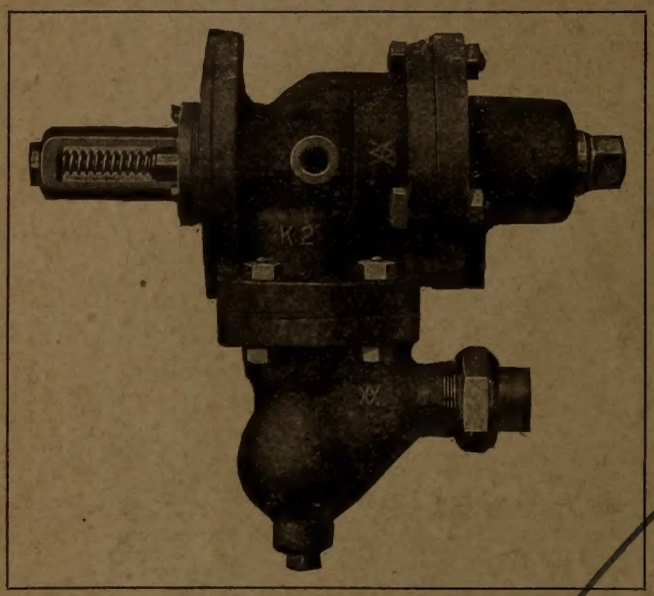
Westinghouse

Type "K" Freight Triple



Long Freight Trains Create New Braking Problems

The Westinghouse Type "K" freight triple solves these problems because, in addition to the functions performed by the ordinary quick-action triple, it provides improvements essential to the satisfactory handling of modern freight traffic.

Quick Service. The present standard quick-action triple valve gives quick serial action of the brakes in emergency application by a local brake-pipe reduction at each triple. The "quick-service" triple accomplishes the same results in ***service application*** as well, insuring a definite braking power on all cars of the longest freight train and in a much shorter period of time than has heretofore been possible.

Retarded Release. The improved freight triple is so constructed that in releasing long freight trains, the brake-cylinder exhaust is ***retarded*** on the first twenty-five or thirty cars back of the engine. This insures simultaneous release of all the brakes and prevents surging, shocks, and the possibility of breaking in two, which might otherwise result.

Uniform Recharge. The uniform recharge feature prevents ***overcharging*** at the head end of the train and consequent ***stuck brakes,*** and unequal braking power in different parts of the train when the brakes are next applied.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Algoma Central and Hudson Bay Ry.—There has been completed a branch, known as the Loon Lake branch, from mileage 23.75, the objective point being the Breitung iron mine at Loon Lake. The branch has a length of 7,600 ft.; there are no bridges, the maximum gradient is 3%, and the maximum curvature 9°. The work was very light, and the branch is in operation. The work was done by the company's own staff.

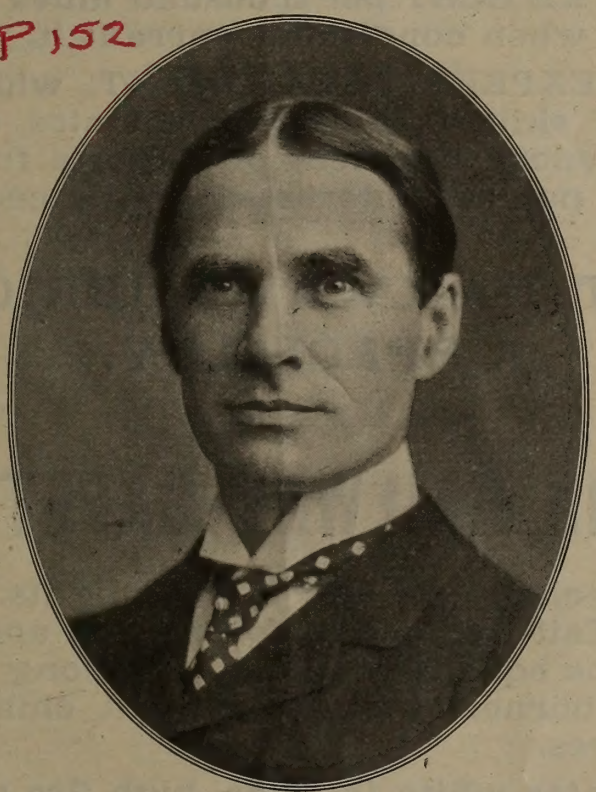
No work was done in the way of extension on the main line during the past year, the question of the further construction from mileage 70 to mileage 173, the proposed junction with the Michipicoten branch, still being undecided. (Aug., 1906, pg. 449.)

The Atlantic, Quebec and Western Ry. Co. is applying at the current session of the Dominion Parliament for an act authorizing it to acquire by private or judicial sale the Atlantic and Lake Superior Ry., and Baie des Chaleurs Ry., between Matapedia and Paspebiac, or any other railway; to purchase the bonds, common stock, judgments and claims affecting the said railways; to alter or deviate the lines, and to construct a line from Paspebiac, Que., to Edmundston, or Grand Falls, N.B., and to connect with the National Transcontinental Ry., or any other railway; to increase its power of issuing bonds or other securities to the extent of $50,000 a mile, and for other purposes. The notice of application is signed by J. X. Lavoie, President of the Canadian Board of Directors, and E. Brassard, Secretary.

Barrie and Orillia Ry.—The Dominion Parliament is being asked at its current session for an act incorporating a company with this title to construct a railway from or near Grenfel or Midhurst, on the C.P.R., to near Barrie; a line from Barrie to Orillia, with branch line to Penetanguishene and Brechin; also from Barrie to Newmarket or Aurora, Ont., with power to construct docks, operate steamers, and make arrangements with other companies. W. A. Boys, Barrie, Ont., is solicitor for the applicants.

Burrard-Westminster Boundary Ry. and Navigation Co.—Application is being made at the current session of the Dominion Parliament for an act incorporating a company with this title for the purpose of constructing railways of any gauge, to be operated by steam, electricity or any other motive power, between the following points: From the north side of False Creek, crossing False Creek by a bridge, southeasterly through Vancouver, Hastings townsite, South Vancouver, Barnby and New Westminster to the Fraser River bridge, thence northeasterly through New Westminster, Coquitlam and Port Moody, westerly to or near the proposed location of the Vancouver, Westminster and Yukon Ry. bridge at the Second Narrows of Burrard Inlet, continuing westerly through Hastings tp. to the place of commencement in Vancouver; from the south end of the proposed V., W. and Y.

P 152



W. B. BULLING,
Assistant Freight Traffic Manager, Eastern Lines, Canadian Pacific Railway.

Ry. bridge at the Second Narrows, across the bridge to North Vancouver, and to the north arm of Burrard Inlet; from the north end of Fraser River bridge, across the bridge (with the consent of the Provincial Government, which will be applied for), thence southerly to the International boundary between Semiamo bay and Sumas; from the south side of False Creek westerly through Vancouver and South Vancouver to Point Grey, thence returning in a southeasterly direction by the most feasible direction to the north end of Fraser River bridge; from Port Moody easterly to Dewdney trunk road, thence following the trunk road through Coquitlam, Maple, Ridge and Mission municipalities to Stave River and the east boundary of Mission municipality. Power is asked for the purpose of constructing branch lines, developing electrical energy, supplying heat, light and power to the public, and for manufacturing purposes; constructing telegraph and telephone lines, carrying on a general navigation business, and making agreements with other companies in connection with any or all of the objects named. Tupper and Griffin, Vancouver, B.C., are solicitors for the promoters.

Central Ontario Ry.—The construction of the line northerly from the present terminus at Bird's Creek to the Ottawa Division of the G.T.R. (the old Canada Atlantic Ry.) is being proceeded with. The contractor is W. G. Gibson, Bancroft, Ont. (Aug., 1906. pg. 451.)

Colchester Coal and Ry. Co.—The officers and directors are: President, S. Winter, Moncton, N.B.; Vice-President, Hon. F. A. Laurence, Truro, N.S.; Secretary-Treasurer, Dr. Jos. Hayes, Parrsboro, N.S.; other directors: B. H. Dodge, Kentville, N.S.; J. Strachan, Halifax, N.S.; L. G. Harris, Canning, N.S.; J. Fleming, Waverley, N.S. The company is constructing a railway from Debert station, N.S., on the Intercolonial Ry., to Debert mines, about four miles, which it is expected to have completed by June 1, 1907. E. S. Matheson is Chief Engineer, and the contractors are A. and W. D. Wheaton. The first two miles of the line is through a level country, but the second two miles is through a rough, heavy timbered district, with considerable rock cutting. The company is developing a 4 ft. seam of coal at the mines, and expects to begin shipping as soon as the line is opened. (Dec., 1906, pg. 711.)

Dominion Atlantic Ry.—A line two miles long is under construction, to be known as the Torbrook Iron Ore branch, extending from Leckie's shaft to Wheelocks. The work is being done by the D. A. Ry. staff.

Duluth, Rainy Lake and Winnipeg Ry.—It is reported that all grading of swamps on the located route between the present track end and the Rainy River, opposite Fort Frances, Ont., has been completed, and that with but a few short stretches the whole of the right of way has been cut out. There are several long strips of land upon which very little work is necessary, and the only heavy work on the line is half a mile of cutting through a granite ledge near Pelican Lake. In a map issued recently by the Canadian Northern Ry. the D., W. and R. L. Ry. is shown as one of its lines under construction. Whether this is the exact situation or not, the line will undoubtedly be operated in connection with the C.N. Ry., as the connecting bridge over the Rainy River is being constructed by a company in which the C.N. Ry. and the Cook

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

STREET RAILWAY LUBRICATION A SPECIALTY.

GALENA RAILWAY SAFETY OIL

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT.

Lumber Co., the original promoters of the Duluth, Virginia and Rainy Lake Ry. are jointly interested. (Dec., 1906, pg. 711.)

Great Northern Ry., U.S.—F. E. Ward, of the G.N.R., on a recent visit to New Westminster, B.C., stated that plans had been prepared for a new station for that city, and that construction would be started as soon as a suitable site could be obtained. Local reports state that the company has purchased land on Front St., for the purpose of building the station. (Dec., 1906, pg. 713.)

Edmonton, Dunvegan and B.C. Ry.—The applicants applying at the current session of the Dominion Parliament for an act incorporating a company with this title to construct a railway from Edmonton, Alta., to Fort George, via Dunvegan and the Parsnip River, are: J. D. MacDonald, Winnipeg; J. A. Sandgreen, Edmonton, Alta.; C. Pringle, Ottawa; D. McLeod, T. G. Gallagher, Spokane, Wash. (Dec., 1906, pg. 713.)

Fort William, Ont.—The Town Council of Fort William, Ont., will apply next session of the Ontario Legislature for an act authorizing it to build one or more bridges over the Kaministikwia, Mission and McKellar Rivers, suitable for railway, highway and all other traffic, with a right to lease any portion to any person or corporation upon such terms as the corporation may see fit; to charge tolls for the use of the same, and to empower the corporation, with the assent of the ratepayers, to issue debentures for the cost thereof payable within 40 years.

Halifax and Southwestern Ry.—A telegram was received by the Premier of Nova Scotia, Dec. 14, stating that the last rail had been laid upon this line at Barrington Passage, N.S. It was expected that the ballasting would be pushed forward, and a train service put in operation early in the year. (Nov., 1906, pg. 641.)

Hamilton and Guelph Junction Ry.—Local reports state that the proposal to construct a line from Hamilton to Guelph Junction, Ont., in the interests of the C.P.R., has been abandoned for the present. (Aug., 1906, pg. 453.)

Hampton and St. Martins Ry.—We are advised by H. E. Foster, St. John, N.B., President, that a survey has been made from the present terminus at St. Martins to Quaco Harbor, N.B. The company's line has recently been sold under foreclosure of mortgage and the purchasers are reorganizing the company.

Intercolonial Ry.—Owing to difficulties in the way of obtaining the necessary structural steel for the new shops at Moncton, N.B., the contractor, E. A. Walberg, has been granted an extension of time for completing the work. The foundations of three of the shops have been completed, the walls of the first shop are up, and the steel columns and roof trusses are well advanced, whilst a good deal of other work has been done. As much work as possible will be done during the winter, and every preparation possible will be made so as to prevent any delay in going on with the work in the spring.

The specification of the group of buildings to be known as the locomotive shops at Moncton, show that the main building will be 408 by 176 ft., with three extensions at right angles with the main building. The first extension is 100 by 375 ft., the second 80 by 375 ft., and the third 75 by 375 ft. The building will include a boiler shop, a smith shop, an engine erecting ship, a boiler erecting shop, a general machine shop and two bolt and brass working extensions and a riveting tower. The different buildings are expected to be completed by Aug. 31. (Dec., 1906, pg. 713.)

A proposal is reported to be under consideration for the development of the water power on the Petitcodiac River at Moncton, N.B., for the purpose of generating electricity for use at the new shops.

The tender of M. E. Keefe, Halifax, N.S., has been accepted for the construction of the new roundhouse at Halifax, N.S. The contract price is $122,373.

International Ry. of New Brunswick.—Track has been laid to mileage 32 from Campbellton, N.B., an additional 11 miles having been laid and completed during 1906. The line between mileage 33 and mileage 38 is practically completed, and engineers are in the field finishing up the surveys as far as St. Leonards. It is expected to have contracts let for the balance of the line, about 70 miles, early in the spring. T. Malcolm, Campbellton, N.B., is the general contractor. (Aug., 1906, pg. 453.)

The Klondike Mines Ry. has been completed from Dawson to the Dome, 25 miles, and a train service has been placed in operation. It is expected to proceed during the coming season with the extension of the line to the Stewart River district, a further distance of 50 miles. (Dec., 1906, pg. 713.)

Manitoulin and South Shore Ry.—No new construction was done during 1906. The proposal to construct a line from Gertrude, mileage 15, to Little Current, Ont., 66 miles, is still under consideration. (Aug., 1906, pg. 455.)

Malone and Hopkins Point Ry.—W. F. Wenwright, Malone, N.Y.; J. Taillon, Dundee, Que.; D'Arcy Scott, W. H. Curle, Ottawa, Ont., are applying at the current session of the Dominion Legislature for an act incorporating a company with this title, for the purpose of constructing a railway from Dundee, on the International boundary, to Hopkins Point, Huntingdon, County, Que.

Matane and Gaspe Ry.—The plans for the first section of the line have been prepared and have been deposited with the Department of Railways. The length of the section is 32 miles, and extends from Matane, Que., easterly. The estimated quantities, etc., for this section shows: fencing, 32 miles; clearing, 150 acres; close cutting and grubbing, 13 acres; telegraph line, 32 miles; earth and rock work, 430,142 cubic yards; six bridges; 17 culverts; 2,049 lineal ft. culvert pipe; 14 crossings of public roads and 259 farm crossings; 83,840 ties; 80,000 cubic yards of ballast, with rails and fastenings. Five station buildings and two points of water supply will be provided. Following are the directors for the current year elected at the annual meeting held at St. Flavie, Dec. 10: Dr. J. A. Ross, M.P.; Senator Choquette, R. G. F. Dubord, J. F. Begin, A. Fortin, L. J. Le Vasseur, C. A. Gauvreau, M.P.; Dr. Caron, M.L.A.; Rev. A. A. Soucy. A meeting of directors was called for Dec. 14, for the purpose of considering a contract for the construction of the first section of the line from St. Flavie to Matane, Que. (Oct., 1906, pg. 583.)

Midland Ry. of Manitoba.—The last rail upon the line from the International boundary into Portage la Prairie, Man., was laid in that town Nov. 29. A temporary station is being constructed by Kenrick & Co., St. Paul, Minn. (Dec., 1906, pg. 713.)

Midway and Vernon Ry.—We have been advised that while there have been some negotiations with the Canadian White Co. respecting a contract for the construction of this line, the matter has not reached the stage when anything definite can be said. (Dec., 1906, pg. 713.)

Milton and Liverpool Ry.—Tenders are under consideration for grading the new work and relaying and ballasting the track for the whole line from Liverpool, N.S., to the pulp mills, a distance of about five miles. R. Gardner is Secretary of the company, and the tenders were received at the office of the Provincial Engineer, Halifax, N.S.

Minnesota and International Ry.—Surveys are reported to have been completed for the extension of this line, which is controlled by the Northern Pacific Ry., from the present terminus at Ripple, Minn., to International Falls on the Rainy River. It is also reported that a contract for the grading has been let, and that the contractor reports that construction will be easy. The M. and I. Ry. starts at Brainerd and runs northwesterly to Bemidji, thence northeasterly to Northome, from whence the extension to Ripple was completed in 1906 under the charter of the Big Fork and Northern Ry.

Napierville Junction Ry.—Tracklaying has been completed upon the line from the International boundary at Lacolle to St. Constant, Que., on the C.P.R. The line passes through Napierville and St. Edouard, and is 27 miles long. The Pacific Construction Co., Ottawa, had the general contract, and A. H. N. Bruce was Chief Engineer. (See Delaware and Hudson Rd., Nov., 1906, pg. 639.)

New Brunswick Coal and Ry. Co.—The work of ballasting the track and making all safe for the winter traffic has been completed by Manager Hunter, under the direction of the Commissioners appointed by the New Brunswick Legislature to repair and operate the line. The work of improvements will be resumed early in the spring. (Dec., 1906, pg. 713.)

Newfoundland-Canada Tunnel.—A Montreal despatch states that a charter has been secured to construct a 10-mile tunnel under the Strait of Belle Isle, to connect Canada and Newfoundland. The franchise allows 20 years for the construction of the tunnel and the connecting railways, and it is provided that the Government of Newfoundland will contribute $75,000 a year towards the cost of the tunnel. The franchise to which the despatch refers is probably a provisional contract with the Newfoundland Government, as the colonial Legislature has not had any such contract submitted to it for approval. There is no charter for such a work on the Canadian side, but persons interested in the Quebec and Lake St. John Ry. have been discussing the possibilities of constructing such a tunnel. (Nov., 1906, pg. 639.)

New York-Canadian Pacific Ry.—A company having its offices at Albany, N.Y., has been incorporated with this title for the purpose of constructing a railway from New York City to Schenectady, and thence to Ogdensburg, N.Y., on the St. Lawrence River, opposite Prescott, Ont., a distance of about 330 miles. Following are the officers and directors: President, V. Colvin, Albany, N.Y.; Treasurer, G. C. VanTuyl, jr., Albany, N.Y; other directors: W. H. Brown, Albany, N.Y.; J. McEnroe, Schenectady, N.Y.; P. H. Flagler, Clarksville, N.Y.; E. A. Jones, Jas. Francis, L. E. Carman, New York City; K. K. McLaren, Jersey City, N.J.; Secretary and Assistant Treasurer, M. Blake, Albany, N.Y.

Niagara Frontier Bridge Co.—The Dominion Parliament is being asked at its current session for an act incorporating a company with this title to construct a railway and highway bridge over the Niagara River from either Stamford or Niagara township or at the boundary line between the two townships, to a point between the south line of lot 32 and the north line of lot 24 of the New York State Mile reservation. Power is asked to collect tolls for the use of the bridge. The applicants are: J. P. Murray, A. E. Osler, Toronto; W. E.

The Locomotive and Machine Company of Montreal, Limited

LONDON OFFICE:
Alfred Davis, 26 Victoria Street,
Westminster, S.W.

Phin, Welland, Ont.; F. A. Hilton, Buffalo, N.Y.; W. C. Burlson, E. H. Taylor, and B. Van Horne, Niagara Falls, N.Y.

The Northern Coal and Coke Co. has been incorporated under the Dominion Companies' Acts, with a capital of $1,000,000 and offices at Winnipeg, to carry on the business of coal mining, the manufacture and sale of patent fuel, lumber, etc.; to develop water powers and sell electric power; to construct irrigation works; to construct and operate electric and steam railways and tramways, etc. The provisional directors are: J. S. Hough, A. C. Ferguson, C. Williams, E. B. Lindsay, and W. G. Graham, Winnipeg, but they are merely nominal. The same persons are also provisional directors of the Western Canada Development Co., the incorporation of which has also been announced under the Dominion Companies' Act. This company has an authorized capital of $2,000,000 and its object is to search for coal, natural gas, and other minerals; to develop anv discoveries, and generally to develop the resources of the country.

Orford Mountain Ry.—Track has been laid on the extension from Potton Springs to Maisonville, Que., 7 miles, but the extension has not been placed in operation. It is proposed to extend the line from Maisonville, Que., to North Troy, at the International boundary, 4 miles. (Nov., 1906, pg. 641.)

Owen Sound Bridge and Terminal Co.—The Dominion Parliament is being asked at the current session for an act incorporating a company with this title for the purpose or constructing a bridge for pedestrian and general traffic; to lay tracks on the bridge and provide terminals; to construct a railway from the east side of Owen Sound, Ont., across the bridge to a connection with the C.P.R., the G.T.R., and the Huron and Ontario Ry., or any of them, or with any other railway authorized to construct a railway in or near Owen Sound, with power to construct branch lines not to exceed six miles in length in any one case. The company also desires to have power to own and operate steam and other vessels, on Owen Sound Bay, Georgian Bay and the Great Lakes; to enter into agreements with other similar companies. T. H. Kilgour, Toronto, who is the principal mover in the Huron and Ontario Ry., is also interested in this undertaking.

A supplemental notice states that it shall be declared in the act that the rates of tolls which shall be asked and the extent of the privileges shall be fixed by the Board of Railway Commissioners; that the height of the arches and the intervals between the abutments or piers for the passage of rafts and vessels shall be subject to the approval of the Governor-in-Council, before the erection of the bridge shall be proceeded with.

Portland Canal-Fear River Valley.—Application will be made next session of the British Columbia Legislature for an act incorporating a company for the purpose of constructing a railway to be operated by steam or any other motive power from the head of Portland Canal along the valley of the Fear River for 30 miles. It is also desired to secure authority to construct branches of 15 miles from the main line, particularly up Glacier, American and Bitter Creeks; to operate telegraph and telephone lines, to develop electrical power and sell the same, to have power to enter into agreements with other companies, to construct docks and wharves and to operate steam and other vessels. Eberts and Taylor, Victoria, B.C., are solicitors for the applicants.

Prince Edward Island Tunnel.—Replying to a question in the House of Commons, Dec. 11, the Minister of Railways stated that a resolution passed by the Maritime Board of Trade in favor of the construction of a tunnel under the Northumberland Strait as a means of maintaining continuous communication between P.E.I. and mainland, was receiving the attention of the Government.

Quebec Bridge and Ry. Co.—Construction work upon the steel work of the Quebec Bridge has been suspended for the season, and the bridge building company is employing its men getting material ready for next season's operations. It is expected to commence the erection of the steel work upon the north side of the river in May. (Dec., 1906, pg. 713.)

Quebec and Isle of Orleans Ry.—The Quebec Legislature will be asked next session for an act incorporating a company with this title for the purpose of constructing a railway from Quebec, crossing over to the Island of Orleans, which it may cross or run around to reach the parish of St. Francois. P. Corriveau, Quebec, is solicitor for the applicants.

Quebec and James Bay Ry.—J. G. Scott, General Manager Quebec and Lake St. John Ry., who is the principal promoter of the Q. and J. B. Ry., in writing to the Quebec Board of Trade, Nov. 28, stated that arrangements had been made in London, Eng., for the necessary capital to construct the first 30 miles from Roberval towards James Bay. It was also probable that the money required for the construction of the line to Chibugamoo would be forthcoming upon condition of a guarantee of interest at 4% by the Provincial Government upon a portion of the cost. At the present time he said the Government did not see its way to give the guarantee asked for. The Board passed a resolution urging the Government to give the guarantee, as the construction of such a railway would bring a large amount of trade into the city of Quebec. (Dec., 1906, pg. 713.)

Quebec and Lake St. John Ry.—Track has been laid on the La Tuque branch as far as the 30th mile from La Tuque Junction, Que., and work is in progress upon the remaining 10 miles of the branch, which will end at La Tuque Falls. Track was laid on 16.75 miles of the branch during 1906. J. Paquet is the contractor. The Gosford branch was extended 1.75 miles during 1906, and now ends at 5.50 miles from Valcartier station. E. Conway, Quebec, is the contractor. The branch from Roberval station to the Government wharf on Lake St. John, one mile, has been completed. (Dec., 1906, pg. 715.)

Quebec Central Ry.—Track has been laid on the extension from Beauceville to St. George, Que., 9 miles. It is proposed to extend this line at a future date to a junction with the Temiscouata Ry., near Cabana station, Que., about 150 miles. The other extension which the company has in contemplation is from Scotts to the southern end of Quebec Bridge, 9.23 miles. (Dec., 1906, pg. 713.)

Quebec, Montreal and Southern Ry.—The work of betterment which has been carried out upon the old Quebec Southern Ry. and South Shore Ry., since they passed under the control of the Delaware and Hudson Co., and were amalgamated with the above title, has included the laying of 32 miles of track with 80-lb. steel, to replace the old 56-lb. rails. Other work of a similar character will be undertaken during 1907. A contract has been let to O'Brien and Mullarkey, Montreal, for the construction of an extension from Pierreville to the Lotbiniere and Megantic Ry. between St. Philemon and St. Jean des Chaillons, 48½ miles; and it is proposed to extend this to the south end of Quebec Bridge, 42 miles; and two miles of terminal tracks in connection with the lines, etc., of the Quebec Bridge and Ry. Co.

The Dominion Parliament is being asked at its current session for an act increasing the powers of the company, and authorizing it to construct a line from Contrecœur to Yamaska, Que. (Dec., 1906, pg. 715.)

Quebec Terminals.—D. McNicoll, Vice-President C.P.R., attended a meeting of the committee which is considering plans for joint terminals for all lines in Quebec City, and suggested that a Union station should be erected on Champlain market; and that Dalhousie and St. Andrew streets be widened so as to permit the laying of four tracks thereon. The engineers were asked to prepare plans and estimates showing the cost of carrying out these suggestions. The sub-committees appointed at the last meeting of the general committee presented reports upon the plans, and the general committee adopted the same, sending them on for further consideration to the National Transcontinental Ry. Commission. The railway sub-committee recommended the Champlain market as a tite for a passenger and freight station for the present, and at the same time contemplating the building of a union passenger station on the heights. The formation of a terminal company was also recommended, involving the bridge and terminals. The steamship sub-committee recommended the 55-ft. line, instead of 40 ft., from Lampson's Cove to the north end of Champlain market square, and that provision be made to wharf the portion between Champlain market and Pointe-a-Carcey for the local market and coasting trade. (Dec., 1906, pg. 715.)

The chairman of the National Transcontinental Ry. Commission, and H. Lumsden, Chief Engineer, were in Quebec, Dec. 14, in connection with the terminal proposals. They visited the river front and had a lengthened conference with a number of those interested in the projected new station.

Quebec Ry. Ferry Co.—Application is being made at the current session for an act incorporating a company with this title and offices at Montreal, for the purpose of operating railway ferries across the St. Lawrence River at any point between Kingston, Ont., and Quebec, Que. The provisional directors named in the bill are: C. Laurandeau, K.C.; E. N. Cusson, L. Garneau, J. F. R. Beaudry and V. Cusson, Montreal.

Quinze and Blanche River Ry.—The Dominion Parliament is being asked at the current session for an act incorporating a company with this title to construct a railway from Dymond tp., on the Temiskaming and Northern Ontario Ry., to or near the mouth of the Quinze River, thence to Quinze Lake, Que. It is also desired to have authority to operate steam and other vessels, to acquire water powers, to develop electrical power and to dispose of the same; and to make agreements with other companies. Perkins, Fraser and Gibson, Ottawa, are solicitors for the applicants.

Red Deer Lumber Co.—A line 5 miles in length from Elk Gate Junction on the Canadian Northern Ry. northerly to Barrows, Sask., has been completed. The line is a private one and is for the company's lumbering operations only.

St. Mary's and Western Ontario Ry.—Application is being made at the current session of the Dominion Parliament for an act extending the time for the construction of this railway. (Dec., 1906, pg. 715.)

St. Maurice Valley Ry.—Tracklaying has been completed upon this line from Three Rivers, along the valley of the St. Maurice River to Shawinigan Falls, Que., 20.85 miles. L. A. Darcy was Chief Engineer in charge of construction, and the St. Maurice Construction Co., Montreal, had the contract. (Nov., 1906, pg. 641.)

Application is being made at the current session of the Dominion Parliament for an

CANADA FOUNDRY COMPANY, LIMITED

Head Office and Works: TORONTO, ONT.

District Offices: MONTREAL HALIFAX OTTAWA WINNIPEG VANCOUVER ROSSLAND

act extending the power of the company and to increase its bonding powers to an extent not exceeding $35,000 a mile.

Saskatchewan Valley and Hudson Bay Ry.—The Dominion Parliament is being asked at its current session for an act incorporating a company with this title for the purpose of constructing a railway from Edmonton, Alta., via Smoky Lake, Prince Albert, and Pelican Lake to Fort Churchill, Hudson Bay. The provisional directors are: T. W. Rourke, J. Morris, R. Tegler, J. T. Collisson, Edmonton, Alta.; F. J. Loughead, Sarnia, Ont. (Nov., 1906, pg. 641.)

Temiskaming and Northern Ontario Ry.—Track has been laid to McDougall's Chute, the mileage laid during 1906 being from Boston, Ont., 45 miles to the south. Construction is proceeding northerly from McDougall's Chute for seven miles, the contractor being A. R. Macdonnell, New Liskeard, Ont.; and surveys are in progress from the terminus of this seven miles, the end of the present contract, for a further distance of 45 miles, to a junction with the route of the National Transcontinental Ry. There are under construction a branch line from Englehart to Charlton, eight miles, A. B. Spencer, Niagara Falls, Ont., contractor; from Cobalt to Kerr Lake, four miles, Canadian Construction Co., Montreal, contractors; from Haileybury station to Haileybury wharf, one mile, McQuigge and Hunt, Pembroke, Ont., contractors.

A contract has been let to J. Cahill, Bonfield, Ont., for 275,000 ties for the completion of the main line northerly, and for the branch lines now under contract. (Dec., 1906, pg. 715.)

Toronto, Hamilton and Buffalo Ry.—The question of erecting a station at Dundas, Ont., is under the consideration of the management. An order has been approved by the Hamilton, Ont., City Council for the purpose of permitting the construction of a spur line from the T. H. and B. Ry. tracks to the Canadian Westinghouse Co.'s works. (May., 1906, pg. 257.)

Toronto Track Elevation.—The Toronto City Engineer proposes the construction of a viaduct six miles long over which all trains shall enter the new Union station, Toronto. The tracks would be given an elevation of 14 or 15 ft. above the present level, and would do away with the necessity of the erection and maintenance of a number of bridges and level crossings. The cost of the work is estimated at $5,000,000. It is proposed that the railway companies be asked to appoint engineers to go into the whole question of railway approaches to the city between the Humber River on the west, and Logan avenue on the east.

Toronto Union Station.—The G.T.R., to which company was given the order to carry out the construction of the new Union station in Toronto, has informed the city council that the delay in proceeding with the work is due in some measure to the fact that there is a difference between the three companies—the G.T.R., the C.P.R. and the Canadian Northern Ontario Ry.—as to the plans. The latter two companies do not approve of the plans as approved by the G.T.R., and negotiations are in progress for the adjustment of the differences. At a meeting of the Toronto Board of Control, Dec. 7, a resolution was passed to notify the railways to proceed with the erection of the new union station without delay, and that in the event of nothing being done to comply with the request, to apply to the courts to have the order of the Board of Railway Commissioners to the G.T.R. made mandatory. (Aug., 1906, pg. 457.)

Vancouver, Victoria and Eastern Ry.—The contract which has been let to the British Columbia General Contract Co., Vancouver, B.C., is for the construction of 30 miles of line between Cloverdale, on the Vancouver, Westminster and Yukon Ry., easterly via Abbotsford, B.C., to Sumas, a station at the International Boundary, on the line of the Northern Pacific Ry. The work generally is of a heavy character, averaging about 40,000 cubic yards a mile; the bridging is heavy, and totals about 3,750,000 ft. The line will open up a considerable stretch of country in British Columbia, which is now only accessible by the old Yale road. (Dec., 1906, pg. 715.)

Vancouver, Westminster and Yukon Ry.—A branch line is under construction from the south side of False Creek to Burrard Inlet, passing round the end of False Creek. The construction is easy, the only feature of interest being that it includes 1,750 lineal feet of pile trestle. The contractors are the British Columbia General Contract Co., Vancouver, B.C. Press reports state that bids will be asked at an early date for the construction of 40 miles northerly from Vancouver. (Dec., 1906, pg. 717.)

Washington County Ry.—We are advised that during 1906, a diversion of the line, which is owned and operated as the Princeton branch of the Washington County Ry., was made near Sprague's Falls, N.B., which resulted in the addition of 0.35 miles to the length of the track between Banning and Crichton. (Aug., 1906, pg. 457.)

Yonge St. Bridge, Toronto.—Toronto taxpayers are being asked to vote on Jan. 1, upon a by-law for the purpose of borrowing $110,939 upon debentures for the erection of a bridge across the railway tracks at the foot of Yonge st. The by-law is being submitted to carry out the terms of an agreement by which the railway companies undertook to pay $100,000 for the cost of the erection of the bridge, and the city agreed to provide the money to meet land damages, etc., estimated at $100,000. The question of the future maintenance of the bridge is to be decided by the Board of Railway Commissioners. (Aug., 1906, pg. 457.)

York and Carleton Ry.—Track has been laid on the extension from Stanley to Glippen Glen, 3½ miles, and an extension of one mile to Ryan's Brook is under contract. (Nov., 1906, pg. 641.)

Railway Curve Tables is the title of a small volume issued by the Engineering News Publishing Co., 2220 Broadway, New York, at $1 cloth and $1.50 leather. It contains a comprehensive table of functions of a one degree curve, with correction quantities giving exact values for any degree of curve, together with various other tables and formulas, including radii, natural sines, cosines, tangents, co-tangents, etc. There is also added a method of finding any function of a curve of any degree or radius without a field book. The volume is compiled by R. S. Henderson.

The New York branch of the Canadian Camp Club has arranged with the C.P.R. to organize a wolf hunt early in the year. The point of departure will probably be on the Mississaga River, Ont., and should the affair prove a success, a similar hunt will be organized for Northern Quebec. L. O. Armstrong is looking after the arrangements for the C.P.R.

The G.T.R. was the defendant in an action brought in the Ontario courts and disposed of at London, recently, by Griffiths & Co., of Chicago, Ill., to recover $7,200 for rental, etc., of 32 dump cars. The cars were rented in 1903 at $8 a day, and the plaintiffs requested the return of the cars in 1905. The G.T.R. did not return the cars, and in the judgment it is now ordered to pay $200 for each car, to settle up all arrearages of rental amounting to $800, making altogether $7,200, and to pay the costs of the action.

Sir Thomas Shaughnessy's Car.

The C.P.R. has turned out of its Angus shops, at Montreal, for the use of the President, Sir Thos. Shaughnessy, a private car, the Killarney, which, if the opinion of those who are qualified to judge be accepted, is the most commodious and most convenient one that has ever been built on this continent. It might, indeed, be described as the finest car, but this expression conveys with it the idea of elaborate and unnecessary decoration, which is, unfortunately, so often noticeable in cars of this character. The most casual observer, on seeing the interior of the Killarney, is at once struck by the entire absence of ornamentation and the studied plainness of the finish It is a noticeable case of "beauty unadorned," for the beauty of the natural woods which have been used in its decoration is unmarred by the carver's chisel or the gilder's brush. The exterior of the car is finished entirely in mahogany, C.P.R. standard ornamentation being used. The car is a very long one, being 74 ft. over the frame, and 84 ft. 3¼ ins. over the buffers.

At the rear, or observation end, is a large observation platform, recessed into the body of the car for 2 ft., which provides shelter from the wind to those who may be standing on the platform. The platform is surrounded by a heavy railing slightly relieved by polished brass ornamentation. Next to this platform is the observation room, 14 ft. by 9 ft. 8 ins. The walls of this room are finished in selected Circassian walnut, the architectural features being very plain in design, but the room, owing to the beauty of the wood, has an extremely rich appearance. The empire ceiling is finished in stained birch to suit the lighter tones of the walnut. The decklights are in art glass to harmonize with the woods and appointments. The observation windows are unusually large, those at the rear being 5 ft. by 2 ft. 3 ins., and those at the sides 5 ft. by 2½ ft., giving a practically unobstructed view of the scenery. One of the features of this room is an ingenious spring roller map-rack, which is placed in the upper part of the bulkhead and runs transversely. By the release of a lever, the map-rack moves out from the bulkhead so that any one of the maps may be pulled down for examination. When no longer required, by pressure on the same lever, the map-rack moves back into the bulkhead and forms part of the design. Unless known to the onlooker, it is practically impossible to detect its location. The furniture of this room consists of two heavy wire-backed arm chairs, and two sofas which at night may be turned into beds (all of which are upholstered in dark green leather). There is, also, a small writing table and chair at the forward end of the room, both of which are of walnut. The carpet is a heavy Wilton of a rich green shade with a small artistic design.

A handsome corridor, panelled in rich mahogany veneer, furnishes communication from the observation room to the dining room at the opposite end of the car, and to the intervening rooms. One novel feature of this corridor is that it is roofed over flat, the space between the roof of the corridor and the ordinary roof of the car being used for lockers, which are reached from the various rooms. This arrangement adds greatly to the storage accommodation of the car, a feature which appeals to all those who have occasion to use private cars. It also adds much to the appearance of the passage itself. A general lavatory comes next to the observation room. This is finished in ivory white with mosaic tiled floor, the appointments being in white porcelain with nickel-plated fittings. Next to the lavatory is a small room for heavy coats and small hand-baggage.

Next to this comes the President's bedroom, 8 ft. 6 ins. by 6 ft. 9 ins., the woodwork of which is finished in ivory white, the walls

MARION STEAM SHOVLES

for Railroads, Contractors, Mines, etc.

All capacities. Shovels furnished to suit special requirements.

NOTICE

We are pleased to state that the **Oliver Iron Mining Co.,** after extensive tests of all different kinds of steam shovels, have recently placed an order for

23 Model 91—Marion Steam Shovels, 5 yd. dipper capacity.
6 Model 60—Marion Steam Shovels, 2½ yd. dipper capacity.

which shows conclusively that the MARION SHOVEL is the most desirable machine for the hardest class of digging, not excluding iron ore.

BALLAST UNLOADERS AND PLOWS, WRECKING AND LOCOMOTIVE CRANES

Successors late Jas. Cooper **F. H. HOPKINS & CO.** MONTREAL

HOTEL TRAYMORE

ATLANTIC CITY, NEW JERSEY

OPEN ALL THE YEAR

To the original hotel has been added a ten-story fireproof addition, equipped throughout with the most improved sanitary plumbing, steam heating and electric lighting. The sleeping rooms are spacious, light and airy, private bath with hot and cold fresh and salt water connecting each. The building is modern in every respect, each room affording an unobstructed view of the ocean, and the furnishings will be unsurpassed in the point of richness and comfort. Capacity, 600.

D. S. WHITE
PRESIDENT

Traymore Hotel Company
CHAS. O. MARQUETTE - MANAGER

being panelled in red silk, the curtains on the windows being of silk to match the panels. The room contains a plain brass bedstead, at the head of which is a small table with drawers, the upper drawer being slightly recessed to admit an electric light switch and bell, so that the occupant of the room may summon an attendant or turn on the light without leaving his bed. On the opposite side of the room is a wardrobe and a dressing-table with drawers underneath. The carpet is a heavy Wilton of a shade harmonizing with the curtains and panels. Opening off this bedroom is a bathroom, which also communicates with the passage and the next bedroom. This room has all the fixtures of an ordinary bathroom, porcelain bath and washstand with nickel-plated fittings, the floor being covered with small mosaic blocks, whilst the walls, from the floor to the cornice are covered with white enamelled tiles, and all exposed woodwork finished in ivory white. Passing through this room another bedroom is reached, finished practically the same as the one described, except that the panels, curtains and carpet are of blue.

The next room to be reached is the Secretary's office and bedroom. This is intended for the President's secretary, but it can also be used as an additional stateroom if required. It is very complete in every detail, having a sofa which at night can be turned into two berths, an upper and a lower, porcelain washing conveniences, cupboards overhead both at the front and rear ends of the room, and a very handsome desk, having a book-case above, the doors of which are fitted with leaded glass windows, whilst underneath are drawers such as one finds in every office desk. The finish of this room is entirely mahogany. The porter's room is immediately next to this, but the section of the car just described is divided from the remainder by a swinging door in the passage to prevent draughts. This room contains two berths, folding washstand and water closet, and is plainly finished in mahogany and green leather. All the rooms are amply supplied with basket racks, coat hooks, etc., of a finish to match the rooms. The kitchen is then reached. This is where the skill of the car builder is taxed to the utmost, for within the smallest possible space must be placed all the essentials of an hotel kitchen, as meals equal to those served in the best hotels have to be cooked here. This room has also to serve the purpose of a pantry, and within such a limited space to find room for the accommodation of kitchen utensils, silverware, china and glassware, seems like attempting the impossible, but in this car it has been accomplished in a manner to satisfy the most exacting. Cupboards for the silver, glass and chinaware, drawers for the knives and forks, etc., refrigerator, working table and sink, a steel range of the latest design and a coal bin complete the fitting of this room. The walls of the kitchen are, for the sake of cleanliness, finished in white enamel tiling, whilst the woodwork is of mahogany veneer. Next comes the dining-room, 12 ft. 8 ins. by 10 ft., finished in very beautiful mahogany veneer and decorated with a very simple marquetry design. The mahogany dining-table will seat eight people comfortably, and ten if necessary. The upholstering of the sofa and chairs is of dark green leather, and the floor is covered with a heavy Wilton carpet of a rich green color.

The car is lighted with electricity, but there is also, in case of failure of the electric light, the C.P.R. standard system of acetylene gas, the fixtures, however, being so arranged that the gas can only be turned on by a special key in the hands of the porter, so as to prevent the gas from being unnecessarily wasted, and to prevent the possibility of a thoughtless guest leaving the burner turned on. From the foregoing description it will be seen that the terms "commodious" and "comfortable" are very apt, and while the car is extremely handsome, the marked absence of anything which may be termed "luxurious" is most noticeable.

OBSERVATION ROOM SIR THOMAS G. SHAUGHNESSY'S CAR KILLARNEY.

DINING ROOM SIR THOMAS G. SHAUGHNESSY'S CAR KILLARNEY.

Orders by the Railway Commissioners.

1902. Nov. 6.—Authorizing revision of location Pheasant Hills Branch, C.P.R., from mileage 379.3 to mileage 381.1.

1903. Nov. 6.—Authorizing G.T.R. to enter upon lot 30, 2nd con., Tp. Brantford, Ont., for purpose of constructing drain to convey water accumulating on its railway.

1904 to 1915, inclusive.—Bell Telephone Co. crossings.

1916. Nov. 7.—Authorizing Nicola, Kamloops and Similkameen Coal and Ry. Co. to open for traffic its railway from Spence's Bridge to Coutlee, B.C., 37.8 miles.

1917 to 1931, inclusive.—North American Telegraph Co. crossings.

1932. Oct. 23.—Authorizing G.T.R. to connect its tracks with the Montreal Park and Island Ry. tracks in St. Laurent, Que.

1933. Nov. 9.—Approving of proposed foot bridge across G.T.R. main line at Emerald St., Hamilton, Ont.

1934. Nov. 9.—Authorizing C.P.R. to reconstruct bridge at mileage 139.98, Fort William section, Ont.

1935. Nov. 9.—Authorizing C.P.R. to reconstruct certain bridges on Smith's Falls section, Ont.

1936. Nov. 9.—Authorizing C.P.R. to reconstruct bridge at Norman, Ont., by means of 60 ft. overhead highway span.

1937. Nov. 9.—Authorizing C.P.R. to reconstruct bridges 0.5 and 0.9, Montreal Terminals.

1938. Nov. 9.—Authorizing James Bay Ry. to construct four bridges over outlets of Lake Couchiching,

1939. Nov. 10.—Approving location of Niagara, St. Catharines and Toronto Ry. from ferry docks, Fort Erie, Ont., through Tps. of Bertie, Willoughby and Stamford, to Lundy's Lane, Ont.

1940. Nov. 10.—Approving location of proposed passenger station C.P.R., Sudbury, Ont.

1941. Nov. 10.—Approving deviation of located line of C.P.R. through Sudbury, Ont.

1942. Nov. 10.—Extending time for installation of interlocking plant by Midland Ry. Co. of Manitoba, at crossing of C.P.R. tracks at Elm Creek, Man., for two months.

1943. Nov. 10.—Authorizing H. A. K. Drury, of the Board's staff, to make inquiry and report to Board regarding lack of cars for carriage of grain over the C.P.R. in Manitoba and Saskatchewan. See Dec., 1906, pg. 711.

1953. Nov. 10.—Authorizing the Canadian Northern Ontario Ry. to operate trains over the crossing of the Canada Atlantic Ry. at Parry Sound junction.

1954. Nov. 12.—Authorizing Peterboro Light and Power Co. to lay a gas main under G.T.R. tracks at Simcoe St., Peterboro, Ont.

1955. Nov. 12.—Authorizing Provincial Natural Gas and Fuel Co. to lay a gas pipe under G.T.R. tracks on Victoria Ave., near city limit of Niagara Falls, Ont.

1956. Nov. 12.—Authorizing Dominion Natural Gas Co., to lay a gas pipe under G.T.R. tracks at Chapman St., Galt, Ont.

1957. Nov. 10.—Authorizing Empire Limestone Co. to lay a gas pipe or main under G.T.R. tracks near Sherks, Ont.

1958. Nov. 13.—Sanctioning and approving of junction of Northern Extension Ry. with Northern Pacific and Manitoba Ry. Portage Extension (C.N.R. lessees), near Winnipeg.

1959. Nov. 13.—Authorizing the town of St. Stephen, N.B., to lay a pipe line under C.P.R. tracks at Valley Road crossing.

1971. Nov. 10.—Authorizing the C.P.R. to construct a bridge at mileage 64.8 of Shuswap section, B.C.

1972. Nov. 10.—Authorizing the C.P.R. to construct a bridge at mileage 37.3, Megantic section.

1973. Nov. 10.—Authorizing the C.P.R. to construct bridges at mileage 21.5, 80.7 and 74.0, Smith's Falls section, Ont.

1974. Nov. 10.—Authorizing the C.P.R. to construct a bridge at mileage 102.9, Edmonton branch, Alta.

1975. Nov. 15.—Sanctioning the Huron and Ontario Ry. Co.'s located line from Meaford to near Owen Sound, Ont.

1976. Nov. 12.—Approving proposed supplement 8 to Canadian Freight Classification 12.

1977. Oct. 29.—Amending (on application of the C.P.R.) order dated Sept. 13, 1905, authorizing the Canadian Northern Ry. to cross at rail level the C.P.R. tracks at Findley, Man.

SIR THOMAS G. SHAUGHNESSY'S PRIVATE CAR KILLARNEY.

1944. Nov. 12.—Authorizing the Commissioners of the Transcontinental Ry. to join its tracks with the Canadian Northern Quebec Ry. near Tawachiche station, Que.

1945. Nov. 12.—Authorizing the Commissioners of the Transcontinental Ry. to cross with its tracks the Canadian Northern Quebec Ry. near Tawachiche station, Que.

1946. Nov. 8.—Authorizing the Bell Telephone Co. to charge telephone tolls at present authorized, for three months from Nov. 13.

1947. Nov. 9.—Complaint Kaslo Board of Trade against freight rates on C.P.R. and Nelson and Fort Sheppard Rys. Adjusting freight rates. See Dec., 1906, pg. 711.

1948. Nov. 10.—Authorizing Canadian Northern Ontario Ry. to operate trains over crossing of the G.T.R. Sutton Branch, lot 21, con. 8, Tp. E. Gwillimbury, Ont.

1949. Nov. 10.—Authorizing Canadian Northern Ontario Ry. to operate trains upon crossing of the C.P.R., lot 3, con, 4, Tp. York, Ont.

1950. Nov. 10.—Authorizing Canadian Northern Ontario Ry. to operate trains upon crossing of C.P.R., lot 13, con. 2, from the bay, Tp. York, Ont.

1951. Nov. 10.—Authorizing the Canadian Northern Ontario Ry. to operate trains over crossing G.T.R. Midland branch, from Beaverton station to wharf on Lake Simcoe.

1952. Nov. 10.—Authorizing Canadian Northern Ontario Ry. to operate trains over crossing, G.T.R. Northern Division, on lot 13, con. C, Tp. Mara, Ont.

1960. Nov. 13.—Allowing to the North American Telegraph Co. an extension of two months' time for filing tariffs of telephone tolls.

1961. Nov. 12.—Authorizing the Corporation of Port Elgin, Ont., to carry a water main under G.T.R. tracks on Mill St., Port Elgin, Ont.

1962. Oct. 25.—Authorizing the Windsor and Tecumseh Electric Ry. to erect a trolley wire across G.T.R. right-of-way at Walkerville, Ont., and across two G.T.R. spurs in township of Sandwich East.

1963. Nov. 14.—Authorizing the opening for traffic of the Klondike Mines Ry. from Bonanza to Sulphur Springs, Yukon.

1964. Nov. 10.—Authorizing the C.P.R. to construct a bridge at mileage 63.3, St. Ignace section.

1965. Nov. 10.—Authorizing the C.P.R. to construct a bridge at mileage 4.2, Guelph section, Ont.

1966. Nov. 10.—Authorizing the C.P.R. to construct bridges at mileage 51.9 and 53.1, Laggan section, B.C.

1967. Nov. 10.—Authorizing the C.P.R. to construct bridges at mileage 68.61, 88.73, 30.44, 84.4 and 31.98, Fort William section.

1968. Nov. 10.—Authorizing the C.P.R. to construct bridges at mileage 114.3, 113.8, and 139.7, Mountain section, B.C.

1969. Nov. 10.—Authorizing the C.P.R. to construct a bridge at mileage 10.8, Port Burwell branch, Ont.

1970. Nov. 10.—Authorizing the C.P.R. to construct bridges at mileage 11.8, 111.5, 28.4, 22.2, 28.6 and 103.9, London section, Ont.

1978. Nov. 16.—Permitting the Ontario Power Co. to erect its wires over the G.T.R., the Wabash Rd., the M.C. Rd., the Canada Southern Ry., the N., St. C. and T. Ry. and the N.F.P. and R. Ry., at lots 57 and 59, Tp. Stamford, Ont.

1979. Nov. 16.—Authorizing the Napierville Jct. Ry. to operate an interlocking plant at its crossing of the G.T.R. near Lacolle Jct., Que.

1980. Nov. 15.—Authorizing the amendment of order dated Aug. 6, on application of the C.P.R.

1981. Nov. 16.—Sanctioning revised location of Canadian Northern Quebec Ry. through County of Portneuf, Que.

1984. Nov. 19.—Authorizing the Dominion Natural Gas Co. to lay pipes along and over bridge spanning G.T.R. tracks west of Cayuga station, Ont.

1985. Nov. 19.—Authorizing the C.P.R. to construct a branch line from its track on Higgins Ave., Winnipeg, 38 ft. westerly from westerly limit of Nena St., produced northerly.

1987. Nov. 19.—Amending order dated Aug. 26, on application of Klondike Mines Ry. Co.

1988. Nov. 15.—Authorizing the James Bay Ry. to cross the C.P.R. tracks near Wahnapitae station, Ont.

1989. Nov. 6.—Authorizing the town of Olds, Alta., to construct highways across Calgary and Edmonton branch of C.P.R. in the town.

Approximate earnings for Nov., $6,143,000 against $5,648,000 for Nov., 1906.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross earnings for Oct., $291,472.90; net earnings, $85,382.86 against $260,050.19 gruss and $80,799.79 net for Oct., 1905. Net earning for four months ended Oct. 31, $427,880.75 against $396,910.23 for same period 1905. Approximate earnings for Nov., $265,777 against $269,119 for Nov., 1905.

MINERAL RANGE RY.—Approximate earnings for Nov., $67,668, against $61,582 for Nov.. 1905.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross earnings for Oct., $1,347,853.75; net earnings, $738,075.78 against $1,226,125.92 gross and $746,131.43 net for Oct., 1905. Net earnings for four months ended Oct. 31, $2,510,158.78 against $2,319,286.05 for same period 1905. Approximate earnings for Nov., $1,111,788 against $1,060,355 for Nov., 1906.

Grand Trunk Ry. Earnings, Expenses, etc.

The following figures give the earnings and expenses of the G.T.R., the Canada Atlantic Ry., the G.T. Western Ry., and the Detroit, Grand Haven and Milwaukee Ry., separately for Oct. as compared with Oct., 1905.

GRAND TRUNK RAILWAY.

	1906	1905
Earnings	$3,024,500	$2,742,636
Expenses	2,086,200	1,901,756
Net earnings	$ 938,300	$ 840,880

CANADA ATLANTIC RAILWAY.

Earnings	$ 194,900	$ 183,514
Expenses	175,900	130,081
Net earnings	$ 19,000	$ 53,433

GRAND TRUNK WESTERN RAILWAY.

Earnings	$ 546,000
Expenses	455,000
Net earnings	$ 99,900

DETROIT, GRAND HAVEN & MILWAUKEE RY.

Earnings	$ 126,900	$ 114,763
Expenses	107,900	89,008
Net earnings	$ 19,000	$ 25,755

Approximate receipts of the system for Nov., as reported in Montreal: $3,760,728 against $3,446,074 for Nov., 1905.

TRAFFIC RECEIPTS OF THE SYSTEM.

Aggregate from July 1 to Nov. 30.

The Board of Railway Commissioners has approved of local standard passenger tariffs for the C.P.R. as follows: Arcola to Regina, Sask., 3½ cents a mile; Balcarres to Strassburg, Sask., 3½ cents a mile; Winnipeg Beach and Gimli, Teulon and Komarno, Lauder and Kandabar, Man.; Reston and Ebor, Man., 3 cents a mile; Ebor, Man., and Baring, Sask., Moose Jaw and Tuxford, Sask., 3½ cents a mile; Lacombe and Stettler, Wetaskiwin and Daysland, Daysland and Hardesty, Alta., 4 cents a mile.

Per Diem Car Rates.

Some particulars respecting the new per diem car rules were given in our Dec. issue, pg. 729. The following is the text of the agreement:

It is mutually agreed, jointly and severally, by and between the several railroad companies subscribing and parties hereto, that on and after Dec. 1, 1906, settlement among themselves for the use of freight cars of the said subscribing companies will be made at the rate of 50c. per car per day, without penalty for delay, and that each subscribing company will account and pay for the use of said cars to each of the other subscribing companies accordingly. It is further understood that this agreement in no wise affects the provisions of the per diem rules agreement, except as to the rate for the use of freight cars and the penalty for delay, between the parties to this agreement. All disputes arising under this agreement shall be settled by a special committee appointed for the purpose, to be known as the Car Hire Committee. This agreement shall terminate on July 1, 1907, unless it shall be extended, modified or dissolved, by the vote of the majority of the signers thereto, owning two-thirds of the cars represented, such action to be taken at a meeting of said signers, called by the car hire committee on ten days' previous notice.

In addition to the above, at the car hire meeting, held in Chicago Nov. 9, the following resolutions were adopted: Resolved, That the question of diversion be referred to the proposed car hire committee, with instructions to prepare an agreement for the purpose of this proposed car hire agreement and as supplemental to it, providing for the proper return of the cars, and that they shall also provide an agreement for a penalty of $5 per car for each case of diversion; and that the committee be requested to have the agreement prepared and submitted to the roads prior to Dec. 1, 1906. Resolved, That the car hire committee when appointed be constituted a committee to pass upon questions under this proposed diversion agreement.

In accordance with this resolution, the committee has prepared an agreement covering the subject of diversion, which is as follows: It is mutually agreed, jointly and severally, by and between the several railroad companies subscribing and parties hereto that on and after Dec. 1, 1906, they will abide by the following diversion rule: Foreign cars must be returned promptly to their owners as follows: 1. Loaded to or via the home road. If such load is not available, cars of immediate connections must be delivered to the home road; cars of other roads must either be loaded to an immediate connection of the car owner or be delivered to the home route. 2. Delivered empty to a connection for loading to the home road or home route, to be returned within four days. Such deliveries shall be indicated on the junction report by the words "For home loading." 3. Forwarded to a foreign road when received consigned to that road. Any other delivery to a foreign road will be a diversion for which a diversion penalty of $5 must be paid to the owner of the car. If the enforcement of these rules shall result in a considerable empty mileage without compensating loaded mileage, the case shall be adjusted on the basis of 3c. per empty car mile, to be paid by the roads responsible. All disputes arising under this agreement shall be settled by the car hire committee. This agreement shall terminate on July 1, 1907, unless it shall be extended, modified or dissolved, by the vote of the majority of the signers thereto, owning two-thirds of the cars represented, such action to be taken at a meeting of said signers, called by the car hire committee on 10 days' previous notice. In case the agreement is extended, subscribers may withdraw by giving three months' previous notice in writing to the Secretary of the car hire committee.

The following Canadian railways, or railways having Canadian connections, have signed the new agreement: Grand Trunk Ry., Duluth, South Shore and Atlantic Ry., Minneapolis, St. Paul and Sault Ste. Marie Ry., Pere Marquette Rd.

The London Interswitching Case.

The arguments in the appeal of the G.T.R against an order of the Board of Railway Commissioners, in regard to the interswitching of freight cars between the G.T.R. and the C.P.R. at London, Ont., were heard by the Supreme Court judges at Ottawa, Dec. 3. The order was made on the application of the G.T.R. and authorized that company to construct, maintain and operate at London, Ont., a branch line for the interchange of cars to and from industrial and business sidings on the lines of both railways, with the condition that the traffic agreements between the companies in regard to the branch line should be submitted to the board for approval. The city is an interested party in respect of having facilities provided and fair traffic rates fixed. By leave of the board the appeal was allowed on the following questions of law: (1) Had the board authority to make the order in such terms? (2) Are sections 266 and 267 of the Railway Act, 1903, applicable to this case, where one and the same rate is charged to and from all points in the district in and about the city of London affected by the order? (3) Does the order involve the use of the tracks, station and grounds of the G.T.R. by the C.P.R. at London, for which the G.T.R. should be compensated? (4) Was the board bound to consider, in estimating the remuneration or compensation to be allowed to the G.T.R. (a) the magnitude of the G.T.R. business as compared with that of the C.P.R. at London; (b) their comparative advantages; (c) the loss to one company whereby the other might gain; (d) the cost of the G.T.R. terminals, etc., otherwise than as evidence of a fair value of the services to be rendered and the use of the facilities, and (e) the further expense cast upon the G.T.R. in order to carry out the terms of the order? The appellants contend that the board exceeded its jurisdiction; that sections 266 and 267 of the Railway Act do not apply under the circumstances of this case, but that section 137 alone applies, and that all the matters enumerated should, as a matter of law, be taken into consideration in fixing the compensation to be allowed to the G.T.R.

Judgment was delivered Dec. 10, the decision being against the G.T.R., the appeal being dismissed with costs.

January Birthdays.

Many happy returns of the day to—

G. Bazzard, ex-Freight and Passenger Agent, Delaware, Lackawanna and Western Rd., Toronto, now of Hamilton, Ont., born at Westhide Court, Herefordshire, Eng., Jan. 3, 1838.

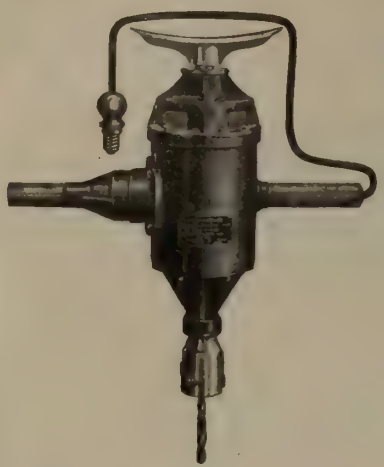
A. H. Bears, Master of Bridges and Buildings, C.P.R., Winnipeg, Man., born at Charlottetown, P.E.I., Jan. 6, 1857.

R. H. Bell, Commercial Agent, Canadian Northern Ry., Pittsburg, Pa., born at Toronto, Jan. 13, 1865.

G. M. Bosworth, 4th Vice-President C.P.R., Montreal, born at Ogdensburg, N.Y., Jan. 27, 1858.

G. McL. Brown, General Passenger Agent C.P.R. Atlantic Steamship Line, Montreal, born at Hamilton, Ont., Jan. 29, 1856.

60% EFFICIENCY IS THE RECORD OF OUR AIR-COOLED DUNTLEY ELECTRIC DRILLS



Breast Drill, Weight 13 lbs. Capacity ¼ inch in steel or iron

Hence they are being rapidly installed wherever current is available, also where air supply is limited; the drilling and reaming being performed by these drills and air used exclusively for riveting and chipping.

A school for educating young men in Great Britain in Canadian railway methods, to fit them for positions in this country, has been opened at Birmingham, Eng., under the auspices of a Toronto man.

At a meeting of the Winnipeg Jobbers' Association held recently, the principal subject discussed was the transportation service, and it was decided to employ the services of an experienced railway man who will represent the interests of the Association with the public carriers, and also before the Railway Commission.

Railway Rolling Stock Notes.

The Canadian Northern Ry. ordered two snow ploughs for Dec. delivery from Rhodes, Curry & Co., Amherst, N.S.

The G.T.R. recently placed an order for 400 refrigerator cars, 60,000 lbs. capacity, for delivery in April and May.

The Canada Car Co. made delivery between Nov. 14 and Dec. 14. of 500 box cars to the G.T. Pacific Ry. and the Canadian Northern Ry.

The G.T.R. between Oct. 20 and Dec. 8, 1906, added to its rolling stock 23 compound consolidation locomotives, two snow ploughs and one second-class car.

The Canadian Locomotive Co. between Nov. 20 and Dec. 12 delivered two 6-wheel switching locomotives to the Intercolonial Ry. and two mogul locomotives to the Quebec Central Ry.

The Locomotive and Machine Co. of Montreal delivered 14 compound consolidation locomotives to the G.T.R. during Nov., and continued making deliveries of the same class of locomotives during Dec., to complete orders from that railway.

The C.P.R. between Nov. 14 and Dec. 14 received the following rolling stock from its Angus, Montreal, shops: Three passenger locomotives, four sleeping cars, five 1st class cars, 10 baggage cars, 403 box cars, 80 flat cars and four snow ploughs.

The White Pass and Yukon Ry. during the last financial year sold two locomotives, a combination car and a passenger coach, and four freight cars to the Klondike Mines Ry., one locomotive, two passenger coaches and 15 flat cars to the Tanana Mines Ry.

The Intercolonial Ry. received the following rolling stock between Nov. 16 and Dec. 17. Five switching engines from the Canadian Locomotive Co., Kingston, Ont.; four wing elevator plows, one double track plow, and 16 Hart convertible dump cars from Rhodes, Curry & Co., Amherst, N.S.

Replying to a question in the House of Commons, Dec. 11, the Minister of Railways stated that G. H. Joughins, Superintendent of Motive Power of the Government Railways, had reported favorably upon the use of electric motor cars and that tenders would shortly be called for the supply of the same.

MacDonell & O'Brien, contractors G. T. Pacific Ry., Eastern section, have ordered from the Dominion Dump Car Co., Montreal, 30 Hart convertible cars, 34 ft. long, 9 ft. wide, outside measurement, 40 tons capacity, similar in design to those ordered recently by the Canadian Northern Ry., also a special ballast spreader car.

The C.P.R. between Nov. 14 and Dec. 13 placed orders for the following rolling stock at its Angus, Montreal, shops: 10 passenger locomotives, 3,000 box cars, 500 flat cars, 100 freight refrigerator cars, two flanger cars, seven ballast distributing cars, two ballast trimmers, and two tourist cars; and at its Farnham, Que., shops, 50 vans.

The dimensions of the 6-wheel switching locomotive which the Locomotive and Machine Co. of Montreal is building for the Dominion Coal Co., Sydney, N.S., are: Cylinders, 19 by 26 in.; driving wheels, 50 in. diameter; weight on drivers, in working order, 120,000 lbs.; tank capacity, 3,000 galls.; coal capacity, 4 tons; wheel base, 11 ft.; diameter of boiler at largest end, 65½ in.

The Crossen Car Manufacturing Co., Cobourg, Ont., has recently delivered 100 box cars to the Canadian Northern Ry., and two baggage and express cars, and four first-class coaches to the Temiskaming and Northern Ontario Ry. It has also received orders for 16 second-class coaches, four mail and express cars and four baggage cars for the Canadian Northern Ry., and six flat cars for the British Columbia Mills Lumber and Trading Co.

The C. P. R. motor car which has been operated between Montreal and Vaudreuil, Que., for several months, was taken off the route early in Dec., and returned to the Angus, Montreal, shops for repairs and such improvements as have been suggested by the experience of the summer's work. We are officially advised that the management is very much pleased with the results of the season's running.

The following rolling stock has been delivered recently for the Canadian Northern and other Mackenzie, Mann & Co.'s lines: 263 box cars, 6 refrigerator cars and 4 passenger cars from Rhodes, Curry & Co., Amherst, N.S.; 41 box cars from the Canada Car Co., Montreal; 45 box cars from the Crossen Car Manufacturing Co., Cobourg, Ont.; 4 locomotives and one switcher, from the Canada Foundry Co., Toronto.

The 30-ton box cars which the C.P.R. is building at its Angus, Montreal, shops will be of the standard dimensions and construction, the special fittings including Simplex body and truck bolsters, Simplex brake beams, Simplex roller bearings for trucks, Susemihl roller side bearings, and Westinghouse air brake. Similar special fittings are being provided for the 45 30-ton flat cars, and 10 30-ton stock cars also being constructed.

The Dominion Parliament is being asked at its current session to vote the following sums for rolling stock for the Intercolonial railway: Air brakes to freight cars, $21,000; to exchange drawbars of freight cars, $37,500; air compressors and reservoirs, $5,000; air brake equipment, $19,500; ballast plough and unloader, $6,500; new machinery for locomotive and car shops, $100,000, also $20,000 for rolling stock for the Prince Edward Island Ry.

The 200 Rodger Hart convertible ballast cars, which the C.P.R. is building at its Angus, Montreal, shops, will have a capacity of 40 tons, and the following general dimensions, etc.: Length inside as a gondola car, 34 ft. 10 in.; length inside as a hopper car, 24 ft. 6 in., width inside, 8 ft. 8 in.; height of sides, 3 ft. 0¼ in.; width over frame, 4 ft. 10 in.; wheels, 33 in., cast iron; journal bearings, 5 by 9 in, M.C.B. Special fittings: Simplex body and truck bolsters, Simplex brake beams, Westinghouse air brakes, McCord journal boxes, Susemihl roller side bearings.

The mail and express car which the C.P.R. is having built at its Angus, Montreal, shops, will be 60 ft. long over frames; body and under frame, wood; axles, 5 by 9 in., M.C.B.; bolsters, double; brake beams, Simplex with adjustable head; brake shoes, cast iron; brakes, Westinghouse air, high speed; brasses, 5 by 9 in., M.C.B.; heating system, Gold with Frumveller heater; journal boxes, M.C.B.; no platforms, but fitted with steel I beams to carry draft rigging, etc.; roof, standard passenger, covered with canvas; springs, 34 in. quadruple elliptic; trucks, 4-wheel passenger; wheels, 36¼ in. steel tyred.

Sir T. G. Shaughnessy, President C.P.R., in an interview at Winnipeg, Dec. 1, stated that there was undoubtedly a car shortage on the line at the present time, but it was impossible to obtain either locomotives or cars anywhere. The company could not get the raw material—steel, iron or lumber—to make the cars as fast as it desired, and all other railway companies and car manufacturing companies were in the same condition. The company's works at Montreal were turning out 24 freight cars a day, and a corresponding number of locomotives a month, which were being absorbed by the operating department as fast as they were delivered.

CHALFONTE IS ALWAYS OPEN

The specifications for the two U8 locomotives which the C.P.R. is building at its Montreal shops, provide as follows:

WEIGHT.—On drivers, 185,000 lbs.; total, 185,000 lbs.

CYLINDERS.—Diameter, 22½ in.; stroke, 28 in.

DRIVING WHEELS.—Diameter, 52 in.; tyres, Krupp crucible.

BOILER.—Type, radial stayed; working steam pressure 175 lbs.; heating surface, tubes, 2,310; firebox, 182; total, 2,492 sq. ft. No. of tubes, 349 of 2 in.; length, 12 ft. 7⅛ in. between sheets.

FIREBOX.—Length, 102½ in.; width, 70 in.; grate area, 49 ft. 7 in.

TANK CAPACITY.—Water, 5,000 Imp. galls.; coal, 10 tons.

SPECIAL FITTINGS, ETC.—Westinghouse air and straight air brakes; Krupp and open hearth steel axles; Simplex brake beams; C.P.R. standard brake shoes, journal bearings; Gold steam heat equipment.

Following are the principal dimensions of the four tourist cars which the C.P.R. is having built at its Angus, Montreal, shops: Length, over frame, 72 ft.; width, over frame, 9 ft. 10½ in.; body and under frame, wood; axles, 5 by 9 in., M.C.B.; bolsters, double; brake beams, Simplex with adjustable heads; brake shoes, cast iron, M.C.B.; brakes, Westinghouse air, high speed; brasses, 5 by 9 in., M.C.B.; heating system, Gold with Frumveller heater; journal boxes, 5 by 9 in., M.C.B.; lighting, acetylene gas; seats, standard colonist car type of slatted wood; roofs, standard passenger car type covered with canvas; trucks, 5 by 9 in., 6-wheel passenger; wheels, 36¼ in., steel tyred, Krupp; springs, 38 in., double elliptic.

The specifications for the ten class G.2.H locomotives which the C.P.R. is building at its Angus, Montreal, shops for May delivery, provide as follows:

WEIGHT.—On drivers, 139,300 lbs.; total, 212,300 lbs.

CYLINDERS.—Diameter, 21 in.; stroke, 28 in.

WHEELS.—Diameter of drivers, 69 in.; tyres, Standard Steel Co., Krupp crucible steel.

BOILER.—Type, radial stayed wagon top; working steam pressure, 200 lbs.; heating surface, 2,959 sq. ft.

TUBES.—Number, 22 of 5 in. and 193 of 2¼ in.; length, 19 ft. 6 in.

FIREBOX.—Length, 7 ft. 10⅛ in. inside; width, 5 ft., 9⅛ in. inside; grate area, 45.6 sq. ft.

TANK.—Capacity, water, 5,000 Imperial galls.; coal, 10 tons.

SPECIAL EQUIPMENT, ETC.—Westinghouse air brake; Krupp and open hearth steel axles; Simplex brake beams for tender; C.P.R. standard brake shoes and journal bearings; C.P.R. crucible steel springs.

The specifications for the colonist car which the C.P.R. is building at its Angus, Montreal, shops, provide as follows: Length, 67 ft.; width, 9 ft. 10½ in.; capacity, 18 sections; body and under frame, wood; axles, 5 by 9 in., M.C.B.; bolsters, double; brake beams, Simplex with adjustable heads; brake shoes, cast iron, M.C.B.; brakes, Westinghouse air, high speed; brasses, 5 by 9 in., M.C.B.; heating system, Gold with Frumveller heater; journal boxes, 5 by 9 in., M.C.B.; lighting, acetylene gas; roof, standard passenger type covered with canvas; seals, standard colonist car type of slatted wood; springs, 38 in., quadruple elliptic; trucks, 5 by 9 in., 4-wheel passenger; vestibules, wide; wheels, 36¼ in., steel tyred, Krupp.

The G.T.R. has put into service a number of new second-class coaches between Montreal and Ottawa. These cars are 75 ft. 6 in. long, and weigh 107,760 lbs., and are mounted on 6-wheel trucks. They have standard wide vestibules with steel platforms. The interior of the car is finished in mahogany, and the lighting arrangements are supplied wth Pintsch gas. The seats are upholstered in leather, and give seating capacity for 74 passengers, including a smoking room which accommodates 13 people. Women's and men's toilet rooms are provided at either end of the car. Roller curtains are attached to the windows, a carpet strip covers the centre of the floor, while linoleum covers the passageways and smoking room.

The specifications for the two pile drivers which the C.P.R. is building at its Angus, Montreal, shops, provide as follows: Wheel base of car, 36 ft. 4 in.; wheel base of truck, 5 ft. 4 in.; frame can be swung completely round except for interference of car body; piles can be driven 17 ft. 2 in. on either side of centre of track, and about 16 ft. 7 in. in front of leading wheels; batter piles cannot be driven; leaders to be swung by hand power and raised by engine; idler car is required; wood car body mounted diamond pattern steel trucks, journals, 4¼ by 8 in.; frame carrying leaders traverses lengthways of car; height of leaders, rail to crosspiece on top 42 ft.; self propelling, leaders can be raised by power; double cylinder hoisting engine; length of car over end sills, 45 ft.; width of car over sills, 9 ft. 10 in.; six wheels, 33 in. cast iron, and two 34 in., steel tyred; height from rail to top of car body, 4 ft. 0⅛ in.

Sir Sandford Fleming, Ottawa, is President, and C. C. Chipman, Winnipeg, Man., is one of the directors of a new company which is laying out a town at Exshaw, 25 miles east of Banff, Alta., and putting up a cement manufacturing plant.

The bill annually introduced by Mr. Lancaster in reference to the protection of level crossings of railways, which is generally sacrificed towards the end of the session, with many other private members' bills, has been again read a first time in the House of Commons. He has also introduced another bill which has for its object the enabling of a property owner from whom a railway company is taking land, to take the initiative for arbitration.

The Grand Trunk Ry. is applying at the current session of the Dominion Parliament for an act repealing or amending the provisions of section 3, chap. 37 of the statutes of 1853, and particularly so much of the section as provides that the fare or charge for each third-class passenger shall not exceed one penny currency for each mile travelled, and that at least one train having in it third-class carriages, shall be run every day throughout the length of the line. The formal conviction of C. M. Hays, Second Vice-President and General Manager, for non-compliance with this section was registered at the Toronto Police Court, Dec. 1, and arrangements made for a stated case to be submitted upon the question of jurisdiction. On Dec. 14, W. N. Robertson, who initiated the proceedings, applied through counsel for a mandatory order to compel compliance with the act, but Chief Justice Meredith refused, stating that the applicant had his remedy in a suit for damages.

The Illinois Central Rd. has submitted a complaint to the Interstate Commerce Commission alleging that the C.P.R. is advertising rates for freight transportation to England and the continent considerably below those announced by U.S. lines, and setting out that it is not compelled by law to give any previous notice of a changie of rates. The U.S. lines are unable, the complaint says, to meet this competition because of that provision of the new railroad law which prescribes that "no change shall be made in rates, fares, charges, or joint rates, fares and charges which have been filed and published by any common carrier in compliance with requirements of this section, except after 30 days' notice to the commission and to the public. At a conference held at Washington, D.C., Dec. 11, at which the C.P.R. and the G.T.R. were represented, A. H. Harris, for the C.P.R., volunteered to file its tariffs via steamship line with the Interstate Commerce Commission, where the freight is taken from a point in the U.S. to a point in adjacent foreign countries to be transported to an interior point. These tariffs would not be changed without 30 days' notice.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Dominion Iron and Steel Co. rolled its first 100-lb. steel rails, Dec. 17.

Geo. McDougall, for many years manager of John McDougall & Co.'s iron works, Drummondville, Que., died at Montreal recently.

The Canadian Westinghouse Co. has issued circular 1139 describing its starting and field rheostats, and type C integrating Wattmeters.

The Vulcan Iron Works Co., Toledo, Ohio, has issued a handsome calendar, the leading design being an illustration of the Giant steam shovel.

The main offices, drafting rooms, and some other buildings at the Robb Engineering Co.'s plant, Amherst, N.S., were destroyed by fire, Dec. 3.

The Carbolite Carbolineum Co. (Ltd.), Toronto, has issued a pamphlet describing its preservative process for railway ties and timbers, and timber preservation generally.

J. Maw, who for the past eighteen years has been Superintendent of Works of the B. Greening Wire Co., Hamilton, Ont., has retired. He will remain as a director of the company.

The Canadian Westinghouse Co.'s salesmen and travellers attended their annual convention in Hamilton, Ont., recently. During their visit they were entertained at dinner at the Hamilton Club, by M. S. Bredin, Sales Manager.

The Pintsch Compressing Co. has been licensed to do business in Ontario, and will operate a plant at Toronto for railway car lighting purposes. The Pintsch Co. is affiliated with the Safety Car Heating & Lighting Co., of New York.

The International Marine Signal Co., a company carrying on business in Canada under the Dominion Companies' Act, has been registered in Ontario under the act respecting the licensing of extra-Provincial companies, T. L. Willson, Ottawa, being appointed its attorney.

The Mica Boiler Covering Co. has completed its contract for the insulation of all cylinders, steam pipes, etc., on H.M.S. Warrior. The company has also secured contracts for the insulation on board another battleship, and for the insulation of boilers, cylinders, steam pipes, etc., on the new Cunard Steam ships Lusitania and Mauretania.

The National Car Co. has been incorporated under the Ontario Companies' Act, with a capital of $300,000 and offices at Toronto, for the purpose of building and equipping cars for railways, and to manufacture and sell all kinds of railway equipment and appliances. The provisional directors are: Alex. Stewart, T. H. Kilgore, and Miss Louise Williams of Toronto. The first named is described as a manufacturer; the second as an accountant, and the third as a stenographer. T. H. Kilgore is the Secretary of the Huron and Ontario Ry. Co.

Mussen's Limited has been incorporated under the Dominion Companies' Act with a capital of $500,000 and offices at Montreal, for the purpose of acquiring the business now carried on at Montreal, Toronto,

THE RAIL JOINT CO., General Offices: 29 West 34th St., NEW YORK CITY

Winnipeg, Vancouver and elsewhere in Canada under the name of W. H. C. Mussen & Co., as dealers in railway, mining, municipal and contractors' supplies. Power is also given to engage in a variety of businesses germain to any of the objects specified, to enter into agreements and partnerships with other firms or persons; to take stock in other companies, or to guarantee interest on stocks and bonds, and other purposes. The provisional directors are: W. H. C. Mussen, G. Boulter, G. G. Foster, K.C.; C. G. McKinnon, W. R. Stavely, Montreal.

The B. Greening Wire Co., Hamilton, Ont., has issued its calendar for 1907. It is the usual design showing portraits of the President and incorporator of the present firm, the founder of the business in Hamilton, and the founder of the present firm in Warrington, Eng., where the late B. Greening came from to start business in Canada. From the cut of the buildings it will be seen that there was no growth during 1906, but plans are being prepared for considerable increase during the current year to take care of the increased volume of business that this firm is sharing with the rest of Canadian manufacturers in Canada. The company did not issue a new catalogue in 1906, but has some left from the last issue which will be forwarded to any one who will write stating the branch of business that they are particularly interested in. This information is necessary as a different catalogue is issued for each department.

The Canadian Locomotive and Machine Co. is making extensive additions to its plant at Kingston, Ont., including the following new buildings: Boiler, erecting, tender and tank shops. These shops will be all under one roof in a building 200 by 352 ft., with four bays. Iron foundry, 140 by 84 ft. Addition to machine shop, 203 by 75 ft. Pattern storage building, 90 by 60 ft., three stories. Power house about 86 by 75 ft. The management gave considerable attention to the question of power to be employed, and was very much inclined to erect a gas producer plant, and run the shops with electric energy supplied by gas engines and motors, but the problem of heating the shops in winter was such a serious one, that the conclusion was arrived at that the modern steam plant from which the exhaust could be used for heating purposes, would be most economical; this power plant will consist of vertical boilers, equipped with mechanical stokers, superheaters, and induced draft apparatus, high speed engines, and Westinghouse generators, together with the necessary condensers, feed water heaters, etc.

C.P.R. Betterments, Construction, Etc.

Chateau Frontenac Extension.—The C.P.R. has acquired the buildings necessary on St. Louis, Des Carrieres and Mount Carmel streets, Quebec, for the purpose of erecting the proposed extension of the hotel. The aggregate cost of the several properties is estimated at $200,000. It is said that as soon as arrangements can be made with the tenants to obtain possession of the properties, the clearing of the site will be commenced. It is also said that the addition will be connected with the present hotel building by an underground tunnel for the use of servants, transferring baggage, etc., and that an archway will be erected across Des Carrieres St., for the use of guests. A new dining-room to run parallel with St. Louis St., and to have accommodation for 1,000 guests, is said to form a feature of the new building.

Port Rouge Spur.—The Board of Railway Commissioners is being asked to approve of the construction of a spur line of 2,800 ft. from near Port Rouge station, Que., mileage 133.92, from St. Martins Junction, with a spur 450 ft. long.

St. Martins Junction Spur.—The Board of Railway Commissioners is being asked for an order authorizing the construction of a branch from mileage 88.88 easterly from St. Martins Junction station, Que., northerly and easterly to the Canada Paint Co.'s premises.

Windsor St. Station.—Nothing definite has been arranged as to when work upon the further extension of the Windsor St. station, Montreal, will be gone on with, but it is not expected that anything will be done during this year. The company has acquired practically all the property it requires for the extension. The plans provide for an extension down to St. Antoine St., and west to Mountain St.

Spurs at Westmount.—The C.P.R. is applying to the Board of Railway Commissioners for authority to construct two spur lines in Westmount, Que.

Vaudreuil-Smith's Falls Second Track.—It is reported in Montreal that the C.P.R. is inviting contractors to give prices on the work of constructing a second track between Vaudreuil, Que., and Smith's Falls, Ont.

Pontiac Pacific Junction Ry.—The C.P.R. has purchased the water power at Deschenes Falls, and it is reported will develop the same, using the electrical power generated for the purpose of operating trains on the old Pontiac Pacific Junction Ry. The C.P.R. also owns the Hull Electric Ry.

Campbellford to Toronto.—At a session of the Board of Railway Commissioners at Toronto, Dec. 12, A. McMurchy, of the C.P.R. legal staff, stated that the company was going to construct a line from Campbellford to Toronto, passing through all the principal towns between these points, and crossing the Don River at Toronto, south of Queen St. He argued that the C.P.R. should only be called upon to pay a small part of the cost of erecting a high level bridge across the Don at Queen St. F. P. Gutelius, Assistant Chief Engineer, stated that the route had been surveyed, and without doubt the best entrance to Toronto, was east and south of the G.T.R. tracks.

Guelph and Goderich Ry.—Track has been laid from Guelph to Blyth, 63.5 miles, and progress is being made with the remainder of the line into Goderich, Ont., about 17 miles. The contractors are Campbell and Folinsbee, Strathroy, Ont.; Piggott & Co., Hamilton, Ont.; B. Gibson, Toronto. There is also under contruction a branch from Linwood into Listowel, about 17 miles, the contractor for which is B. Gibson. P. A. Peterson is Chief Engineer.

Woodstock to Brantford.—We have been advised by an official that so far as he is aware there is nothing in the newspaper item referred to in our last issue that the C.P.R. would shortly proceed with the construction of a line to connect Woodstock and Brantford, Ont.

Toronto-Sudbury Branch.—The first section between Bolton Jct. and Craighurst, Ont., of the new line designed to give a direct connection by the C.P.R. between Toronto and Sudbury, Ont., was opened for passenger traffic, Dec. 1.

Five miles of the line from Parry Sound southerly is ready for the rails. The erection of the bridge across the Seguin valley, at Parry Sound, has been started, and it is expected that it will take the best part of the year to complete it. The work to the north of Parry Sound is being pushed towards the French River, where it will connect with the mileage already graded south from Romford, where the line will join the main transcontinental line east of Sudbury.

Fort William-Winnipeg Second Track.—The following portions of the second track work between Fort William, Ont., and Winnipeg have been completed and handed over to the operating department: West Fort to Neebing, mileage 2.7 to mileage 7.6; Neebing to Murillo, mileage 7.6 to mileage 13.4; Dexter to Linko, mileage 54.0 to mileage 59.6; Murillo to Kakabeka, mileage 13.4 to mileage 18.3; Ignace to Gull River, mileage 148.4 to mileage 141., as officially reported by the engineer in charge

Winnipeg Train Shed.—A contract has been let to the Dominion Bridge Co., Montreal, for the manufacture and erection of the steel work for the concourse and train shed to be erected in connection with the recently completed station at Winnipeg. It is expected to begin the erection of the train shed at an early date and to have it completed by the end of April.

Manitoba and Northwestern Ry.—Power is being asked at the current session of the Dominion Parliament to construct a branch line from the M. & N.W. Co.'s main line between Theodore and Insinger, westerly and northwesterly to a junction with the C.P.R. Quill Lakes branch, in tp. 32, range 18 or 19 west of the second meridian, a distance of about 80 miles.

The Dominion Parliament is also being asked for an act authorizing the construction of a branch line from Bredenburg, on the M. & N.W. main line, northerly to or near Kamsack, Sask., about 42 miles.

Earl Grey or Bulyea Southwesterly.—Application will be made at the current session of the Dominion Parliament for an act authorizing the construction of a branch from Earl Grey or Bulyea, Sask., on the Pheasant Hills branch, or some point between these places, southwesterly to tp. 20 or 21, range 21, west 2nd meridian.

Saskatoon to Strassburg.—Work was suspended early in Dec. upon the grading between Saskatoon and Strassburg, Sask., the present terminus of the Pheasant Hills branch. This is the branch which is being continued westerly from Saskatoon to connect with the Wetaskiwin branch of the Calgary and Edmonton Ry. The British Columbia General Contract Co. has the contract.

Irrigation Works near Calgary.—The constructing of the branch irrigation canals near Calgary, Alta., in the area which the C.P.R. is reclaiming, has been suspended for the season. The work is being done by the British Columbia General Contract Co., Vancouver, B.C.

Calgary Machine Shops.—The company's machine shops at Calgary, Alta., are being extended to meet the increasing demands for repairs to rolling stock. The new buildings are being erected by the British Columbia General Contract Co., Vancouver, B.C.

Calgary and Edmonton Ry.—The Dominion Parliament is being asked for an act authorizing the construction of a branch from tp. 47, range 20, west 4th meridian, upon the Wetaskiwin branch, northwesterly to the main line in tp. 52, range 24, west 4th meridian.

A contract has been let to the British Columbia General Contract Co., Vancouver, B.C., for the erection of six steel spans on the Calgary and Edmonton Ry.

Nicola, Kamloops and Similkameen Ry.—A train service was put in operation early in Dec. over this line from Spence's Bridge to Nicola, at which point a town site has been laid out. Work is going ahead on the extension of the line towards Midway on the C.P.R.'s Crow Nest branch.

Esquimalt and Nanaimo Ry.—The object of the survey which a party under F. H. Shepherd is making on Vancouver Island

NOVA SCOTIA STEEL AND COAL CO. LIMITED

NEW GLASGOW, NOVA SCOTIA

is to discover an easier pass than one already surveyed at an altitude of 1,200 feet for the purpose of constructing a line from Nanaimo to Alberni, B.C. The distance by wagon road between these points is 46 miles.

Sir T. G. Shaughnessy, President C.P.R., visited Winnipeg recently, and had a lengthened consultation with W. Whyte, Second Vice-President, C.P.R., and President E. and N. Ry., respecting the affairs of the latter line. He said, in an interview: "We are making some preparations to clear up 150,000 acres of land on Vancouver Island, but the details of this plan are not fully completed. The plan is under way, however, and it can be judged how much work it means when it is calculated that it costs from $80 to $100 an acre to clear up land such as we propose to clear."

Surveys are in progress for a line from the present terminus at Wellington to Sandwich, B.C., about 98 miles. The following lines are also under consideration, but surveys are not at present being made: From Duncans to Sarita Bay, 71 miles; from Sandwich to Quatsino, 180 miles.

Railway Finance, Meetings, etc.

Canadian Northern Ry.—Application is being made at the current session of the Dominion Parliament for an act increasing the bonding powers upon the company's lines, other than those from Edmonton, Alta., to the Pacific, and in British Columbia, from $35,000 to $40,000 a mile; to confirm an agreement with the G.T. Pacific Ry. respecting the construction and use of terminals at Winnipeg, and for the expenditures upon the same; the confirmation of the issue of 4% perpetual guaranteed debenture stock, and mortgage in trust to the British Empire Trust Co., and the National Trust Co., on account of the purchase of the Qu'Appelle, Long Lake and Saskatchewan Ry.

Columbia and Western Ry.—A suit has been entered in the B.C. courts by the C.P.R., the defendant being F. A. Heinze, the original builder of the C. and W. Ry. The B.C. Government gave a land bonus of 760,000 acres for the building of the line, and by the terms of the sale to the C.P.R., Heinze was to retain half of this area. The C.P.R. wishes to dispose of some portion of the land falling to its share, and the present action is being brought to compel Heinze to select his half of the land grant.

Dominion Atlantic Ry.—A deed of conveyance has been deposited with the Secretary of State at Ottawa, transferring all the property, rights and franchises of the Midland Ry. Co., Limited, to the Dominion Atlantic Ry. Co. There has also been filed a trust deed between the Dominion Atlantic Ry. and C. F. Kemp and T. R. Ronald, trustees, securing an issue of debenture stock to the amount of £292,500 to be called the Dominion Atlantic Ry. Extension Debenture Stock.

In the House of Commons Dec. 7, the Premier stated that the lease of the Windsor branch of the Intercolonial Ry. to the Dominion Atlantic Ry. would expire in 1914, and the question of its renewal was a matter for serious consideration.

Duluth, South Shore and Atlantic Ry.—Reports are current in St. Paul, Minn., that the D., S.S. and A. Ry. is to be absorbed by the Minneapolis, St. Paul and Sault Ste. Marie Ry. Both lines are controlled by the C.P.R.

Grand Trunk Ry.—Application has been made to the Stock Exchange, London, Eng., for the listing of a further issue of £1,500,000 of G.T.R. 4% guaranteed stock.

Great Northern Ry. of Canada.—Questions affecting the construction and early financing of this railway, are being investigated in the Supreme Court of Quebec in connection with the liquidation of the Great Northern Construction Co., an order for the winding up of which was obtained in Montreal by Ross, Barry & McRae, railway contractors. The G.N. Construction Co. was incorporated in the State of Georgia, with head offices in New York city. A commission failed to elicit any information from Col. McNaught, President; H. H. Melville, Vice-President, and E. E. Leng, Treasurer, and the case was thereupon transferred to Quebec in order that the Quebec shareholders might be examined.

Hampton and St. Martins Ry.—See St. Martins Ry.

Intercolonial Ry.—The accounts for the year ended June 30, 1906, submitted to the House of Commons Nov. 29, showed that the revenue was $7,643,829.90, and the working expenses $7,581,914.36, leaving a surplus of $61,915.54. For the five months ended Nov. 30, 1906, the earnings show an increase of about $500,000 over those of the corresponding period of 1905.

London and Port Stanley Ry.—Owing to the increased earnings during the current year, it is estimated that the London, Ont., City Council will receive $25,000 as its proportion of the revenue. The line is leased to the Lake Erie and Detroit River Ry., which is owned by the Pere Marquette Rd.

Midland Ry.—See Dominion Atlantic Ry.

Pere Marquette Rd.—The report that the C.P.R. will absorb the P.M. Rd. continues to be circulated in Western Ontario. The advantages which the purchase of the line would be to the C.P.R., are being fully discussed in the newspapers published in the district through which the line runs.

Prince Edward Island Ry.—In the budget speech, in the House of Commons, Nov. 29, Hon. W. S. Fielding said the P.E.I. Ry. was not usually self-supporting, and he had hardly felt at liberty to hope it would be so. However, there is an improvement, for whereas in 1904-5 there was a deficit of $151,375.19, the deficit in 1905-06 was only $36,982.59. The revenue for 1905-06 was $257,270.57, and the working expenses $294,253.16.

Quebec Central Ry.—Gross earnings for Oct., $76,503.41; net earnings, $26,257.35, against $68,867.20 gross and $22,710.48 net for Oct., 1905. Net earnings for ten months ended Oct. 31, $291,299.64, against $233,426.20 for same period 1905.

Quebec and Lake St. John Ry.—The London, Eng., stock exchange has been asked to list a further issue of £40,000 prior lien 4% bonds of this railway, numbered 4,251 to 4,650.

The question of the control of the Q. and L. St. J. Ry. has been the theme of considerable discussion in Quebec for some time past. It has been stated that Mackenzie, Mann & Co. have secured 51% of the common stock, but up to Dec. 20, no official announcement had been made to that effect. The nearest to an official statement is an interview with W. Hanson, one of the directors, through whose brokerage firm in Montreal the purchase was said to have been made. Mr. Hanson is reported to have said that the railway had not been sold. One report states that the price paid was $34 per share. The capital stock of the company is $6,000,000. Another report states that there is a movement also in progress for the purchase of the Quebec Ry., Light and Power Co., and its amalgamation with the Q. and L. St. J. Ry. The Quebec Board of Trade, at a meeting held Dec. 11, passed a resolution setting out that any change in the management of the railway would not be in the interests of Quebec, and that as the Province contributed $2,500,000, and the city of Quebec $450,000 towards the construction of the line, the Provincial and the city government should have something to say in the direction of its policy, in its control, and in the retention of the head office, work shops and management in Quebec city.

Qu'Appelle, Long Lake and Saskatchewan Ry. and Steamboat Co.—The transfer of the line from Regina to Prince Albert, Sask., from the C.P.R., which has been operating it under lease, to the Canadian Northern Ry., by which company it has been purchased, took place Dec. 15.

St. Martins Ry.—Application is being made for a charter of incorporation under the New Brunswick Companies' Act, by G. W. Vaughan, of St. Martins, N.B.; W. E. Foster, W. G. Scovil, H. A. McKeown, of St. John, N.B.; and F. M. Anderson, of Campbellton, N.B., with the title of the St. Martins Ry. Co., to take over and operate the Hampton and St. Martins Ry. The proposed capital is $99,000, and the offices are to be at Hampton, N.B. The railway was recently sold to satisfy a judgment obtained by A. P. Barnhill, under the provincial act respecting the sale of railways under foreclosure of mortgage or execution, the purchaser being G. W. Vaughan.

Temiskaming and Northern Ontario Ry.—Earnings for Sept.: Passenger, $20,303.73; mails and express, $1,776.11; freight, $18,617.91; telegraph and telephone, $1,419.47; miscellaneous, $1,310.97; total, $43,428.19. Expenditure, $31,816.68, leaving net earnings of $11,611.51.

The public loan of $3,000,000 on the bonds of the T. and N.O.R., has been fully subscribed. The greater part of the issue was taken in Ontario, and only $100,000 went outside Canada. The loan is at 3½%, and has freedom from Provincial taxation and succession duties.

Temiscouata Ry.—Traffic receipts for Nov. $10,622.41, against $10,032.49 for Nov., 1905.

Toronto, Hamilton and Buffalo Ry.—Earnings for Nov. $65,146.61, against $62,243.00 for Nov., 1906.

Railway and Canal Expenditures.

The public accounts for the year ended June 30, 1906, show that the following amounts were expended upon capital account during the financial year:

RAILWAYS—		
Intercolonial Ry	$3,765,170.90	
P.E.I. Ry	496,124.89	
National Transcontinental Ry	1,841,269.95	
		$6,102,565.74
CANALS—		
Cornwall	$ 37,879.09	
Galops	167,426.91	
North Channel	83,028.98	
Soulanges	5,000.22	
Lachine	103,798.28	
Sault Ste. Marie	120,000.00	
Trent	319,789.49	
Welland	715,198.24	
		1,552,121.21
PUBLIC WORKS—		
Montreal harbor	$ 67,855.80	
Port Arthur and Fort William harbors	247,762.55	
Port Colborne harbor	115,182.93	
Quebec harbor	197,000.40	
Georgian Bay to Montreal, waterway surv'y	243,789.45	
River St. Lawrence ship channel	1,056,995.90	
		1,928,587.03
		$9,538,273.98

Bonds of the undermentioned works have been guaranteed by the Dominion Government to the following extent:

QUEBEC BRIDGE AND RY. CO.—The guarantee is for the principal $6,678,200 and for interest thereon at the rate of 3% for 50 years

CANADIAN NORTHERN RY.—The guarantee is for the principal and interest thereon at the rate of 3%, £1,923,287 sterling for 50 years.

GRAND TRUNK PACIFIC RY.—The guarantee is for a sum equal to 75% of the cost of construction of the Western Division of the National Transcontinental Ry., but not exceeding $13,000 a mile in respect of the Prairie section.

I. A. YOUNG,
AGENT

The C.P.R. and the United States.

In a recent interview Sir T. G. Shaughnessy, President C.P.R., is reported to have said: "The C.P.R. does not extend into the U.S. It is essentially a Canadian corporation. True, it became interested in some U.S. lines 20 years ago by helping them financially when they needed aid badly. One of these lines, the Duluth, South Shore and Atlantic, has not added to its mileage for years past. The other, commonly known as the 'Soo' line, has during the past ten years constructed a good many miles of railway, and will, no doubt, in the interest of its traffic, find it desirable to build a good many more. The Soo line is a dividend payer, and the C.P.R., like any other reasonable shareholder, gives its support to the board of directors of that property whose policy is progressive and prudent. Neither the C.P.R. in Canada nor the Soo line in the U.S. builds a single mile of railway for the purpose of injuring its neighbors. Every mile added to either system is for the purpose of providing transportation facilities where they appear to be required and of adding to its revenue. The C.P.R. did not build the extension to Spokane, nor did it provide money for building it. Its relation to the Spokane International Ry. Co. is only in the nature of a traffic agreement. The rates from the east to Spokane are made on precisely the same basis as those from eastern points on any of the transcontinental roads to interior points in the west. No company could afford to base its rates for the shorter mileage on Pacific coast rates, because these are established by water competition so that I think all the companies, including the C.P.R., pursue the same recognized policy in fixing these interior rates."

Interlocking System Rules.

The Board of Railway Commissioners have made the following order ,no. 2105, dated Nov. 27, 1906: "The Rules and Regulations of the Board as approved Oct. 18, 1904, are amended by striking out all the paragraphs under the heading 'Interlocking System,' and immediately preceding the heading 'General Requirements,' and substitute therefor the following:

"INTERLOCKING SYSTEM

"Rules governing the use of interlocking and derailing signals and speed of trains where one railway crosses another at rail level, or where a railway crosses a drawbridge.

"1. The normal position of all signals must indicate danger.

"2. When the distant semaphore indicates caution, the train passing must be under full control and prepared to come to a full stop before reaching the home signal,

"3. When the home signal indicates danger, it must not be passed.

"4. When clear signals are shown where one railway crosses another at rail level, the speed of passenger trains must be reduced to 35 miles an hour, and freight trains to 20 miles an hour until the entire train has passed the crossing.

"5. When clear signals are shown where a railway crosses a drawbridge, the speed of passenger trains must be reduced to 25 miles an hour and the speed of freight trains to 15 miles an hour until the entire train has passed the drawbridge."

The Toronto and Niagara Power Co. received its first delivery of power from the electrical development station at Niagara Falls, Ont., on Nov. 20, but the distribution of power to the electric light station, and other consumers in Toronto, did not begin until some days thereafter.

BRANTFORD STATION, GRAND TRUNK RAILWAY.

Revision of Freight Rates.

The Canadian Manufacturers' Association has issued a circular to its members as follows: "The question of re-adjustment of international freight rates so as to overcome discrimination in favor of shippers from U.S. points is under advisement by the Railway Commission. The railways have submitted a scheme for revision of the rates to Eastern Ontario, Quebec and Maritime Province points, which they claim will do away with the discrimination. To adopt their scheme a uniform freight classification must be used, and they propose the Canadian Freight Classification with ten classes, instead of the Official U.S. Classification with only six classes which has heretofore been used on international business. The plan proposed will involve increases as well as reductions in freight rates from U.S. points. In order to protect manufacturers, the railways have stated they will avoid any advance in freight rates on raw materials which come from the U.S., and to accomplish this will put in commodity tariffs for traffic which is moving in sufficient volume to warrant it, such for instance as iron and steel, lumber and so forth. So that we will be fully advised of what goods are coming from the U.S. for use in the process of manufacture, will you kindly enumerate the goods, if any, which you are importing for that purpose, and say in what quantities brought in. The information is desired only in connection with this international freight rate proposition."

Railway Subsidies in 1905-06.

The Dominion Public Accounts for the year ended June 30, 1906, show that there was paid on account of subsidies, $1,637,574, to 11 railways. The amount was distributed as follows:

Atlantic and Northwestern Ry.	$186,000
Chateauguay and Northern Ry.	116,000
Halifax and Southwestern Ry.	176,512
James Bay Ry.	651,264
Kootenay and Arrowhead Ry.	89,076
Middleton and Victoria Beach Ry.	50,303
Nicola, Kamloops and Similkameen Coal and Ry. Co.	110,592
Northern Colonization Ry.	75,376
Orford Mountain Ry.	45,764
Quebec and Lake St. John Ry.	86,016
Restigouche and Western Ry.	50,070

G.T.R. Betterments, Construction, Etc.

Montreal Track Elevation.—C. M. Hays, Second Vice-President and General Manager, stated Dec. 12, to Alderman Sadler, Chairman of the Montreal City Council Committee on Level Crossings, that a conference between the company's representatives and the council would be arranged for an early date. Personally he was in favor of a new station being built at the same time as the track elevation was carried out, but he did not know whether he would be able to get the directors in England to share his views. The plans and estimates for the work will be presented when the conference is held.

Ottawa Central Station and Hotel.—Plans for the proposed new central station and hotel at Ottawa have been submitted to the Premier and Minister of Railways for approval. It is expected that a start will be made upon the erection of the building early in the spring.

North Bay to Lake Abitibi.—Press reports state that the G.T.R. will construct a line from near North Bay to a junction with the G.T. Pacific Ry. near the Frederick House River, directly south of the big bend of the Abitibi. The projected line will run through the Cobalt district to Lake Temagami, and then turn northwesterly to the junction. A line between these points is among those contemplated in the charter of the G.T. Pacific Ry.

Stratford Shops.—E. H. Fitzhugh, Third Vice-President, and W. D. Robb, Superintendent of Motive Power, had an interview with the Stratford aldermen, Dec. 3, and subsequently a delegation visited Montreal, where the matter of the extension of the shops was discussed. The plans contemplate the expenditure of $200,000 instead of $100,000, as was originally contemplated. The company desires to have an additional street closed so as to facilitate the enlargement of the shops. The deputation expressed the opinion that this would be agreed to by the citizens.

Stratford Station.—The erection of an improved station at Stratford, Ont., is one of the works which it is expected will be undertaken at an early date. It is likely that it will be accompanied by a general rearrangement of the yards and tracks.

London Improvements.—Extensive works are being carried out in the vicinity of London, Ont., one of them being the erection of

a high trestle near Cove bridge. This piece of track elevation extends from Egerton St. to Hyde Park Jct., and in some places the track is being raised 35 ft. W. C. Stevens, Toronto, is the engineer in charge of the work. Other extensive improvements are in contemplation in London including track elevation, the enlargement of the station, and the rearrangement of the yards. An agreement with the city has not yet been reached, but F. H. McGuigan, Fourth Vice-President, was in the city consulting with the City Engineer upon the matter early in Dec.

Battle Creek Shops.—Extensive shops are being built at Battle Creek, Mich. The buildings comprise machine and erecting, boiler and tank shop under one roof, the building being 175 by 817 ft. It will contain 25 erecting pits, nine boiler stalls and nine tank stalls. The foundation work has been started. Other buildings will be erected, and it is expected that the whole of the buildings will be completed by the end of the year.

Track Elevation at Chicago.—The work of separating the grades of the G.T. Western Ry., 49th St. line, between Kedzie Ave. and Wallace St., Chicago, was begun on April 15, 1906, and is still in progress. The operation covered the elevating of three miles of double track main line, including the Aberdeen St. yard and also the Indiana Harbor Ry. double tracks, which are parallel with the G.T.W. Ry. tracks. Twenty-four grade crossings have been eliminated, and also the grade crossings with the Calumet Terminal and the Pennsylvania Ry., which may probably be restored when these roads decide on track elevation. The tracks were raised an average of 15 ft., giving an overhead clearance of 12 ft. on 20 of the streets, the remaining four streets on which the Chicago City Ry. operates require an overhead clearance of 13.5 ft., which was maintained by lowering these streets 1.5 ft. It was found to be more economical to elevate the tracks the full height, rather than depress all the streets. The filling for the work, which necessitated moving 550,000 cubic yards of material, was procured at Oak Glen, on the G.T.W. Ry., and handled by the company's equipment to Chicago, a distance of 20 miles. The method adopted for doing the filling, was to first elevate the south G.T. track to grade, on a temporary pile trestle, building the trestle over the streets sufficiently strong to carry traffic, but between the streets the trestle was simply made heavy enough to carry the empty cars. The trestle was then filled in between the streets, and all the timber used was removed, except the piles; the filling was unloaded in the usual way, by means of plows and unloaders. While the work of elevating the first track was in progress, the regular traffic was operating over the Indiana Harbor Ry. tracks. After the first track was completed, the remaining tracks were built by widening out the embankment and building pile bridges over the streets. The work of grading was completed practically on Oct. 1, over 500,000 yds. of material having been put in place by that date. Concrete abutments and retaining walls to the extent of 25,000 cubic yards will be required, of which 16,000 cubic yards is already constructed, and it was expected to have all concrete work completed Dec. 31. The steel bridges for the street crossings are being constructed, and are expected to be in place in the early part of 1907. As stated previously, the work was commenced April 15. Trains were using the high grade line Aug. 5, and grading for all the tracks was completed Oct. 1. The completed work for both the G.T.W. Ry and the Indiana Harbor Ry. will cost, when completed, in the neighborhood of $1,000,000, not including the proportion borne by the city of Chicago, which amount will include abuttal damages.

MAINLY ABOUT PEOPLE.

H. V. Harris, formerly Manager of the Midland Ry. of Nova Scotia, is now living at Louisville, Kentucky.

T. A. Piddington, director of the Quebec and Lake St. John Ry., died somewhat suddenly at Quebec, Nov. 26.

H. A. Wells, Eastern Passenger Agent, Baltimore and Ohio Southwestern Ry., at Buffalo, N.Y., died Nov. 30.

G. M. Bosworth, Fourth Vice-President C.P.R., was laid up for several days early in Dec. with an attack of la grippe.

Jas. E. Carruthers, who died at Pasadena, Cal., Dec. 7, was a son of Jas. Carruthers, grain exporter, etc., Montreal.

A. R. Creelman, K.C., Chief Solicitor C.P.R., has been elected a Fellow of the Royal Colonial Institute, London, Eng.

F. L. Pomerov, Assistant General Traffic Manager, New York, Central and Hudson River Rd., died at Brooklyn, N.Y., Nov. 26.

W. H. Alford, Brantford, Ont., who has been in the G.T.R. service for 49 years, for 41 of which he acted as conductor, has retired.

Jos. Hardisty, who has acted as manager for Lord Strathcona and Mount Royal in Montreal for over 20 years, died there Dec. 3, aged 74.

Jas. Leitch, K.C., chairman of the Ontario Railway and Municipal Board, has taken up his residence at 30 Dunbar Road, Toronto.

Mrs. Thompson, wife of Senator F. P. Thompson, of the New Brunswick Telephone Co., died suddenly at Fredericton, N.B., Nov. 30.

Hon. W. Gibson has been elected President, and S. Barker, M.P., Hamilton, and A. W. Mackenzie, Toronto, directors of the Hamilton Jockey Club.

Miss Edna McGuigan, daughter of F. H. McGuigan, Fourth Vice-President G.T.R., was married at Montreal, Dec. 1, to H. L. Paddock, of Washington, D.C.

Neil Stewart, train despatcher on the Nova Scotia Steel and Coal Co.'s railway, Sydney Mines, N.S., was married there Dec. 12 to Miss M. McKeigan.

M. C. Dickson, G.T.R. agent at Woodstock, Ont., has been granted leave of absence, and will take a lengthened trip to Scotland before resuming duties.

A. McColl, at one time in the G.T.R. service at Hamilton, Ont., and for the last ten years with the American Express Co., New York, died in that city, Dec. 18.

R. McColl, Provincial Engineer of Nova Scotia, delivered a lecture on bridge construction before the Engineering Society of Dalhousie University, Nov. 30.

A. Campbell, M.P., Toronto Junction, Ont., has been re-elected chairman of the House of Commons Committee on Railways and Canals for the current session.

J. Moran, who celebrated his golden wedding at Westmount, Que., Dec. 1, was for 40 years a locomotive driver on the G.T.R. running between Montreal and Lachine.

Jas. Lipscomb, of the White Pass and Yukon Ry. service, has been visiting Calgary, Alta., where he was a C.P.R. official in the early days of that company's existence.

J. W. Grier, insurance agent, who died in Montreal, Dec. 9, was engaged in the promotion of railway companies, one of them being the Nova Scotia Eastern Ry.

Bay View House, Deseronto, Ont., the residence of E. W. Rathbun, M.P.P., President of the Rathbun railway, navigation and allied companies, was burned Dec. 18.

Geo. Brennan, chief clerk to the Superintendent Canadian Northern Ry., Edmonton, Alta., died in the hospital there recently, from the effects of drinking formalin.

J. M. Fotheringham, resident engineer G.T. Pacific Ry., Kaministikwia, Ont., was married recently at Windsor, Ont., to Miss P. Dickenson, formerly of Fort William, Ont.

Mrs. Lumsden, widow of the late Alex. Lumsden, M.L.A., Ottawa, lumberman and vessel owner on Lakes Temiskaming and Kippewa, died at Phydelphia, N.Y., Nov. 26.

W. McGillis, railway contractor, who died at Kankakee, Ill., Dec. 4, was a native of Glengarry county, Ont. He did some work on the G.T.R., but moved to the U.S. in 1858.

C. T. Long, ex-Manager of the Northern Navigation Co. of Ontario, has been in Egypt for some time, and has contributed several descriptive letters to the Toronto Globe.

P. Amesse, ironfounder, Montreal, who died there Dec. 14, was engaged in contracting work in connection with the engines and machinery upon the Welland and Galops canals.

Miss O. Hays, second daughter of C. M. Hays, Second Vice-President and General Manager G.T.R., was married at Montreal recently to T. Davidson, fourth son of Mr. Justice Davidson.

Sir T. G. Shaughnessy, President C.P.R., returned to Montreal Dec. 3, after having made a trip of inspection over the Minneapolis, St. Paul and Sault Ste. Marie Ry. and visiting Winnipeg.

R. J. Cherry, formerly Superintendent of the C.P.R. dining car department at Vancouver, B.C., and latterly in the service of the Atcheson, Topeka, and Santa Fe Rd., died at Chicago, Ill., Dec. 18.

W. B. Johnson, C.E., who died at Niagara Falls, N.Y., Dec. 15, formerly resided in Montreal, and had been engaged upon the electric power development works at Shawinigan Falls and Niagara Falls.

Mrs. Drinkwater, wife of C. Drinkwater, Secretary C.P.R., died at Montreal, Dec. 15. Mrs. H. P. Timmerman, wife of the General Superintendent Eastern Division, C.P.R., Montreal, is a daughter.

A Fredericton, N.B., press report states that Hon. A. G. Blair, formerly Minister of Railways and Canals, is to be appointed Lieutenant-Governor of New Brunswick in Feb., when the position becomes vacant.

C. W. Cooper was presented with a sea lion leather travelling bag by the employes of the Canadian Northern Ry. passenger department, upon the occasion of his promotion to the position of Assistant General Passenger Agent.

Mrs. C. A. Drury, who died at St. John, N.B., Nov. 26, aged 72, was mother of E. H. Drury, C.E., now in Mexico, and of H. A. K. Drury, C.E., Assistant Engineer of the Board of Railway Commissioners at Winnipeg.

R. Scott, who has been appointed C.P.R station agent at Chatham, Ont., was presented with an address and a purse of gold by the business men of Woodstock, Ont., on his leaving that place after 12 years' residence.

O. A. Barberie, I.C.R. station agent at Campbellton, N.B., died there Dec. 11, aged 74. He entered the service in 1869, was the oldest station agent on the line, and was prominent in promoting tourits travel over it.

A. B. Murdoch, travelling auditor C.P.R., who has been moved to Toronto, was presented with a case of pipes, Dec. 10, by the members of the Crescent St. Church Young Men's Association, Montreal, of which he was financial secretary.

E. G. Russell, who was Manager of the Intercolonial Ry. for some time in 1901-02, and who is now on the G.T. Pacific Ry staff, has been appointed postmaster, of Prince Rupert, B.C., the Pacific coast terminus of the new transcontinental line.

G. G. Ruel, Assistant Solicitor of the Canadian Northern Ry., Toronto, has been appointed attorney for the St. Leon Water Co., a Dominion company which has been granted a license to do business in Ontario, under the act relating to foreign corporations.

W. E. Costello, who recently resigned the position of Assistant Superintendent G.T.R., Battle Creek, Mich., and who was previously with the G.T.R. at London, Ont, is reported to have been appointed General Superintendent Oregon Shore Line, at Salt Lake City, Utah.

Miss L. Mullins, who died in Toronto Dec. 4, was a sister of W. Mullins, formerly Superintendent Central Vermont Ry., St. Albans, Vt., and now manager of the Costa Rica Ry. in one of the Central American republics, and also a sister of T. Mullins, chief clerk City Passenger Agent's office, C.P.R., Toronto.

Barlow Cumberland, Vice-President Niagara Navigation Co., in his capacity as Vice-President of the Ontario Historical Society, gave an interesting address on the Preservation of Historical Sites, before the Women's Wentworth Historical Society, Hamilton, Ont., Nov. 28.

Jno. Adams, London, Ont., one of the oldest locomotive engineers in Canada, having entered the service of the old Great Western Ry. in 1855, and who recently retired, was driver of the first train which crossed the first suspension bridge across Niagara River in 1856.

M. McD. Duff, of the C.P.R. Atlantic Steamships Department, was presented with a quantity of cut glass, an electric lamp and a gold clock, by members of the staff, upon the occasion of his marriage. The presentation was made Dec. 3, by A. Piers, Manager C.P.R. steamships.

C. W. P. Ramsey, who has been appointed Acting Division Engineer of Construction C.P.R., at Montreal, was engaged on transit work for the division until Jan., 1906, when he was taken into the office as assistant to the late H. L. Jordan, and was in charge of the work during Mr. Jordan's illness.

Jas. Porteous, sr., who died at the home of his eldest son, Jas. Porteous, jr., at Carlisle, Eng., Nov. 23, aged 82, was the father of W. M. Porteous, Freight Agent C.P.R., St. Louis, Mo., and brother of the late Jno. Porteous, formerly General Freight Agent G.T.R. and General Manager National Despatch Fast Freight Line, Boston, Mass.

E. A. Cunningham, who was from 1885 to 1900 connected with the C.P.R. General Stores Department at Montreal, and who has for the last six years been purchasing agent and storekeeper for the Alberta Ry. and Irrigation Co. at Lethbridge, Alta., has resigned to go into lumber and builders' supply business, at Lethbridge, with Mayor Rogers.

C. L. Hervey, Divisional Engineer, National Transcontinental Ry. survey, was presented with a dressing case by the members of the staff of his division—headquarters Reed's Camp, near Quebec—Dec. 14; and on the following day, A. M. Morrison and W. Chisholm, resident engineers of the same division, were presented with pipes by the staff.

J. D. Morton, latterly accountant for Mackenzie, Mann & Co., Bridgewater, N.S., in connection with the construction of the Halifax and Southwestern Ry., has been placed in charge of accounting for the Canadian Northern Ry., and allied companies, at the head office in Toronto. Mr. Morton was at one time accountant on construction for the Manitoba and Northwestern Ry.

J. R. Marlow, Manager Transportation Department, Canadian Manufacturers' Association, has resigned to become sales manager for the Canada Cycle and Motor Co., Toronto Junction, Ont. Before transferring his services he will close up as far as possible the freight rate matters pending before the Railway Commission. Mr. Marlow will be succeeded by J. E. Walsh, formerly in the Canada Atlantic Ry.'s service at Ottawa.

H. W. Harding, who has been appointed Local Secretary of the Canadian Northern Ry. in London, Eng., was born there June 6, 1869, and entered railway service Feb., 1883, as clerk in the London, Brighton and South Coast Ry. offices. After passing through various departments of the Accountant's office he was appointed in 1891 to the staff of the Secretary of the company, upon which he remained until appointed to his present position.

G. W. Alexander, who has been appointed Local Treasurer G.T.R. lines west of Detroit and St. Clair rivers, has been connected with those lines since 1880, first as private secretary to the then General Manager at Port Huron, Mich.; subsequently as Assistant to the Treasurer, moving to Detroit when the financial and accounting departments of the Western Lines were merged in 1885, and for the past eight years has been Paymaster. He was born at Lightcliff, Yorkshire. Eng., Sept. 10, 1859.

C. W. Cooper, who has been appointed Assistant General Passenger Agent Canadian Northern Ry., was born at Montreal Nov. 16, 1868; entered railway service Feb. 24, 1885, in the G.T.R. Passenger Department, and became secretary to D. McNicol, then General Passenger Agent C.P.R., in 1892, and served for a time in the Montreal and Ottawa ticket offices. In 1901 he joined the staff of the Canadian Northern Ry. as chief passenger clerk, serving in that capacity until his present appointment.

Geo. Stephen, who has been appointed Assistant General Freight Agent Canadian Northern Ry., Winnipeg, entered the service of the C.P.R. as junior clerk in 1889 and was transferred to Winnipeg in 1899 as chief clerk to the Assistant General Freight Agent, becoming Travelling Freight Agent of the C.P.R. Manitoba lines, 1900. In 1901 he was appointed contracting freight agent C.P.R. at Nelson, B.C.; and in 1903, left the C.P.R. service to become chief clerk to G. H. Shaw, General Traffic Manager, Canadian Northern Ry., Winnipeg. He was born at Montreal, July 5, 1876.

G. B. Burchell, who has been appointed General Manager Canada Coal and Rd. Co. at Joggins Mines, N.S., was born at Sydney, N.S., Nov. 1, 1877, is a B.Sc. of McGill University, Montreal, and is a mining engineer. He was engaged in mining work in the western States, and on returning to Canada, was in charge of the Cape Breton Coal Mining Co., which operated 1¾ miles of railway, and from July, 1903, to Oct., 1906, was Manager of the Gowrie and Block House collieries, Port Morien, N.S., in connection with which he had charge of the chartering of vessels.

W. J. Jackson, who has been appointed General Manager Chicago and Eastern Illinois Ry., was born at Toronto in 1859, and entered the service of the G.T.R. as a machinist's helper in the Toronto shops in 1877. In the following year he entered the G.T.R. freight office in Toronto as a clerk, going to the Chicago and Grand Trunk Ry. in 1882 as chief claims clerk at Chicago. In 1885 he was made general freight foreman on that line, and in 1890 assistant general agent, also at Chicago. In the following year he entered the service of the Chicago and Eastern Illinois Ry., of which he is now general manager.

W. B. Bulling, whose portrait appears on the first page of this issue, was born in Montreal, Sept. 16, 1858, and his first railway experience was with the G.T.R., which service he entered in 1872 in that city. He resigned in 1880 to accept a position with the Chicago and North-Western Rd. in Chicago, in which employ he remained, however, only a short time, returning to the staff of the G.T.R. In 1883 he was appointed chief clerk of the general freight department of the C.P.R.; in 1889 he was appointed District Freight Agent, in 1892 General Freight Agent of the Eastern Division, and in July, 1901, Assistant Freight Traffic Manager of Eastern Lines, comprising all lines east of Fort William and Detroit to Quebec and St. John, N.B.

Dinner to Mackenzie and Mann.

Under the auspices of the Toronto Board of Trade, W. Mackenzie, President, and D. D. Mann, Vice-President, of the Canadian Northern Ry., were entertained at dinner in Toronto on Dec. 14, by a highly representative gathering of prominent citizens. Among those at the table of honor, in addition to the two guests, the President of the Board of Trade, who occupied the chair; the Lieutenant-Governor of Ontario, the Premier of Ontario, the leader of the Provincial Opposition, the Mayor of Toronto, Z. A. Lash, D. B. Hanna, F. Nichols, R. J. Mackenzie, W. H. Moore, A. W. Mackenzie, L. Lukes and C. W. Spencer.

W. Mackenzie, in replying to the toast of the evening, expressed thanks for the honor extended to him and his colleague and asked to be excused if he referred often to his manuscript, for he said: "This is so different to railroading." Continuing, he said Mr. Mann and himself were proud that they were Canadians, but, while that was so, they should not be too provincial. Canada was a great country, and greater in its possibilities and resources than any country in the world. But it required men and money to develop them, and if investments were directed into the right channels, the development would be enormous. In this connection Mr. Mackenzie spoke gratefully of the assistance given to the Canadian Northern Ry. by the investing public of the United Kingdom. "I am pleased to be able to inform you," he said, "that the investing public of Great Britain take a keen interest in Canadian affairs, and that Canadian securities are growing in their appreciation. That has been shown in a practical way by the taking of all the securities the Canadian Northern Ry. had offered them." This was peculiarly gratifying when it was remembered that London was the financial centre of the world, and the British investor had the world to choose from. Mr. Mackenzie spoke of the great growth of immigration into Canada from 49,000 in 1900, to 189,000 in 1905, the total for the six years being 710,000, of whom 273,000 were from Britain and 240,000 from the U.S. Most of these settlers had gone into Manitoba, Saskatchewan and Alberta, and the speaker dwelt upon what this meant to the west and to Canada generally. He expressed the opinion in this connection that the day of total crop failures in the west had passed. The area under cultivation was so large and the crops so varied that if there was a failure in one section it would not affect the other sections. An allusion was made to the tremendous growth of trade of the country, and of Toronto in particular, and passing on he paid special attention to the Canadian Northern Ry.

A PAIR OF

RUSSELL MOTOR INSPECTION CAR No. 12

has been designed after an exhaustive study of your requirements for a light car, that can be handled by one or two men—can be easily taken down, and packed in the baggage car and that will go when you want it, and keep going. Next month on this space, we will tell you about the engine, its simplicity and ease of operation.

WRITE FOR DESCRIPTIVE MATTER.

CANADA CYCLE & MOTOR CO., Limited, TORONTO JUNCTION

Dealing with the question of subsidies, he said that there was an erroneous impression that the company had received great assistance in that way. This was not the case. In Manitoba, Saskatchewan and Alberta they had constructed 2,255 miles of railway. From the Dominion Government they had received for that only $385,600 in cash and 2,616,960 acres of land. This acreage was a portion of land granted in the eighties to the Hudson's Bay Ry. when the land was not so valuable, and considerable of it was sold at its low value at that time. From the Dominion Government there had been received for the lines in Ontario $2,607,326, and from the Provincial Government $671,000 for the James Bay Ry., now part of the C.N.R. Taking the mileage, the C.N.R. had received less proportionately in Government aid in cash and lands than any other railway in the country. The Provincial guarantees of the bonds were of course of great help in financing the road, but the signing of these guarantees had not cost the different Governments a single cent. "We have been able to earn the interest on these roads as they are constructed," said Mr. Mackenzie, "and a great deal of the credit for that is due to our Third Vice-President, D. B. Hanna."

Mr. Mackenzie said it was less than three weeks since the new Canadian Northern Ontario Ry.'s line had been completed from Toronto to Parry Sound. They had been delayed by injunction and other proceedings from getting into the terminals, and that had only been just accomplished, enabling them to accept freight for carriage over the road. The line was now graded through to the famous Hutton iron range, 300 miles north of Toronto, which was now being developed. People from the U.S. who understood these questions told him that the developing of these mines would in course of time enable the establishment in Toronto of blast furnace rolling mills, steel mills, etc., and getting their raw material from the Hutton mines. The city would then be the manufacturing point in steel and iron for all the territory now tributary to it. He asked if it was in the interests of Toronto to have the Canadian Northern lines stationary or to continue them into the great country beyond, into what is commonly called the great clay belt of northern Ontario, lying between Lake Superior and James Bay. He spoke of the immense possibilities of this region, which surveys showed to be a timbered plateau full of agricultural possibilities, and urged that it was the duty of the Government to assist in every legitimate way in having it developed and thrown open for settlement.

"We have altogether a little over 4,000 miles of road," he continued, "distributed in Nova Scotia, Quebec, Ontario and the three western Provinces. We hope at no distant day to be able to connect this system up and to afford transportation for the products of the east to the west, and from the west to the seaboard. Some gentleman asked what about the west; I presume he meant west of Toronto. We expect in the near future to have our line from Quebec to Ottawa, and so soon as we are able to finance our line from Ottawa to Toronto we intend to put it in construction. Then it will be necessary to get to the manufacturing places in Ontario. Of course our plans are not fully matured and we are asking now for the necessary charters from Parliament. We hope in the near future to be able to lay down our lines to the different manufacturing centres of Ontario at least."

In conclusion, Mr. Mackenzie expressed his thanks for the material assistance rendered their enterprises by the Canadian Bank of Commerce. The bank had never been subjected to any risk in carrying their account, but the generous manner in which every reasonable facility had been afforded entitled the institution to their warmest thanks.

D. D. Mann, after expressing his appreciation of the honor conferred upon Mr. Mackenzie and himself, declined to consider it a personal tribute. It was paid by commerce to transportation. "While Mr. Mackenzie and myself," he said, "assumed the responsibility and care of the construction of the Canadian Northern Ry., credit is due to many, from the youth who trailed the surveyor's chain across the plains to the men at the head of the greatest banking institutions in Canada. In 1896, just ten years ago this month, we commenced to build the first 100 miles of the Canadian Northern Ry. To-day we have just 3,000 miles of railway in western Canada, or, in other words, sufficient mileage to more than reach from Montreal to Vancouver. In eastern Canada we have 850 miles of railway, making a total of about 3,800 miles, or we have constructed and acquired more than an average of a mile a day during the past ten years. The country tributary to the main line of the C.N.R. from a point about 50 miles east of Winnipeg, through the Provinces of Manitoba, Saskatchewan and Alberta, to the foothills beyond Edmonton, a distance of nearly 1,000 miles, is practically all a wheat-growing country. Every station on this portion of the line, with the possible exception of two, will be wheat-receiving stations. There is an abundance of natural rainfall and a soil as rich as any in the world. During these ten years we have established in western Canada 132 new towns, with a population of 65,000 people; that is, we have located this number of towns along the line of our railway, giving them a name, surveying and naming their streets, and, considering that the majority of these new towns are only from one to two years old, this will give you an idea of how western Canada is developing Of course, this is exclusive of the farming population tributary to these towns, and does not include the increased population in the towns and cities where there is more than one line of railway, such as Winnipeg, Port Arthur, Fort William, Brandon and Edmonton. During the last fiscal year homestead entries in the west have numbered 50,000, which at, say, 160 acres to each person, means that 8,000,000 acres have been taken as free homesteads. Government statistics show that during the last five years the population of the three Prairie Provinces has increased from 419,000 to 806,000, a gain of 92%.

"The great bulk of traffic originating on our western lines is grain, and the products of grain, eastward bound, and it is important that we should have our own line of railway into the industrial points in the east, to gather return cargoes for these grain cars westward bound. With this object in view we are building from Toronto to Moose Mountain, 300 miles, via Parry Sound, the mouth of French River and Sudbury. We intend to extend this line to Port Arthur, dividing the country between the C.P.R. and the G.T.P. We are also building between Quebec and Montreal, Montreal and Ottawa, and intend to connect Toronto with Montreal in the near future. It is also our intention to build westward through to the Pacific coast, making a continuous line of railway from tidewater to tidewater. I think I have said enough about railway enterprises, but I wish to impress upon you that it is only by having through lines from east to west and branches reaching to all industrial centres in the east that the internal trade of this country can be developed. Great as the prospects are for the future development of the west, there is no reason why Ontario should not continue to maintain the first place among the Provinces of Canada. While reaching out for trade in foreign markets be mindful of the fact that manufacturers in other countries are reaching out for the trade of your home market.

"We have established our head offices in Toronto. Up to the present we have had our clerical staff located here, but with the completion of the Canadian Northern Railway and the branching out of other roads from this city you will have the benefit of repair shops and other works, which will add materially to the population and trade of the city of Toronto."

Z. A. Lash, K.C., Premier Whitney, Hon. G. W. Ross, M.P.P., Mayor Coatsworth and B. E. Walker, General Manager of the Bank of Commerce, also spoke.

National Transcontinental Railway.

The report of the National Transcontinental Railway Commission for the year ended June 30, was presented in the House of Commons Dec. 10. The total expenditure for the year was $1,831,263, of which $352,191 was paid to the G.T.Pacific Ry. for surveys from Winnipeg eastward. There were 18 casualties in the survey parties during the year, chiefly from drowning. When District Engineer Almon and Transitman White, of section C, in the eastern district of Quebec, were drowned, the rest of the party refused to remain in the field. They were sent to their homes and a new party organized. The report of the surveys in District E, which extends from Abitibi to Peninsula Crossing, the point of junction with the Lake Superior branch G. T. Pacific Ry., to which point the Eastern Division (National Transcontinental Ry.) is under construction from Winnipeg, shows that 14 bridges of considerable magnitude will be required. Five of these will be 500 ft. long, and one 700 ft.

The report of the Chief Engineer, H. D Lumsden, which is incorporated, reaffirms the statements previously made that the gradient from Winnipeg easterly to the Atlantic seaboard will not exceed 0.4%, and westward the gradient will not exceed 0.6%. The curvature for the most part will be kept down to a minimum of 1,433 ft., except in a few cases where the radius is 955 ft.

The question of the route of the line into Moncton has not been finally settled, but a St. John despatch, Dec. 19, says, unofficial information indicates that the reports of the engineers favor what is known as the central route, reaching Chipman practically in a straight line, instead of along the valley of the St. John River. The central route is said to be somewhat shorter than the river route, offers better gradients and presents fewer obstacles to construction. Replying to questions in the House of Commons on the subject the Premier said the preliminary location surveys for the Quebec-Moncton section of the line had been made, and a portion of the revised survey, but the reports had not come to hand. With regard to the re-survey of the proposed routes from Grand Falls to Moncton, N.B., the Commissioners had not made any recommendation as to routes. The engineers of District A reported in favor of the back line, and preliminary surveys were completed between Moncton and Grand Falls, as the shortest and cheapest, but before finally deciding this matter it was considered advisable to have the first location made over both routes. This had been done and plans and estimates are expected to be furnished shortly.

The Chairman of the Commission stated in Quebec, Nov. 29, that the Commissioners expected by the end of Dec. to be in a position to ask for tenders for the construction of about 450 miles of line. Of this mileage, 50 miles would be from Levis, Que., southerly 100 miles from Moncton, N.B.; 40 miles northwesterly from La Tuque, Que.; and 150 miles from Abitibi.

The Minister of Railways spent Christmas in New Brunswick and a Moncton dispatch of Dec. 26, which was probably inspired, said:

WINTER TRANSCONTINENTAL SERVICE

1906
FALL CHANGE
OF TIME

DEPARTURE TIMES FROM TORONTO:

1.45 p.m. daily, "Western Express," for Winnipeg and the West runs as far as Calgary only.

11.30 p.m. daily, "Pacific Express," for Winnipeg, the North-West and Vancouver.

EASTBOUND, "Eastern Express" from Calgary, "Atlantic Express" from Vancouver.

General Offices: 43 Exchange Place, NEW YORK

"Advertisements will be issued this week, calling tenders for constructing portions of the eastern section of the Transcontinental Ry. between Moncton and Levis. Besides asking tenders for the sections between Levis and the New Brunswick frontier, tenders for constructing the following sections of the National Transcontinental Ry. will be solicited: From Moncton towards Chipman, 50 miles, will be the first section. The road will enter Moncton from north of Steeves Mountain and run almost parallel with the I.C.R. from east Berry's Mills. Tenders will also be called for the section in New Brunswick for a distance 62 miles from Quebec frontier towards Grand Falls. The route will be down to Baker's Brook and thence along the St. John River valley to Edmundston and following the valley to about 2½ miles from Grand Falls. Between the two sections named there will be in New Brunswick three additional sections, each 50 miles, tenders for constructing which will be called early in the spring, or as soon as the question of route has been finally determined."

The position of construction upon the line easterly from the Quebec bridge, shows that on the seven miles to Cap Rouge, a considerable amount of rock cutting will have to be done during the winter. The granite piers of the viaduct at Cap Rouge have been completed, except the two eastern ones, one of which is caisson work. The section from Cap Rouge to Belair, 13 miles, where a connection is made with the C.P.R., is expected to be completed by June. On the 14 miles between Belair and Jacques Cartier River, the grading is nearly completed, and it is expected that tracklaying will be commenced in the spring. The section from Jacques Cartier River for 33 miles is also well advanced, and the masonry work for the bridge across St. Anne's River is finished. The work on the other 127 miles to La Tuque is well advanced, and the abutments of nearly all the bridges are completed.

GRAND TRUNK PACIFIC RY.

The Vice-President and General Manager stated in an interview at Winnipeg, Dec. 18, that he was well satisfied with the work that had been done on the road during the past year. About 80% of the work the company set out to do during the year had been completed, and preparations had been made for larger works during the coming season. It was anticipated that not only would the arrears of 1906 be made up in 1907, but the whole of the work laid out for the year would be completed. The company was taking every precaution to provide against any scarcity of labor during the summer, such as there was during 1906.

Plans have been submitted for the approval of the Government for the line from Edmonton, Alta., through the Yellowhead Pass to Prince Rupert on the Pacific coast. The plans show the line over the summit of the Rocky Mountains will have a gradient of 0.4% and that no heavier gradient will be required to the ocean. The profile accompanying the location plans shows that there will be some heavy cuts and deep fills to ensure a line with so low a gradient. Engineers who are familiar with the Yellowhead Pass state that it is wide enough to provide routes for several lines.

Reports from Prince Rupert state that during the year five acres of land have been cleared and stumped; the whole district has been surveyed, and a hydrographic survey made of the harbor. The harbor is 16 miles wide, with a good entrance, straight and deepfor a width of over 2,000 yds., the water in the harbor averaging 25 fathoms in depth.

Canadian Northern Railway Construction.

Canadian Northern Quebec Ry.—The grading upon the cut-off from near Garneau Jct. has been finished to the crossing of the Batiscan River at St. Stanislas, Que., 12 miles. From this point to the crossing of the Charest River, 8 miles, the grading was expected to be finished at the end of Dec., with the exception of a few small cuttings. About half the grading has been completed on the section between the Charest River and the crossing of Ste. Anne River, at St. Casimer, 6 miles. Work is to be carried on continuously during the winter, unless the weather becomes too severe. Between the points mentioned there is considerable bridge work to be done, the substructures at the Ste. Anne and Batiscan Rivers are well under way.

We have since been advised that tracklaying has been started on the line from Garneau Jct., on the old Great Northern Ry., into Quebec, 8 miles; and on the line from St. Jerome, on the same line, to Morin Flats, Que., on the old Montford and Gatineau Colonization Ry., about 15 miles. The contractors are O'Brien and Mullarkey, Montreal.

In addition to the construction work on hand, there is projected a line from Montford Junction to Morin's Flats, Que., about 5 miles.

The point of junction of the old Great Northern Ry. with the National Transcontinental Ry., now known as Tawachiche, has been changed to Hervey Junction, and the station at Reed's Camp, where the headquarters of the N.T. Ry. survey parties have been located, has been closed.

Canadian Northern Ontario Ry.—The grading on the line between Hawkesbury and Rockland is practically ready for the rails. On the section between Rockland and Ottawa, the right of way has been laid out, and everything is in readiness for an early start at grading in the spring. The line into Ottawa, it is expected, will be completed and in operation early next fall.

The plans for the line from Ottawa into Toronto have been filed and show a route between the two points about 60 miles shorter than the present G.T.R. or C.P.R. lines. From Ottawa the line will run southwesterly as far as Cobourg, from which point it will parallel the G.T.R., and after passing about midway between Brooklin and Whitby will touch the lake near Dunbarton. It will reach Wetburn south of the G.T.R. tracks, cross Kingston road south of Norway and Queen St., Toronto, to Ashbridge's marsh, run along the north shore of the marsh to the Don, then northerly with a slight curve until it reaches the tracks upon which it will enter the Union Station limits. The approval of the Toronto Board of Control has been asked for the plans within the city limits.

The plans for the line from Ottawa to Key Inlet have also been filed, and have been approved of in part by the Board of Railway Commissioners. The plans show a line from Ottawa to Fitzroy harbor, then crossing the Ottawa River, running very close to Norway bay, Bristol and Portage du Fort. At this point it recrosses the river and cuts across the peninsula, of which Beachburg is the centre. Thence the line passes about 10 miles to the south of Pembroke, and traverses the height of land to Key Inlet, Georgian Bay.

Canadian Northern Ry.—The C.N.R. boiler room wing of the Winnipeg repair shops was destroyed by fire Dec. 7. The total loss, including a locomotive undergoing repairs, and the machinery, is estimated at about $100,000.

Plans have been filed at Ottawa for an extension from south of Neepawa, Man., to the point where the Edmonton line crosses the South Saskatchewan River near Saskatoon, Sask.

A survey is being made for a line from Battleford northeasterly to Prince Albert, the object of which is to connect the two main sections of the line, and so provide a short line from Edmonton with the line under construction towards Hudson Bay. Of this line, which starts at Etiomami, Sask., track has been laid for 43 miles, and the grading for the remaining 46 miles to Pas Mission has practically been completed. This will be finished and the line opened for traffic next season. The survey parties were reported to be still in the field between Pas Mission and Fort Churchill, at the end of Dec.

The steamboat Woods entered Fort William harbor on Christmas Day, having been towed from Port Arthur. This is the first instance of a steamer getting into Fort William so late in the season.

The C.P.R. overseas mail train made its first run from St. John, N.B., to Vancouver, B.C., with the China-Japan mail, in 86 hours 55 minutes, the run from Montreal to Vancouver being accomplished in 75 hours.

The Intercolonial Ry., with a view of effecting a speedy delivery of mails and passengers between the trans-Atlantic steamers and Montreal, has put on a special train to run from Halifax, N.S. The first train made the run in 22 hours, but it is expected to cut this time to 20 hours or less.

Hon. R. L. Borden has given notice in the House of Commons that he will move for the appointment of a select committee to enquire into the management and operation of the Government railways, and whether it is feasible to establish a better system of administration, free from the influence of party politics and based on sound economic and business principles.

The Brotherhood of Maintenance of Way Employes concluded its annual convention at Toronto, Dec. 6. The officers elected for the current year include A. B. Lowe, Kingston, Ont., First Vice-President; A. F. Stout, Ivanhoe, Ont., Third Vice-President. The first named was also elected Chairman of the Executive Committee. The next convention will be held at New Orleans, La.

The car line committee which will have charge of the new per diem arrangement agreed upon at the recent meeting of owners in Chicago, Ill., consists of A. Hale, General Superintendent of Transportation, Baltimore and Ohio Rd.; F. A. Delano, President, Wabash Rd.; and J. Kruttschmitt, Director of Operation and Maintenance, Southern Pacific and Union Pacific. The new per diem charge is 50 cents a day, and the penalty for holding cars more than 30 days has been abolished. The new charges become effective Jan. 1, but do not affect all railway companies signing the original agreement.

A proclamation has been issued by the Governor-in-Council under the terms of sec. 6a, which was added to the Railway Act, 1903, by sec. 2, chap. 32, of the Dominion Statutes of 1906, confirming acts of the Ontario and Manitoba Legislatures dealing with the prohibition or regulation of labor upon the first day of the week, commonly called Sunday, as follows: Sec. 193 of the Ontario Railway Act, 1906, and so much of sub-section 4, sec. 197 of the same act as provides that no park or pleasure ground within the the purview of said subsection 4 shall be used for games, picnics, concerts, excursions or other public entertainments on Sundays; and sec. 22a of chap. 51 of the acts of the Legislature of Manitoba of the last session

TRANSPORTATION APPOINTMENTS.

Alberta Ry. and Irrigation Co.—E. A. Cunningham, Purchasing Agent and Storekeeper, has resigned.

Algoma Central and Hudson's Bay Ry.—C. L. Vaughan, Car Accountant and Trainmaster, has resigned.

P. Robinson, heretofore Chief Dispatcher, has been appointed Trainmaster and Chief Dispatcher. Office, Sault Ste. Marie, Ont.

D. J. Graham has been appointed Car Accountant. Office, Sault Ste. Marie, Ont.

Canadian Northern Ry.—O. H. Clarke, K.C., has been appointed solicitor at Winnipeg for the company's western lines. Munson, Allan, Laird and Davis will continue to act as counsel for the lines west of Lake Superior.

Canadian Pacific Ry.—I. Roth, travelling passenger agent, has been transferred from Quebec to St. John, N.B., for the winter.

W. Stitt, heretofore General Agent, Canadian Australian Steamship Line, Sydney, N.S.W., has been appointed General Passenger Agent, Eastern Lines, C.P.R., vice C. E. E. Ussher, promoted. Office, Montreal.

F. B. Zercher has been appointed foreman passenger car shops, Angus, Montreal, vice C. F. Rydberg, promoted to be Superintendent of the car shops.

Jules Hone, jr., now deals with passenger business only and has the title of City Passenger Agent at Quebec, instead of City Passenger and Freight Agent as formerly.

A. Marchessault has been appointed travelling fireman for the Eastern Division, with headquarters at Montreal.

A. J. Holtby, heretofore locomotive foreman at Cartier, Ont., has been transferred to Ottawa, Ont., vice T. Hudson, resigned.

The Ontario Division has been divided into three districts instead of two. District 1 comprises main line from Smith's Falls to Leaside Jct., with branch from Burketon to Bobcaygeon, J. R. Nelson, Superintendent, Toronto. District 2 consists of the London and Windsor sections, Ingersoll, Port Burwell and Goderich branches, C. Murphy Superintendent, with office at London instead of Toronto, as heretofore. W. A. Killingworth, Chief Dispatcher, has also been removed from Toronto to London, with two sets of dispatchers. District 3 comprises the Owen Sound section, the Orangeville, Teeswater, Wingham, Elora and Muskoka branches, the Hamilton section and Toronto terminals. A. L. Smith, heretofore Inspector of Train Dispatching, has been appointed Superintendent, with office at Toronto.

E. A. Freeman has been appointed locomotive foreman at Cartier, Ont., vice A. J. Holtby, transferred to Ottawa, Ont.

M. J. Gorman has been appointed travelling fireman for the Lake Superior Division, with headquarters at Schrieber, Ont.

C. E. E. Ussher, heretofore General Passenger Agent, Eastern Lines, Montreal, has been appointed Assistant Passenger Traffic Manager Western Lines. Office, Winnipeg.

W. A. Wells has been appointed travelling passenger agent at Winnipeg, vice C. A. Folwell, transferred to Vancouver ticket office.

D. E. Brown, heretofore General Agent for China, Japan, etc., at Hong Kong, has been appointed General Superintendent Trans-Pacific Steamship Service. Office, Vancouver, B.C.

J. M. Griffin is reported to have been appointed District Freight and Passenger Agent at San Francisco, vice M. M. Stern, resigned.

D. W. Craddock, heretofore chief clerk in the office of the General Agent for China, Japan, etc., has been appointed General Traffic Agent for China. Office, Hong Kong.

Central Ontario Ry.—The position of Receiver, held by Geo. Collins, Manager, has been abolished.

Grand Trunk Ry.—J. W. Farrell, heretofore Train Dispatcher, has been appointed Chief Train Dispatcher at Island Pond, Vt., succeeding E. A. Cabana, resigned.

G. Mansfield has been appointed chief clerk to the local freight agent at Toronto, succeeding W. E. Ireland, resigned to enter the Canadian Northern Ontario Ry. service.

W. Armstrong, heretofore train dispatcher, has been appointed Chief Train Dispatcher at St. Thomas, Ont., succeeding J. A. McLardy, promoted.

G. W. Alexander, heretofore Paymaster, has been appointed Local Treasurer for lines west of Detroit and St. Clair rivers, vice J. H. Muir, deceased. He has also been appointed to the several positions held by Mr. Muir with the individual companies forming the western portion of the system, viz.: Secretary and Treasurer G.T. Western Ry. Co., Detroit, Grand Haven and Milwaukee Ry. Co., Toledo, Saginaw and Muskegon Ry. Co., G.T. Junction Ry. Co., Grand Rapids Terminal R.R. Co., and G.T. Milwaukee Car Ferry Co., and Secretary Chicago, Detroit and Canada G.T. Junction Ry. Co., Michigan Air Line Ry., St. Clair Tunnel Co., and International Bridge Co. Office, Detroit, Mich.

The following agents have been appointed: Richmond, Que., J. J. Anderson; St. Madeline, Que., A. J. Bellisle; Beaconsfield, Que., A. E. Alguire; Kingston (Freight), Ont., C. Summerby; Mariposa, Ont., D. F. Milloy; Craigville, Ont., C. Gordon; Barrie and Allandale, Ont., A. Donnelly (acting); Washago, Ont., P. W. Hancock; Sundridge, Ont., W. G. McCormack; Colwell, Ont., T. A. Wickett; Ridgeway, Ont., J. T. Cameron; Port Rowan, Ont., W. G. Livingstone; Hickson, Ont., A. Clark; Neustadt, Ont., A. J. Madjett; Newton, Ont., F. Newman; Barrys Bay, Ont., H. B. Partridge; Rose Point, Ont., J. Beaton.

Huntsville, Lake of Bays and Lake Simcoe Navigation Co.—W. Duperow, General Manager and Secretary, has resigned. S. H. Jacobs, heretofore Assistant General Manager, has been appointed General Manager, with charge of operation of the steamboats. W. J. Moore, heretofore with the Rathbun Co.'s mills at Gravenhurst, has been appointed Secretary, with charge of office and transportation business. J. McKee has been appointed Treasurer. Office, Huntsville, Ont.

Intercolonial Ry.—E. H. Allen, Claims Agent, is reported to have resigned.

National Transcontinental Ry.—T. S. Armstrong, Assistant District Engineer, District E, Kenora, Ont., has been appointed District Engineer at Nepigon, Ont., succeeding the late C. E. Perry.

J. A. Heaman, engineer in charge Division 5, District E, has been appointed Assistant Division Engineer.

New York Central Lines.—The following appointments have been made: C. J. Grammar, Vice-President in charge of Freight Traffic; C. F. Daly, Vice-President in charge of Passenger Traffic; and J. A. Place Vice-President in charge of legal matters.

C. F. Daly has also been appointed a Vice-President, Lake Shore and Michigan Southern Rd., and the Michigan Central Rd., with charge of the passenger departments.

A. H. Harris, heretofore General Counsel N.Y.C. Lines, has also been appointed a Vice-President of the L.S. and M.S. Rd., and M.C. Rd., with charge of the law departments.

H. B. Mitchell, heretofore Freight Traffic Manager, N.Y.C. Lines West, Chicago, Ill., has been appointed Freight Traffic Manager N.Y.C. Lines East, with office at New York City.

Wabash Rd.—C. H. Stinson, heretofore chief clerk to the General Traffic Manager, has been appointed Assistant General Freight Agent, with charge of fast freight lines, succeeding F. E. Signer, resigned.

Alberta Railway and Irrigation Co.

At the annual meeting in London, Eng, recently, Col. K. R. B. Wodehouse Vice-President, who was in the chair, in opening the meeting, said he regretted to inform the shareholders that the health of the President, E. T. Galt, had been severely impaired for some time past and it was impossible for him to be present. He was under medical treatment and it would be some considerable time before he was able to resume the cares of office. He was sure shareholders would share the sympathies of the directors and endorse the hope that the company would soon have the President again at the helm of affairs, fit and strong. Referring to the accounts, which were published in full in our Dec. issue, the Vice-President said, under the heading of liabilities to the Dominion Government, there was $514,583 due in respect of the 500.000 acres of land taken over at the time of the amalgamation; as to the item of sundry creditors, $384,372, the principal items were Brainerd-Cobley land suspense account, $45,908; interest on prior lien and 5% debenture stocks payable July 1, 1906, $85,162, and various railway companies, $92,565. There was the land suspense account of $433,548. On June 30 the company had 762,186 acres of land remaining unsold, of which 155,000 were irrigable and 607,186 non-irrigable. The minimum selling price had been increased to $20 an acre for irrigable and $5 an acre for non-irrigable lands. The amounts received from the land sales are treated as follows: First, there are the free lands which were taken over from the old irrigation company. The inventory price of $4 is first deducted, then the balance remaining is divided; 50% is placed to a reserve account, which is intended to meet any loss arising by sales below the inventory price. The remaining 50% is carried to revenue suspense account. The amount of this latter is carried to revenue as received in cash. Secondly, there are the trust lands—namely, lands covered by the trust deed. All money received for these must eventually go towards redeeming the debentures. The estimated net profit resulting from all these land sales amounted during the year to $343,960.03, and that after deducting $32,836 23 for commission and land expenses, which are all charged in the first year, the portion applicable to this year's revenue was represented by $4,587.79, now carried to the revenue account, the balance remaining in reserve to be dealt with as outstanding instalments are received. The company has an interest with the C.P.R. in the disposal of 100,000 acres belonging to that company, of which there have been sold during the past year 57,920 acres, earning the A R. & I. Co. a profit equal to $2.10 an acre. After having gone over the figures on the assets side of the account, the Vice-President referred to the gift by the company of a site of 320 acres near Lethbridge, to the Dominion Government for an experimental farm, and concluded by moving the adoption of the report and the statement of accounts. This was seconded by W. Burdett-Coutts, M.P., and agreed to.

Col. Wodehouse was re-elected a director by special resolution, and by a second resolution the following directors were re-elected: E. T. Galt, A. M. Nanton, E. S. Clouston, J. Galt, W. Burdett-Coutts, M.P.; J. H. Dodgson, W. M. Ramsay and E. Waterhouse. The resolution as to these latter directors was seconded by C. Lock, who in the course of his remarks said: "I have been connected with this company from its very inception, and I know what a dark and dreary time it passed through for the shareholders, and all who were interested in it in its early history. I know also that the present position is due entirely to the initiative of those directors

ROYAL MAIL TRAINS VIA

INTERCOLONIAL RAILWAY

CANADA'S FAMOUS TRAIN

THE MARITIME EXPRESS

Leaving Montreal 12.00 noon Fridays, carries the European mail and lands passengers, baggage and mail at the steamer's side, Halifax, the following Saturday. Baggage checked through to Liverpool, England, from Montreal, Quebec, etc.

SPECIAL TRAINS. When inward bound mail steamers at Halifax do not connect with the regular train—Maritime Express, westbound—special train, with through sleeping and dining car attached, for passengers, baggage and mail, will leave Halifax for Quebec and Montreal, connecting with trains for Ottawa, Toronto, and all points west.

HEAD OFFICE AND WORKS: **SYDNEY, CAPE BRETON, CANADA**

who were on the Board then. We have had some new ones appointed since, but our present position is due to the foresight and acumen of those directors. Our property consists of a colliery and a large tract of prairie, which was practically unmarketable, and with which nothing could be done. Those gentlemen conceived the idea of tapping the waters of the adjacent rivers, and irrigating the property, with the result that land which was unsaleable at any price has been converted into property selling at $13, and now at $20. On the prairie the back-land has been rendered somewhat more accessible and valuable for agriculturists and pastoralists. These results are due, in my opinion, entirely to the conception of the irrigation scheme, and the credit for that scheme rests on the shoulders of Mr. Galt and the gentlemen who sit here."

The remuneration of the directors for the year ended June 30, 1906, was fixed at £2,000, and a similar amount was voted then for the current year.

The C.P.R. has inaugurated a fast freight service, leaving Toronto Junction, Ont., every Monday at 11 p.m., and reaching St. John, N.B., at 3.30 p.m. Thursday, in connection with the winter sailing of steamers from that port.

The Ontario Railway and Municipal Board has decided that a steam railway is not liable for the business tax under the Ontario Assessment Act. The decision was given upon the appeal of the C.P.R. against the assessment of its property in Galt, Ont.

F. H. McGuigan, Fourth Vice-President G.T.R., has been elected a member of the Executive Committee of the Bureau for the Transportation of Explosives. This committee will act until the annual meeting, which it was decided should be held in Feb.

During the visit of the Canadian Ticket Agents' Association to Mobile in November H. G. G. Donald, lumber exporter of that city, formerly of St. John, N.B., and a brother of J. W. Donald, D.P.A., Chicago, Alton Rd., Detroit, Mich., entertained a party of members of the association and their wives, giving them a trip in his steamer around the harbor.

The C.P.R. has decided to introduce Japanese attendants on its transcontinental trains between Montreal and Vancouver, for the purpose of rendering similar services on first and second-class cars as are rendered by the porters on sleeping cars. This will relieve the brakemen of certain of the duties now discharged by them and enable them to give their undivided attention to the working of the trains.

The Ottawa Valley Development Co. is the title under which an act of incorporation is being asked at the current session of the Dominion Parliament by interests represented by O'Meara and MacInnes, solicitors, Ottawa. The company desires to have power, among other things, to construct tramways or electric railways, telegraph and telephone lines, wharves and docks, and to carry on a general navigation business.

Steam Railway Track Laid in 1906

In accordance with our annual custom circulars were sent in December to all railway companies in Canada, asking particulars of track laid during 1906. Below is a compilation of figures received, showing that the total length of new track, exclusive of second track and sidings laid during the year on steam railways from which reports have been received, was 1,165.35 miles. The figures given for the C.P.R. western lines include only such mileage as had been handed over to the operating department during the year, and do not include any lines upon which rails may have been laid, but upon which the ballasting and other work had not been completed. The C.P.R. subsidiary line, the Minneapolis, St. Paul and Sault Ste. Marie Ry., laid 123.80 miles of track in the U.S. during the year, and the Great Northern Ry., U.S., through its subsidiary company, laid 27 miles, from Molson to Oroville, Wash., in connection with the Vancouver, Victoria and Eastern Ry.

A meeting was held at Halifax, N.S., Dec. 12, for the purpose of considering a proposal to establish car works in that city. It is proposed to raise a capital of $250,000 in $100 shares, and to ask the city to guarantee the bonds of a company to the extent of $125,000. A considerable amount of stock was subscribed at the meeting. The City Council at a meeting held at a later date decided to guarantee the bonds as asked.

STEAM SHOVELS

The New Model Vulcan Heavy Duty Steam Shovels are substantially built throughout, with every part of sufficient strength to withstand the heaviest strains. All gears, pinions and racking have cut teeth. Built in sizes from 22 to 110 tons and 5/8 to 5 cubic yards dipper. Ask for catalog.

The Passenger Department of Canadian Steam Railways.

By G. T. Bell, General Passenger Agent, Grand Trunk Railway.

In the beginning the passenger department had little or no individuality. It was merely an attachment to the general manager's, general superintendent's, auditor's, or some other office. This was natural when the railways were small, and all that seemed necessary was to issue a tariff of fares to several local stations and place it and some card tickets in the hands of a few agents and conductors. As the traffic developed, however, and the railways commenced to spread over the entire country and enter into friendly alliances with connecting lines in the U.S. and Mexico, the largest stations required ticket agents thoroughly qualified to advise as to the most inexpensive and comfortable, or luxurious and generally attractive routes available to reach everywhere in his own and adjacent countries, and even across the oceans to Europe, Asia, Africa, and the Islands of the Seas. Passenger agents became necessary at principal stations to aid in the reception at one train and transfer to another of ladies travelling alone, the young, the aged and the inexperienced. The way-freight and mixed trains that sufficed to move together the passengers and their goods were gradually replaced by exclusively passenger trains, and these rapidly supplemented by limited trains making stops at principal stations only, and restricted in the number and class of cars hauled, as required by the speedy schedules. Elaborate ticket offices were soon provided in the heart of the chief cities, and in many cases in smaller places, at which reservations may be made in advance of sleeping and parlor car, steamer, and other accommodations; trips are suggested and their time and cost considered, and full information imparted, all designed to make travel pleasant and encourage everyone to benefit by the educational and other advantages which it affords. An army of travelling passenger agents are employed to solicit the patronage of the public at home and abroad; those who hesitate are assisted to make up their minds, parties are organized and accompanied, tons of literature distributed gratuitously, telling of the country traversed by or tributary to the railway, and passenger traffic is promoted by every legitimate and ingenious effort. For more effective work, district or division passenger representatives were appointed, who could more closely study and keep in touch with conditions within their territory. The representatives are kept in harmony with the railways' general policy by continuous consultation with the general passenger agents, and the growth of many railways into large systems has necessitated several general passenger agents for one system, who report to a passenger traffic manager, the latter being in command of the passenger department and responsible to the president, or sometimes to a vice-president, who directs both freight and passenger departments.

I have briefly traced the organization of the passenger department as it to-day exists, and it may be of interest to say something of the nature of the duties performed by the staff at headquarters. The main divisions of this staff are: 1. Tariffs and tickets. 2. Excursions. 3. Advertising. 4. Immigration and colonization. 5. Statistics. 6. Accounts. 7. Refunds.

I presume the majority of persons have no idea of the labor and expense necessary to provide ticket agents with the fares, tickets, and instructions in relation thereto required to expeditiously and correctly sell tickets of many different classes to practically all places of importance the American Continent over, in round numbers, 250,000 miles of steam railway tracks, and, in addition, over numerous lake, river, and ocean navigation lines. Local tariffs on the principal railways with large mileage are issued in divisions, the fares from each station on the division to every other station on the same division being carefully shown, calculated on the mileage at the legal or maximum rate per mile authorized by the railway company's charter or approved by the Railway Commission. Competitive fares of other lines must be watched and met where it can be done judiciously without lowering the local fares to an unprofitable extent. If there are 100 stations on a division the total separate fares to be calculated and printed in the local tariff of that division would be 10,000. To facilitate the issue of tickets from a station on one division to any other station on the same railway, each agent is provided with an inter-division tariff, which contains fares from junction stations on each division to all stations on the railway which, by one addition of the fare to and from the junction, readily gives any local fare required. The division tariffs are prepared with the view of embracing in the same tariff all stations between which the volume of traffic is large or naturally flows, and to reduce to a minimum the necessity of adding fares to and from junction stations. Conductors are provided with tariffs of fares of a size and character suitable to their various runs. To stations on connecting lines the practice is, as far as practicable, to select a compiler of common tariffs in behalf of a group of lines more or less interwoven as connections or competitors, or both, in a certain section, or from important cities like Montreal, Toronto, Winnipeg, etc., to stations on other groups of lines, or in many cases to principal stations on all connecting lines, the fares being arranged by classes, and to every state, province, etc., in alphabetical order. This work of compiling and printing interline tariffs is aided greatly by the lines in various sections acting together in publishing their fares from basing or constructive stations through territorial traffic organizations. Each railway requires an elaborate chart of forms of interline tickets for guidance of ticket agents, detailing the lines and innumerable combinations of lines forming through routes to all parts of the country. Principal ticket offices have a complete supply of interline tickets applicable from their stations; other offices have a supply of only such forms of interline tickets as are likely to be frequently requested, and if asked for other forms use an exchange order, which designates the route, number, and class of the required interline ticket, which is furnished to passenger at the nearest convenient exchange office, a list of all such offices being in possession of each ticket agent. The use of the exchange order enables agents at small stations to give the public the benefit of through fares, as well as get their baggage checked through to destination. The charts and tariffs, especially those to stations on connecting lines, are subject to many changes, owing to new lines being opened, old lines extended, and consolidations between existing lines, requiring new tickets, withdrawal or alteration of old tickets, fares to new stations, changes and fares to old stations, etc. Some idea of the expense of printing tariffs and tickets may be gained by the fact that a railway company operating between New York and Chicago recently had occasion to reprint its local passenger tariffs, the total cost being approximately $15,000, and that one railway of 3,200 miles of track, handling about ten million passengers each year, pays for printing its tickets about $20,000 per annum.

In addition to the tariffs already alluded to, which apply to what may be termed ordinary passenger traffic, or, in other words, fares which are in force daily throughout the year, for one way tickets for single passengers, a great many special tariffs are required to provide for reduced fares below the maximum basis, given by the railway companies with the object of creating travel that otherwise would not move at all or in much smaller volume. The following will serve as examples of such special tariffs: 1. Round trip tickets on sale daily at 16⅔% less than double the one way fare, valid for one month. 2. Round trip tickets on certificates for persons attending meetings of regularly organized societies. These reduced fares vary according to total attendance from about the one way fare to one and one-third fare for the return journey. The railways in Ontario and Quebec grant reduced fares for 200 or 300 of such meetings each year. 3. One thousand mile tickets, the general rate being $25, which is 2½c. per mile. 4. Organized parties of 10 or more at one and one-third fare for round trip, or two-thirds fare when circuit (going one way and returning another), is being made. 5. Members of commercial travellers' associations who travel constantly for at least three months each year, 2¼c. per mile for one way tickets, and week-end round trip tickets at one way fare. About 20,000 members of five Canadian commercial travellers' associations benefit by this reduction. 6. Cricket, lacrosse, baseball, hockey, curling, and other organized clubs, in addition to reduction already stated for organized parties of 10 or more, are accorded 10 to 18 round trip tickets, for actual players, at one way fare. This is to encourage such clubs to make long trips, which many amateur clubs, comprised largely of young men of limited means, otherwise would hesitate to take. 7. Charitable homes for deaf and dumb, blind, etc., 2c. per mile. 8. Theatrical and concert troupes, bands, orchestras, lecture, and other organized parties of ten or more persons professionally engaged in giving public entertainments, 2c. per mile. 9. Guaranteed parties of 100 or more under auspices of organized associations, clubs, societies, churches, Sunday schools, mercantile firms, etc., at fares netting from 2c. per mile for short distances down to about ½c. per mile for longer distances. The associations, etc., are permitted to sell tickets at certain higher fixed rates, averaging about 20%, which is paid to them to cover the necessary advertising expenses, etc., and to aid their benevolent and other funds, which is a valuable incentive and materially promotes the success of such excursions. The rates are generally higher where these excursions are run in the winter, when operating expenses are greater and the number inclined to travel smaller; also if run to commercial centres at any season, as they naturally discount the regular business travel to such centres. 10. Military bodies of 100 or more, in uniform, ¾c. per mile. Such organizations usually stimulate general excursion travel to the place they visit. 11. Celebrations, demonstrations, regattas, political meetings, etc., round trip at one way fare; but as experience has shown few extra passengers are attracted to ordinary events of this character; where the one way fare exceeds $2.50 reduced fares are restricted to that limit. 12. Civic holidays, at one way fare for round trip from the stations celebrating the holiday. 13. Agricultural exhibitions, generally, round trip at one way fare, and, in addition, on certain days to large exhibitions in incorporated cities, offering exceptional prizes, attractions, etc., about two-thirds one way fare for round trip. 14. Sportsmen in parties of five or more on shooting and fishing ex-

peditions to restricted territory, one and one-third fare. Such trips are generally longer and more expensive than the average of other special parties, and it is more difficult, therefore, to organize parties of ten or more. 15. School and college vacations at Christmas and Easter of non-resident pupils and teachers returning to their homes, round trip tickets at one and a third fare. 16. Public holidays, such as Christmas and New Year's, Good Friday, Victoria Day, Dominion Day, Labor Day, and Thanksgiving Day, round trip tickets at one way fare, with several days' time limit, and at one and one-third fare with longer limits. 17. Commutation fares between cities and suburban stations where a large number of persons reside who travel daily to and from their place of business, from about six-tenths of a cent to 1½c. per mile, according to distance and restricted privileges of tickets—the lowest rate applying to such tickets as are valid for one person only who must average one round trip daily. The minimum for a single trip is 5c.

Excursions local to a district are generally arranged by the district or division passenger agent, who deals direct with the public, takes guarantee, orders tickets, notifies the transportation department of the train and probable coach requirements, instructs agents as to sale of tickets, and advises the general passenger department of the completed arrangement, which, in turn, is transmitted to the auditor of receipts, who checks agents' ticket reports, prepares and furnishes to the general passenger department statement of sales and rebates due to promoters, voucher for which is then made and passed to the treasurer, who remits or instructs agent to pay the amount. If the excursions pass over connecting lines the negotiations with and advices to and acknowledgments from such lines are handled by the general passenger departments of the various lines concerned. The utmost care is necessary to see that every detail is understood in advance by each person responsible for any part of the excursion, as a slip anywhere might cause serious inconvenience and discomfort to a large number of persons. It is the exacting, unimaginative side of the passenger department, for mathematical accuracy must govern every move, yet the great variety of organizations and greater variety of promoters and patrons—comprising all classes of the social structure—afford some relief from the otherwise continuous strain of the excursion work, more especially during the summer months. On the intelligent, energetic, careful efforts of the excursion staff much depends in the way of developing traffic, by directing attention to new resorts which the public are constantly seeking and by co-operating with the transportation department in handling successfully each party, thus causing them to desire to repeat the pleasing experience.

A few weeks ago J. J Byrne, the head of the passenger department in California of one of the greatest U.S. railways—himself a former Canadian railway employe—in addressing the general passenger agents of America, used these words: "Unrest is the seed of passenger traffic, and you are the sower. If you have an inland town, give the people a chance to get to the ocean or to the lake; if you have a flat country, give them a chance to go to the hills or mountains; if you have a hill country, coax them out to the fertile plains. . . . . Show the city man the country, and paint its green hills and babbling brooks till he can't resist. Lecture the farmers on the lure of the city, its glittering lights and gilded palaces of amusement. Preach the belief that travel is the great educator; make parents feel that the children should be educated away from home, and make the children long for the delights of home. Hang fine pictures of distant scenes in the school room; thus the teacher will be constrained to go, that he may explain it to his pupils. By travel the minister can find themes for his sermons, and the lawyer find modern instances. Picture to the sturdy the charm of the place at the other end of your road for golf, or boating, or bathing; to the hunter tell of the game just $10 distant from where he is. East of the Rockies no fish are caught equal to those near Catalina or in the Columbia; on the Pacific Coast the best fish are in the Atlantic or Gulf. Distance, not time, is the great healer of sorrow, and change is as good as a rest."

(To be continued in next issue.)

ELECTRIC RAILWAYS.

Electric Railway Shop Practice.

By W. R. McRae, Master Mechanic, Toronto Railway.

Probably there is no department of electric transportation which has so completely changed its methods as the repair shops of a modern electric railway. A glance into the procedure and equipment of a modern electric railway shop by one who has worked in the old days of risk and chance, but who is not now engaged in electric railway work, will cause the "has been" to figuratively scratch his head, and recall memories of the old days when he was up against it. He would very likely tell you how he used to remove the armatures from the motors by using a tripod and rope block, or took them out from below with the aid of a screw jack and two inch plank. He would also probably tell you how he was accustomed to file his commutators perfectly round by hand. He could if he wished describe many other things which he used to do, which to the shop man of the present day would appear ridiculous. The writer knows from his early experience, that these methods were in the early days of electric transportation necessary; in fact, the handy man was practically indispensable; as his duties would not only require him to do electrical repairs, both to cars and power station, line and track work, and not unusually run a car, but he was very often obliged to attend to the boilers, and also look after the engine in the event of the illness of the regular engineer. Circumstances are now altered, and the fact that electric transportation is no longer an experiment, but an important factor in the business of the world, has enabled us to secure more modern methods in repair work. As a matter of fact, the necessity of having modern and reliable equipment in our rolling stock is fully recognized by the managers of all enterprising roads. To properly maintain equipment such as that mentioned above, it is absolutely necessary to have the repair department equipped with the very best of machinery and tools. It is also essential that the shops should be laid out in a proper manner. Other important points are the securing of proper repair material, and the employment of the right kind of men to do repairs. In the matter of shop construction, the building of proper pits is of great importance, as lack of pit room in shops is a great drawback. I would strongly recommend that all barns, storage houses, and repair shops, be designed for all tracks to be laid over pits, as this not only facilitates repair work, but also motor and truck inspection. It is also well to have a number of pits designed for the removal of wheels. The installation of hydraulic pit pumps, air hoists and swinging cranes, is also strongly recommended. The use of compressed air is now largely practised in modern railway shops for the purpose of operating pneumatic tools, the cleaning out of motor cases, and the operating of vapor painting. Patterns, jigs and templets for the manufacture of all standard repair parts, should be procured, and kept in the tool room of the various departments engaged in the manufacture of the different parts. The subject of standard equipment is a question which I consider to be one of great importance, and repair men will heartily welcome the day when it will be necessary to keep only one type of repair parts for all equipment. For some years electrical and mechanical officers of the different roads have been endeavoring to reach some uniform system of repairs and repair parts, and I have pleasure in stating that their efforts have to a certain extent been rewarded. This success is largely, if not entirely, due to the formation of associations which meet at stated intervals, for the discussion of methods of maintenance, as well as by the question box system, and of course by correspondence. This system of exchanging ideas has entirely eliminated the feeling which repair men had some years ago, namely, to say nothing, and let the other fellow find out by experience. We of the Toronto Railway are very proud of our shops and, without boasting, may say that we have cause to be, as taking into consideration the size of our system, and the number of cars operated, we have shops that are as up-to-date as any in existence to-day. We have endeavored to keep our shops in such a condition as to be able to meet any demands which may be made upon them at any future period; of course, within a reasonable time. On the question of general shop practice, the field for discussion is so large that it is only possible for me at this time to touch on a very few of the methods in vogue in our shops.

First, I will mention the machine shops. This department is equipped with the most modern machinery that can be obtained. Templets and jigs have been manufactured in our own shops for the purpose of turning out work with speed and accuracy. In this department, as well as in other departments, the apprenticeship system is in vogue, and we have been able by means of fair treatment to retain the services of our graduated apprentices. These men are so perfectly familiar with the articles with which they are called upon to work, that they are able to turn them out much more quickly than would be the case were we to engage men from the outside and break them in. A sufficient number of skilled mechanics from outside sources are engaged to enable us to handle any and all kinds of machine work which may be required to be manufactured in our machine shops. One of the very important articles which is turned out from this department is the motor brush-holder. I may say here that all brush-holders go through this department before being used on motors, whether they be new or repaired. The proper commutation of current to the armature is one of the very important factors in connection with the securing of efficiency in the motor equipment. By this I mean the proper spacing of brushes, and the angle at which they are set on the commutator. We in Toronto have had a great deal of trouble with our motors, arising from the improper setting of the brushes, and caused by the wooden brush-holder yokes shrinking, and also the brush-holders being set at the wrong angle to properly follow the natural wear of the commutator. To overcome this difficulty, I have had constructed a jig, on which all complete brush-holders and yokes are adjusted before being issued to the motor supply department. This jig consists of a metal bed plate to which is bolted a cylinder, the same size in diameter as an average commutator. In the centre of

this cylinder is a post about four inches in diameter; the cylinder is slotted to receive a steel insert the same size as a carbon brush; the post is also slotted for the steel insert to enter into, and an adjustable bracket is also bolted to the bed-plate to permit the regulating of the distance between centres of the different types of motors. The completed brush-holder is then bolted to this bracket, and if correct, the steel inserts will easily pass through carbon holder, cylinder, and pocket home in slots in the centre post of the jig. By this means proper distances and angle are secured. We use for our brush-holder yokes the best of kiln-dried hard maple, which is kept in storage two years before using. This practically overcomes the trouble caused by shrinkage. A special jig is also used which permits of drilling brake hangers for seven different types of trucks. All hangers of similar lengths are absolutely the same centres. This is very important, as it ensures the correct hang, and longer life to the brakes shoes. It also assists in overcoming the chattering of hangers when the brakes are applied.

In the matter of motor maintenance, we in Toronto have made a special study of the causes which lead to motor breakdowns, and, on their location, have gone systematically to work to overcome and find a remedy for them. I am pleased to state that the officials of the manufacturing companies have worked heartily and harmoniously with us in this matter. The setting of a standard for brush-holder spring tension is also important to ensure the best results from commutator wear.

Too much attention cannot be given to the subject of motor bearings. The best of metal obtainable is none too good for this purpose, as probably no piece of machinery is subject to so much abuse as railway motors, and especially is this true of the bearings. As regards lubrication, oil is rapidly taking the place of grease; in fact, it may be safely said that the days of grease lubrication are practically past. All modern motors are designed for oil feed bearings, and several good oil cups have been placed on the market for the older types of motors. I strongly advise electric railway men to look well into the matter of the lubrication of equipment, as neglect in this respect leads most directly to the coal pile and increased operating expenses. I sum up the motor situation thus: Be sure of the condition of armature and field windings, have proper air gaps between magnets and armature, brush-holders correctly set to follow the wear of the commutator, keep bearings well lubricated, motors clean, and there is no reason on earth why a motor should be pulled apart more than once in eight months for overhauling, except for some such cause as lightning, or mechanical injury. Regarding practice in armature and field department, space will not permit of my going into details, suffice to say that I consider this department the most important in connection with the repair shops. In the matter of up-to-date appliances we have treated it accordingly, and results have proved the wisdom of this liberal treatment. In our shops we are able to trace back to the man who made or repaired any article in the works which does not turn out satisfactory. This system has given most beneficial results. Touching on the matter of car records, I cannot too strongly impress upon you the necessity of keeping a separate record of the performance of every car upon your road. Quite often it is found that instead of your cripples being different cars, you will find by individual records that it is the same cars which are continually running in for repairs. Thus you are given an answer to the question, Which car shall be overhauled next?

I would suggest the following matters for discussion: The advisability of placing automoteneers or devices on controllers to regulate operation by motormen. Oil cups and methods of lubricating motors and journal bearings. The vacuum method of cleaning car upholstering.

Electric Railway Track Laid in 1906.

In December as usual we sent circulars to all the electric railway companies in Canada asking particulars of new track laid in 1906. Many of these companies, we regret to say, have not been as prompt in sending in their replies as the steam railway companies, so the particulars given below are not complete. The returns received show only 60 miles of new track, nearly all in Ontario. The largest extension has been on the Toronto and York Radial Ry., from Newmarket to Jackson's Point, 24.40 miles. The Hamilton Radial Electric Ry. reports that no additional mileage was laid, but the seven miles between the Hamilton city limits and the canal at Burlington beach, was relaid, and a second track laid.

Following are the returns of the new track laid as officially reported to date:

	Miles.	Miles.
LONDON STREET RY.—Extensions within London, Ont.		1.9
MONTREAL PARK AND ISLAND RY.—From main line to rail track.		0.59
MONTREAL STREET RY.—Various extensions on city streets.		2.31

SOUTH-WESTERN TRACTION CO.—		
Lynhurst to St. Thomas, Ont.	1.00	
St. Thomas towards Lake Erie.	8.00	
		9.00
		56.32

It was stated in the British House of Commons, Dec. 3, that an inquiry will be held as to the grounding of the battleship Dominion in the St. Lawrence, as soon as she returns to England. The vessel was damaged for a length of 280 ft. by the grounding.

A Charlottetown, P.E.I., despatch says that a company has been organized to procure a powerful winter steam car ferry, and will apply to the Dominion Government for a subsidy to carry on the winter service between Prince Edward Island and the mainland.

Capt. Newcombe of the Government steamer Kestrel, employed on the Pacific coast, who was suspended on account of alleged irregularities in connection with the purchase of supplies, has been reinstated. An investigation was held, and his conduct vindicated.

The standard freight mileage tariff no. 1, and the standard passenger tariff no. 1, of the Klondike Mines Ry., which have been approved by the Board of Railway Commissioners, are signed by H. B. Smith, C.E. M. Inst., General Manager, and H. D. Weeks, General Freight and Passenger Agent.

According to the decision of L. Tuttle, President, Boston and Maine Rd., to whom the matter was referred, the Michigan Central Rd. has been placed in a differential class by itself, as a result of the recent rate controversy. By the terms of the decision, the M.C.R. is permitted to charge a rate to Boston, New York and Buffalo, which is between the standard and the regular published differential rates. An exception is made in the case of the standard first-class rate to Boston. The arbitrator decides that the rates which he has given the M.C.R. shall be applied by that road only over its eastern connection—the New York Central Rd.

Canadian Street Railway Association.

The semi-annual meeting was held at Toronto, Dec. 7 and 8, W. H. Moore, President, in the chair; the following companies being represented: Hamilton Cataract Power, Light and Traction Co.; International Ry.; Montreal St. Ry.; Niagara, St. Catharines and Toronto Ry.; Ottawa Electric Ry.; Sandwich, Windsor and Amherstburg Ry.; Toronto and York Radial Ry.; Toronto Ry.; Toronto Suburban Ry. There were also present, J. C. Rothery, General Manager East Liverpool, Ohio, Traction and Light Co., and Acton Burrows, Managing Director RAILWAY AND MARINE WORLD.

The report of the Executive Committee referred, among other things, to the appointment of the Ontario Railway and Municipal Board and to a number of electric railway cases which had been dealt with by the Board. In the case of the Hamilton St. Ry. the city council complained to the Board that the company was not performing its obligations as provided by the agreement, that the road was in a state of disrepair and the rolling stock completely run down. The Board appointed an engineer to inspect the railway, who recommended certain work to be done. The Board forwarded these directions to the company, which did not carry them out. As a result of the company's opposition to the engineer's recommendations, the Board granted a hearing to the parties, at which the city sought to prove the absolute disrepair of the street railway system. The company put in evidence to refute these statements and urged that the Board should take into consideration the financial condition of the company, and of its earnings and operating expenses, and that the condition of the road should not be made too burdensome where no profit resulted from its operation. The city urged that the terms of its agreement with the company should be fully carried out by the company, no matter what loss might be sustained. The Board concluded that they could not ignore the company's financial situation and must take into consideration the revenue and operating expenses, so that in arriving at a conclusion as to how far the Board should go in enforcing the terms of the agreement, they would interpret agreements as lightly as possible, as against companies whose returns were low; but as against companies whose returns were high and in a good position financially, agreements would be interpreted in the strictest sense. This announcement by the Board is very important and affects all companies operating in Ontario. The Executive Committee, considering the importance of this subject, directed the Secretary to attend the sessions of the Board during this case in the interests of the Association. A report of the proceedings will be furnished to the members as soon as they are completed by the reporter.

The City of London made a similar complaint about the London St. Ry. Co. The Board made an inspection of the company's system, heard both sides and sent an engineer to report upon conditions, and to recommend such improvements and repairs as would put the system in a fair state. The engineer's report has been made and has been accepted by the company, so that this difficulty has passed off without much friction. Similar inspections are to be made of other systems, as it is intimated that the Board proposes to familiarize themselves with every system under their jurisdiction.

W. R. McRae, Master Mechanic, Toronto Ry., read a paper on "Some of the methods in vogue in modern street railway shops." Mr. Clark, Assistant Comptroller Toronto Ry., read an introductory paper on the history of electric traction in Ontario, and he and P. Dubee, Secretary Montreal St. Ry.,

were appointed a committee to compile a similar history for the whole Dominion. J. C. Rothery read a paper on the power-house, and W. H. Fiske, electrician, Toronto Ry., read one on storage batteries. A. M. Grantham, C.E., Purchasing Agent and Superintendent of Construction, Toronto Ry., contributed an exhaustive paper on track construction. All the papers were very fully discussed and a lot of valuable information was elicited.

On the evening of Dec. 7, the representatives attending the meeting were entertained at dinner by the Toronto Ry. Co. The arrangements, which were made by A. M. Grantham, were most complete, every detail, from the artistic menus to the musical and other entertainment features, being most perfectly carried out.

Projects, Construction and Betterments.

Brantford and Hamilton Ry.—J. G. Gauld is reported as having stated that the cars would be running on the line between Hamilton and Brantford, Ont., by July 1. The grading is completed from just outside Hamilton to Cainsville, about six miles from Brantford. This portion of the right of way, as well as the crossing of the rifle ranges and the golf club at the Hamilton end, will be completed during the winter. Ties and rails are expected to be laid during the winter ready for setting and ballasting in the spring. (Dec., 1906, pg. 753.)

Fort William, Ont.—Application will be made next session of the Ontario Legislature for an act sanctioning a by-law to construct an electric street railway and to provide for the raising of $82,000 by way of debentures necessary therefor.

The Guelph Radial Ry. Co. has under survey or contemplation a line from Guelph to Hespeler, Ont., and a line from Guelph to Puslinch Lake, Ont., about 10½ miles.

Hamilton, Waterloo and Guelph Ry.—The Minister of Railways has approved of the application of the company for permission to construct its line across Dundurn Park, subject to the City Council passing a by-law giving its consent. (Dec., 1906, pg. 753.)

Huron and Ontario Ry.—A meeting was held at Owen Sound, Ont., Nov. 28, when S. F. Kilgore, Toronto, President of the company, explained that the proposal was to construct an electric railway from Whitby to Toronto, thence to Owen Sound by way of Tottenham, Flesherton and Thornbury and Meaford. Surveys for these lines had been completed within the previous week. It was also proposed to construct a line from Owen Sound to Southampton, and southerly along the Lake Huron shore to Goderich, with a line running east to Kincardine and Hopeville; and continuing south from Goderich to Parkhill, Sarnia and Windsor. The distance from Owen Sound to Toronto would be 152 miles, and would be covered in from 3½ to 4 hours. The surveys showed that the gradients would not exceed 1% with a curvature of not more than 6°. The line would be operated by electric locomotives. The Canadian Northern Ry. was not behind the project, but he would not say who were. The company's bonds to the extent of $11,000,000 had been placed on the London, Eng., market. The meeting was not a unanimous one, but a resolution was ultimately passed favoring the calling of another public meeting for the consideration and discussion of any agreement which company might submit to the Town Council, and any by-law which the council wished to adopt in connection therewith.

Application is being made at the current session of the Dominion Parliament for an act authorizing the construction of branch lines from between Shelburne and Tottenham, westerly through the counties of Simcoe, Dufferin, Peel, Wellington, Waterloo, Perth, Huron, Middlesex, Lambton, Kent and Essex, to London, Strathroy, Parkhill, Wallaceburg, Sarnia and Windsor, Ont.; from near Shelburne, through the counties of Dufferin, Grey and Simcoe, to Collingwood, Ont. An extension of time for the construction of the lines is also asked. In connection with this company's proposals, the application of the Owen Sound Bridge and Terminal Co. to the Dominion Parliament for an act of incorporation, referred to on pg. 5 of this issue, is of interest, as the notice of application is signed by T. H. Kilgore, who is Secretary of the H. and O. Ry. Co. (Dec., 1906, pg. 753.)

Levis County Ry.—The company has under consideration the construction of the following branch lines or extensions: St. Joseph to Gilinore's Hill, one mile; Levis uppertown loop line, 1⅝ miles; St. Romuald to German Bridge, Que., two miles.

London Street Ry.—The repairs and improvements at the bridges recommended to be made by the engineer who inspected the line for the Ontario Railway and Municipal Board were completed early in Dec. The other work called for is well forward, and will be completed as speedily as possible. (Dec., 1906, pg. 753.)

Manitoba Radial Ry.—A. Wagner, R. S. Fletcher, W. J. Donovan, J. A. Munro, C. Hoffman, Winnipeg, Man., are applying at the current session of the Dominion Parliament for an act incorporating a company with this title to construct a railway, or railways, to be operated by electricity or other power, from Winnipeg to Lake Manitoba, and other points; to construct branch lines, to develop electrical power and sell the same, and with all other incidental powers. (Dec., 1906, pg. 753.)

Montreal Street Ry.—W. G. Ross, Managing Director, is quoted as saying that the company has secured a right of way from Henderson's to a point opposite St. Vincent de Paul, about 4 miles; that work will be commenced upon a line there in the spring, and that it will be in operation by July 1, giving connection from Craig st. to the ferry, 10 miles away. It is also proposed to construct a branch from Peloquins to Bordeaux, 2½ miles; and surveys have been completed for the extension of the Lachine line from Stoney Point to Dorval, about five miles. Following the taking over of the lines of the Montreal Terminal Ry., Jan. 1, Mr. Ross said a number of improvements would be effected, which would give new routes and a better service. Surveys were also being made for an extension from St. Laurent on the Park and Island Ry., and curve around to St. Genevieve, about nine miles. (Dec., 1906, pg. 753.)

North Midland Ry.—The taxpayers of St Marv's, Ont., defeated the by-law to lend $40,000 to the company for 30 years, upon condition that the company's powerhouse and car shops would be located in the town. A recount has been demanded, and the promoters of the company hope to have an opportunity of having the by-law submitted a second time. (Dec., 1906, pg. 753.)

Quebec and Saguenay Ry.—Six miles of the line have been located from the terminal of the Quebec Ry., Light and Power Co.'s line easterly towards Cap Tourment. The line will be at a uniform level of about 3 ft. above high water mark. The survey work was being greatly delayed, at the time we were advised, by the high tides and gales which were prevalent. A contract had not been let at the end of Nov., but it was expected to let one early in Dec., and that J. D. Cameron, Quebec, would probably get it. (Dec., 1906, pg. 753.)

Quebec Ry., Light and Power Co.—The dam which the company is building at the Natural Steps of the Montmorency River has been completed below the water level, and as the water is at present low, good progress is being made with the work. Negotiations are reported to be in progress to secure a charter to extend the line into Quebec county, but the President states that he does not know of any plans being prepared or property purchased for the purpose of extending the line to Sillery, Que. (Nov., 1906, pg. 675.)

St. John and Grand Falls Electric Ry.—Application will be made next session of the New Brunswick Legislature for an act incorporating a company with this title, with power to construct an electric railway from St. John to Fredericton, thence to Woodstock and Andover, N.B.; thence crossing and recrossing the St John River, as it may deem expedient, to Grand Falls, N.B.; thence to the boundary of the State of Maine above the falls. The application is signed by J. Burgess, Grand Falls, N.B.; J. F. Tweedale, Arthurette, N.B.; and J. E. Stewart, Andover, N.B.

Seaforth to Brussels, Ont.—Local reports state that a proposal is under consideration to construct an electric railway from Seaforth to Brussels, Ont., and to connect it with the C.P.R. at Walton, Ont. The projected line would be about 20 miles long, and would run through a good farming country, and serve several small villages now without any rail connection with outside points.

Southwestern Traction Co.—The Canadian Electric Traction Co., which is the construction company for this electric railway, is completing the mile of grading between the present track end and Port Stanley, Ont., and will have it ready for operation early in the spring. It is also constructing a branch from Delaware to Lambeth, Ont., 6.75 miles (Dec., 1906, pg. 753.)

Windsor and Tecumseh Electric Ry.—The Detroit United Ry., which owns the W. and T.E. Ry., as well as the Sandwich, Windsor and Amherstburg Ry., is constructing eight miles of line from Walkerville to Tecumseh, Ont. (Dec., 1906, pg. 753.)

Windsor, Essex and Lake Shore Rapid Ry.—An order has been issued by the Board of Railway Commissioners authorizing this electric railway to carry its line across the Michigan Central Rd. at Talbot St., Essex, Ont., at rail level, instead of by a subway as formerly ordered. The regular safety devices are ordered to be maintained, and the cost of providing a watchman, day and night, is to be divided equally between the two companies. Track has been laid between Windsor and Kingsville, Ont., except about a mile, and the rails and ties are on the ground for an extension from Kingsville to Leamington. (Sept., 1906, pg. 549.)

Electric Ry. Finance, Meetings, Etc.

Berlin and Waterloo Street Ry.—At a recent session of the board of arbitration which is sitting to determine the value of the B. and W. S. Ry., which has a length of about two miles, and which the town of Berlin, Ont., wishes to purchase, the company placed a value of $182,877 upon the property. This is $68,000 in excess of the amount at which the value was placed by the company at the commencement of the arbitration proceedings.

BOSTON, MASS.

Halifax Electric Tramway Co—Railway receipts for Nov., $11,849.34; total railway, electric lighting and gas receipts for Nov. $34,351.96, against $11,414.38 railway, and $33,039.31 total receipts for Nov., 1905.

Hamilton, Grimsby and Beamsville Electric Ry.—The adjourned annual meeting of the shareholders has again been postponed to a date in Jan.

Hamilton Street Ry.—The Hamilton, Ont., City Council has appointed Aldermen Stewart, Witton and Howard a committee to interview the Hamilton Cataract Power, Light and Traction Co., and ascertain, if possible, the price at which it will sell the system.

Montreal Street Ry.—Passenger earnings for Nov., $257,349.46; total earnings, $263,260.41; against $228,601.00 passenger, and $232,635.23 total for Nov., 1905. Operating expenses, $174,933.26; city percentage on earnings, $9,008.03; interest on bonds and loans, $17,074.61; contingent for renewals, $13,193.74, against $8,291.78 city percentage on earnings; and $13,782.37 interest on bonds and loans; there was no contingent fund for renewals in 1905. The surplus for Nov. was $49,050.77, against $56,933.45 for Nov., 1905. Net earnings for two months ended Nov. 31, $213,308.91; surplus, $134,022.63, against $187,115.05 net earnings and $143,978.26 surplus for same period, 1905.

Montreal Street Ry.—Application will be made next session of the Quebec Legislature for an act amending the company's charter, increasing the number of directors from five to nine, reducing the number of stockholders whose vote is required for the increase of the capital stock of the company from three-fourths to two-thirds, and for other purposes.

Niagara, St. Catharines and Toronto Ry.—Gross earnings for the year ending Oct. 31, $225,447.55, as against $210,484.79 for the corresponding period of 1905, showing an increase of $14,972.76.

Southwestern Traction Co.—Officials of the company in London, Ont., stated Dec. 5 that there was no foundation for the report that the lines, franchises, etc., were to be taken over by the Detroit United Ry. It was, however, contemplated to abandon the present three-phase alternating system of operating the line, and to replace it by the system in use on other Canadian lines.

Toronto Ry.—Car earnings for Nov., $247,314.35, against $220,803.78 for Nov., 1905

Windsor, Essex and Lake Shore Rapid Ry.—The U.S. interests in the line have been acquired by the existing Canadian interests, and the line will be financed in future as a Canadian enterprise. The Canadian directors who have taken this action are: W. E. McKeough, W. R. Phillimore, J. and W. Piggott, Chatham, Ont.; and W. C. Crawford, Tilbury, Ont. Jno. Piggott remains as President of the reorganized company; Jas. Brien, Essex, succeeds W. L. Wilson of Port Huron, Mich., as First Vice-President, and W. E. McKeough becomes Second Vice-President, in succession to Jas. Brien.

Electric Railway Notes.

The Port Arthur, Ont., Town Council has added several new cars to the rolling stock of its street railway.

Press reports states that I. K. Pierson, Chief Engineer of the Brantford and Hamilton Ry., has resigned and that W. Hillman has been appointed to succeed him.

We are advised that the press reports to the effect that the Hamilton Cataract Power, Light and Traction Co. had ordered 100 new cars for the Hamilton Street Ry., is incorrect.

The Winnipeg City Council has entered a suit against the Winnipeg Electric Street Ry. to have the right of the company to bring electrical power into the city from an outside source decided.

The Toronto Street Railway Men's Union has applied to the Ontario Railway and Municipal Board for an order to compel the Toronto Ry. to provide vestibules on the rear end of the cars, as required by the Railway Act of 1906.

The car barns of the Galt, Preston and Hespeler Electric Ry.. and the Preston and Berlin Ry., at Preston, Ont., were burned, and most of the cars belonging to the two lines destroyed, by a fire which broke out on Dec. 4 at 3 a.m.

An agreement has been reached between the Winnipeg Electric Street Ry. and the City Council, by which the city's action respecting the electrolysis of the water mains by power escaping from the company's system, will not come on for trial.

The Ontario Railway and Municipal Board tested a number of fenders for use on electric railways, with a view of approving of one or more for adoption on the electric railways of the province, Nov. 29 and 30, and will have further tests made

The Imperial Privy Council has given both the Toronto Ry. Co. and the Toronto City Council leave to appeal from the decision of the Supreme Court of Canada, in the consolidated suits brought by the city against the company for alleged breaches of the agreement.

The action which was taken by the Hull, Que., city authorities to have the question of the C.P.R.'s right to haul freight over the Hull Electric Ry., which it owns, tested, has been withdrawn, the company promising that the terms of the by-law would be strictly complied with in future.

The Toronto Ry. has issued an order stating that employes in uniform, whether off or on duty, going into a saloon will be instantly dismissed. Such a rule, the business agent of the Street Railway Employes' Union states, was adopted some years ago at the suggestion of the employes themselves.

L. Trudeau, Superintendent Montreal Street Ry., died at Maisonneuve, Que., Dec. 11, after a lengthened illness. He started as a conductor with the company in the old horse-car days, and was subsequently manager of the electric railways at Bordeaux, France, and Alexandria, Egypt, returning to the Montreal Street Ry. in 1904.

The Montreal Street Ry. has announced that a new schedule of wages would come into effect Jan. 1 as follows: conductors and motormen in first and second year of service, 18 cents an hour; after two years' service, 19 cents an hour; after five years' service, 20 cents an hour. This means an increase in the pay roll of about $75,000 a year.

The Toronto Ry. has appointed four Divisional Superintendents, who will have supervision over all car starters, motormen and conductors, at their respective barns. A. E. Edwards has been appointed at Dundas St. barns; J. M. McCullough to King St. barns; C. W. Steel to Roncesvalles Ave. barns, and J. J. McWilliams to Yorkville Ave. barns. These Divisional Superintendents will be under W. H. Nix, Chief Inspector.

Judgment has been reserved by the Supreme Court at Ottawa, in the two appeals by the Hamilton Street Ry. in the suits brought against it by the Hamilton City Council. One suit had reference to the method of calculating the percentage payable to the city and the other has to do with the issue of workmen's tickets. The city claims such tickets should be issued to all who ask for them, and the company desires to restrict the issue of tickets to bona-fide work people.

Jas. Leitch, K.C., Chairman of the Ontario Railway and Municipal Board, has issued a statement showing the powers which the board has to seize street railway lines. The act empowers the board to seize a railway in the event of the owners disregarding an order respecting equipment or service or breach of an agreement with a municipality. So far as the powers of the board in relation to strikes are concerned, if both parties agreed it could hear the matters in dispute and make an order that would be binding. If there was no such agreement, and the board was called upon to act by a municipality, or some interested party, it could endeavor to effect an amicable settlement, or investigate all the facts bearing upon the strike, and bring in such recommendations as in its judgment would contribute to a fair and equitable settlement. Either party can refuse to be bound by recommendations made under such circumstances.

Grain Elevator Notes.

The Royal Commission on the Grain Trade held a series of sittings at various points in Manitoba, Saskatchewan and Alberta during Dec.

The Farmers' Elevator Co. is putting its elevator at Virden, Man., which collapsed recently with 40,000 bush. of grain, into a thorough state of repair.

The British America Elevator Co. has been registered in Ontario under the act respecting extra-provincial companies, W. Gow, Toronto, being appointed its attorney.

The question of where the action of the Gaspesian against the Montreal Grain Elevating Co., for damages arising out of a collision, shall be tried, is before the Exchequer Court upon four appeals.

Jas. Clark, who died at Goderich, Ont., Nov. 29, was a director of the Goderich Elevator and Transit Co., and was also interested in the Lake Huron and Manitoba Milling Co., as well as in several fish and other companies.

The new elevator at Goderich, Ont., received its first cargo of grain Nov. 26. The elevator is of concrete, square bin construction, and is claimed to be fireproof in every particular. The operating machinery is driven by electric motors.

The Medicine Hat Milling Co. is applying to the city council for a loan of $7,000 for the purpose of erecting a large grain elevator at Medicine Hat, Sask. The company already possesses three grain storehouses at its mills, but increased accommodation is necessary to handle the growing business of the district.

The Royal Trust Co., Montreal, made a seizure of the Great Northern Ry. of Canada, Nov. 23, to satisfy a judgment in its action on behalf of the bondholders of the Great Northern Elevator Co., Quebec. An appeal against the decisions, under which the seizure was made, is expected to be taken to the Supreme Court.

The working house at the C.P.R. Elevator D., Fort William, Ont., was completely destroyed by fire on the morning of Dec. 7. The damage is estimated at $175,000. The elevator was built in 1898, and the working house was destroyed by fire in 1901. When the new working house was erected, the storage capacity was largely increased.

The Gilchrist Transportation Co., Cleveland, Ohio, has brought an action against the Zenith Grain Co., Winnipeg, Man., and the Canadian Northern Ry., to recover the value of 2,718 bush. of grain. The plaintiffs own

the str. Oglebay, upon which there were loaded through the C.N. Ry. elevator a cargo of wheat which the defendants say was 146,147½ bush.; and the plaintiffs say was only 143,429½ bush.

The substructure of the new elevator at Port Colborne, Ont., the Premier said in the House of Commons, Dec. 3, had been completed by P. Lyall & Sons, Montreal, at a cost of $63,700, and the contract for the superstructure had been let to Larkin and Sangster for $90,000. The original plans provided for a capacity of 2,000,000 bush., but it had been decided to erect at present a structure having a capacity of 800,000 bush. The work was expected to be completed by Sept. 1.

The Farmers' Grain Co. has been incorporated under the Manitoba Companies' Act, with a capital of $100,000 and offices at Heaslip, Man., to carry on a general grain buying and selling business, and in connection therewith to own elevators. The provisional directors are: E. W. Davis, Evanston, Man.; L. D. Maurier, P. P. Bottolfson, Starkweather, Man.; W. G. Samuel, W. Webster, M. Morrison, R. Sorenson, Webster, Man.; C. Todd, Grand Harbor, Man.: and A. G. Tanton, elevator manager, Lakota, Man.

The G.T.R. has just completed a new storage annex in connection with its grain elevator at Depot Harbor, Ont. The present elevator has a storage capacity of 1,000,000 bushels; an additional capacity of 500,000 bushels is added by the new building. The new structure is for storage purposes only. There is no machinery in it, excepting the conveyors for filling and emptying the bins, and the spouts to and from them. It is 196 ft. long by 80 ft. wide. The foundations are of reinforced concrete, the principal portion being a concrete slab, 15 in. thick, covering the entire surface of the ground beneath the building. The structure is divided into 84 bins, 65 ft. deep. Two 32 in. concentrated belt conveyors are installed for filling the bins, each conveyor being provided with a self-propelling tripper. Two conveyors of the same size are installed in the basement below the bins for emptying same. As the present elevator is built for receiving grain from boats, the belts filling the bins in the new house are designed to receive grain elevated by the marine leg and put it into storage. The belts below the bins discharge to shipping elevators in the present working house for loading to cars. The framing of the building is of heavy post and girder work, and the bin walls are of laminated 3 in. hemlock planking. The building is covered on the outside with galvanized corrugated steel. The work of construction was done by John S. Metcalf Co., Engineers, Chicago. The elevator has been in constant use since last season's northwestern wheat crop began to arrive at Depot Harbor in large quantities.

MARINE DEPARTMENT

Launching of the Midland Prince.

The Midland Navigation Co.'s steamship Midland Prince, which is the largest vessel built and owned in Canada for trading on Canadian waters, was launched on the Georgian Bay, Dec. 5. She is 489 ft. long, 55 ft. beam and 31 ft. deep, and will have a carrying capacity of 9,000 tons, or 300,000 bush. of wheat on a 19-ft. draft. The hull is of steel, built to meet the highest requirements of the underwriters, and with the most powerful and highest class of engines and boilers. At her launch the steamer had a displacement of 4,000 tons. She is built for the grain trade and for general bulk freight, and will carry 10,000 tons on a 20-ft. draft. The machinery includes two Scotch boilers, the largest ever built in Canada, 15½ ft. diameter by 12 ft. long between heads, and triple expansion engines 23, 38½ and 63 in. diameter by 42 in. stroke, 2,200 i.h.p. She is equipped with all the modern outfit of deck winches and steam mooring gear. Her outfit throughout is the best that can be made, and all round she is a most complete ship to handle and carry cargo safely and cheaply. The complete ship and outfit will cost $365,000. She will trade on the Upper Lakes between Port Arthur, Fort William, Ont., and Duluth, Minn., and ports on the Georgian Bay, Lake Huron and Lake Erie. The steamer was named as she left the ways by Miss Hays, daughter of C. M. Hays, Second Vice-President and General Manager, G.T.R., who was also present at the launch, accompanied by a number of other Montreal business men interested in transportation. There were, also, a number of invited guests from Toronto, Midland, etc.

After the launch, 260 guests were entertained at luncheon, Arthur Hill, of Saginaw, Mich., President of the Midland Navigation Co., occupying the chair; Jas. Playfair, Vice-President, and D. L. White, director, being the vice-chairmen. After the health of the King had been honored, Mr. Playfair, on behalf of the Navigation Co., presented Miss Hays with a hammered silver tea service.

C. M. Hays, in replying to the toast of Railway Transportation, pointed out that with the large bulk of freight moving eastward, water transportation by large freighters was essential, not only to the railways, but also to the far western country. He said that the railways were not jealous of the development of water transportation, looking at it as a twin handmaiden with the railway interests to the commerce of the country. He explained that the capacity of the Midland Prince was such that it would take a train of 300 cars to carry the load that she could carry from the head of the lakes to Midland. He further hinted of the possibility of another port besides Midland being developed by the G.T.R.

Other toasts were responded to by J. A. Cuttle, of the Montreal Transportation Co.; T. Harling, Montreal; A. Tilley, Montreal; Capt. T. Donnelly, Kingston, and others.

Atlantic and Pacific Ocean Marine.

The Allan Steamship Co. is arranging to secure new office accommodation for its passenger business in the Lower Town, Quebec.

The Allan Line S.S. Sarmatian arrived in Halifax, N.S., recently, having lost a blade off her propeller. She went into drydock there to have repairs made.

The C.P.R. S.S. Montezuma has been fined $400 by the customs' authorities at St. John, N.B., its boatswain having been detected taking a lot of cigars ashore.

The str. Deramore, for Dublin, Ireland, was the last steamer to leave the St. Lawrence for a transatlantic port in the season of navigation of 1906. She left Murray Bay, Dec. 6.

Vessels arriving at Halifax, N.S., Dec. 2, reported having experienced very rough weather. The Allan Line S.S. Tunisian reported the loss of five ventilators and her Marconi wireless telegraph apparatus.

The Montreal Harbor office reports that during the season of navigation 816 ocean-going vessels arrived and cleared, against 833 during the season of 1905. The aggregate tonnage was 1,968,979, against 1,940,056 in 1905.

Navigation opened at Montreal, April 29, 1906, and closed Dec. 2, the number of oversea vessels using the port being: 783 steamships of 1,957,615 tons and 33 sailing vessels of 11,364 tons, against 786 steamships of 1,918,002 tons, and 47 sailing vessels of 22,054 tons in 1905.

The Dominion Government has forwarded to the British Board of Trade awards for three officers and two of the crew of the S.S. Durango, in recognition of services to the crew of the schooner James W., of Charlottetown, P.E.I., abandoned in the North Atlantic ocean, Feb., 1904.

The Quebec Steamship Co. has placed an order with Sir James Laing & Sons, Sunderland, Eng., for a new steamship for its New York-West Indies trade. The vessel will be 345 ft. long, 44 ft. beam, and 27 ft. 6 in. deep, and will be fitted with tri-compound engines, cylinders 26, 43 and 71 in. diameter by 45 in. stroke.

The Dominion Line S.S. Kensington, from Montreal to Liverpool, picked up the disabled S.S. Briardene, owned in Halifax, N.S., and on a voyage from Bordeaux, France, to Liscomb, N.S., and towed her into Halifax. The Kensington stood by for two days before she could get a tow line on board. A claim for $40,000 salvage has been filed.

The Department of Marine appointed a commission, which sat at Halifax, N.S., Nov. 27, to investigate a complaint of the C.P.R. S.S. Empress of Ireland, that on the occasion of her entering Halifax with the mails she could not get a pilot, and was therefore delayed. Evidence was taken, and a report made to the department.

The C.P.R. S.S. Lake Manitoba left Montreal Nov. 26, and was the last passenger steamer of the season to sail from Montreal. The Manchester Trader for Manchester, the C.P.R. S.S. Montreal for London, and Elder-Dempster Co.'s S.S. Degamer sailed on Nov. 28, closing the St. Lawrence ocean-going traffic for the season.

The Liverpool Shipwreck and Humane Society has awarded silver medals to the officers and £2 each to the six men of the lifeboat's crew of the S.S. Vedamore for the recent rescue of the crew of the Battle Line S.S. Nemea in mid-ocean. The wreck of the Nemea is reported as having been passed by several steamers, the fire still being burning.

The Nova Scotia members of Parliament waited on the Dominion Government recently and urged that the C.P.R. be compelled to take steamers carrying mails alongside the wharf at Halifax, instead of lying in midstream and transferring mails to a tender; and also directing that passengers who desired to do so could be landed or taken on at Halifax.

The Liverpool Post-Mercury, which is usually very well informed in regard to marine matters, states that two new steamers have been ordered by the Dominion Line for the St. Lawrence trade. This report has been made so frequently within

HALIFAX, - N.S.

the last two or three years that there will be many doubters, even although official confirmation be given.

It is stated that the North American Wrecking Co. will have sufficient repairs made to the Allan Line S.S. Bavarian, which it floated off Wye rock, Quebec, to enable her to be taken to the Clyde for permanent repairs. As the steamer will have to lie aground where she is for another winter, there is a good deal of uncertainty about any decision being arrived at before spring.

The S.S. Antilochus, the third of the new steamers for the Blue Funnel line, reached Vancouver, B.C., from Great Britain, Nov. 29. She is in all respects identical with the Teucer and Bellerophon, which have already been described. The Titan and Cyclops, also of the same dimensions, are under construction, and are expected to be put on the route during the summer.

One of the steamships which the Allan Line is having built on the Clyde to replace the Bavarian, will be about the same size as the Tunisian, and the second steamer which is being built will be slightly smaller and slower. The framing of the larger steamer has been completed, and as the strike in the shipyards has been settled, it is expected to have her ready for service about May.

The steamships which the Allan Line operates between Montreal and Havre, France, via London, Eng., during the summer, will make St. John, N.B., the winter port this season, calling at Halifax, N.S. The service will be performed by the Sardinian and the Pomeranian, giving a sailing every three weeks. The winter port for this service in previous years has been Portland, Me.

The survey of the Dominion Line S.S. Kensington at Quebec showed that the injuries sustained by her stranding near Matane were not serious. Repairs were made at Quebec, and the steamer loaded there for Liverpool, sailing Nov. 30. The steamer proceeded direct for that port, instead of going round to Halifax, as was originally intended. Complete repairs will be made in England.

A Glasgow, Scotland, report states that three steamers are under construction there for an Italian navigation company, to run between Italian ports and Canada, carrying freight and passengers. In connection with this report, the further report from Italy may be mentioned, that it is stated there that the Dominion Government has intimated its willingness to subsidize such a line of steamers to the extent of $80,000 a year.

The Minister of Trade and Commerce explained in the House of Commons Nov. 28, that the reason the Elder-Dempster Co.'s steamers performing the Canada-Mexico service on the Atlantic ocean did not call at Cuba on the northward trip, was because Mexico furnished one-half of the subsidy and objected to their calling at Cuba, which was a competing country. Canada, he explained, would object to its subsidized steamers calling at U.S. ports for cargo for Mexico.

The North American Wrecking Co., which was formed for the purpose of undertaking the salvage of the Allan Line S.S. Bavarian, having successfully accomplished that task, proposes to engage in wrecking operations in any part of the world. The officers and directors of the company, as it is at present constituted, are: President, T. J. Drummond, Montreal; Vice-President, E. W. Stokes, New York; Treasurer, W. G. Rainsford, New York; Secretary, H. W. Norton, Montreal; other directors: P. Molson, D. Armour, Montreal.

Maritime Provinces and Newfoundland.

Capt. H. Cann, of the Halifax and Cape Breton Steamship Co., died suddenly at St. John, N.B., Dec. 9.

E. C. Watson, Deputy Minister of Marine of Newfoundland, died in the Royal Victoria Hospital, Montreal, Dec. 13.

The St. John River steamers made their last trip to Fredericton, N.B., Nov. 26, the latest date for over ten years.

N. Chiasson has been appointed wharfinger at the Dominion Government wharf at Lameque, N.B., and Alex. Young wharfinger at Pinette, P.E.I.

J. W. Moran has been appointed wharfinger of the Dominion Government wharf at Freeport, N.S., and G. Henry has been appointed harbormaster at Egmont Bay, P.E.I.

The Dominion Atlantic Ry. str. Prince George is laid up at Yarmouth, N.S., at present, but is expected to be put on a run in West Indian waters at an early date.

The Montreal Transportation Co. is reported to have two steamers on order in Great Britain for carrying cargoes of steel rails from Sydney, N.S., to Upper Lake ports.

A. Gray has been appointed a member of the pilotage authority for the district of Sackville, N.B., and P. McKinnon has been appointed wharfinger at Wycocomagh, N.S.

The tug Ingraham has been practically rebuilt by the Reid-Newfoundland Co. at St. John's, Nfld. A new boiler has been put in and her engines are being thoroughly overhauled.

D. Campbell and A. Grady have each been presented with a purse of $220 and a medal for saving the lives of two sailors from the ship Sovinto, wrecked at Priest Pond, P.E.I., Nov. 6.

The Newfoundland Government has been engaged in improving the harbor of St. John's during the past year and will shortly invite tenders for dredging and other work for the coming season.

C. H. Hosterman, of the Department of Marine staff, Halifax, N.S., who was married there Nov. 28, to Miss A. M. Martin, was presented with a Morris chair by the staff of the Halifax office.

The str. Ruby L. was launched at Margaretville, N.S., for the Canning-St. John, N.B., route, Nov. 17. The hull was subsequently towed to Yarmouth, N.S., where the engines and boiler will be installed.

A three-masted schooner, named Reliance, was recently launched from the yard of G. A. Cox, Shelburne, N.S., for the West Indian and South American trade. The schooner will measure about 200 tons register, and will be commanded by Capt. J. Coumans.

Parrsboro', N.S., vessel owners are advocating the establishment of a Maritime Marine Association for the purpose of taking up all questions relating to the coasting trade, shipbuilding, etc., for the Provinces of Nova Scotia, New Brunswick and Prince Edward Island.

The Three Rivers Steamship Co., Prince Edward Island, is having built at Shelburne, N.S., the hull of a steamer for its freight and passenger trade. The hull, when launched, will be towed to Yarmouth, N.S., where her engines will be installed. Delivery will be made in the spring.

The Shepody Navigation Co., of which W. H. Edgett, Moncton, N.B., is local manager, has decided to purchase a second steamer for the service on Petitcodiac River and the Bay of Fundy. The company's present steamer, Wilfrid C. is no longer able to transport all the business offering.

From May 1 to Nov. 30, no less than 145 vessels have been placed on the marine railway at North Sydney, N.S., for repairs. The directors have under consideration a proposal to increase the capacity of the cradle so as to have room for vessels of 1,000 tons. James Mann is business manager of the company owning the plant.

The Dominion Government str. Minto was put on the route between Charlottetown, P.E.I., and Pictou, N.S., Dec. 10, and the Stanley has been put on the run between Summerside, P.E.I., and Cape Tormentine, N.B. The str. Empress made her last trip between Point Duchene, N.B., and Summerside, P.E.I., Dec. 7.

During the fall, the dredge Montague, which was completed at the Polson Iron Works Toronto, in the summer, was engaged in dredging a channel 1,200 ft. long, 55 ft. wide, and 10 to 12 ft. deep, at Crapaud, P.E.I. It is expected that there will be nearly another year's work at the harbor before the improvements are completed.

The St. John River str. Aberdeen has been sold by the Fredericton and Woodstock Steamboat Co. to Capt. Perry, of St. John, N.B. If the steamer is not placed on the Fredericton-Woodstock run in 1907 by her new owner, the Fredericton and Woodstock Steamboat Co. will secure a steamer of somewhat smaller size to trade between these points.

The French Government has revised the customs tariff of St. Pierre and Miquelon, in order to stimulate trade. For schooners entering the port for shelter or supplies the tax has been placed at 9c. per ton, instead of 25c. as heretofore; for vessels entering for the purpose of securing bait, 25c. instead of 55c., as previously; for trading craft the old rate of 56c. per ton remains.

An investigation has been ordered into the circumstances attending the stranding of a Norwegian schooner at East Point, P.E.I. One of the features in connection with the wreck was mentioned in the Senate, Dec. 6, by Senator Ferguson, who stated that the officials of the P.E.I. Ry. refused to get out a special train to take the lifeboat to the scene of the wreck unless a deposit of $60 was first made.

O. H. Taylor has been appointed Passenger Traffic Manager of all the steamship lines owned by C. W. Morse and his associates, which include the Eastern Steamship Co., trading between Boston, Mass.; Eastport, Me., and St. John, N.B. Mr. Taylor will have his headquarters in New York city. Pending a decision as to a permanent address he will have his offices on the People's Line wharf, pier 32, North River, foot of Canal st.

Tenders were invited in 1905 for the maintenance of a wrecking plant for the Maritime Provinces, but no contract was entered into. Up to Dec. 14, 1906, no decision had been reached as to whether any contract would be entered into or not. Halifax, N.S., papers of Dec. 15 state that the Halifax Salvage Co. has been formed there consisting of the firms of G. S. Campbell & Co., Beazley Bros., and S. S. Brookfield, Ltd., of that city, to perform salvage services. A barge purchased at the recent Admiralty sale at the dockyard, is being fitted with pumps, cranes and engines, with other apparatus necessary for wrecking purposes, and it is proposed to station this barge near the dry dock so that she will be readily available. One of the three tugs, F. W. Roebling, Togo or Shannon, will be kept in the harbor with steam up, ready to tow the barge wherever required. The Dominion Government proposal was to give a subsidy of $10,000 a year, and it is reported that a contract is about to be made with the Dominion Coal Co., to retain its tug, D. H. Thomas, as a salvage steamer at Sydney, N.S.

IDEAL RAILWAY FENCING

MADE TO LAST

Large gauge (No. 9) hard steel wire is used throughout, decreasing cost of maintenance, insuring durability and serviceability.

IDEAL FENCE has been adopted as a standard by all the leading Railways in Canada. More IDEAL is used by Railways this year than all other makes combined.

ARMAND LALONDE
Can. P. & F.A.
Montreal, P.Q.

Province of Quebec Marine.

The Quebec Transportation and Forwarding Co. has purchased the barge A.D., of Montreal.

The tug Beaver, which was being broken up near the Palais, Quebec, was burned Dec. 14. She was uninsured.

During the season of navigation of 1906, 12,557 vessels of 3,095,174 tons arrived at Montreal from inland points.

The port of Grand River, Que., has been declared an outport of customs and warehousing port under the survey of the port of Perce, Que.

The following have been elected members of the board of pilots for and below the harbor of Quebec: A. Larochelle, L. A. Morin, C. Raymond, A. Pouliot, L. Thivierge and J. Talbot.

The Quebec Harbor Commission has prepared plans for the equipment of cranes and other facilities for the rapid handling of cargoes at the Louise docks and Point-a-Carcey wharf.

The Department of Marine is considering tenders for the supply of steel plates and shapes required for the construction of a dipper dredge at the Government dockyard, Sorel, Que.

F. L. Gagnon, Assistant Engineer Montreal Harbor Commission, was presented with a set of table silverware and cutlery by the staff, upon his recent marriage to Miss E. Lecavalier.

The Quebec agency of the Department of Marine and Fisheries is required to move from its present quarters, which are needed in connection with the National Transcontinental Ry. terminals.

The Hamilton str. Dundurn left Montreal, Dec. 3, for Hamilton, Ont., and managed to get through the Lachine Canal, but got icebound in Lake St. Louise, where she will remain during the winter.

The Dominion Government str. Rouville, which has been on pilot duty at Father Point, Que., is wintering at Les Eboulements, Que., it having been found that the ice was too thick to take her on to Quebec.

The Lake St. John and Saguenay Navigation Co. is reported to be negotiating for the purchase of a passenger steamer to run on the Saguenay River. The company is owned by interests connected with the Quebec and Lake St. John Ry., and has a fleet of steamers on Lake St. John.

The Department of Marine informed the Quebec Board of Trade Nov. 28 that it has been arranged that the steamers Montcalm and Lady Grey will make several trips to North Shore points during the winter, but that the dates of the trips and the points to be visited had not been definitely arranged.

The tug Spray, owned by J. S. Thom, Quebec, has been wrecked at Madam Island, Que. Contrary to expectations, the owners were able to float the tug, and she was taken to Levis between two batteaux. An examination showed that the bottom planking has been ground out by the pounding upon the rocks.

La Compagnie-Generale du Port de Chicoutimi, Que., has deposited with the Minister of Public Works, Ottawa, plans of the works which it is intended to construct at Chicoutimi Basin, and duplicate plans have been filed with the registrar of the county. The approval of the Government is being asked for the plans.

The report of the International Waterways Commission is understood to be against the proposal to construct a canal from Lake Champlain, N.Y., to the St. Lawrence River. The project is being opposed by the Canadian interests on the ground that the construction of the canal would only benefit U.S. marine interests.

A. J. C. Robertson, A.M.I.N.A., Naval Architect, is to give a series of four popular lectures on ships and shipbuilding under the auspices of the Montreal Y.M.C.A., to which all interested in shipping are invited. The first lecture, on Jan. 17, will be on "The evolution of the modern ship," and will be followed on the three succeeding Thursday evenings by "Science in shipbuilding," "Designing the ship," and "Building the ship."

The Dominion Government has appointed the Commissioners for Montreal Harbor as follows:—G. W. Stephens, chairman, C. C. Ballantyne and L. E. Geoffrion. The chairman, will receive $7,000 a year, while the others will be paid $5,000 a year each. They will be expected to devote the whole of their time to the duties of the office. It was stated in the House of Commons, Nov. 30, that the name of Hon. J. I. Tarte had been considered for the chairmanship, but that he had declined.

The General Metal Foundry and Machinery Co. has been incorporated under the Dominion Companies' Acts, with a capital of $199,900, and offices at Montreal, to take over the business of Lymburner and Mathews, engineers, machinists, brass founders, etc., and to carry on and extend the same. Power has also been taken to carry on the business of builders of ships and dredges, and to trade as shipowners. The provisional directors are: M. E., L. M., H. N. Lymburner, J. E. Mathews, J. B. Mathieu, Montreal; and A. St. Georges, St. Paul, Que.

The construction of steel sheds at the Montreal wharves, which has been going on for a couple of years past, will, it is expected, be completed so far as seven sheds are concerned, by the opening of navigation in the spring. The plans for the sheds, as finally passed by the commissioners, did not meet with the approval of the steamship owners, and the result was a number of meetings between the interested parties, and a compromise. These negotiations considerably delayed the contractors—P. Lyall & Sons—in getting ahead with the work, and those of the sheds which should have been ready for the season 1906, were only partially completed.

The Anchor Line str. India has been purchased by the Lake Erie Steamship Co., which will place her on a run between Montreal and Toledo, Ohio. It is understood that the India will be renamed City of Toronto. The company, when organized, purchased the Anchor Line str. China, and had her renamed City of Montreal. The India is a three-deck vessel of about 1,600 tons, and has good accommodation for passengers. The officers and directors of the company are: President, Jas. Carruthers, Montreal; Vice-President, W. D. Matthews, Toronto; General Manager, C. A. Jaques, Montreal; other directors: H. Munderloh, Montreal; J. H. Hall, Ottawa; S. Samuel, Toronto.

Judgment has been delivered in the Quebec courts in the various actions arising out of the collision of the Bay State, and its tows, the barges Berkshire and Bath, with the str. Universe, and the Montreal Harbor Commissioners' dredge. The Harbor Commissioners recover damages against the Bay State and the barge Bath; and its actions against the barge Berkshire and the str. Universe are dismissed; the action by the owner of the barges against the str. Universe is dismissed; and damages are given to the str. Universe against the owners of the Bay State and the barges Berkshire and Bath. The costs in the various actions are divided out in different proportions among the several parties. The questions of damages and of the amount of costs to be paid by the several parties were referred to the Deputy Registrar of the Exchequer Court

The Judicial Committee of the Imperial Privy Council, London, Eng., has dismissed the appeal of the Richelieu and Ontario Navigation Co., in the suit between that company and the Dominion Coal Co., as a result of the collision between the Canada and the Cape Breton off Sorel, Que., in June, 1904 The R. and O.N. Co.'s str. Canada was sunk, with the loss of five lives, as the result of the collision, and cross actions for damages were taken in the Admiralty court at Quebec. This court adjudged both vessels to blame, and directed that amount of damages to be paid by each vessel be apportioned by the Registrar. Upon appeal to the Supreme Court by both parties, the Canada was found to be solely to blame, and her owners were directed to pay damages to the owners of the Cape Breton. This decision has now been upheld by the final court of appeal, with costs. The damages to the Cape Breton are estimated to be about $80,000, and the costs of the action will be very heavy.

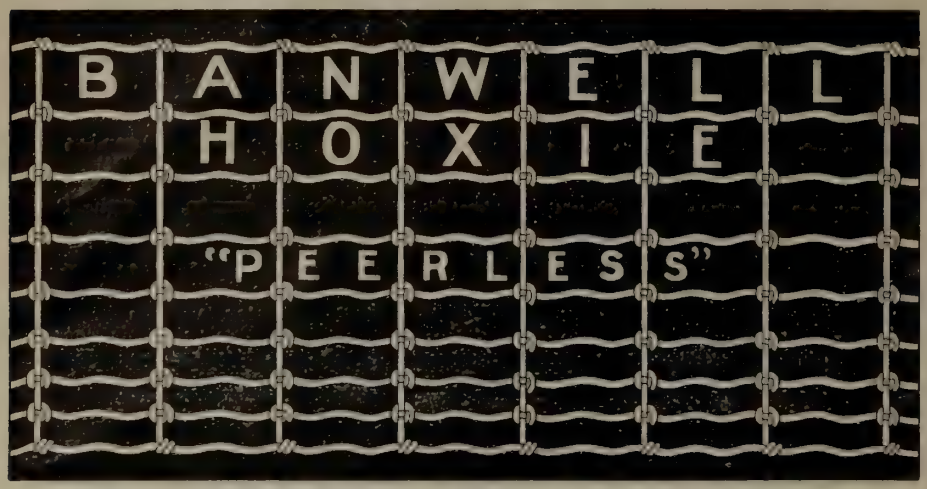
A bill has been introduced into the House of Commons having for its object the provision of free transportation of members of Parliament upon all inland steamship lines, in the same way as is done in the case of railways.

H. Mathers, Halifax, N.S., has been appointed to represent Canada as a member of the Imperial Commission which is going to enquire into the existence of an alleged shipping combine. Jno. Torrance, of Montreal, declined to accept the position.

The suction dredge Galveston, which the Dominion Government purchased at New Orleans, La., cost $146,000; repairs and fittings cost $10,942.14, and insurance $4,574.14. The dredge has been employed on the St. Lawrence channel, and during Dec. was working at St. John, N.B.

A. P. McKeen, who was drowned in the Cowleitz River, Ore., recently, while saving a deckhand who had fallen overboard, was a son of W. H. McKeen, of Hagersville, Ont. He was one of the men saved from the Islander when she struck on a reef near Skagway, in 1901, and was also in the wreck of the Clallen between Townsend and Victoria, B.C.

A deputation representing certain of the shipbuilding yards of Canada, waited on the Minister of Finance at Ottawa, Dec. 10, to discuss the subject of an increase in the bounty upon shipbuilding in Canada. It was pointed out that the shipbuilding companies are handicapped by reason of the fact that much of the material which they require in the course of business has to be imported and duty paid on it. The only offset to this is a bounty of $1.15 per ton, which, in the case of a 10,000-ton steamer would only amount to $11,500, while on the other hand, the duties paid upon material entering into construction of the vessel would range all the way from $25,000 to $30,000. In addition to this handicap, the Canadian shipbuilding firms have to contend with the competition of the British shipbuilders, whose vessels come into Canada free, and the extent of this competition may be gauged by the fact that at the present there are 170 British-built vessels plying on the Great Lakes. The deputation emphasized the fact that they did not wish to interfere with the tariff arrangement as it applies to British vessels, but they strongly urged that the bonus on Canadian-built ships be increased to at least $4 a ton.



PEERLESS WOVEN WIRE FENCING

Made from uniformly heavy hard steel wire, well galvanized.
Made in large rolls ready to stretch up.
Requires but few posts; costs very little to erect.
Conforms perfectly to any surface, no matter how rough.
Reduces the cost of fence maintenance to a minimum.

BANWELL HOXIE WIRE FENCE COMPANY LIMITED
HAMILTON, ONTARIO

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 10,500,000 acres of choice farming lands for sale in Manitoba, Saskatchewan and Alberta. Ranching lands generally $4.00 to $5.00 per acre. Lands adapted to grain growing and mixed farming $5.00 to $15.00 per acre according to quality and location. Maps showing the lands in detail will be sent free on application.

TERMS OF PAYMENT.

An actual settler may purchase not more than 640 acres, on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal with interest in nine equal instalments annually thereafter as shewn in the following table:—

160 Acres at	$4.00	per acre,	cash payment	$95.85,	first year's interest	$32.64	and nine instalments of	$80.00
" "	4.50	"	"	107.85,	" "	36.73	"	"	90.00
" "	5.00	"	"	119.85,	" "	40.81	"	"	100.00
" "	5.50	"	"	131.80,	" "	44.89	"	"	110.00
" "	6.00	"	"	143.80,	" "	48.98	"	"	120.00
" "	6.50	"	"	155.80,	" "	53 05	"	"	130.00
" "	7.00	"	"	167.80,	" "	57.16	"	"	140.00
" "	7.50	"	"	179.75,	" "	61.22	"	"	150.00
" "	8.00	"	"	196.70,	" "	65.28	"	"	160 00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of 6 per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN,
Land Commissioner C.P.R. Co., Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 650,000 acres of selected lands in Manitoba and Assiniboia which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

Ontario and the Great Lakes.

The S.S. Turbinia was not chartered to go south this winter, but is laid up at Toronto.

The str. Beaver, owned by C. White, Lakefield, Ont., was burned at her dock on Rice Lake, Ont., Dec. 7.

Capt. A. Curtis, of the Detroit, Belle Isle and Windsor Ferry Co.'s fleet, died at Windsor, Ont., Dec. 4.

Capt. O. Beatty, one of the oldest lake captains in Ontario, died at Hamilton, Ont., Nov. 28, aged 89.

Water was let out of the canal at Ottawa Dec. 1, and navigation on the river was closed about the same time.

The Dominion Government estimates for the current year provide $100,000 for harbor improvements at Toronto.

Jas. Playfair, of the Midland Navigation Co., Midland, Ont., has purchased a new yacht to replace the Margueretta.

The Dominion Government is arranging to establish life saving stations mainly along the gulf shore of Prince Edward Island.

The G.T. Pacific Ry. dock at West Fort, Fort William, Ont., collapsed Nov. 19, and 50 ft. slipped into the river, carrying with it 800 tons of steel rails.

"The Georgian Bay ship canal, from Georgian Bay to Montreal," said Hon. R. Lemieux, in a recent speech at Montreal, "is a thing of the near future."

The Brockville Navigation Co.'s str. Victoria sank at her moorings at Brockville, Ont., Dec. 7. She was injured on Dec. 6, in a collision with the tug Queen.

The Kingston schooner Queen of the Lakes foundered off Sodus Point, N.Y., Nov. 29, and the crew reached Kingston, Ont., on the following day in their small boats.

Regulations have been approved for the governance of a ferry across the Rainy River between the town of Rainy River, Ont., and the towns of Beaudette and Spooner, Minn., U.S.

H. S. Osler, K.C., Toronto, has been appointed by the Ontario Government as counsel to represent it in the settlement of the International boundary line through Lake Erie.

The Montreal Transportation Co.'s str. Fairmount went ashore near Snake Island, Kingston, Ont., Dec. 9, and was lightened before she was got off. The damage is not serious.

There was an ice jam at Sault Ste. Marie, Ont., Dec. 7, when 20 vessels were caught. An attempt was made to release them by ice-crushing steamers, and the jam was broken Dec. 11.

The str. Turret Crown, operated by one of the Mackenzie, Mann & Co. undertakings, went aground near Grand Marias, Lake Superior, Nov. 27, while bound for Duluth, Minn., without a cargo. She was subsequently got off uninjured.

The str. Jessie Bain, which was operated under charter during the past season of navigation by the Rathbun Co., was returning to Kingston, Ont., Dec. 3, when her hull was pierced by ice and she sank after reaching the slip.

Navigation closed at Toronto Dec. 8, when the Hamilton Steamboat Co.'s str. Macassa left for Hamilton, and the Niagara, St. Catharines and Toronto Navigation Co.'s str. Lakeside arrived from Port Dalhousie, Ont.

The estimate of the underwriters is that the season of navigation of 1906, represents the loss of 137 lives, and property valued at over $2,000,000, upon the Great Lakes. Canadian boats suffered heavily during the season.

The str. City of New York, which went aground near Coteau Lake, Ont., was got off uninjured, and was taken to Cornwall, Ont., where she will remain for the winter. Her cargo will be transferred to the railway and taken on to Montreal.

During the ten years ended June 30, 1906, the Dominion Government expended $1,404,267.67 through the Department of Railways and Canals, and $828,187.86, through the Department of Public Works, upon the improvements at Port Colborne, Ont.

The Montreal Corn Exchange has endorsed the resolution passed by the Kingston Board of Trade in favor of the deepening and widening of the Welland Canal, so that it can be navigated by the same size vessels as can pass through the Sault Ste. Marie canals.

The Department of Marine has arranged for the delivery of a series of lectures in Toronto, two nights a week, until the end of Feb., upon seamanship and navigation. The lectures are free and are open to all who are interested, The first lecture of the series was delivered Dec. 4.

The U.S. Chief of Engineers has reported adversely against the proposal to cut a 25-ft. channel between Chicago, Duluth and Buffalo. He says that no deepening of the channel should be commenced until it is demonstrated that a 20-ft. channel will not meet the demands of commerce.

The steam barge Hickox, from Oswego to Belleville, Ont., with coal, caught fire on the trip, and was beached at Main Ducks Island, Dec. 2. The crew were compelled to stay on the island until Dec. 4, before the weather moderated sufficiently to enable them to leave in their small boat.

The boiler of the tug Georgiana burned out while she was towing a barge from Silver Islet to Port Arthur, Ont., Dec. 7. The boat finally made the shore under sail, and the men tramped to the C.P.R. near Sawyer's Bay, where they were picked up by a freight train and taken into Port Arthur.

Capt. Lesslie, of the North American Wrecking Co., was given a public welcome upon his return to Kingston, Ont., after the successful floating of the Allan Line S.S. Bavarian. He was presented with a piece of silver plate by the citizens as a recognition of his service to marine interests.

The last lock on the stretch of the Trent Valley canal between Healey's Falls on the Trent River, and Lake Simcoe, Ont., has been completed, and will be opened for navigation in the spring. The lock is situated at Kirkfield, Ont., and is of the hydraulic lift type, affording an elevation of 50 ft.

The str. Eleanor, of the Parry Sound Yacht Co.'s fleet, while out taking in buoys and lights for the Marine Department in Georgian Bay, got on to a shoal near Pancake Island, Dec. 7. The crew were taken off by another of the company's steamers, but the Eleanor will have to remain until the spring.

The estimates placed before the U.S. Congress for expenditures on harbors and rivers during 1907, provide for $500,000 at the falls of St. Mary's River, Mich.; $1,000,000 on Hay Lake and Neebish channels, St. Mary's River; $300,000 on Detroit River; $222,000, Black Rock harbor and channel, N.Y.

The Canadian Supreme Court has under consideration an appeal in the case of the D. C. Whitney against the St. Clair Navigation Co. and the Southern Coal and Transportation Co. The main question involved is as to the jurisdiction of the Admiralty Courts in Canada to try a case of collision between two U.S. vessels in a U.S. port.

A decision has been given by Justice Clute, at Chatham, Ont., that the River Thames, at Kentbridge, Ont., is a non-navigable stream, and that the plaintiff owned the land as far as the centre of the stream. The action arose out of a claim made by Pickard and Avery to take sand from the bed of the river on the ground that it belonged to the Crown.

It was stated in reply to a question in the House of Commons, Nov. 28, that $2,031 had been expended by the Department of Public Works in having a survey made of the River Thames as far as Chatham, Ont. No decision, however, had been reached upon the question of deepening the channel of the river from its mouth to Chatham to a depth of 18 or 20 ft.

Unconfirmed reports state that the C.P.R. has decided to build three new steamers for its Upper Lakes trade. Some time ago it was announced that a contract had been placed for a new Upper Lakes steamer by the C.P.R., for delivery in the spring, but it is now stated the contract has been abandoned, as the shipbuilding company cannot undertake to make delivery.

Following is a statement of grain shipments out of Port Arthur and Fort William for the season of 1906 up to Nov. 30, in bushels: Wheat, 34,377,837; oats, 4,659,068; barley, 574,848; flax, 282,145; total shipments, 39,893,898; total shipments in foreign bottoms, 8,222,167: shipments in Canadian bottoms for Nov., 1906, 7,710,496, against 6,895,716 in Nov., 1905.

Replying to a question in the House of Commons, Nov. 28, the Acting Minister of Public Works stated that the Chief Engineer in charge of surveys upon the proposed Montreal-Georgian Bay canal had presented two interim reports, and the final report was expected to be ready for presentation during Jan. No approximate estimate of the cost of the work had been prepared.

The Lakes to the Gulf Deep Waterway Association has been formed in St. Louis, Mo., for the purpose of promoting the construction of a deep waterway from the Chicago Drainage Canal through the valleys of the Des Plaines and Illinois Rivers, to the Mississippi River at Grafton, Ill., thence down that river to St. Louis. The minimum depth which it is desired to obtain is 14 ft.

A sitting of the Admiralty Court was held in Hamilton, Ont., Nov. 27, for the purpose of hearing a claim against the str. Dundurn, brought by one of the engineers, named Allison. Judge Hodgins, after the question of an adjournment had been discussed, induced the parties to effect a settlement. This is the first occasion upon which the Admiralty Court has held a sitting in Hamilton.

The bill which the U.S. Congress has under consideration for the improvement of harbors and rivers, includes $10,000,000 for the construction of a third lock at Sault Ste. Marie, Mich.; $500,000 for the proposed canal to connect the lake at Buffalo with the terminus of the 1,000-ton barge canal at Tonawanda, N.Y.; and $2,000,000 on account of the improvement of the Detroit River, chiefly at the Limekiln crossing near Amherstburg, Ont.

The Hamilton str. Golspie, which has been doing service on the Upper Lakes as a lighthouse tender, went ashore near Brule Bay, Lake Superior, Dec. 4, and has become a total wreck. The captain and five of the crew remained by the vessel, and the mate with the rest of the crew set out to row to Michipicoten harbor. The first mentioned were rescued by a tug, Dec. 9, and the others reached Michipicoten after having a rough time.

The Dominion Fish Co.'s tug J. H. Jones, of Owen Sound, Ont., was wrecked during a recent storm on Lake Huron, with the loss of 26 lives, passengers and crew. The steamer left Owen Sound, Nov. 22, on her usual route, collecting boxes of fish from the various fish-

210 ELLICOTT SQUARE, BUFFALO, N.Y.

ing stations, and was last seen to pass Cape Croker lighthouse the same afternoon. The steamer was a good boat of her class, and is thought to have been overwhelmed by the heavy seas prevailing during the storms.

The new steamer which the Farrar Transportation Co., of Collingwood, is having built for the Upper Lakes trade, will be ready for launching in May. Her dimensions will be: length, 406 ft.; breadth, 50 ft.; depth, 28 ft.; and she will be fitted with triple expansion engines, cylinders 21, 37 and 42 in. diameter, by 42 in. stroke, to which steam will be supplied by two Scotch boilers, 14½ ft. diameter by 12 ft. long. It is expected that the engines will have 1,600 indicated horse power.

The Upper Ontario Steamboat Co., which was recently incorporated under the Dominion Companies' Acts, with a capital of $99,000 and offices at New Liskeard, Ont., to carry on a general navigation business on Lake Temiskaming and adjacent waters, will take over the steamers Gypsie, Geshia, and Blanche, and a number of scows. The vessels were previously operated by Brickenden and Hendry, who are the practical members of the company, the other directors being: M. R. Jennings, G. C. Banks, and F. L. Smiley, of New Liskeard.

The Algoma Central Ry. str. Theano struck on a rock near the entrance to Thunder Bay, Nov. 18, was washed off by the heavy sea and sank. She had a cargo of 2,044 tons of steel rails on board for the National Transcontinental Ry. construction. Capt. Sinclair, who has been looking into the matter of the loss of the Theano, and the str. Strathmore, for the underwriters, says that there is nothing left to show where the Theano sank; the depth of water in the vicinity is 400 ft. The Strathmore was burned after she went ashore on Michipicoten Island.

The Great Lakes Dredging Co. was given a contract by the Dominion Government for keeping the harbors of Port Arthur and Fort William, Ont., open during the season of navigation of 1906. By the use of the specially constructed tug James Whalen, and other vessels, the harbors were kept open until Dec. 12, when the last steamers left. The Wacondah, one of the last of the vessels to leave, returned Dec. 16, her cargo having shifted owing to the heavy weather. She will remain at Port Arthur for the winter. The Reid Co.'s tug Manistique also arrived in Port Arthur, Dec. 16. She was towing the barge Ireland, but owing to the heavy weather had to abandon it at anchor off Sand Island.

The Trent Valley Canal was under discussion in the House of Commons for a brief period Dec. 3. The Premier stated that the canal in its present incomplete state had proven to be of material advantage to the district which it served, and justified the policy of the construction of branches as feeders. While the Government had not sufficient information to enable them to form an opinion upon the merits of the Gull River from Coboconk northward, the opening up of which was advocated by Col. S. Hughes, M.P., he thought the county which it would open up was more suited for forest reserve and tourist purposes than it was for agriculture. W. H. Bennett, M.P., advocated the immediate completion of the canal by the Severn River route, and T. H. Lennox, M.P., advocated the survey of the route from Barrie via the Nattawasaga River.

The grain section of the Toronto Board of Trade, in connection with the loss of the barge Resolute, with six lives, off Toronto, has passed a resolution asking the Dominion Government to improve and deepen the western channel to 14 ft., and the eastern gap to 18 ft., so that vessels could enter in any weather. The section also recommended the purchase of a fire tug, to be manned with a life saving crew. Replying to a question in the House of Commons the Minister of Marine said a fully equipped surf boat was kept at the harbor, and the equipment was under the charge of Capt. W. Ward, who lived on the Island. The question of what further protection was necessary was under the consideration of the Department. An investigation was held at Toronto, Dec. 3, before Commander Spain, Wreck Commissioner, assisted by Capt. T. Donnelly, Kingston, Ont., and Capt. J. W. Trowell, of the str. Persia, into the circumstances attending the loss of the vessel. Judgment was reserved.

The Northern Navigation Co.'s str. Monarch, while on her last trip for the season from Port Arthur to Sarnia, Ont., struck on Isle Royal, Lake Superior, during the night of Dec. 8. The passengers and crew, numbering 41, were got off safely with the exception of one watchman, who was drowned. The rescued people were on the island until Dec. 10, having no shelter and but little to eat, until tugs arrived from Port Arthur and took them off. The news was taken into Port Arthur by the str. Edmonton, which was unable to get near enough to the rocky island to effect a rescue. The Monarch has pounded to pieces, and no attempt will be made to get her off. She was valued at $85,000. On Dec. 15, Capt. Robertson, of the Monarch, was given a purse of gold and an address by the people of Port Arthur, as a mark of respect. The company's str. Ionic also ran ashore during the same snow storm about a mile from Whitefish Point, Lake Superior, but was released by tugs Dec. 11, without having sustained any material damage.

Replying to a question in the House of Commons, Dec. 12, the acting Minister of Public Works stated that the depth of water in the eastern entrance to Toronto harbor was 16 ft. 6 in. and in the western entrance 9 ft. 6 in. This is not sufficient for the purpose of navigation at all times and in all weathers. Several communications had been received by the Government from the city of Toronto, the Harbor Commissioners and other persons during the past five years, complaining of insufficient depth of water at these entrances. Three instances of vessels going aground or becoming wrecked because they were unable to obtain access to the harbor, had recently been called to the attention of the Government. The Government had already taken action towards deepening these entrances. During the past three years 89,348 yards of material had been taken out of the eastern entrance, while the Harbor Commissioners for the same period has removed 70,129 yards from the western channel. The channels were constantly filling up, owing to the nature of the material, and its being washed in again.

The Lake Superior and Hudson Bay Development and Canal Co. is the title under which an act of incorporation is being sought at the current session of the Dominion Parliament by certain interests represented by A. Honeywell, solicitor, Ottawa. The company desires to have power to locate and construct a canal, canals or system of canals, to build dams, create storage for water, divert streams and otherwise to control the flow of water so as to improve the natural waterways, and create a navigable waterway between Lake Superior, James Bay and Hudson Bay, by way of Nepigon River, Nepigon Lake, the water stretches between Nepigon Lake and the Albany River, the Albany River to James Bay, by the water stretches between the Albany River and the Severn River, and by the Severn River to Hudson Bay, to complete such navigable canal or canals sufficient to enable vessels of deep draught to pass in safety through the same; to construct, maintain and operate terminals, wharves, docks and warehouses in connection with the same; to develop and deal in electrical power; to own and operate steam and other vessels and to carry on a general navigation business; to levy tolls for the use of the canals and other facilities; to construct railways and tramways, telegraph and telephone lines, bridges, ferries and such other works as may be necessary, and to carry on a number of businesses in connection with the enterprise.

Manitoba, Saskatchewan, Alberta, Etc.

The Globe Lumber Co. has been incorporated under the Manitoba Companies' Act, with a capital of $60,000 and offices at Winnipeg, with power, among other things, to operate steam or sailing vessels and barges. H. C. Webb, A. Lucas, C. W. Tait, A. B. Donley, C. W. Bradshaw, Winnipeg, are the provisional directors.

L. McCarthy, M.P., has reintroduced, for the fourth time, at the current session of the Dominion Parliament, a bill to amend the Steamboat Inspection Act, 1898. The object is to require that engineers on steamboats over a fixed tonnage shall have a certificate from the Department of Marine. At the last session the bill was referred to a special committee, and was not reported back to the House of Commons.

The Toronto branch of the Navy League has adopted the following resolution: "That it is not consistent with the true interests of Canada, either from a political or from an economic point of view, that we should continue to neglect all preparation to take our part in the naval defence of the British Empire, and that it is a duty we owe to ourselves, to our floating commerce, and to the Empire, that we should lay the foundations of a broad national maritime policy, in which naval preparation will go hand in hand with the development of a Canadian mercantile marine, with the encouragement of the Canadian shipbuilding industry, and with securing for Canada her fair share of the world's maritime transportation."

The report of the International Waterways Commission upon the application of the International Development Co., for permission to construct regulating works on the Richelieu River and canals, under the charter of the Lake Champlain and St. Lawrence Ship Canal Co., has been issued. While the works proposed, plans of which, however, were not submitted, are to be entirely in Canada, their operation will affect the levels of Lake Champlain in New York State. The Commissioners are of opinion that it is not desirable that either nation should obstruct the natural flow of streams crossing the International boundary to the injury of public or private rights in the other. The applicants should be compelled to furnish evidence that public or private rights will not be injuriously affected by the carrying out of the suggested works; and that the company be compelled to operate the canals under such regulations affecting the levels of Lake Champlain as may be approved by the Secretary of War at Washington. The report concludes: "We respectfully submit that in any treaty to be had between the two nations in relation to the use of international waters, the principles above suggested should have consideration. We would further suggest that the applicants' Canadian act of incorporation should be amended so as to provide that the maintenance of the works sought to be erected shall be conditional at all times upon compliance with all regulations imposed by the Secretary of War of the United States from time to time for the preservation of the levels of Lake Champlain."

B.C. and Pacific Coast Marine.

The Skeena River str. Pheasant is reported wrecked near Beaver Dam, and will be a total loss. The crew were saved and reached Vancouver Nov. 27.

The revocation of the appointment of Aulay Morrison as Deputy Judge in Admiralty of the Exchequer Court of Canada for the district of British Columbia is announced.

The Vancouver Tug and Barge Co. has been incorporated under the British Columbia Companies' Acts, with a capital of $100,000 and offices at Vancouver, to carry on a general towage and lighterage business.

The steamers Iroquois and Chippewa, which are on the way from the Upper Lakes to the Pacific Coast, are to be converted into oil burners on their arrival there. They are expected to reach Seattle, Wash., early in Feb.

The steam whaler St. Lawrence has been purchased in Newfoundland by Victoria, B.C., owners, represented by Capt. Balcom. The steamer is on her way to the Pacific Coast, and is expected to reach Victoria early in Feb.

J. C. Kinghorn, Victoria, has been appointed an inspector of hulls and equipment of steamboats for such ports in the Province of British Columbia as may be designated by the Minister of Marine and Fisheries. He will have his office at Victoria.

The new lighthouse has been completed at Cape Beale, B.C., by the Dominion Government, and the temporary light has been removed. It is intended to replace the illuminating apparatus with a modern quick-flashing light early in the year.

The Canadian Fish Co. is converting its fishing trawler Celestial Empire into a dory steamer, owing to the lack of success as a trawler. The Celestial Empire, and two or three other trawlers, were brought out from England, early in 1906, for the fisheries off the B.C. coast.

The Tidal and Current Survey branch of the Department of Marine has issued tide tables for the Pacific coast of Canada for 1907 The waters included in the tables are Fuca Strait, Strait of Georgia, and the northern coast, and there are also included data for slack water in the navigable passes and narrows.

A Victoria, B.C., press report states that a number of English and Scottish firms are interested in a project to combine the small shipbuilding and repairing yards upon the B.C. coast, and concentrating them at Esquimalt, where a yard will be laid out with accommodation for the construction and repair of the largest ocean-going vessels.

All the civil actions arising out of the collision between the C.P.R. str. Princess Victoria and the Chehalis in July, 1906, have been consolidated and a decision of Justice Morrison is to the effect that the cases shall be tried without a jury, but that the presiding judge may call in two nautical assessors to assist him upon questions of seamanship. The plaintiffs are appealing against this order.

The Pacific Coast Steamship Co. is being sued by the San Francisco, Cal., pilots for pilotage fees at that port, on the ground that as the company's steamers touch at Victoria, B.C., they arrive from a foreign port. R. P. Rithet & Co., the company's B.C agents, have communicated with the Victoria Board of Trade upon the matter, and pointed out that in the event of the decision being against the company, the call at Victoria may have to be cut out.

It is expected that the arrangements between the Dominion and Imperial Governments respecting the transfer to the former of the dockyard property at Esquimalt, B.C., will shortly be completed. The Dominion Government has several steamers on the Pacific coast, for which the present wharfage accommodation at Vancouver and Victoria is insufficient. It is understood that the whole of the vessels will have their headquarters at Esquimalt when the transfer takes place.

Notices to Mariners.

The Department of Marine, Ottawa, has issued the following notices to mariners:

No. 129. Nov. 8.—Nova Scotia—318. Southwest coast, Cape Sable, change in fog alarm. 319. South coast, Sambro, temporary change in light. 320. Cape Breton Island, Gulf of Canso, Bear Island, lighthouse established. New Brunswick—321. Chaleur Bay, Restigouche River, Campbellton, front range lighthouse moved. Labrador—322. Domino run approach, Deer Island, shoal to the northward.

No. 130. Nov. 12.—New Brunswick—324. Bay of Fundy, Chignecto channel, Cumberland basin, Ward point, light improved. Nova Scotia—325. South coast, Little Hope, temporary light. Labrador—328. Strait of Belle Isle, Red bay, Saddle Island, light established.

No. 131. Nov. 12.—Ontario Lighthouse division—329. River St. Lawrence, Lake St. Francis, Lancaster bar, gas buoy established. Ontario—330. Georgian bay, east side, approach to Parry Sound, change in character of light.

No. 132. Nov. 12.—British Columbia—331. Vancouver Island, west coast, Clayoquot sound, Templar channel, Lennard Island, change in characteristic of fog alarm. 332. Queen Charlotte sound, New channel, Christie passage, Balaklava Island, Scarlett point, hand fog horn at light station.

No. 134. Nov. 13.—Ontario Lighthouse division—334. Quebec, Ottawa River, north shore, Way channel, and Besserer crossing, range lights established.

No. 136. Nov. 15.—Quebec—337. Ottawa River, Calumet wharf, wrecks removed. Ontario—338. Lake Erie, Pelee passage, wreck of Tasmania removed.

No. 137. Nov. 15.—Quebec—339. Chaleur bay, north side, Port Daniel West, lighthouse established. 340. Chaleur bay, north side, Port Daniel, color of light to be changed.

No. 138. Nov. 16.—British Columbia—341. Vancouver Island, Victoria harbor, Laurel point, change in position of light. Alaska—342. Norton sound, St. Michael's Island, Cape Stephens, light established.

No. 139. Nov. 17.—Quebec—343. River St. Lawrence, St. Simeon, light established.

No. 140. Nov. 17.—New Brunswick—344. South coast, Bay of Fundy, Passamaquoddy bay, St. Andrew's bar, Navy Island, light improved. 345. Northumberland strait, Richibucto harbor entrance, range lights on south beach temporarily extinguished, bell buoy adrift. Nova Scotia.—346. South coast, Tusket River entrance, Pioneer rock located and buoyed. 347. Cape Breton Island, east coast, Sydney harbor entrance wreck removed.

No. 141. Nov. 19.—Nova Scotia—348. South coast, off entrance to Sable Island, Bantam rock, bell buoy established.

No. 142. Nov. 21.—Nova Scotia—350. West coast, Yarmouth Sound, Hen and Chickens, gas and bell buoy to be established. Prince Edward Island—351. South coast, Bedeque bay, Miscouche shoal, gas buoy established.

No. 143. Nov. 22.—British Columbia.—352. Vancouver Island, south coast, Strait of Juan de Fuca, Trial Island, permanent light not yet established, temporary light described.

No. 144. Nov. 24.—British Columbia—353. Chatham sound, Prince Rupert harbor Tuck Inlet, uncharted rocks, buoys established, beacons erected, sailing directions. 354. Hectate strait, Edge passage, shallow depths in western approach. 355. Dixon entrance, West Devil rock, shoal depths in vicinity. 356. Dixon entrance, Queen Charlotte Islands, position of North Island and northwest extreme of Graham Island incorrectly shown on Admiralty chart. 357. Dixon entrance, danger southward of Cape Muzon.

No. 145. Nov. 28.—Quebec—358. River St. Lawrence, a chart numbered 8, of the River St. Lawrence at the head of Lake St. Peter between Montreal and Quebec, has been issued by the Department of Marine.

146. Nov. 29.—Ontario Lighthouse Division—359. Quebec—Ottawa River, Upper Allumette Lake, Allumette Island, light established. 360. Ottawa River, Upper Allumette Lake, Morrison or Hawley Island, light discontinued.

No. 147. Nov. 30.—Nova Scotia—362. South coast, Sambro light, lighthouse tower increased in height, light changed.

148. Dec. 4.—Ontario—365. Detroit River, Amherstburg reach, Elliott point, range lights changed in position, float lights moved.

No. 150.—Dec. 6.—British Columbia—373. Vancouver Island, southeast coast, Pachena point, temporary light.

The Stranding of the S.S. Victoria.

Capt. J. Gaudin, of the Department of Marine, assisted by Capt. J Gosse and Capt. J. G. Cox, have concluded an investigation into the circumstances attending the stranding of the C.P.R. steamer Princess Victoria on Lewis reef, Oct. 16. The important paragraphs in the judgment follow: "4. After carefully considering the evidence given before the commission, we find that after passing Cadboro Point, a proper course was shaped to pass between Lewis and Fiddle reefs. Capt. Hickey observed that the ebb tide was setting the vessel to the southward he then changed the course half a point over to the westward, from S. by W., ½W. to S. S. W. in order to counteract the influence of the tide; he also consulted the pilot, who, after observation, replied they were in the fair-way, or in a good position. When shortly afterwards Lewis reef beacon was made almost ahead, slightly on the starboard side, the engines were immediately reversed full speed, and every precaution was taken to prevent the unavoidable stranding of the vessel. This casualty must be attributed to error of judgment of the master in underestimating the set of the tide and his distance from Fiddle Reef light. Furthermore it is not in evidence that this casualty was caused by want of attention to the navigation of the ship by either the master or the chief officer; the court is therefore not warranted in recommending that the certificates of these officers be dealt with. It is recommended that owing to the large amount of traffic passing through Baynes channel, that a small light be established on Lewis reef to prevent the recurrence of such accidents as the stranding of the Princess Victoria.

Notice has been given in the House of Commons, that a resolution will be submitted at an early date urging that steps be taken to secure for Canada the cancellation of existing coasting privileges now enjoyed by foreign countries under Imperial treaties. Under the terms of such treaties a large number of Norwegian vessels are engaged in the coasting trade in Canada, particularly in the Maritime Provinces.

The Kensington Stranding Case.

Commander Spain, R.N., Dominion Wreck Commissioner, assisted by Capts. W. H. Logan and J. Temple, held an investigation at Quebec, Nov. 22, into the stranding of the S.S. Kensington in the St. Lawrence River, near Matane, on Nov. 11. The following decision was rendered Dec. 10: "The Kensington was fully supplied with all the necessary aids to navigation, in the way of charts, instruments, etc. The vessel was set towards the land by the strong southeast current, which is known to nearly always exist on the Matane coast. The master of the Kensington took a four point bearing of an uncharted object on shore, the object being a prominent house; the bearings were no doubt properly taken, but, the house in question was well back from the shore, and, although the vessel was three miles distant from the object, she certainly was not anything like that distance from the shore. The court is strongly of the opinion that, had the lead been used, an excellent warning would have been given, as the soundings in this vicinity are unmistakable close in shore; the court is satisfied that the master of the Kensington gave every attention to his vessel, but he was over-anxious, and has committed a serious error in judgment; the court, however, taking into consideration Captain Morle's previous excellent record, considers that the case does not call for any interference with his certificate, but warns him to be more careful in future."

The Grounding of the S.S. Agnar.

Commander Spain, R.N., Dominion Wreck Commissioner; Capt. A. Hawkett and Pilot N. Gauthier, as assessors, held an enquiry at Montreal on Nov. 5, 1906, into the causes which led to the grounding of the S.S. Agnar on the bar at Cape Charles, St. Lawrence River, Sept. 22, 1906. The following judgment has been given: "That the S.S. Agnar, when nearing Batture du Chene gas buoy number 73Q. on her voyage to Montreal, heard one blast of a whistle from the steamship Monmouth, which vessel was approximately about 1½ miles astern; this whistle was answered by Pilot Belisle, of the Agnar, immediately, and the engines of the Agnar were put at "slow." When between Batture du Chene and Cadieux buoy another blast was blown from the Monmouth, which was also answered by the Agnar. In the opinion of the court, Pilot Belisle of the Agnar should not have answered this second whistle, for the reason that, with the strong easterly wind, and the flood tide, there was not enough distance for the Monmouth to pass the Agnar before getting to Cape Charles, and Pilot Belisle, being in the leading ship, should have been aware of this fact. It is also apparent that Pilot LaBranch, in the S.S. Monmouth, who was keeping his vessel full speed ahead, should have been able to judge, by the way he was overtaking the Agnar, that it would be impossible for him to pass before getting to Cape Charles. A third blast of the whistle was given from the Monmouth, which was not answered by the Agnar, and, after giving this blast, Pilot LaBranch ordered the engines of the Monmouth full speed astern, but, finding that his vessel was canting towards the north bank, he was obliged to go ahead again, which necessitated his passing the Agnar in the narrow channel, which no doubt caused the Agnar to ground. In the opinion of the court, both pilots were deceived by the strong east wind, and the flood tide, and both Pilot F. LaBranch and Pilot Arthur Belisle are hereby censured and warned to be more careful in the future."

The Burroughs-Bielman Collision.

The Supreme Court at Ottawa decided the case of the Bielman vs. Caldwell, recently, the Chief Justice delivering the judgment as follows: "This is a case of damage promoted by the owners of the ship G. T. Burroughs against the owners of the ship C. F. Bielman, both foreign ships registered in U.S. ports. By the pleadings and findings of fact, it appears: On May 31, 1905, at about 12.45 a.m., a collision took place between the Burroughs and the Bielman, in the St. Clair River, just below the southeast bend. The Burroughs was a steamer 109 ft. long, 27 ft. beam and 9 ft. draught, and the Bielman 305 ft. long, 42 ft. beam and 18 ft. draught. The weather was clear, the wind light from the southwest. Both vessels were proceeding down the river on the same course, fully laden, the Bielman having the barge McLaughlin in tow. The navigable channel of the river, where the collision occurred, is about 700 ft. wide, very winding, and is referred to in the evidence as dangerous. One of the witnesses describes it as 'collision bend, because accidents happen there.' There were several vessels in the locality at the time of the collision. Under these circumstances the Bielman, going at the rate of about nine miles, attempted to overtake and pass the Burroughs on the latter's port side. It is unnecessary to refer to the well-known rules which require caution as to speed in a dangerous and crowded channel, and put upon the overtaking and pursuing vessel the obligation to keep out of the way of the overtaken vessel, which latter has the right-of-way, her only duty being to hold her course. It is sufficient to say that, as the boats were abreast, the bow of the Bielman, apparently being somewhat ahead and at a distance apart of not less than 250 ft., which is the extreme limit fixed by any of the witnesses, a collision occurred; the bow of the Burroughs swung towards the Bielman and struck her amidships; as a result of the blow, the Burroughs sank. It is argued by the appellant that the Burroughs was not properly manned and that proper steps were not taken by those on board of that steamer at the critical moment to guard against an accident. Even if it be admitted that, on the whole, the evidence of both sides is, on some points, conflicting and nicely balanced, I am of opinion that the court below was properly guided by the probabilities of the respective cases which are set out, and the balance of probability favors the theory adopted by the trial judge that the collision was the result of the suction produced by the passage through the water of a relatively large vessel, such as the Bielman overtaking a smaller vessel in close proximity and at a rate of speed which, under the circumstances, was too great and which suction caused the Burroughs to sheer over to port and collide with the Bielman. The appeal should be dismissed with costs."

Transfer of Halifax Dockyard, &c.

The Dominion Government notified the representatives of the Imperial Government at the Halifax dockyard that it would be prepared to take over the property Jan. 1. The property covers 40 acres of land along the water front, and is valued at about $3,000,000. It comprises a navy yard, victualling yard, naval barracks, naval hospital and grounds, burial ground, Admiralty house and grounds, recreation grounds, and a dozen wharves. The condition imposed by the Imperial Government and accepted by the Dominion Government in connection with the transfer are: (1) The care and maintenance of the buildings, plant and machinery to be undertaken by the Dominion Government and to be regulated by similar instructions to those in force at the time of the closing of the yards. (2) The yards to be open to inspection by the Commanders-in-Chief of the North American, West Indies and particular service squadrons when desired. (3) The yards to be available for the repair of his Majesty's ships at any time so far as their facilities admit. (4) The places where the navy coal has been hitherto stored to be kept free for such stocks as may be required from time to time for his Majesty's navy; access to the wharves to be available and the use of all appliances for coaling his Majesty's ships to be permitted. (5) The Admiralty to have power to take over the full management and charge of the establishment in the event of war or any other emergency, of which the Admiralty shall be the sole judges. (6) The right for the Admiralty to revert into permanent occupation of the establishments whenever they consider that the interests of the navy render such course necessary, without incurring any liability towards the Dominion Government. (7) The Dominion to undertake all existing liabilities to which the establishments are subject for such time as they may be in the occupation of the Dominion.

The New Steamship Dundee.

The str. Dundee, the latest addition to the fleet of vessels managed by R. O. and A. B. Mackay, Hamilton, Ont., sailed from the builder's yards, Dundee, Scotland, Nov. 4, and put into St. John's, Nfld., Nov. 16, with her steering gear disabled, and otherwise damaged. She experienced very heavy weather, and during the storm one of the engineers was badly crushed in the machinery and one of the seamen had his leg broken. The injured men were removed to the hospital at St. John's for treatment, and the steamer was repaired before leaving for Hamilton, which was reached Dec. 3. The Dundee has been built to the highest class British Corporation Registry and is specially designed for the grain and package freight business. The steering gear is placed aft under the spar deck, and is of an elaborate description, combining both hand and steam gears; in the after part of the boat there is a steam capstan, while two steam winches are fitted convenient to the cargo hatches. A large wire warping winch is placed amidships for rapid mooring, etc., and steam windlass and capstan on the forecastle head. The other arrangements for towing are of the most complete description. Forward in the large deckhouse, elaborately furnished, are the captain's and owners' rooms, with all conveniences. The officers' quarters are also placed forward under the forecastle deck, while the engineers are accommodated on the spar deck aft; also a large dining saloon. The crew's quarters are immediately under on the main deck. Her dimensions are: Length, 257 ft. over all; breadth, 43 ft. 3 in., with a depth of, to spar deck, 26 ft. 6 in.; her gross tonnage being 2,300 tons. The engines are placed aft. They are of the triple-expansion type, with cylinders 20, 33 and 54 in. in diameter, with a stroke of 36 in. Steam is supplied by two large boilers working at a pressure of 180 lbs. per square inch. This is the fourth vessel built by The Caldon Shipbuilding and Engineering Co. for the Canadian lake trade.

The Lake Freight Situation.

Our Winnipeg correspondent wrote as follows Dec. 15: "The lake season just closed has been a very disappointing one from the standpoint of both owners and shippers, as after the magnificent growing weather all season and the equally fine weather during threshing operations, the car shortage in the west prevented a free movement of the grain, and the effect of this was to keep the price of wheat too high for an active demand for our wheat from exporters, and this in turn had the effect of knocking the bottom out of lake freight rates, they having gone as low as 1½c. per bushel during the last week of Nov., against 4½ to 5c. for the same time last season, and of course this rate for such a late date hardly paid the expense of handling the business owing to the increase in all operating expenses aboard ship in the late fall.

"The car shortage in the west was caused by the extraordinary amount of westbound package freight being handled by the railways, and also somewhat to the failure of coal dealers throughout the west to get in their supplies during the early summer, and the consequent demand for cars for this traffic during the wheat shipping season. Contrary to general expectation, there was no car shortage to speak of at eastern lake terminals, as owing to the slowness in movement in the west the grain did not move over the lakes fast enough to bother the eastern terminals to any extent; in addition to this, there were two new eastern terminal elevators ready before the close of navigation, one at Tiffin and the other at Goderich, which also perhaps had something to do with the fact that there was no blockade east of the lakes. From a weather standpoint, conditions might have been considerably better, for although the season opened early, navigation was delayed to a great extent all season by fogs and later on by rather severe gales, and early in October by snow storms, and to top off, serious delays were encountered by ice obstructions in the St. Mary's River which lost a number of boats a trip. The severe weather was responsible for the loss of a number of Canadian vessels, among which might be mentioned the Theano, Golspie and Monarch, all being lost through severe weather, and a number of others being lost by collision.

"The total movement of wheat from the Canadian head of the lakes will probably fall fully six million bushels short of the previous season, but the interior is still full of grain of all kinds and the business will simply be moved at the beginning of next season, but of course the lake rates are never as attractive in the spring as in the fall, for the reason that shippers are able to move the business at their own convenience in the spring, whereas the fall movement is of the rush order usually, and shippers have to take what they can get and be thankful.

"Coal was very active at the close of navigation, one cargo of about 8,000 tons having been loaded from Erie for Fort William at $1 a ton, which is 60 to 65c. higher than the usual summer or season rate on this commodity, and from present indications, there will be a decided shortage of soft coal at the Canadian head of the lakes before the opening of another lake season, and no doubt considerable coal will have to be moved during the winter via the all rail route."

The Ottawan-Maude Collision.

Commander Spain, R.N., Dominion Wreck Commissioner, with Capt. A. Reid, Port Warden of Montreal, and E. Adams, Chairman of the Board of Steamboat Inspection, as assessors, held an inquiry at Montreal on Oct. 3, 1906, into this collision, which occurred in the Lake of Two Mountains, Ottawa River, Que., Sept. 27. The following judgment has been given, prefaced with the remark that the evidence was of a most contradictory character: "The steamer Maude was sunk by the steamer Ottawan at about 1.30 a.m., owing to a collision between the two vessels, whereby three lives were lost. The night was fine, dark but clear; the lights of both vessels were distinctly visible at some distance. Both ships were on the wrong side of the fairway, the Maude on the north side of the channel, and the Ottawan on the south. W. Gerard, mate of the Maude, states that he saw the masthead and starboard lights of the approaching Ottawan to the right or south of the Maude, distant about one mile. The master of the Maude at this time was asleep in the pilot house; the mate, apparently apprehending no danger from the approaching vessel, did not call the master, but continued on his course, expecting, as he states, that both vessels by keeping their respective courses would pass green to green. Shortly afterwards he heard one blast from the approaching steamer Ottawan, the sound of which aroused the master, who immediately committed the very grave error of giving two blasts of his whistle, thereby infringing the rules of the road by what is termed 'cross signals.' The rule reads as follows: 'Vessels approaching each other from opposite directions are forbidden to use what has become known among pilots as cross signals, that is, answering one whistle with two, and answering two whistles with one.' The mate of the Maude at the same time starboarded his helm, and almost immediately the collision took place. The mate was the navigating officer in charge of the vessel; he was at the wheel himself and, in the opinion of the court, was grossly culpable for not acting more promptly in taking steps to avoid the collision. When he saw both lights of the approaching vessel so close, he might have stopped his ship, given three blasts of his whistle and gone full speed astern; had he acted in this way the probabilities are that the collision would not have occurred, or if it had, the results would not have been so disastrous. The steamer Maude, when inspected by the court two days after the disaster, was resting on the bottom with her upper works more or less washed away, and Point du Lac lighthouse bearing nearly right ahead. The court considers that when the Ottawan collided with the Maude her stem cut into the latter vessel some 5 ft., and there is no doubt that in going full speed astern to back out, the bow of the Ottawan became entangled in the wreckage, and drew the Maude into the position in which she now lies. The court considers the disaster was due to the wrongful acts of the master and the mate of the Maude, and therefore suspends the certificate held by Capt. E. Gauthier as master of a passenger steamer between Ottawa and Montreal, for 12 months from the date of the disaster; also suspends the certificate held by Mate W. Gerard, as mate of a passenger steamer, minor waters, for 18 months from the date of the disaster. It is very evident that on board both vessels very indifferent lookouts were kept, and poor judgment shown in determining their distance apart. However, the Ottawan carried out the rules of the road, whereas the Maude did not.

A clause has been incorporated in the Merchants' Shipping Act, by the Imperial Parliament, making it an offence punishable by a fine not exceeding £50, or imprisonment for three months, to induce or attempt to induce any person to emigrate or engage steerage passage in any ship by means of any false pretence. The clause was introduced into the act upon representations made by the Dominion Government.

Lloyd's register of shipping for the year ended June 30, 1906, shows 662 new vessels of 1,412,645 tons were classed, of which 652 vessels of 1,408,579 tons were steamers, and 10 vessels of 4,066 tons were sailing ships. Of the total tonnage, 24.4% was built for foreign and colonial owners. There were 39 steamers of over 5,000 tons each classed during the year. As compared with the returns for 1904-05, there was an increase of 218,810 tons in the steamships built, and a decrease of 6,992 tons in the sailing vessels built.

A report of the International Waterways Commission deals with the proposal to divert certain waters from the Birch Lake drainage basin in Lake and Louise counties, Minn. It was shown, on behalf of Fort Frances, Ont., the Koochiching Power Co., the Rainy River Improvement and Navigation Co., and the company which has an Ontario charter to develop a water power at Fort Frances, and the City of Winnipeg, that the level of the waters of Rainy River would be materially affected if the project was approved of. The Commissioners report against the proposal and suggest the adoption of a treaty between the United States and Canada to settle the principles to govern the diversion of international waterways, but recommend that high waters be used freely by either side for navigation purposes, domestic and sanitary purposes, and for locks used for purposes of navigation.

Reciprocal Tonnage Exemptions.

At the annual meeting of the Passenger Steamboat Lines of the U.S., held at New York Nov. 22, F. King, of Kingston, Ont., Secretary of the Dominion Marine Association, who is an honorary member of the passenger lines organization, presented a strong argument, of which the following is a summary: The U.S. Department of Commerce and Labor has recommended, and the U.S. Senate at its last session adopted a bill no. 8, 4885, repealing what are called the reciprocal exemption privileges provided in the tonnage tax statute of 1884, as amended in 1886. That statute imposes a duty of 3c. a ton (not to exceed 15c. in any year) at each entry on all vessels entered in any U.S. port from any foreign port or place in North America or in certain other countries; and it provides for the suspension of the collection of so much of this duty on vessels from any foreign port as may be in excess of the tonnage and lighthouse dues or other equivalent taxes imposed in said port on U.S. vessels. Since 1885, vessels from Ontario have enjoyed exemption from this tonnage tax because U.S. vessels are exempt in Ontario ports. Quebec Province has been entitled to exemption to the extent of the difference between the 6c. hospital tax charged there and the tonnage tax in question, but has not yet enjoyed this exemption. If it is granted it will assist materially in procuring the abolition of the obnoxious hospital tax in Quebec. At various dates, exemption has also been granted to vessels of certain foreign countries where U.S. vessels enter free. The argument advanced for the repeal of these reciprocal exemptions appears to be that certain foreign countries entering vessels in U.S. ports enjoy greater advantages than the U.S. under the reciprocal exemption privileges, because the foreign tonnage entering the U.S. from these countries so greatly exceeds the U.S. tonnage entered in the foreign ports. Entries between U.S. ports and ports in the Netherlands are cited as examples; and it is also urged that Great Britain is likely to repeal its light dues in the near future and thus incidentally become entitled to ask exemption from the U.S. tax for British tonnage entering U.S. ports. Whatever forcé this argument may have in the cases cited, it is submitted that it cannot apply on the Great Lakes and the St. Lawrence, where the U.S. tonnage occupies such an important relative position. The repealing bill would swell the U.S. tonnage tax receipts at the expense of vessels from Ontario, and would prevent other Canadian provinces from enjoying that measure of exemption to which they are entitled; yet at the same time the enactment of the bill would be a direct invitation to Canada to pass similar legislation and the result would be the imposition of a most undesirable burden upon U.S. tonnage trading to Canadian ports on the International waterway. The bill did not pass the House of Representatives on account of representations made in time, including representations made from Ottawa to Washington at the instance of the Dominion Marine Association. It is presumed, however, that it is to come up again at the coming session of Congress, and the Dominion Marine Association asks the assistance of the Association of Passenger Steamboat Lines of the U.S., and of the Lake Carriers' Association in preventing its passage or, at least, in having the Great Lakes and St. Lawrence exempted from its provisions. Such action would benefit all vessel owners equally and be in accord with the recent reciprocal abolition of the annual inspection fees, and the still more recent reciprocal arrangements in regard to inspection itself, in both of which matters the Dominion Marine Association was an active agent.

The Passenger Steamboat Lines representatives received Mr. King very cordially and passed a strong resolution opposing the bill, and urging that at least the Great Lakes and the St. Lawrence should be exempted from its operation. A committee, consisting of G. A. White, Hudson River Day Line; B. W. Parker, White Star Line, Detroit, Mich.; A. A. Shantz, of the Detroit and Cleveland, and Detroit and Buffalo lines; H. Goulder, of Cleveland, Ohio, couusel of the Association; and F. King, were appointed to take further action in the matter before Congress if necessary. The facts have been laid before the President of the Lake Carriers' Association by the committee and it is expected that Association will join in opposing the bill.

The obnoxious hospital tax charged in Quebec Province came up incidentally for discussion, it being felt that the reservation of the Great Lakes and the St. Lawrence from the present repealing bill would materially assist in the abolition of that tax, while if the bill went through Congress as it stands, it might be just that much more difficult to abolish the hospital tax.

A deputation of four, including Mr. King, had an interview with the new U.S. Secretary of Commerce and Labor in New York and discussed the objects and aims of the Association, also urging the objections to the bill.

Most cordial expressions of good will were made by members of the Passenger Steamboat Lines towards the Dominion Marine Association, and there is no doubt that in matters of common interest a combination of forces can be brought about at any time.

The New York meeting was also attended by B. W. Folger, Manager Niagara Navigation Co.; W. Campbell, Manager Detroit, Belle Isle and Windsor Ferry Co., and C. J. Smith, General Manager Richelieu and Ontario Navigation Co., the latter being elected a member of the executive committee.

Among the Express Companies.

The Dominion Ex. Co. has opened a route on the C.P.R. between Bolton and Craighurst, Ont., on the Toronto-Sudbury line.

The Dominion Ex. Co. is to be provided with additional accommodation at the Union Station, St. John, N.B., by the abolition of the cells there.

The Dominion Ex. Co. has opened offices at Alliston, Baxter, Beeton, Craighurst, Midhurst, Palgrave, Tottenham, Utopia, Ont.; and Wawota, Sask.

J. Haycock has been appointed agent of the Dominion Ex. Co. at St. John, N.B., succeeding E. N. Abbott, transferred to the company's Montreal office.

One of the features of the shortage of cars in the Canadian Northwest has been the demands made upon collieries and coal dealers at various points to ship sacks of coal by express.

W. S. Stout, Toronto, General Manager Western Ex. Co., has issued a general circular to agents, calling attention to a number of matters affecting the carrriage of express parcels.

The Canadian Ex. Co. has opened offices at Bonaventure, Caplin, Carleton, Cascapedia, Charlemagne, Maria, New Carlisle, New Richmond, Oak Bay, Que.; Point du Chene, N.B.

The annual meeting of the Canadian Ex. Co. was held in the G.T.R. offices, Montreal, Dec. 14, when the retiring directors were re-elected. The retiring officers were subsequently re-elected by the directors.

The attention of express agents is called to the similarity of Yamachiche, Portneuf County, Que., an office of the Dominion Ex. Co., and Tewachiche, a station on the Great Northern Ry. of Canada (Canadian Northern Quebec Ry.).

The United States courts at Sioux Falls, S.D., has decided, in a test case taken by the U.S. Ex. Co., that express companies doing business in the State are common carriers, and subject to the orders of the South Dakota Railroad Commission.

The Dominion Ex. Co. has extended its route on the Guelph and Goderich Ry. from Elmira to Milverton, Ont.; on the C P R. Lauder extension from Lauder to Broomhill, Man.; and on the C.P.R. extension between Preston, Man., and Kaiser, Sask.

The Canadian Ex. Co. has re-opened the following offices on the Intercolonial Ry., which were included in the list of offices temporarily closed in circular No. 40, Oct. 10: Jacquet River, N.B.; Belmont, East Mines, Harbour au Bouche, McIntyres Lake, Ocford Jct., Thomson, Wentworth, N.S.

The Dominion Ex. Co. has opened offices at Baker, Bardal, Broomhill, Ebor, Man.; Fasset, Maryland, Mount Johnson (formerly St. Gregorie, Iberville county), Que.; Belbeck, Bender, Drinkwater, Fairlight, Kennedy, Sask.; Earlton, Englehart, Heaslip, Linwood, Millbank, Milverton, Thornloe, Uno Park, Ont.

The Dominion Ex. Co.'s officials in Montreal stated recently that the demand for money orders to Great Britain was largely in excess of former years at the Christmas season. A good deal of the increased business is due to the large number of immigrants who are sending money to their friends in the old country.

J. S. Patch, who had been General Agent of the Canadian Ex. Co. at Montreal since 1893, died there Dec. 5, aged 67. He came to Canada after the U.S. Civil War and entered the Canadian Ex. Co.'s service, acting for many years as agent at Kingston, Ont., before being moved to Montreal. At the latter place he was also general agent for the American and National Express companies.

The station agents and telegraphers on the Intercolonial Ry. and the Prince Edward Island Ry., who struck against the refusal of the Canadian Ex. Co. to grant them increased remuneration in April, 1906, have settled their differences and work was resumed in Dec. It is said that agents are to receive a regular payment of $2 a month, and a commission of 5% upon all business done.

Replying to a question in the House of Commons recently, the Premier stated that the contract between the Canadian Ex. Co. and the Intercolonial Ry. was still in force. The company, so far as its rates and regulations were concerned, came under the control of the Board of Railway Commissioners. The Government was not aware that there had been any discrimination by the company in connection with its service over the I.C.R.; there had been some irritation owing to a strike, but that had been settled.

The Canadian Northern Ex. Co. is operat ing over the Canadian Northern Ontario Ry. between Toronto and Parry Sound, Ont. It has offices at Beaverton, Brechin, Footes Bay, Mount Albert, Parry Sound and Washago, Ont Express matter for Bala Park, Blackstone, Cedardale, Dudley, Duncan, Falding, Gamebridge, Gormley, Lake Joseph, Monk Road, Pefferlaw, Pine Orchard, Richmond Hill, Southwood, Sparrow Lake, Thornhill, Torrance, Vandorf, and Zephyr, must be prepaid and released, and will be put off train at destination at owner's risk, whether there is anyone there to receive them or not.

Press despatches from Ottawa stated, recently, that the Post Office Department is about to take up the business of handling express matter. Replying to a question in the House of Commons the Postmaster-General stated that an arrangement was under consideration for the transmission and delivery of parcels by post c.o.d. It was contemplated that the post office should be the means by which parcels should be despatched, and the collection of any charges thereon made by the department on a definite scale. Details had not been perfected, but were being considered by the department. Full information would be given to Parliament when the project had been completed.

Telegraph and Cable Matters.

The C.P.R Telegraph Department has opened offices at Millbank, Milverton, Elmira, Cliffe, Linwood, and Weissenburg, Ont.

The Marconi Wireless telegraph apparatus is to be installed on the steamers of the Dominion Line. The first two vessels to be fitted will be the Canada and Dominion.

Jno. Fothergill, formerly of the Western Union Telegraph Co.'s cable office at Canso, N.S., has been appointed to the San Francisco office of the Commercial Pacific Cable Co.

During the year ended June 30, 1906, the earnings of the Dominion Government telegraph line to Dawson, Yukon, were $115,876. The cost of management and operation was $229,351.

W. F. Maclean, M.P., has introduced a bill into the House of Commons to amend the Railway Act, 1903, so as to bring telegraph companies under the jurisdiction of the Board of Railway Commissioners.

The Commercial Cable Co.'s str. Mackay-Bennett recently returned to Halifax, N.S., after a lengthened repairing trip, during which she picked up and repaired the deep sea cable between Flemish Cape and the Grand Banks.

F. R. Carney, formerly local manager of the G.N.W. Telegraph Co., Montreal, has been appointed manager of the Western Union Telegraph Co.'s office at 255 Church St., New York city, succeeding J. Simmonds, appointed Inspector of offices north of 42nd Street in that city.

Local reports state that the C.P.R. and the G.N.W. Telegraph Co. have offered to purchase the telegraph line operated by the Temiskaming and Northern Ontario Ry. Commission at a valuation. It is also said that the Commissioners have declined to consider any offer for the purchase of the line.

The officials of the Old Time Telegraphers' and Historical Association for the current year are: President, H. D. Reynolds, Buffalo, N.Y.; Vice-President, G. A. Burnett; Executive Committee: J. W. Tillinghurst, Grand Island, N.Y.; N. Hucker, L. M. Moore, Buffalo, N.Y.; E. W. Collins, Cleveland, Ohio; H. J. Kinnucan, Detroit, Mich. These with I. McMichael, Toronto, and G. S. Macdonald, will have charge of the arrangements for the annual meeting and reunion at Niagara Falls, N.Y., during the summer. The date of this gathering has not yet been fixed

A. White, President of the De Forest Wireless Telegraph Co., is quoted as saying that a company is about to be formed to be called the United Wireless Telegraph Co., which will take over the Marconi Wireless Telegraph Co. of England (which controls the Marconi companies of the U.S., Canada and European countries), and the American De Forest Wireless Telegraph Co., which controls the De Forest subsidiary companies. The story is categorically denied by officials of the U.S. Marconi, Wireless Telegraph Co., and an action has been commenced in the Maine courts to have A. White restrained from transferring, or in any way dealing with the De Forest patents.

The shareholders of the Dominion De Forest Wireless Telegraph Co. are being asked to exchange their shares for stock in the Northern Commercial Telegraph Co., which has acquired 200,000 shares, the controlling interest in the D. DeF. W. T. Co. The Northern Commercial Telegraph Co. was originally incorporated by the Dominion Parliament in 1898, to construct telegraph lines to the Yukon Territory and points in B.C., and obtained additional powers in 1899. At the first session of the Dominion Parliament of 1906, an additional act was obtained increasing the capital stock to £750,000, repealing sec. 8 of the act of 1898, and substituting another therefor, so as to enable it to construct, maintain and operate lines of electric telegraph and telephones by means of cables through the waters on the west coast of British Columbia, or elsewhere in Canada, and the necessary land connection at each end of such cables, and land lines, or by continuous land lines; and in, under, upon and across any water, or along and across any highway, provided that such lines shall not interfere with the use of such highways, or interrupt the navigation of navigable waters. It is also provided that the company shall not have the right to build a bridge over any navigable waters.

General Telephone Matters.

A local telephone line has been opened at Fielding, Sask.

W. Hay, London, Ont., has been appointed local manager of the Bell Telephone Co. at Ingersoll, Ont.

F. O. Burbide, Bell Telephone Co.'s inspector at Coaticook, Que., has been transferred to Calgary, Alta.

Returns from Manitoba up to Dec. 24, show that the telephone by-law was defeated in 71 municipalities and carried in 51.

There is a long distance telephone system in operation between Port Arthur, Ont., and Hymers, Ont. The line has just been put into thorough repair.

G. B. Baker, who has resigned his position as local superintendent Eastern Tele-

A Personal Appeal

The Hospital for Sick Children, College street, Toronto, appeals to fathers and mothers of Ontario for funds to maintain the thousand sick children that it nurses within its walls every year.

"HAPPY WITH HER DOLL."

The Hospital is not a local institution—but Provincial. The sick child from any place in Ontario who can't afford to pay has the same privileges as the child living in Toronto and is treated free.

The Hospital had last year in its beds and cots 853 patients—331 of these were from 231 places outside of Toronto. The cost is 1.37 cts. per patient per day, and there were 138 sick little ones a day in the Hospital.

"NEW PICTURE BOOKS, JUST ARRIVED."

Since its foundation the Hospital has treated 12,120 children. About 8,500 of these were unable to pay and were treated free.

SERVING BREAKFAST.

Your money can put golden hinges on the door of the Hospital's mercy.

Everybody's dollar may be the Friend in Need to Somebody's child.

Your dollar may be a door of hope to somebody's child. The Hospital pays out dividends of health and happiness to suffering childhood on every dollar that is paid by friends of little children.

TWO CLUB FOOT CASES IN PLASTER

If you know of any child in your neighborhood who is sick or crippled or has club feet send the parent's name to the Hospital.

See what can be done for club-foot children. There were 36 like cases last year and hundreds in 31 years.

BEFORE AFTER

Please send contributions to J. Ross Robertson, Chairman, or to Douglas Davidson, Sec.-Treas., of the Hospital for Sick Children, College Street, Toronto.

phone Co., Sydney, N.S., was presented with a dress suit case by the staff, Dec. 13.

The arrangements in connection with the amalgamation of the New Brunswick Telephone Co., and the Central Telephone Co., are practically completed and it is expected that the new charter will be obtained from the Provincial Government early in the month.

In connection with the plebiscite recently taken in Manitoba upon the proposal to establish municipal telephone lines with Government long distance connections, the Bell Telephone Co. has issued a map showing its long distance lines, local exchanges and rural lines within the Province.

The Premier of Manitoba, in an interview Dec. 16, stated that the Government had instructed the Public Works Department to ask for tenders for poles, wire, cross arms, and insulators, etc., so that construction of a Provincial telephone system could be started as soon as the frost was out of the

ground in the spring. He expected that 1,000 miles of line would be constructed during the year.

Tests are reported to have been successfully made on the Bell Telephone Co.'s U.S. lines of an induction coil patented by Professor Sauve, Spokane, Wash., which is claimed to increase the effectiveness of telephones on long distance lines from 30 to 40%. It is stated that the most satisfactory test was made on the line between Seattle, Wash., and Los Angeles, Cal., conversation between the two points being easily carried on.

A bill is before the Dominion Parliament having for its object the amendment of the Act passed in 1906, respecting the control of telephone companies by the Board of Railway Commissioners. It is desired by the proposed amendment to extend the provisions for the interchange of business over long distance telephones to all telephone service. This would compel telephone companies operating in the same place to interchange service.

The Bell Telephone Co. has made an offer to the London, Ont., City Council of $4,000 a year and ten free telephones for the use of the city offices, for an exclusive franchise. A condition of the offer is that all special rates will be cut off. The matter is under consideration by a committee of the council, which has also before it an application of the Independent Long Distance Telephone Co. of Ontario, for a franchise. The Bell Co.'s franchise in London expires Dec. 31.

The Norfolk County Telephone Co. has been incorporated under the Ontario Companies Act, with a capital of $40,000 and offices at Waterford, Ont., for the purpose of carrying on a telephone business in the county of Norfolk; Oakland and Burford townships in Brant county; Walpole tp. in Haldimand county; North and South Norwich tps. in Oxford county. The provisional directors are: E. S. Barber, H. Bartholomew, J. H. McIlwraith, S. L. Squire, P. G. Perce, of Waterford, Ont.; C. H. Glover, F. L. Culver, of the tp. of Townsend, Ont.

Vancouver Island Rail Connection.

The Minister of Railways in May, 1906, instructed H. P. Bell, C.E., Victoria, B.C., to make a report concerning all-rail communi cation between Victoria, Vancouver Island, and the mainland of British Columbia. In the course of a lengthy report, Mr. Bell states that a clear introduction to the subject will be found in a report of Mr., now Sir, Sandford Fleming, then Chief Engineer of the C.P.R., made to the Dominion Government and dated Jan. 26, 1874. A lengthy quotation is made from this report, which refers to an earlier report by Marcus Smith, made in 1872, the particular part referred to and dealing with the examinations he made from Seymour Narrows along the west coast of Vancouver Island to Esquimalt. The survey made by Sir Sandford Fleming, or under his direction, was from Waddington harbor at the head of Bute Inlet, along the northwesterly shore of the inlet to Valdes Island, and passed over to Vancouver Island at Seymour Narrows; and from this point an exploration was made along the easterly shore of Vancouver Island to Esquimalt, and to the harbor at the head of Alberni canal or inlet. His observations upon the survey, as given in the report, follow: "For about 50 miles from Waddington harbor, the only course for the line is to follow the base of the high rocky mountains that extend along the Bute Inlet. On this section a great number of tunnels, varying from 100 to 3,000 ft. in length, through bluff, rocky points would be indispensable, and the work generally, even with unusually sharp curvature, would be very heavy. Careful examination has established the fact that to reach Vancouver Island from the mainland, the following clear span bridges would be required:

	Feet.
At Arran Rapids, clear span.....	1,100
At Cardero Channel, 1st opening.....	1,350
At Cardero Channel, 2nd opening.....	1,140
At Cardero Channel, 3rd opening.....	640
At Middle Channel	1,100
At Seymour Narrows, 1st opening....	1,200
At Seymour Narrows, 2nd opening ...	1,350

The length of the section across the group of islands known as the Valdes Islands, lying between the mainland and Vancouver Island, is about 30 miles. The channels to be bridged are of great depth, with the tide flowing from four to nine miles an hour. In crossing the islands, heavy rock excavation, and probably a few short tunnels, would be required. Taking everything into consideration, the work of construction on these 80 miles, lying between Waddington Harbor and Vancouver Island, would be of a most formidable character. I have myself made a general reconnaissance of portions of the country between Esquimalt and Seymour Narrows, and am satisfied from what I have seen and learned, that this line would be generally favorable with works of a moderate character. The whole distance between Seymour Narrows and Esquimalt would be about 160 miles; of this distance, 25 miles between the latter place and Cowichan would have heavy rock excavations. From Cowichan to Nanaimo, 35 miles, the work would be somewhat lighter. The remaining 100 miles would be very favorable. An exploration was made from the coast line to the harbor at the head of the Alberni canal, with satisfactory results. This examination showed that it would be quite practicable to carry the railway to the seaboard on the west coast of Vancouver Island by this route. Whatever point on the mainland be selected for the terminus of the Transcontinental railway, there can be no doubt that a line along the eastern coast of Vancouver Island will, at no distant day, form part of the railway system of British Columbia."

T. C. BURPEE,
Engineer of Maintenance of Way and Works, Intercolonial Railway.

The plans and profiles of the works to which the report quoted refer were burned in the fire which destroyed the Government C.P.R. survey offices at Ottawa in the winter of 1873-4. The British Pacific Ry. Co. did some location work upon the Vancouver Island portion of the route, the result of which was to confirm the opinion expressed by Sir Sandford Fleming with regard to its favorable features. In 1895 the B.C. Government had a survey made which covered within its terminal points the 80 miles of line referred to.

The observations of Mr. Bell upon the essential features of the work, and his estimates follow: "A prominent physical feature is the fact that the water is too deep and the natural slope of rock shores too precipitous for the making of embankments. Under the circumstances, the only recourse is to cut the whole roadbed continuously out of the solid, which means that there is not sufficient room for good curvature without tunnelling, and bad alignment becomes a necessity if very heavy works are to be avoided. It did not appear that these tunnels would be as numerous as the first line run suggested, provided that very sharp curvature was used to avoid them, but the fact remains that tunnelling is necessary for any alignment upon which a fairly good speed could be maintained. At the head of Bute Inlet (like the majority in British Columbia) the water shoals suddenly, and there is not sufficiently wide area for anchorage. . . . . It is doubtful even, whether the head of Bute Inlet is a fit landing for a ferry boat in all weathers, and it is not to be wondered at, that the late Marcus Smith wished to have a ferry with one terminus at the head of Frederick Arm. The entrance to Estero basin, Frederick Arm, however, is closed up by rockslide at low water, and would require heavy works to make it accessible even for a ferry boat. . . . A better point, however, can be found at no great distance. As regards the grading upon the 30 miles east of and terminating at Seymour Narrows, it is to be observed that the bridge crossings would probably have to be kept as at Quebec—150 ft. above high water level. With seven large bridges in a distance of 30 miles, it would not be possible to rise and fall between these bridges to any great extent, nor does it seem likely that a direct high level line could be found in so rough a country, or as Sir Sandford Fleming has it, 'In crossing the islands, heavy rock excavations and probably a few short tunnels would be required.' The suspension bridges before referred to would require piers for the navigable channels of variable heights, ranging from 260 to 300 ft. above water level. There would be 12 anchorages required for the cables of these bridges. The superstructure of the bridges enumerated by Sir Sandford Fleming, and taken from actual measurements upon the ground after careful examination of the crossings, have been approximately estimated as

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY.

GALENA RAILWAY SAFETY OIL

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT.

regards costs. All of those enumerated, except one of 640 ft. span, have been estimated as single track, stiffened suspension bridges, capable of carrying the train load known as especial heavy (Dominion Government general specifications for steel bridges and viaducts, bearing date 1905.) Each one of these bridges is supposed to have one main span, and two side (or approach) spans, the side span equal to one-half the length of the main span. The general dimensions of these stiffened suspension bridges from 1,100 to 1,350 ft., both inclusive, are as follows: Average width of the floors, 40 ft. Versed sine or sag of the cable at the centre of the span one-tenth of the span length. The strength estimated as given these bridges is governed by the Dominion Government railway specifications before referred to where applicable, and where not applicable, as in the case of steel wire cables, the unit stress was taken at 40,000 pounds per square inch in reference to the fact that such steel wire can be procured with an ultimate strength of 100 tons of 2,000 lbs. per square inch. The type of truss chosen for the suspension bridge's estimate is similar to that designed by G. Lindanthal, Mem. Am. Society of Civil Engineers, for the Quebec Bridge competition. It would be possible to build a suspension bridge so heavy that it would not require a stiffening truss, but it might entail such a waste of material as to make it more economical to use the stiffening truss. In making the attached estimate, the work is supposed to be of the same standard as that set forth in the last G.T. Pacific Ry. general, and Dominion Government bridge specifications; in fact, such a road as the Government would build as a state enterprise, or such as the C.P.R. and G.T. Pacific Ry. are building with a good standard of traffic capacity in all respects.

It may be pointed out that previous surveys prove that the same amount of money that would be required to make continuous rail communication between Vancouver Island and the mainland would suffice to build a railway with a first-class car ferry from Comox on Vancouver Island, and from the mainland, to the summit of the Rocky mountains at the Yellowhead Pass, a distance of about 477 miles by the shortest yet explored route. It should not be considered that the traffic capacity of the ferry would be inferior to that of the all-rail connection, nor the time of transmission longer. The time is near at hand when the traffic by way of Seymour Narrows will be much greater than at present. The rock in mid-channel at the narrows, which has often been spoken of as the site of a bridge pier, is an obstruction to navigation. Would it not be much better in the interests of this navigation, to mine that rock with drill holes, driven from a crib, for 35 ft. in depth, and blow it up at one blast? It would still be possible to cross there with a suspension bridge of 2,800 ft. long, which is within the limit of strength of bridge material at the present time. It would seem to be of more importance that this navigation be improved, than that a saving should be made in the cost of building a bridge. Taking all things into consideration, it appears that the recommendation in favor of a ferry, made by Sir Sandford Fleming in 1874, will still hold good. The waterway built by nature, with no cost to the country, may reasonably be considered a more perfect aid to transportation than any road that ingenuity, aided by capital, can build, and to fail to utilize this advantage would not seem to accord with sound economical principles. On the other hand, the building of a railway from a well-chosen point on the west coast of the mainland into the mountains, via the Yellowhead Pass, would open up to mining that country which is pre-eminently well suited for alluvial work."

Approximate estimate of the cost of works required to make all-rail connection between Vancouver Island and the mainland of British Columbia:

54 miles of single line of railway, 4 ft. 8½ in. gauge, from Comox to Seymour Narrows, complete at $16,000 a mile	$ 864,000
80 miles of single line, same gauge, to the Mainland from Seymour Narrows eastward, at $70,000 a mile	5,600,000
Cost of tunnelling on these 80 miles of line, say	1,400,000
BRIDGES.	
15,900 tons of steel wire cable, in place, at $301 a ton	4,785,900
5,190 tons of steel wire rope, in place, at $349 a ton	1,811,310
460,000 tons of structural steel, in place, at $104 a ton	4,222,400
2,000 tons of steel castings, in place, at $200 a ton	400,000
MASONRY, CONCRETE AND TIMBER	
152,000 cubic yards masonry, face work, at $18	2,736,000
152,000 cubic yards concrete backing, at $8	1,216,000
5,000,000 feet b.m. timber, at $27	135,000
Add for omissions and contingencies, 10%	2,317,061
	$25,487,671

(The ton is 2,000 lbs.)

The Passenger Department of Canadian Steam Railways.

By G. T. Bell, General Passenger Agent, Grand Trunk Railway.

(*Continued from last issue.*)

This sowing of unrest, so aptly described, is an important part of the work of the passenger department particularly in charge of the advertising staff. I believe it is a safe assertion that of all the great agencies of our modern civilization none equal the transportation lines of Canada and of America in utilizing publicity in its myriad forms. One of our great Canadian railways, aside from the millions of readers repeatedly reached through its advertising in the daily and weekly newspapers, magazines, and other publications not issued by itself, distributed during the past year, almost entirely without cost to recipients, the enormous total of over 3,500,000 separate pieces of advertising, comprising finely printed and illustrated guide books to about a score of Canadian tourist and health resorts, wall and vest pocket maps, art prints—framed and unframed—of Canadian natural scenery and engineering and other achievements, packs of picture playing cards, timetables—complete, sectional, and local—posters and other bills. Nor does this include the display of large photographs, mounted fish and game, biograph pictures, stereopticon slides, etc., employed in world, international, national, sportsmen and travelling exhibitions, lectures and other forms of educational, industrial, sociological, and entertaining enterprises. I will not detain you by enlarging, but suggest it would be of interest to you to have a separate paper on "Art in railway advertising," or a like subject, from some of our experts in this field. Nor can justice be done in a single paper to the immigration and colonization side of the passenger department work which, in co-operation with the Dominion and Provincial authorities, is of vital and far-reaching importance to the whole of Canada. This also should be treated separately, and I am sure will be of special interest at this time when extraordinary activity is manifest everywhere both as to new settlers and the opening up of millions of acres of fertile land.

I will pass over the statistical and accounting branches of the passenger department, without which its effective work would be much impaired by lack of comparison of results which the statistics furnish on the one hand, and by confusion in dealing with the multitude of bills for advertising, printing, etc., on the other; nor will I delay to explain the system of dealing with the thousands of claims for refunds upon unused or partly used tickets, chiefly growing out of human joy, sorrow, vicissitude, and instability; but, with your indulgence, will say a little about that important side of the passenger department which aids in supplying the sinews of war for us all, namely, passenger earnings

When Canadian steam railways earn for carrying passengers from the single track mileage of 20,487, which they operated last year, the grand total of $154,410,519, instead of $28,959,650, they will have reason to congratulate themselves, as their passenger earnings will then equal those of the New England railways which enter the State of Massachusetts, and which last year, with a total of 4,962 single track miles, received from passengers $37,399,209. But this desirable result will probably not be attained until 512,933,019 passengers annually travel on the 20,487 miles of track, instead of 25,288,723 passengers who paid fares last year. For every mile of track the New England passengers paid for transportation $7,537, against $1,413 paid in Canada. Twenty-five thousand and thirty-seven passengers in the year used the New England railways, and only 1,234 passengers used the Canadian railways for each mile of track operated. If all of the steam railways in the U.S., outside of the 4,962 miles in New England, had received from passengers the same gross earnings per track mile as the New England railways, instead of $435,295,523, those railways not within the passenger man's Garden of Eden would have earned from passengers on their 212,011 miles of track $1,597,926,907. Did I hear anyone remark that the "conditions" in New England must be vastly different than in the rest of the United States and in Canada? Exactly so!

And what is the essential element in this difference of "conditions"? Density of population—not of the people, for nowhere else in America have we so much culture in so small an area. According to the latest census, each 1,000 persons in Massachusetts helped to support only three-quarters of one mile of the 2,111 miles of steam railway track in that State; whereas, in our most populous Province of Ontario the same number of persons help to keep passenger trains moving on three and one-quarter miles of steam railway track. And if you consider that the 1,000 prospective passengers are spread over Massachusetts at the average density of 350 to each square mile of area in that state, against 10 to each square mile in Ontario, it will help you further to grasp why the steam railways of Canada are unwilling to abandon the fruits of much experience for the theories of the demagogue. A city seven miles long and two miles wide has an area of 14 square miles. With a population of 400,000 such a city would average 28,571 to each square mile. On 124 miles of track the Montreal Street Ry. last year carried 64,334,418 passengers, an average of 518,826 passengers for each track mile. This is a condition of density which justifies the application of the zone system of fares, where you pay as much for 100 yards as for 1,000 or 10,000 yards. The districts within and surrounding great cities are the nearest approach to a condition where experiments with the zone method of passenger fares may be carefully undertaken, and the steam railways already recognize that principle to some extent in their commutation fares for daily patrons of their suburban trains. The people of Canada are, however, much more vitally interested in having railways enough to develop all parts of their great country, and in the prosperity of their partners, the railways, than in the maximum rate per mile which, owing to voluntary reductions

already alluded to, is paid only by transient passengers, who are but a small percentage of the total number carried. The railways should be permitted to work out their destinies and tariffs in accordance with the good, old, safe law of supply and demand, and without undue, and often unreasonable, legislative interference. If the comparatively few transient passengers pay less, the masses, of limited incomes, and who cannot afford to travel except on public holiday and other greatly reduced excursion fares, must pay more; otherwise the service must deteriorate and contract instead of continuing to improve and expand. Evidence that the railways are not unmindful of public comfort and are willing, if not bound, to divide their prosperity with the public is furnished by the fact that the old and disliked mixed trains are gradually disappearing, last year the total mileage of such trains on all Canadian railways being 6,133,098, against 9,530,816 in 1904, a reduction of 36%, and while gross passenger earnings from 1901 to 1905 increased 49%, deposits by the public in the chartered banks of Canada increased by $159,733,530 in the same period, equal to more than 50%, which magnificent increase exceeded the gross earnings of all the Canadian steam railways from passenger, freight and all other sources of traffic last year by $53,266,331.

The foregoing was read at a meeting of the Canadian Railway Club recently.

Orders by the Railway Commissioners.

The following orders have been issued by the Board of Railway Commissioners:

1982. Nov. 10.—Authorizing the C.P.R. to reconstruct bridge 33338, mileage 70.9, Kenora section, Ont.

1983. Nov. 10.—Authorizing the C.P.R. to reconstruct bridge 33194-3, mileage 73.8, Ignace section, Ont.

1985. Nov. 19.—Authorizing the C.P.R. to construct a branch from its railway on Higgins Ave., Winnipeg, a distance of about 38 ft. westerly from the westerly limit of Nena St., produced northerly; thence southwesterly direction for 676 feet.

1986. Nov. 10.—Authorizing the C.P.R. to reconstruct bridge B-2-95, mileage 26-8, and B-2-94, mileage 28.2, Esquimalt and Nanaimo Ry.

1990. Nov. 6.—Directing the G.T.R. to adopt and use an interlocking and derailing plant where its lines are crossed by the C.P.R. on lot 8, 9th con., Yarmouth tp., Ont., the cost to be borne by the C.P.R.

1991. Nov. 19.—Authorizing the construction of the C.P.R. over portion of road allowance between cons. 8 and 9, Tp. Dumfries North, Ont.

1992. Nov. 9.—Sanctioning revised location of Wolseley-Reston Branch of C.P.R., mileage 0 to 11.5.

1993. Nov. 17.—Extending the time one year for use of crossing, at rail level, by the Vancouver, Westminster and Yukon Ry., of the B.C. Electric Ry. tracks on Park Avenue, Vancouver, B.C.

1994. Nov. 17.—Approving location of Canadian Northern Ry. through tps. 1 and 2, ranges 18 and 19, w.p.m., mileage 45 to 53.10, west from Greenway, Man.

1995. Nov. 19.—Ruling in regard to refund to Montreal exporters on butter, cheese, and eggs for export season of navigation, 1905.

1996. Oct. 22.—Authorizing the Midland Ry. of Manitoba to cross the C.P.R. tracks at Morden, Man.

1997. Nov. 19.—Providing that all tariffs of express tolls shall be in such form, size, and style, and give such information, particulars, and details as the Board from time to time may prescribe.

1998.—Nov. 20.—Approving of revised location of portion of main line of Vancouver, Westminster and Yukon Ry. from junction of its tracks with the C.P.R. near 10th St., New Westminster, B.C., to station 71-72, beyond 18th St., New Westminster.

1999. Nov. 8.—Directing the C.P.R. to construct a suitable highway crossing where its railway intersects Fourth Street, High River, Alta.

2000. Nov. 22.—Approving supplements 1, 2, 3, and 4 of Standard Passenger Tariff C.R.C. no. W. 38 of the C.P.R.

2001. Nov. 18.—Rescinding order of the Board of May 25, 1906, authorizing the Windsor, Essex and Lake Shore Rapid Ry. to cross the Michigan Central Rd. tracks by means of a subway in Essex, Ont.

2002. Nov. 22.—Authorizing the Canadian Northern Ontario Ry. to place its tracks across Olive, Vine, and Water streets, between Eastern Avenue and Front St., Toronto.

2003.—Nov. 22.—Granting the Canadian Northern Ontario Ry. leave to construct its line across the Don Esplanade, between Queen St. and Eastern Avenue, and across Eastern Avenue west of Cypress St., Toronto.

2004. Nov. 17.—Authorizing the C.P.R. (lessee of the Manitoba and North-Western Ry.) to construct a branch line from point on main line 2,000 ft. southerly from Saltcoats station, Sask., to the G. R. McCracken Milling Co.'s premises.

2005. Nov. 17.—Authorizing the C.P.R. to construct certain bridges on the Toronto-Sudbury Branch.

2006. Nov. 17.—Authorizing the C.P.R. to construct a bridge at mileage 6.4, Windsor section, Ont.

2007. Nov. 17.—Authorizing the C.P.R. to construct a bridge over Battle River, Wetaskiwin branch, Alta.

2008. Nov. 17.—Authorizing the C.P.R. to construct a bridge at mileage 44.83, White River, Ont.

2009. Nov. 17.—Authorizing the C.P.R. to construct a bridge at mileage 28.6, Nakusp and Slocan branch, B.C.

2010. Nov. 17.—Authorizing the C.P.R. to construct a bridge at mileage 108.16, Thompson section, B.C.

2011. Nov. 17.—Authorizing the C.P.R. to construct a bridge at mileage E 46 A, Edmundston branch, N.B.

2012. Nov. 17.—Authorizing the C.P.R. to construct a bridge over Government drainage ditch on the Molson cut-off, Kenora section, Man.

2013. Nov. 17.—Authorizing the C.P.R. to construct its line across existing highways in North Himsworth tp., district of Parry Sound, and Ferris tp., district of Nipissing, Ont.

2014 Nov. 17.—Authorizing the C.P.R. to construct a spur from station 3043+50.3, distant 1,090 ft. from m.p. 73, into the Nichols Chemical Co.'s premises.

2015. Nov. 17.—Authorizing the C.P.R. (lessee of the Ontario and Quebec Ry.) to construct a branch line in Toronto from point on centre line of main line on the North Toronto branch into Haney & Miller's premises, a distance of 691 ft.

2016. Nov. 21.—Authorizing the C.P.R. to construct its Toronto-Sudbury branch at rail level across the highway at mile 31.6, Essa tp., Simcoe county, Ont.

2017. Nov. 22.—Authorizing the G.T.R. to construct an additional track across public road leading to Port Sidney, north of Utterson station, Muskoka, Ont.

2018. Nov. 19.—Permitting the Town of Orillia to lay a water pipe under the G.T.R. at Colborne St., Orillia, Ont.

2019. Nov. 12.—Authorizing the C.P.R. to construct a bridge at mileage 94.0, Edmonton branch, Alta.

2020. Nov. 12.—Authorizing the C.P.R. to construct a bridge at mileage 12.2, Eganville branch, Ont.

2021. Nov. 12.—Authorizing the C.P.R. to construct a bridge through Government dainage ditch Lariviere section, Man.

2022. Nov. 12.—Authorizing the C.P.R. to construct a bridge at mileage 1.1, Kenora section, Ont.

2023. Nov. 12.—Authorizing the C.P.R. to construct bridges at mileage 28.4 and 28.6, Esquimalt and Nanaimo Ry., B.C.

2024. Nov. 19.—Authorizing the C.P.R to construct a bridge at mileage 51, Woodstock section, Ont.

2025. Nov. 20.—Authorizing the C.P.R. to construct a bridge, number B-2-12, mileage 82.89, "Soo" branch, Ont.

2026. Nov. 9.—Authorizing the Canadian Northern Ontario Ry. to operate its trains over various bridges upon the James Bay section of its line.

2027. Nov. 26.—Authorizing the Commercial Cement Co. to construct a trestle or tramway over the Canadian Northern Ry. 72 miles west of Winnipeg.

2028. Nov. 26.—Authorizing the C.P.R. to open for traffic its line from Winnipeg Beach to Gimli, Man., 9.3 miles.

2029. Nov. 26.—Authorizing the Commissioners of the Trans-Continental Ry. to join its tracks with the C.P R. tracks west of Rennie station, Man., upon the Commissioners installing an interlocking plant and providing a signal man for the operation of the same.

2030. Nov. 12.—Authorizing the Canadian Northern Ontario Ry. to lay its tracks across the G.T.R. tracks in Hawkesbury, Ont., on putting in an interlocking plant, and providing for the maintenance and operation of the same.

2031. Nov. 12.—Authorizing the Canadian Northern Ontario Ry. to cross the G.T.R. spur line to Edwards' Mill at Rockland, Ont., between mileage 36 and 37 west of Hawkesbury upon putting in a diamond and semaphores.

2032. Nov. 9.—Granting permission to the Canadian Northern Ontario Ry. to construct a bridge over Burnt Creek, Neelon tp., Nipissing district, mileage 107.1 north from Parry Sound, Ont.

2033. Nov. 9.—Authorizing the C.P.R. to construct bridges at mileage 7.7 and mileage 7.8, Laggan section, B.C.

2034. Nov. 10.—Sanctioning the erection of bridge B-2-88, at mileage 94.0, Edmonton branch C.P.R.

2035. Nov. 21.—Authorizing the Bell Telephone Co. to carry wires across C.P.R. tracks at Cherry Street, Toronto.

2036. Nov. 20.—Sanctioning the construction of bridge B-2-45, mileage 6.8, Orangeville, Ont., on the C.P.R.

2037. Nov. 20.—Granting permission to the C.P.R. to construct bridge B-2-26, mileage 46.45, Nepigon section, Ont.

2038. Nov. 20.—Authorizing the C.P.R. to construct bridges at mileages 85.6, 117.6 and 111.2, Shuswap section, B.C.

2039. Nov. 20.—Granting permission to the C.P.R. to construct bridge B-2-64, mileage 68.5.

2040. Nov. 20.—Authorizing the C.P.R. to construct bridges at mileages 77.4, 34.4, 80.07, 52.05 and 54.1, Ignace section, Ont.

2041.—Nov. 20.—Authorizing the C.P.R. to construct a bridge at mileage 3.9, Fredericton branch, N.B.

2042. Nov. 20.—Granting permission to the C.P.R. to construct bridges at mileages 58.7 and 57.4, Smith's Falls section, Ont.

2043. Nov. 20.—Authorizing the C.P.R. to construct bridges at mileages 111.45, 112.34, 28.63, 73.43, 106.17, 31.62, 101.11, and 43.24, Fort William section, Ont.

2044. Nov. 20.—Sanctioning the erection of a bridge at mileage 41.6, Montreal and Ottawa section C.P.R.

2045. Nov. 20.—Sanctioning erection of bridge at mileage 1.5, Edmonton branch C.P.R., Alta.

2046. Nov. 20.—Authorizing the C.P.R. to erect a bridge at mileage 100.5, Woodstock section, Ont.

2047. Nov. 20.—Sanctioning the erection of a bridge at mileage 7.17, Port Burwell, Ont., branch C.P.R.

2048. Nov. 20.—Granting permission to the C.P.R. to construct bridges at mileages 3.3, 3.2, 51.47, 0.6, 49.3, 49.5, 50.3 and 50.9, Kenora section, Ont.

2049. Nov. 17.—Authorizing the C.P.R. to construct bridges at mileages 62.5 and 50.4, Chalk River section, Ont.

2050. Nov. 27.—Approving supplement 2 to C.P.R. Standard Passenger Tariff C.R.C. no. E 93 (cancelling Supplement 1).

2051. Nov. 26.—Authorizing opening of C.P.R. Staynerville branch from Staynerville station, Argenteuil, Que., to Brunette's Quarry.

2052. Nov. 15.—Directing the C.P.R. to establish a suitable highway crossing where its railway intersects Huron St. produced across its right of way within the limits of Steelton, Algoma, Ont.

2053. Nov. 26.—Authorizing the People's Telegraph and Telephone Co. to erect a telephone wire across the G.T.R. tracks at Killaloe Station, Ont.

2054. Nov. 28.—Authorizing a similar crossing of the G.T.R. at Golden Lake, Ont., by the People's Telegraph and Telephone Co.

2055. Nov. 27.—Similar order respecting the P.T. and T. Co., carrying its wire across the G.T.R. at Wilno Station, Ont.

2056. Nov. 28.—Authorizing the North American Telegraph Co. to carry its telegraph line across the G.T.R. tracks at Mallorytown, Ont.

2057. Nov. 28.—Granting permission to the C.P.R. to construct a spur line in Vancouver, B.C., to P. Burns and Co.'s premises.

2058. Nov. 28.—Authorizing the C.P.R. to construct a spur line in Indian Head, Sask., to the Indian Head power house.

2059. Nov. 28.—Sanctioning the construction by the C.P.R. of a spur line and siding in Pinto, Sask., to the Western Coal Mining Co.'s property.

2060. Nov. 28.—Authorizing the C.P.R. to construct a spur line in Toronto to John Arnold's premises.

2061. Nov. 28.—Granting the C.P.R. permission to construct a spur to the Mundy Lumber Co.'s premises, from mile post 15 west of Revelstoke, B.C.

2062. Nov. 28.—Authorizing the C.P.R. (lessee of the Columbia and Western Ry.) to construct a spur line from mile post 3, south of Castlegar, B.C., to the China Creek Lumber Co.'s premises.

2063. Nov. 28.—Authorizing the C.P.R. (lessee of the British Columbia Southern Ry.) to construct a spur line from Coal Creek, B.C., across the Elk River to the Elk River Lumber Co.'s premises.

2064. Nov. 28.—Authorizing the C.P.R. to construct bridges over Still, Magnetawan, and Muskox Black rivers, Sudbury-Kleinburg branch, Ont.

2065. Nov. 26.—Authorizing the C.P.R. to divert a highway in Carling tp., Parry Sound district, Ont., at mileage 90, Sudbury-Kleinburg branch.

2066.—Nov. 28.—Approving diversion of a highway at mileage 86, C.P.R. Sudbury-Kleinburg branch, in Carling tp., Parry Sound district, Ont.

2067. Nov. 28.—Granting permission to the C.P.R. to divert a highway at mileage 94, Sudbury-Kleinburg branch, McDougall tp., Parry Sound district, Ont.

2068. Nov. 28.—Granting similar permission in respect of a road at mileage 91.3 in same township.

2069. Nov. 28.—Approving deviation of the route of the Guelph and Goderich Ry. between Linwood and Listowel, Ont.

2070. Nov. 28.—Authorizing the C.P.R. to open for traffic the Wetaskiwin branch of the Calgary and Edmonton Ry. from Daysland to Hardisty, Alta.

2071. Nov. 29.—Authorizing the General Freight and Passenger Agent of the Canadian Northern Ontario Ry. to prepare and issue tariffs of tolls to be charged.

2072. Nov. 29.—Granting permission to the Ontario Power Co., Niagara Falls, Ont., to maintain a transmission line across the Michigan Central Ry. tracks west of the company's distributing station in Stamford tp., Ont.

2073. Nov. 29.—Authorizing the Ontario Power Co., Niagara Falls, Ont., to carry its transmission line across the Niagara, St. Catharines and Toronto Ry. tracks at Allan St., and Portage Road, Stamford tp., Ont.

2074. Nov. 29.—Authorizing the Ontario Power Co., Niagara Falls, Ont., to carry its transmission line across the Niagara, St. Catharines and Toronto Ry. tracks at Dixon and Stanley streets, Stamford tp., Ont.

2075. Nov. 29.—Authorizing the carrying of power transmission lines across the Niagara, St. Catharines and Toronto Ry. tracks at Victoria and Morrison streets, Niagara Falls, Ont., by the Ontario Power Co. of Niagara Falls.

2076 and 2077. Nov. 26.—Approving deviation of the C.P.R. line in Sudbury, Ont., and rescinding order 1941, of Nov. 10, in respect of the same matter.

2078. Nov. 29.—Authorizing the Welland County Telephone Co. to carry its lines across the Michigan Central Rd. tracks at six different points in and near Stevensville Ont

2079. Nov. 29.—Authorizing the Welland County Telephone Co. to carry its wires across the G.T.R. at Bridgeburg, Niagara Jct., and at the fourth crossing west of Stevensville, Ont.

2080. Nov. 29.—Sanctioning the laying of gas mains under the G.T.R. tracks at Queen St., Galt, Ont., by the Dominion Natural Gas Co.

2081. Nov. 29.—Authorizing the C.P.R. to construct a spur in Indian Head, Sask., to Campkin, Cole & Williamson's premises.

2082. Nov. 30.—Granting permission to B. Wase & Son, Toronto, to carry three wires for the conveyance of light and power across the C.P.R. tracks at North Toronto, Ont.

2083. Nov. 20.—Authorizing the Michigan Central Rd. to operate its trains across the Niagara Falls, Wesley Park and Clifton Tramway Co.'s tracks at Victoria Ave., Niagara Falls, Ont.

2084 to 2095. Nov. 29.—Authorizing the Ontario Power Co., Niagara Falls, Ont., to carry its transmission lines across the Niagara, St. Catharines and Toronto Ry., the Michigan Central Rd., and the International Ry. tracks at various points in Stamford tp., Ont.

2096. Nov. 7.—Approving location plans for Canadian Northern Ontario Ry. from south of Queen St., Don Esplanade, to the street line of Eastern Ave., Toronto.

2097. Nov. 27.—Authorizing the Vancouver, Westminster and Yukon Ry. to carry its tracks across the C.P.R. spur line to Fraser River mills, New Westminster, B.C.

2098. Dec. 4.—Approving amended location plans for G. T. Pacific Ry. from mileage 75.183 to mileage 83.708, East Alberta.

2099. Dec. 4—Approving location of Manitoba and North-Western Ry., Quill Lake branch, mileage 0 to mileage 31, Sask., on application of the C.P.R.

2100. Dec. 1.—Approving by-law of Dominion Express Co., Nov. 12, 1906, authorizing the President and General Manager of the company to issue tariffs of express tolls to be charged.

2101. Dec. 5.—Approving standard passenger tariff C.R.C. no. 161, at the rate of 3c. per mile for the Brandon, Saskatchewan and Hudson's Bay Ry.

2102. Dec. 5.—Approving standard freight tariff C.R.C. no. A145, of the Brandon, Saskatchewan and Hudson's Bay Ry.

2103. Dec. 5.—Approving standard passenger tariff C.R.C. no. 1, of the Canadian Northern Ontario Ry.

2104. Nov. 29.—Approving supplement no. 6, to standard passenger tariff C.R.C. no. 19, Vancouver, Victoria and Eastern Ry. and Navigation Co.

2105. Nov. 29.—Amending rule as to interlocking and derailing signals, etc. See Jan., pg. 23.

2106. Dec. 1.—Authorizing the Qu'Appelle, Long Lake and Saskatchewan Rd. and Steamboat Co. to construct a spur along Smith St., Regina, Sask.

2107. Dec. 4.—Varying the order of the Railway Committee of the Privy Council, of Dec. 16, 1902, respecting the position of signals at the crossing of the G.T.R. by the Port Burwell branch of the C.P.R. (Tillsonburg, Lake Erie and Pacific Ry.), and directing that the normal position of the signals shall be at danger.

2108. Nov. 24.—Authorizing the C.P.R. to construct a drain through lands adjoining its railway at Kaladar, Addington county, Ont.

2109. Dec. 7.—Approving location of Canadian Northern Ontario Ry. through Horton, Ross and Westmeath tps., Ont., mileage 57.5 to mileage 72.00 north from Ottawa.

2110. Dec. 7.—Authorizing the C.P.R. to carry its tracks across the Qu'Appelle, Long Lake and Saskatchewan Rd. tracks at Saskatoon, Sask., and to use the same for the passing of construction trains only, until May 1, 1907.

2111. Dec. 6.—Sanctioning change in location of the C.P.R. station at Webbwood, Ont.

2112. Dec. 7.—Authorizing the Toronto, Hamilton and Buffalo Ry. to construct a spur in Brantford tp., Ont., from mileage 3618 + 50.5, and terminating at mileage no. 3623 + 18.8.

2113 and 2114.—Bell Telephone Company crossings.

2115. Nov. 16.—Amending or varying order of the Board dated Feb. 14, 1906.

2116. Nov. 28.—Authorizing the Brandon, Saskatchewan and Hudson's Bay Ry. to maintain a telegraph line across the C.P.R. tracks near Carroll, Man.

2117. June 21.—Authorizing the James Bay Ry. to lay its tracks across the tracks of the spur extending from the Belt Line owned by the G.T.R. on lot 13, con. 2, from the Bay, York tp., Ont., at mileage 3.80, Toronto North.

2118. Dec. 4.—Authorizing the James Bay Ry. to lay its tracks across tracks of spur extending from Belt Line of G.T.R. in lot 13, con. 2, from the Bay, York tp., Ont., at mileage 3.80, Toronto North.

HOTEL TRAYMORE

2130. Oct. 25.—Authorizing the C.P.R. to carry Nelson St., Sudbury, Ont., across its railway by means of an overhead bridge.

2134. Dec. 7.—Authorizing the Guelph Radial Ry. to carry an electric power feed wire across the G.T.R. tracks at Edinboro' road, Guelph, Ont.

2135. Dec. 5.—Granting permission to the Plymouth Cordage Co. to lay a gas main under the G.T.R. tracks at Lincoln St., Welland, Ont.

2136. Dec. 5. — Authorizing the Plymouth Cordage Co. to lay and maintain a gas pipe under the G.T.R. tracks where same cross Lincoln St., Welland, Ont.

2137.—Dec. 8.—Extending the time for the installation by the Brandon, Saskatchewan and Hudson's Bay Ry., of an interlocking plant at its crossing of the C.P.R. near Carroll, Man., for three months from Oct. 21, 1906.

2138. Dec. 5.—Bell Telephone Co. crossing.

The New Canadian Tariff.

In the new tariff, which the Government is asking the Dominion Parliament to approve at its current session, the duties are fixed in three separate tariffs, one the British Preferential Tariff, second the Intermediate Tariff, and third a General Tariff. Under the new tariff Admiralty charts will be admitted free under all heads.

Iron and steel railway bars or rails of any form, punched or not, not otherwise provided for, for railways, which term for the purposes of this item shall include all kinds of railways, street railways and tramways, even although they are used for private purposes only, and even although they are not used or intended to be used in connection with the business of common carrying of goods or passengers, $4.50 per ton, under the British Preferential Tariff; $6 under the Intermediate Tariff; and $7 under the General Tariff.

Iron or steel railway bars or rails which have been use in the tracks of railways in Canada, and which have been exported from Canada and returned thereto after being rerolled, and weighing not less than 56 lbs. per lineal yard when re-rolled, and which are to be used by the railway company importing them on its own tracks, under regulations prescribed by the Minister of Customs, 25c. per ton under all the tariffs. Provided that the value for duty of such re-rolled rails shall be the cost of re-rolling of the same. Provided also that whenever the Governor-in-Council is satisfied that a mill adapted and equipped for rolling such rails in substantial quantities has been established in Canada, the Governor-in-Council may abolish the duty specified in this item, and thereupon all such rails, when imported into Canada, shall be subject to such duty as otherwise provided in the Customs Tariff.

Railway fish plates and tie plates, per ton, $5, $7 and $8.

Switches, frogs, crossings and intersections of railways, 20%, 30% and 32½%.

Iron or steel bridges or parts thereof, iron or steel structural work, columns, shapes or sections, drilled, punched, or in any further state of manufacture than as rolled or cast, n.o.p., 22½%, 30% and 35%.

Springs, axles, axle bars, n.o.p., and axle blanks or parts thereof, of iron or steel, for railway, tramway or other vehicles, 22½%, 30% and 35%.

Locomotives and motor cars for railways and tramways, n.o.p., 22½%, 30% and 35%.

Telephone and telegraph instruments, electric motors, dynamos, generators, etc., 15%, 25% and 27½%.

Locomotive and car wheel tires, of steel in the rough, free.

Machinery or appliances of iron or steel of a class or kind not made in Canada, and elevators and machinery of floating dredges when for use exclusively in alluvial gold mining, free.

The following articles and materials when imported by manufacturers of automatic gas buoys and automatic gas beacons, for use in the manufacture of such buoys and beacons for the Government of Canada, or for export under regulations prescribed by the Minister of Customs, viz., iron or steel tubes over 16 in. in diameter; flanged and dished steel heads made from boiler plate over 5 ft. in diameter; hardened steel balls not less than 3 in. in diameter; acetylene gas lanterns and parts thereof, free.

Iron or steel masts or parts thereof, and iron or steel beams, angles, sheets, plates, knees and cable chain, for wooden, iron, steel or composite ships and vessels; and iron, steel or brass manufactures which at the time of their importation are of a class or kind not manufactured in Canada, when imported for use in the construction or equipment of ships or vessels under regulations prescribed by the Minister of Customs, free.

Ships and other vessels built in any foreign country, if British registered since Sept. 1, 1902, on application for license to engage in the Canadian coasting trade, on the fair market value of the hull, rigging, machinery, furniture and appurtenances thereof (as provided in an act respecting the coasting trade of Canada), 25% under the Intermediate and General Tariffs.

Vessels, dredges, scows, yachts, boats and other waterborne craft, built outside Canada, of any material destined for use or service in Canadian waters (not including registered vessels entitled to engage in the coasting trade, nor vessels in transit between Canada and any place outside thereof, n.o.p., on the fair market value of the hull, rigging, machinery, boilers, furniture and appurtenances thereof, on arrival in Canada, 15% under the British Preferential Tariff, and 25% under the Intermediate and General Tariffs. Provided that regulations may be prescribed by the Minister of Customs for exemption from further duty after the duty specified in this item is once paid.

Railway or other cars, wheelbarrows, trucks, road or railway scrapers and handcars, 20%, 27½% and 30%

Locomotives and railway passenger, baggage and freight cars, being the property of railway companies in the U.S., running along any line or road crossing the frontier, so long as Canadian locomotives and cars are admitted free under similar circumstances into the United States, under regulations prescribed by the Minister of Customs, free.

Materials to be used in Canada for the construction of bridges and tunnels crossing the boundary between the United States and Canada, when similar materials are admitted free under similar circumstances into the United States, under regulations prescribed by the Minister of Customs, free.

It is provided in schedule B that the following drawbacks will be allowed on goods or home consumption: 95% drawback upon flat spring steel, steel billets and steel axle bars when used in the manufacture of springs and axles for vehicles other than railway or tramway vehicles; 95% upon spiral spring steel when used in the manufacture of railway spiral springs.

February Birthdays.

Many happy returns of the day to—

S. A. Baker, Canadian Freight and Passenger Agent, Chicago Great Western Ry., Toronto, born at Morrisburg, Ont., Feb. 1, 1877.

B. H. Bennett, General Agent Chicago and North-Western Ry., Toronto, born at Cobourg, Ont., Feb. 6, 1858.

F. L. C. Bond, Resident Engineer G.T.R., Montreal, born there Feb. 21, 1877.

E. E. Cain, Trainmaster Pere Marquette Rd., Detroit, Mich., born at Dublin, Ind., Feb. 14, 1867.

F. W. Churchill, C.P.R. Ticket Agent, Collingwood, Ont., born in London, Eng., Feb. 6, 1853.

H. R. Charlton, Advertising Agent G.T.R., Montreal, born at St. John's, Que., Feb. 9, 1866.

F. W. Cooper, Resident Engineer C.P.R., London, Ont., born there Feb. 16, 1880.

R. Crawford, Northwest Agent Northern Navigation Co. Winnipeg, Man., born at Kingston, Ont., Feb. 21, 1870.

F. P. Dwyer, Eastern Passenger Agent G.T.R., New York, born at Chicago, Ill., Feb. 20, 1853.

E. A. Evans, General Manager and Chief Engineer Quebec Ry., Light and Power Co., Quebec, born at Kensington, London, Eng., Feb. 26, 1855.

E. H. Fitzhugh, Third Vice-President G.T.R. and Vice-President Central Vermont Ry., Montreal, born in Montgomery County, Mo., Feb. 1, 1853.

C. W. Gardner, Auditor Minneapolis, St. Paul and Sault Ste. Marie Ry., Minneapolis, Minn., born at Rushville, N.Y., Feb. 17, 1861.

L. O. Genest, General Storekeeper, C.P.R. Western Lines, Winnipeg, Man., born at St. Henri, Levis County, Que., Feb. 16, 1856.

W. Jackson, C.P.R. ticket agent, Clinton, Ont., born there Feb. 4, 1860.

R. S. Logan, Assistant to 2nd Vice-President and General Manager G.T.R., Montreal, born at St. Louis, Mo., Feb. 13, 1864.

D. MacPherson, Assistant Chief Engineer Transcontinental Ry. Commission, Ottawa, born at Bath, Ont., Feb. 2, 1858.

C. S. Maharg, Assistant Superintendent C.P.R., Moose Jaw, Sask., born in Dufferin county, Ont., Feb., 1867.

T. McNabb, Master Mechanic Alberta Ry. and Irrigation Co. at Lethbridge, Alta., born in Scotland, Feb. 16, 1849.

C. W. Milestone, ex-Superintendent C.P.R at Moose Jaw, Assa., born at Medina, Ohio, Feb. 24, 1857.

C. Percy, Auditor G.T.R., Montreal, born in Kent, Eng., Feb. 12, 1845.

J. G. Scott, General Manager Quebec and Lake St. John Ry., Quebec, born there Feb. 13, 1847.

G. Spencer, Superintendent C.P.R. North Bay, Ont., born in London, Eng., Feb. 21, 1865.

Hugh Sutherland, Executive Agent Canadian Northern Ry., Winnipeg, Man., born at New London, P.E.I., Feb. 22, 1845.

J. B. Tinning, Travelling Passenger Agent C.P.R. Atlantic S.S. Lines, Toronto, born there Feb. 21, 1866.

J. W. Troup, Superintendent C.P.R. Pacific Coast Steamships, Vancouver, born Feb. 5, 1855.

Sir Wm. C. VanHorne, K.C.M.G., Chairman C.P.R. and President Cuba Co., Montreal, born in Will County, Ill., Feb., 1843.

H. W. Walker, General Auditor G.T.R., Montreal, born at Brantford, Ont., Feb. 12, 1839.

Special Session of Ry. Commissioners.

The Board of Railway Commissioners will hold a session in Ottawa on Feb. 5, to discuss and settle upon a system of operating rules for the various railways subject to the jurisdiction of the Board. The Board will also consider the petition of the railway trainmen of Ontario, dated April 28, 1906, and the representations of employes in relation thereto, as made before the Board on June 15, 1906; and the Board desires to have the contents of such petition and the representations referred to fully discussed and all possible information in respect thereto given.

The Board would like also to have consideration then given to the subjects enumerated below and to receive information in relation thereto: Railway accidents and precautions for preventing the same. Provisions for cleanliness, ventilation and health at passenger stations. Supply of equipment and adoption of methods to insure more prompt and efficient service on railways. Car supply for traffic originating on short local lines for carriage for long distances over other lines. Mechanical appliances and fire-guards for preventing the setting or spreading of fires from locomotive engines, especially on the prairies. Equipment of cars carrying lumber and similar commodities, and rules regulating the same. Width of gates and planking at farm crossings. Forms of orders for railway crossings. Supply of ice at convenient points for the icing of refrigerator cars for shipment, and provision for re-icing the same in transit for export and to the Western provinces. Compliance with sec. 216 of the Railway Act requiring the wearing of badges by railway officials. More careful compliance with sec. 231 of the Railway Act, respecting notices of delayed trains. Compliance with sec. 215 of the Railway Act, requiring trains to be run according to schedule time. Such other subjects connected with the management and operation of railways as it may appear then to those skilled therein desirable to discuss before the Board.

G. H. Phillips, General Freight and Passenger Agent, Ottawa and New York Ry., in renewing his subscription writes: "Your publication contains valuable information put together in convenient form for the reader."

Railway Commissioners' Freight Orders.

2115. Nov. 16, 1906. In the matter of the application of the C.P.R. Co. operating, as lessees, the Columbia and Western Ry., under sec. 25 of the Railway Act, 1903, for an order varying or amending the order of the Board dated Feb. 14, 1906, fixing the rate to be charged for interswitching between the Red Mountain Ry. Co.'s and the Columbia and Western Ry. Co.'s tracks at Rossland, B.C., so as to provide that the point of interchange for traffic between the said tracks be at the junction of the tracks of the said companies at or near Third Ave., Rossland, instead of at the point of interchange known as Transfer Jct., mentioned in the said order; and to fix a reasonable toll to be charged by the Red Mountain Ry. Co. for switching cars containing through freight traffic to and from the connection of the tracks of the Columbia and Western Ry. Co. at or near Third Ave., and from and to all points reached by the Red Mountain Ry. tracks on the Black Bear High Line and Low Line; also points west of the junction of the main line and the Lower Black Bear Line, including the White Bear Mine; the rate at present charged by the Red Mountain Co., viz., that authorized by the Board's order dated Feb. 14, 1906, which fixes the point of interchange at Transfer Jct., being in the opinion of the C.P.R. Co. excessive for the services performed in view of the fact that the interchange is now being made at Third Ave., or for such other order as the Board may in the circumstances deem proper. Upon reading what was alleged in support of the application, and the answer filed on behalf of the Red Mountain Ry. Co., and upon hearing counsel for the companies, the evidence adduced and what was alleged, and upon the report of its chief traffic officer, the Board orders that the point of interchange for traffic between the C.P.R. Co.'s and the Red Mountain Ry. Co.'s tracks be at the junction of their tracks at or near Third Ave., Rossland, instead of at the point of interchange known as Transfer Junction, as provided in the order of Feb. 14, 1906. That the Red Mountain Ry. Co.'s rate for switching cars containing through freight traffic to or from the point of interchange between its tracks and the C.P.R. tracks at or near Third Ave., and from or to all points described in the order of Feb. 14, 1906, be fixed at $3.00 per carload, regardless of weight, no extra charge to be made for the haulage of the empty cars in either direction, instead of $3.50 per carload, as provided in the order of Feb. 14, 1906. That the Red Mountain Ry. Co. refund to the C.P.R. Co. the difference between the rate of $3.00 per carload, as herein provided, and the rate of $3.50 per carload, as provided by the order of Feb. 14, 1906, wherever the latter rate has been charged and collected by the Red Mountain Ry. Co., on cars which have been interchanged at the point of junction at or near Third Ave., as provided in this order.

Intercolonial Ry. Motor Cars.

The Intercolonial Ry. is having built at its Moncton shops, several motor cars for use on its suburban lines. These cars have been designed by G. R. Joughins, Superintendent of Motive Power, from the knowledge gained during a visit to Great Britain and France last fall. In these countries there has been a considerable development of motor car travel on railways, and several types of cars are in service. As a result of his observations Mr. Joughins recommended for adoption by the I.C.R., the type of car in use on the Great Western Ry. of England, and this design has been followed with such modifications as the local conditions in Canada necessitate. The car will have a total length of 66 ft. exclusive of the enclosed platform at the rear end, which will be enclosed, and provided with a cowcatcher and couplings for attaching a second car if necessary. The front end is fitted with cowcatcher, coupling, headlight and bell. It is divided into compartments for boiler and engine, baggage, smoking, general passengers, and lavatories. Entering from the rear platform are two lavatories, 3 ft. 11 in., one on each side of the car; then comes the passenger compartment, 30 ft. 3 in., with seats for 40 persons; next comes the smoking compartment, 9 ft. 1 in., with seats for 12 persons; then the baggage compartment, 8 ft. 4½ in.; and finally the boiler room, 14 ft. This is enclosed in wood, like the body of the car, the smoke stack projecting a little above the roof. Coal bunkers are at front end, one on each side of the car, and the boiler and engines are carried above the centre of the driving wheel truck. The door into the boiler room is 2 ft. 3 in. wide; and there are sliding doors giving connection with the baggage room. This has two doors, one at each side of the car, 3 ft. 8 in. wide. The windows in the passenger sections of the car are 24 in. square. The driving wheels are 42 in. in diameter, and the rear wheels are 36 in. in diameter. There are two water-tanks carried under the central part of the car, having a total capacity of 625 gallons, and there is also a vapor tank. The cylinder has a diameter of 12 in.; with a piston stroke of 16 in.; and the driving wheels have 7 by 16 in. journals. The motor will have a capacity of 200 h.p., and is calculated to haul a trailer, if necessary at a speed of 30 miles an hour, or 10 miles an hour less than if no trailer is attached. Three cars are being built and they are to be completed for the early summer traffic.

Refunds on Passenger Tickets.

The Eastern Canadian Passenger Association has adopted the following regulations: That wholly unused passage tickets, sold in Canada, presented for redemption at the ticket office where sold within 30 days from the date of expiration shall be redeemed forthwith by the agent in charge of said ticket office at the price paid for such ticket. That passage tickets sold in Canada and partly used, shall be received for redemption if presented within 30 days from the expiration of the time for which the ticket was issued in accordance with the conditions thereon, on the basis of the amount paid for the ticket less the regular and ordinary fare for the distance for which such ticket has been used. Tickets bearing "B.C." or gate punch marks must be treated as partly used tickets. That passage tickets presented to agents for redemption more than 30 days after their expiration, shall be forwarded at once to the general passenger department, with full particulars, including the reason why ticket was not presented for redemption within the proper limit. That where the claimant for refund is located in a place at which there is an agent of the transportation company, the claim be paid by an order or draft from the general passenger department to be sent promptly to the agent at such point; notice to be sent by mail to the claimant the day the order or draft is sent to agent, advising him where payment will be made. That where the claimant for refund is located in a place at which there is not an agent of the transportation company, the claim be paid promptly by the general passenger department through the treasury department; notice to be sent by mail to the claimant on the day the order is made by the general passenger department. That the cheque or form of remittance to be used by the treasury depart-

ment shall be payable at par in the place claimant desires payment to be made, and that the present practice of one or more members in deducting the cost of remittance from the amount of the refund should be discontinued, in all instances the claimant being entitled to the amount of his claim without deductions referred to above. That a receipt be taken in every case where an agent makes refund on a wholly unused ticket, the receipt to show claimant's address. That an acknowledgment be made at once by general passenger department for every claim received direct from claimant, if claim requires investigation and payment cannot be made on the day claim is received. That to ensure prompt payment of all claims any necessary checking by the accountant department should take place after payment has been made, experience having demonstrated that only an infinitesmal number of small errors occur in comparison with the total claims paid.

C.P.R. Betterments, Construction, Etc.

Wiscasset, Me.—A United States press report states that the C.P.R. is interested in a project to extend the Somerset Ry. of Maine into Canada, and to develop the harbor of Wiscasset, Me., in opposition to the G.T.R. port of Portland.

Halifax.—Reports are current in Halifax, N.S., to the effect that the C.P.R. is negotiating for the purchase of several properties in the city with a view of having terminal facilities there.

Quebec Improvements.—The surveys and preliminary work for a number of improvements at Quebec are being made. The improvements planned include the building of a cribwork wharf from Prince Edward St. to the north embankment of the Louise docks, filling in to make new ground for additional tracks, sidings, etc., the building of a freight shed to take the place of the present one, which will be demolished to give additional yard space, and the erection of a new station. The work of demolishing the buildings on the site of the extensions to the Chateau Frontenac has been commenced.

Campbellford to Toronto.—The preliminary surveys for the line between these points which the C.P.R. proposes to construct so as to reach the Lake Shore towns, are practically complete, and F. S. Darling, Division Engineer of Construction, recently stated that it was desired to avoid the Scarboro Heights by connecting with the main line at some point between Leaside Jct. and Locust Hill. As soon as the preliminary surveys had been completed the actual location surveys would be gone on with.

Walkerton and Lucknow Ry.—Grading practically ceased on the line under construction between Proton and Walkerton, Ont., at the end of Dec. Good progress has been made with the work generally. The big fill at the crossing of the Saugeen river, which requires about 65,000 cubic yards, has been about half done. The fencing posts are all set, and the telegraph posts and ties are now being hauled in.

Offices at Chatham, Ont.—The company has leased the I. A. McCall Drug Co.'s store at Chatham, Ont., for 10 years, and will fit it up as a city ticket office.

Surveys at Sarnia, Ont.—Engineers have been working in the vicinity of Sarnia for some time, in the interests, it is stated, of the C.P.R., with the object of securing an entrance of that line to the waterfront. The report also states that it is sought to effect a junction with the Pere Marquette Rd. lines, and a further report is to the effect that negotiations for the purchase by the C.P.R. of the Sarnia Bay mill property for terminal purposes have practically been completed. The manager of this company stated Jan. 6 that although C.P.R. officials had interviewed him on two occasions, there was no truth in the report that the property was about to be sold.

Toronto-Sudbury Line.—Track was laid into Bala on Christmas morning, and it was expected that the rails would be laid into Parry Sound by the end of Jan.

Winnipeg Train Shed.—Work was commenced Jan. 3 by the Dominion Bridge Co., Montreal, upon the erection of a train shed over the six C.P.R. tracks at the new station. The shed will extend from the subway to the eastern end of the station building. It will have a total length of 474 ft 8 in., with a width of 108 ft. 2½ in., and will be 29 ft. 1½ in. from the top of the concrete piers to the roof. The roof will be carried on steel pillars and trusses, and there will be a skylight 37 ft. wide along the centre. On the side of the shed opposite the station building, there will be a covered way for waiting vehicles, etc.

Spur Lines in Winnipeg.—The C.P.R. has given notice of application to the Board of Railway Commissioners for permission to construct a number of spur lines in Winnipeg.

Quill Lakes Branch.—The Board of Railway Commissioners has approved of location plans for the Quill Lakes branch for a distance of 31 miles.

Water Supply at Suffield, Alta.—For the purpose of supplying water for locomotives at Suffield the C.P.R. has had laid 10½ miles of 8 in. high pressure wood pipe. The pipe line is laid at a depth of 8 ft. in order to protect it from the frost. The water will be pumped from the Saskatchewan River. The Pacific Coast Pipe Co., Vancouver, B.C., had the contract.

Cascade Bridge Filling.—In connection with the filling of the big bridge at Cascade, B.C., which will take another year to complete, there was finished at the end of 1906, a cut of about a mile long along the base of the mountain. This cut has always been a source of trouble to the company on account of slides, and its widening will be a considerable betterment to this section of the line.

Bridge at Revelstoke.—Work has been started upon the foundations of the new bridge across the Columbia River at Revelstoke. The foundations are expected to be completed and ready for the erection of the steel superstructure in the spring. The bridge will be at the site of the existing one.

New Westminster Terminals.—Plans for the improvement of the terminal facilities at New Westminster, B.C., are under consideration. It is expected that work will be gone on with during the year.

Esquimalt and Nanaimo Ry.—The terminal facilities in Victoria, B.C., are entirely inadequate for the business being handled, and the question of an extension is understood to be under consideration. The Soughees' reserve is the area into which the extensions are planned, and the Government is being asked to open it up. Plans for improved station buildings and terminals were prepared by J. Hunter, Chief Engineer of the E. and N. Ry., before it was taken over by the C.P.R., and it is stated that these will be utilized. The plans provide high level trackage for passengers and express traffic and a low level for freight. (Jan., pg. 19.)

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Dominion Dump Car Co., Montreal, has issued a handsomely illustrated calendar.

F. H. Hopkins & Co., railway contractors and mining supplies, etc., Montreal, have issued a large wall calendar.

The Locomotive and Machine Co. of Montreal has sold eight steam shovels to the C.P.R., and five to the G.T. Pacific Ry.

Mussens Limited, railway contractors, mining and municipal supplies, etc., Montreal, have issued a large wall calendar.

The Hiram L. Piper Co., Railways and Marine Supplies, etc., Montreal, has issued a handsome calendar, "A String of Trout," for 1907.

J. W. Duntley, President Chicago Pneumatic Tool Co., who returned recently from his 21st trip to Great Britain and the European continent, reports his company's business on the increase at all the points visited. He again sailed for Europe on Jan. 8.

The fifth of the series of pamphlets which is being issued by the American Locomotive Co. has been published. It is devoted to 10-wheel type locomotives weighing less than 150,000 lbs., and will be followed by one presenting the heavier designs of this type. The pamphlet illustrates and describes 21 different designs of 10-wheel locomotives, ranging in weight from 64,000 to 150,000 lbs. and adapted to a variety of road and service conditions. The series now includes pamphlets on the Atlantic, Pacific, consolidation and 10-wheel types, and copies may be had upon request.

The Dominion Car and Foundry Co. has been incorporated under the Dominion Companies' Acts, with a capital of $5,000,000 and offices at Montreal, to manufacture, buy, sell and deal in cars and rolling stock of all kinds and descriptions, and any parts of the same, and all the necessary incidental powers in connection with the purchase and sale of patent rights, the holding of lands and buildings, the purchase of similar businesses, and the financing of the various operations. The provisional directors are: W. V. Kelley, R. P. Lamont, Chicago, Ill.; W. W. Butler, Saratoga Springs, N.Y.; G. McAvity, St. John, N.B.; A. H. Chave, and J. A. Lamont, Montreal.

The Vulcan Iron Works Co., Toledo, Ohio, has, during the past year, materially increased the capacity of its plant. New machines, of the latest and most improved types, have been installed. In fact, every device for facilitating the work in the shops, such as heavy steam hammers, lathes, boring, turning, milling, punching, and shearing machines, besides two large water tube boilers, with a capacity of 200 h.p. each, and a new air compressor, with a capacity of 750 ft., have been added, making this one of the most complete and compact plants in the country for the manufacture of steam shovels. Another very important feature is the completion of an entirely new and separate shop for taking care of the repair work.

The Manitoba Cartage and Warehousing Co., Winnipeg, Man., has been granted supplemental letters patent, increasing its capital from $150,000 to $250,000.

Vertical Enclosed Engines

We are prepared to supply high speed Vertical Enclosed Engines of the English type, up to 750 horse power.

The oiling system of these Engines is under a pressure of 15 lbs. to the square inch, ensuring a copious supply of oil to all bearings.

They have Robb-Armstrong automatic governors and Sweet balanced valves giving the best regulation and highest economy.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Abitibi and Hudson Bay Ry.—The Dominion Parliament is being asked at its current session for an act incorporating a company with this title with power to construct a railway from the National Transcontinental Ry., between Frederick House River and Abitibi Lake, Ont., to James Bay, between Albany River, Ont., and East Main River, Que. Power is also asked to join tracks with the National Transcontinental Ry. and the Temiskaming and Northern Ontario Ry.; to make traffic arrangements with other railways, and with steamboat companies; to construct telephone and telegraph lines; to own and operate steam and other vessels, construct wharves, docks, etc., and to develop electric power. Murphy and Fisher, Ottawa, Ont., are solicitors for the applicants.

Alaska Central Rd.—J. D. Cameron, Engineer of Construction, states that not much was accomplished in actual mileage during 1906, but big headway was made in the amount of work done. Seven tunnels, aggregating more than 4,100 ft., were driven on miles 49 and 52; all the grading and pile driving has been completed to mileage 67; all the right of way has been cleared to mileage 105, and five miles of grading done between mileage 67 and 105. There are ties on hand for 40 miles, rails for 50 miles, and material or five bridges. The heaviest work is now completed, and during the coming season rapid progress will be made. (Dec., 1906, pg. 711.)

Alberta Central Ry.—The Dominion Parliament is being asked at its current session to pass an act extending the time for the commencement and completion of the railway and extension authorized by the company's acts, and authorizing the making of agreements with the G.T. Pacific Ry. and the Canadian Northern Ry. It is also desired to vary the personel of the provisional directors and to change the head office from Toronto to Red Deer, Alta. J. T. Moore, Red Deer, is solicitor for the applicants.

A second application is being made at the current session of the Dominion Parliament for an act extending the time for the construction of the authorized lines; to authorize an extension of the projected line from Content to Medicine Hat, Alta., and to include the Canadian Northern Ry. and the G.T. Pacific Ry. or any other railway among the companies with which it is authorized to make agreements. The application is signed by G. W. Smith, Red Deer, Alta., President.

Alsek and Yukon Ry.—The applicants at the current session of the Dominion Parliament for an act incorporating a company with this title are: J. A. McDougal, J. P. Smith, Dawson, Yukon; F. Jodin, Fairbanks, Alaska; B. L. Allan, New York; and C. E. W. Johnson, Vancouver, B.C. The line as projected will traverse the Yukon territory from the British Columbia to the Alaskan boundary, passing through Dawson. (Nov., 1906, pg. 639.

Atlantic, Quebec and Western Ry.—W. Moffatt, of Scotland, and J. Lavoie, Perce, Que., interviewed the Dominion Premier Jan. 2, with respect to the Dominion subsidy towards the construction of this line, of which 20 miles have already been completed. (Jan., pg. 1).

The Bangor and Aroostook Rd. Co. has been granted authority by the Maine Railway Commission, to construct a line from West Sebois to St. Francis, Me., near the Canadian boundary, 145 miles. The company already has a branch running from Houlton, Me., to Fort Kent, at the Canadian boundary, and the projected branch will be some miles west of this, but the termini of both will be on the U.S. side of the river along the banks of which the St. Francis branch of the Temiscouata Ry. runs. M. Burpee, Houlton, Me., is Chief Engineer.

Beersville Coal and Ry. Co.—The line from Beersville, N.B., to the Imperial Coal Mining Co.'s collieries was re-opened for traffic Jan. 1.

Big Fork and International Falls Rd. Co.—Articles of incorporation have been filed at Minneapolis, Minn., naming E. W. Backus, W. F. Brooks, and C. G. Rockwood, as directors of this company, with the object of constructing a line from the present terminus of the Minnesota and International Rd., to International Falls, on the Rainy River, nearly opposite Fort Frances, Ont. The length of the projected line is about 35 miles, and the cost of the construction and equipment is put at $1,000,000. The promoters of the line are interested in the development of the power plant at the International Falls. (See Minnesota and International Ry., Jan., pg. 34.)

Buffalo and Frontier Terminal Ry.—The new switching road to be constructed in Buffalo, N.Y., under this title will be a double track line, 27½ miles long. The southern terminals will be at Bay View, and the northern terminal at Tonawanda. The proposed route crosses all the lines from the seaboard and from the south shore of Lake Erie. It is understood that at a future date the line will be extended to Black Rock, so as to touch the lines entering Buffalo from Canada.

Cape Breton Coal, Iron and Ry. Co.—It is reported that the shaft at the company mines at Broughton, N.S., has been sunk at the wrong point, and that the $1,000,000 expended in laying out a town, building an hotel, men's houses, etc., has been wasted. At any rate the town has been abandoned for some months, and nothing is being done in the direction of constructing the projected railways. A report from London, Eng., Jan. 7, states that the company has not paid the interest due on its bonds, which are held almost exclusively in England. (Dec., 1906, pg. 711.)

Chibougamou and James Bay Ry.—The Quebec Legislature is being asked at its current session for an act incorporating a company with this title with power to construct a railway commencing at or near Roberval, thence to Chibougamou and Mistassini Lakes; and a line commencing on the north side of the National Transcontinental Ry., following the Bell and Nottaway rivers and reaching James Bay. Martineau, Lemieux and Brassard, Montreal, are attorneys for the applicants.

The Cumberland Ry. and Coal Co.'s freight and passenger station at Parrsboro, N.S., which was burned down Jan. 7, is to be rebuilt at once.

Detroit River Tunnel.—Shaft 1, located nearest the river at Windsor, Ont., has been completed, and the men are engaged in cutting a tunnel to shaft 2, from which another gang is tunnelling towards shaft 1. (Dec., 1906, pg. 711.)

Diamond Coal Co.—The Alberta Legislature at its current session is being asked for an act incorporating a company with this title for the purpose, among other things, of constructing a railway from the company's mines to the Crow's Nest line of the C.P.R.

Gaspesian Ry.—Application is being made at the current session of the Quebec Legislature for an act incorporating a company with this title for the purpose of constructing a railway from Paspebiac, through the county of Bonaventure, not further north than Causapscal, or further south than Cross Point, to the boundary of the Province, in the direction of Edmundston or Grand Falls, N.B., or between those two points on St. John River. Power is also asked to amalgamate with the Atlantic, Quebec and Western Ry., to operate telegraph and telephone lines, and to own and operate steam and other vessels. Martineau, Lemieux and Brassard, Gaspe Basin, Que., are attorneys for the applicants.

Great Northern Ry. (U.S.) Canadian Lines.—Jas. Fisher, K.C., Winnipeg, solicitor for the company's lines in Manitoba, stated Jan. 3, that the line from Gretna on the International boundary to Portage la Prairie, Man., and from St. John, N.D., to Brandon, Man., would be opened for passenger traffic by Jan. 31. A short line from Walhalla, N.D., to Morden, Man., would be completed early in the spring. The right of way from the International boundary to Winnipeg has not yet been purchased. The route map filed with the Government shows a line from Emerson to Winnipeg. (Jan., pg. 3, also see Midland Ry. of Manitoba, Jan., pg. 3, and Brandon, Saskatchewan and Hudson Bay Ry., Dec., 1906, pg. 711.)

Reports from Winnipeg and other points in the west, are to the effect that the Hill project for the construction of a line from Winnipeg to Vancouver, has either been abandoned, or held up for an indefinite period. Also that all that the company will do will be to extend its branch lines into Canadian territory.

Halifax and South-Western Ry.—The first through train from Halifax to Yarmouth, N.S., over the H. and S.W. Ry., reached the latter town Dec. 20, and a regular bi-weekly service between Liverpool and Yarmouth was inaugurated Dec. 22. W. Mackenzie, Toronto, C. W. Spencer, General Manager of the line, and other officials were entertained at dinner at Halifax, in connection with the completion of the line Dec. 21. Mr. Mackenzie spoke of the connecting up of the various sections of the Canadian Northern Ry. lines with the lines in Nova Scotia, and added that the only thing that is left to Halifax is to wait for the Canadian Northern Ry. A new passenger station was a necessity in the city. (Jan., pg. 3.)

Huntsville and Lake of Bays Ry.—The Ontario Legislature will be asked next session for an act constituting C. O. Shaw, S. H. Jacobs, J. McKee, J. J. McNeil, H. F. Chafee, W. J. Moore, J. Whitesides, and A. Marsh, provisional directors in lieu of those mentioned in the act of incorporation, and conferring upon them all the powers of the original company.

Intercolonial Ry.—The contract for the erection of the locomotive shops at Moncton, N.B., has been awarded to E. A. Wallberg, Montreal, at a price of about $500,000. They will be built entirely of concrete and steel. This is the last group of the shop system to be built there. All the others are being built by the same contractor.

A contract has been let to M. E. Keefe & Co., Halifax, N.S., for the erection of a roundhouse and engine house. The new roundhouse will have 36 stalls, and the engine house will adjoin it. The structure will be built of concrete, and the flooring, etc., will also be of concrete. The roundhouse will be 350 ft. across. The turntable in the centre of the building will be 75 ft. wide. The building will be only one story and will have a ventilating roof of reinforced concrete slabs, metal and hard pine, supported throughout the space by piers of concrete. Most of the roof will be 28 ft. in height, but one portion will be somewhat higher than the rest. The engine house

THREE RIVERS, P.Q. LONDONDERRY, N.S.

HEAD OFFICE:

CANADA LIFE BUILDING, ——— MONTREAL

connected with the roundhouse will be 108 by 157 ft. and will also be of reinforced concrete, and have a ventilating roof. Other buildings to be erected later on the grounds adjacent to the roundhouse include a freight car repair shop 360 by 86 ft., a planing mill 128 by 60 ft., a store house 125 by 80 ft., oil and sand houses, a water tank and a general storehouse, but contracts have not yet been given for these. The railway entrance to the new site of the works will be from the cotton factory siding and the roundhouse will be well up towards the Exhibition grounds. The front will be near Windsor St. (Jan., pg. 3.)

Knee Hill Ry.—Application is being made at the current session of the Alberta Legislature for an act incorporating a company with this title for the purpose of constructing a railway, not exceeding 25 miles long, from the Knee Hill mines to the C.P.R.

Little Nation River Ry.—Application is being made at the current session of the Quebec Legislature for an act incorporating a company with this title for the purpose of constructing a railway from between Thurso and Montebello, on the left bank of the Ottawa River, running northerly to near the line of the C.P.R. in Ottawa county; to operate hotels, to develop electric power, and to sell the same; to acquire steam and other vessels, and to carry on a general navigation business. The persons mentioned in the application are; A. Taillefer, Montebello; Que.; P. de Varennes, A. Chauret, Papineauville, Que.; N. Chenie, Rev. J. P. Belanger, St. Andre Avelin, Que. H. A. Fortier, Hull, Que., is their solicitor.

London and Port Stanley Rd.—The Pere Marquette Rd., which operates the L. and P.S. Ry. under lease, has made an offer to the London City Council, the owners of the line, with respect to the renewal of the bridges. The lessee has notified the city in accordance with the terms of the lease that it requires the bridges over Kettle Creek, and the Thames renewed, and that E. K. Woodward, C.E., had been appointed engineer to represent its interests. The P.M. Rd. offered to provide the funds necessary, to be repaid by the city during the continuance of the lease, the P.M. Rd. paying an additional rental equal to 4½% upon the cost of the work. The city is taking legal advice as to the power of the lessee to call upon the city to renew the bridges. During the past year 15 miles of track were relaid with new 56 lb. rails. (July, 1906, pg. 381.)

Lotbiniere and Megantic Ry.—Application is being made at the current session of the Quebec Legislature for an act extending the time for the construction of the additional lines authorized by the company's acts.

McLeod, Cardston and Montana Ry.—Deputations from Calgary and MacLeod, Alta., are arranging to visit Ottawa, to ask the Government to vote a subsidy for the construction of the projected railway.

Michigan Central Rd.—Practically all the new second track on the M.C.R.'s Canadian line was used for traffic Dec. 31. About 12 miles had not been fully completed, but it was expected that this would be finished by Jan. 31. (Dec., 1906, pg. 713.)

Niagara Peninsula Ry.—Application will be made at the current session of the Ontario Legislature for an act incorporating a company with this title for the purpose of constructing a railway, to be operated by steam, electricity or other motive power, from Port Colborne westerly to Welland. It is also asked that all such other powers as are usually given to railways be conferred upon the company. Rowell, Reid, Wilkie, Wood and Gibson, Toronto, are solicitors for the applicants.

Ontario and Quebec Ry. Ferry Co.—The examiner of petitions of the House of Commons reported that the standing orders had not been complied with in several particulars. The principal non-compliance was in asking for powers not specifically mentioned in the notice, viz., power to operate steamboat lines, and the right to expropriate lands. The question whether the applicants will be allowed to proceed is before the Standing Orders Committee. (See Quebec Ry. Ferry Co., Jan., pg. 5.)

Ottawa River Ry.—The Ontario Legislature will be asked next session for an act extending the time for the construction of the branch lines authorized to be constructed by the company under chap. 103, 1906.

Pontiac Central Ry.—The Quebec Legislature is being asked at its current session for an act incorporating a company with this title with power to construct a railway from Bryson, Que., along the valley of the Coulonge River to a port on James Bay, with such branches as may be required. It is also desired to have power to develop the mineral, timber, agricultural and other resources of the district to be traversed. Ryan and Bickerdike, Montreal, are solicitors for the applicants.

Quebec and Lake Huron Ry.—The Canadian Gazette states that the Quebec and Lake Huron Construction Co. was registered in England on Dec. 18, with a capital of £100,000, to adopt an agreement with Steele, Lockhart and Co. to construct, equip, work, and maintain the railway from Lake Huron to Quebec authorized by the Dominion Parliament. (Aug., 1906, pg. 455.)

Quebec and Oriental Ry.—The application for an extension of time for the construction of this projected railway, is under consideration at the current session of the Dominion Parliament. The offices of the company are at Montreal, but the shareholders all reside at or near Rimouski, Que., and in giving notice of the application the necessary advertising was not done in Montreal at the same time as it was done at Rimouski. The Standing Orders Committee has the technical point under consideration.

Quebec to Lake Champlain.—Application is being made at the current session of the Quebec Legislature for an act incorporating "The Railway Company from Quebec to Lake Champlain," for the purpose of building and working a railway between these two points. J. C. Langlier, Quebec, is attorney for the applicants.

Reid Newfoundland Co.—A new station building has been completed at Killigrew, Nfld., and was opened for business at the end of Dec.

Saskatchewan Central Ry.—Application will be made next session of the Saskatchewan Legislature for an act authorizing it to construct the following additional lines of railway: from the eastern boundary of the province south of the northern boundary of tp. 11, to the western boundary of the province south of the northern boundary of tp. 11; from the projected main line west of range 23, west 2nd meridian, northerly and northwesterly to Goose Lake, thence northerly to Big River between ranges 9 and 12 west of the 3rd meridian; from near Goose Lake westerly to the western boundary of the province; branch lines from any point on the first mentioned line to any town on the C.P.R. main line, and to the southern boundary of the province.

Sherbrooke to Quebec.—Application is being made at the current session of the Quebec Legislature for an act incorporating a company with power to construct a railway from Sherbrooke to the city of Quebec, with all the necessary and incidental powers. The persons named in the application are: F. McCrea, timber merchant, Sherbrooke, Que.; J. A. Begin, notary, Windsor Mills, Que.; E. W. Tobin, lumber merchant, Bromptonville, Que.; E. Hunt, broker, Quebec city, several of whom are connected with the Lotbiniere and Megantic Ry.

Somerset Ry.—Application has been made to the Maine Legislature by the Somerset Ry., to construct a line from Birch Point, Me., to the Canadian boundary. The line, which has a junction with the C.P.R. near Moosehead Lake, Me., was extended to Birch Point two years ago. Its total length is 60 miles, and the extension now asked for is 130 miles.

St. Maurice Valley Ry.—The line from Three Rivers to Shawinigan Falls, Que., was placed in operation Dec. 29, two trains a day in each direction being run. The time table issued is signed by V. Burrill, President, and W. H. Potter, Trainmaster. The line has a total length of 22 miles, and the construction has been fairly heavy. It includes two large bridges, one a cantilever 135 ft. high, with two spans 165 ft. each, and approaches at Shawinigan Falls, and one at Les Gres, consisting of seven 60 ft. steel girders, two 128 ft. truss spans and one big span of 240 ft. (Jan., pg. 5.)

Temiskaming and Northern Ontario Ry.—The Ontario Government has passed an Order-in-Council authorizing the Commissioners to extend the line to a junction with the National Transcontinental Ry. at or near the junction of the Black and Abitibi rivers. This is about 47 miles north of the end of the present contract. The construction of this extension will give the line a total length of about 250 miles. The commissioners will receive tenders up to Feb. 13 for the construction of this additional mileage. (Jan., pg. 7.)

Tenders are being asked for the construction of an office building at North Bay, Ont., which is estimated to cost about $30,000. The Commissioners have under consideration a proposal to construct branch lines to the Larder Lake and Portage Bay or Mud Lake districts. The first named branch will be about 16 miles long, and will run from Englehart; the Portage Bay branch will run from Gillies Depot or Cobalt, for a distance of about five miles.

Thurlow Ry.—Application will be made at the current session of the Ontario Legislature for an act incorporating a company with this title with power to construct a railway from a junction with the G.T.R. in Thurlow tp., at or about lot 22 or 23, con. 1, southerly to the Bay of Quinte. H. H. Macrae, Toronto, is solicitor for the applicants.

Vancouver, Westminster and Yukon Ry.—The New Westminster, B.C., City Council has under consideration a proposal to offer 50 acres of land on Lulu Island for car shops, or other purposes in connection with the line. The land has about 2,000 ft. water frontage at the North Arm of the Fraser River. (Jan., pg. 7.)

Winnipeg and Fort Alexander Ry.—Application is being made at the current session of the Manitoba Legislature for an act extending the time mentioned for the completion of all roads, adding to the powers contained in the act, and making such other amendments as may be deemed necessary and proper. J. T. Haig, Winnipeg, is solicitor for the applicants. The W. and F.A. Ry. was incorporated in 1898, for the purpose of constructing a railway from the C.P.R. between Beausejour and Darwin stations, northerly by way of Lac du Bonnet to the head of lake navigation near the mouth of the Winnipeg River. The provisional directors named in the act are:

York and Carleton Ry.—The contractors for the extension from Glippen Glen to Ryan's Brook, N.B., one mile, is J. A. Young, Taymouth, N.B. The work will be completed this season. (Jan., pg. 7.)

The C.P.R. has moved its district freight office at London, Ont., from the passenger station to the Bank of Commerce Building.

The Board of Railway Commissioners has decided to make an investigation into the charges of telephone and express companies, and G. F. Shepley, K.C., Toronto, has been appointed counsel to conduct the enquiry. The investigation will be a public one.

The C.P.R. has filed with the Board of Railway Commissioners the following standard passenger tariffs: Between Guelph and Goderich, Ont., 3c. per mile; between Lacombe and Stettler, Alta., and between Wetaskiwin and Hardesty, Alta., 3½c. per mile; between Spence's Bridge and Nicola, B.C., 4c. per mile.

Railway Rolling Stock Notes.

The Canadian Northern Ry. has ordered 20 30-ton refrigerator cars from Rhodes, Curry & Co., for June delivery.

The Canadian Northern Ry. is building a business car at its Winnipeg shops for Superintendent Cameron.

The Canada Car Co. has received orders for 100 Hart-convertible ballast cars to be built for the patentees, the Dominion Dump Car Co.

The Canadian Locomotive Co., Kingston, Ont., has delivered one switching and five consolidation locomotives to the Intercolonial Ry.

Rhodes, Curry & Co., Amherst, N.S., has delivered four first-class passenger cars, two mail and express cars, and one caboose to the Canadian Northern Ry.

The Canadian Northern Ry. has received a snow plow from Rhodes, Curry & Co., and the Canadian Northern Ontario Ry. has also received one from the same builders.

The Dominion Dump Car Co., Montreal, has sold to MacDonell & O'Brien, who have a contract on the Eastern Division of the Transcontinental Ry., 10 additional Hart-convertible ballast cars, 34 ft. long and 9 ft. wide, outside measurement, 80,000 lbs. capacity, and similar in design to those sold to the G. T. Pacific Ry.

The C.P.R., between Dec. 14, 1906, and Jan. 14, received the following rolling stock: three passenger and freight locomotives from the Locomotive and Machine Co. of Montreal; five switching locomotives, 13 first-class cars, 476 box cars, five snow ploughs and nine flangers from its Angus, Montreal, shops, and 20 vans from its Farnham, Que., shops.

The Canadian Northern Ry. and allied lines received the following rolling stock between Nov. 15 and Jan. 15: 2 passenger cars, 1 refrigerator car, 398 box cars and 2 snow plows from Rhodes, Curry & Co., Amherst, N.S.; 4 first-class cars, 2 mail and express cars, 1 caboose, 24 box cars from Crossen Car Mfg., Co., Cobourg, Ont.; 1 locomotive and 1 switching locomotive from Canada Foundry Co., Toronto; 2 box cars from Canada Car Co.

The C.P.R., between Dec. 14, 1906, and Jan. 14, placed orders for the following rolling stock: 20 passenger and freight locomotives and 15 freight locomotives with the Locomotive and Machine Co. of Montreal; 25 freight locomotives with the American Locomotive Co.; 25 passenger and freight locomotives with the Baldwin Locomotive Works; 10 passenger locomotives, 25 first-class cars, 15 mail and express cars, 128 box cars, 90 flat cars and 30 stock cars with its Angus, Montreal, shops.

The Canadian Northern Ry. and its allied lines, the Canadian Northern Ontario, the Canadian Northern Quebec, the Halifax and Southwestern and the Inverness and Richmond railways have the following rolling stock under order for delivery during the current year: 10 ten-wheel and 15 consolidation locomotives, Locomotive and Machine Co. of Montreal; 15 ten-wheel and 15 consolidation locomotives, Canadian Locomotive Co.; 15 ten-wheel and 25 consolidation locomotives, Canada Foundry Co.; 12 passenger cars, 6 baggage cars, 6 mail and express cars, Rhodes, Curry & Co.; 16 passenger cars, 4 baggage cars, 4 mail and express cars, Crossen Car Manufacturing Co.; 4 passenger cars, 2 parlor cars, 3 sleeping cars, 2 dining cars, being built in the U.S.; 1,500 box cars, Rhodes, Curry & Co.; 100 flat cars, 200 stock cars, 15 cabooses, Crossen Car Mfg. Co.; 200 Hart convertible cars, Dominion Dump Car Co.

The G.T.R. has received from the Locomotive and Machine Co. of Montreal a Walscheart gear cross-compound piston valve locomotive, of which an illustration is given on this page. The leading dimensions are:

CYLINDERS.—Type, piston valve, Richmond compound; diameter, 22½ and 35 in.; stroke, 32 in.

TRACTIVE POWER.—34,500.

WHEEL BASE.—Driving and rigid, 17 ft.; total, 25 ft. 9 in.; engine and tender, 57 ft. 3½ in.

WEIGHT.—In working order, 206,350 lbs.; on drivers, 180,110 lbs.; engine and tender, 350,850 lbs.

LOCOMOTIVE BUILT FOR THE GRAND TRUNK RAILWAY BY THE LOCOMOTIVE AND MACHINE COMPANY OF MONTREAL.

HEATING SURFACE.—Tubes, 2,757.1 sq. ft.; fire box, 168.2 sq. ft.; total, 2,925.3 sq. ft.; grate area, 50.62 sq. ft.

AXLES.—Journals, main, 9½ by 12 in.; others, 9 by 12 in.; engine truck journals, 6½ by 12 in.; tender, 5½ by 10 in.

BOILER.—Type, extension wagon top; outside diameter, first ring, 68⅜ in.; working pressure, 210 lbs.

FIREBOX.—Type, wide; length, 96½ in.; width, 75¼ in.; thickness of crown, ⅜ in.; tube, ½ in.; sides, ⅜ in.; back, ⅜ in.; water space—front, 5½ in.; back and sides, 4½ in. Crown staying, radial.

TUBES.—Material, steel; number, 358; diameter, 2 in.; length, 15 ft.; gauge, 11, B.W.G.

BOXES.—Cast steel.

BRAKES.—Westinghouse, American for engine; Westinghouse for tender; Westinghouse air signal; pump, 18 in. L.H.; reservoir, 1-24½ in. by 140. in.

TRUCKS.—Engine, radial swing centre bearing.

EXHAUST PIPE.—Single.

GRATE.—Style, rocking.

PISTON ROD.—Diameter, 3¾ in.; packing, cast iron rings.

SMOKE STACK.—Diameter, 16 by 19 in.; top above rail, 14 ft. 11 15-16 in.

TENDER.—Frame, 13 in. steel channels; style, U shape, level top; capacity, 7,000 galls. water and 12 tons coal.

VALVES.—Type, piston; travel 5½ in. high pressure, 6 in. low pressure; steamlap, ⅞ in. low pressure, 1 in. high pressure; ex C.L., 5-16 in. high pressure, ¼ in. low pressure; setting—lead of h.p. valve, 3-16 and low pressure, 5-16 in.; equipped with Walschaert valve gear.

WHEELS.—Diameter driving wheel, outside tire, 63 in.; diameter centres, 56 in.; materials, cast steel for main wheels, cast iron for others; engine truck wheels, 31 in. diameter, steel tired with cast iron spoke centres; tender, wheels, 34 in. diameter, steel tired with cast iron plate centres.

The Pine Ridge Sand Co. has been incorporated under the Manitoba Companies' Acts, with a capital of $50,000 and offices at Winnipeg, Man., with power among other things to construct tramways, electric roads, railway switches or sidings, telegraph and telephone lines, or other work of a similar nature in connection with its business.

The O'Boyle Bros. Construction Co. has been incorporated under the Ontario Companies' Acts, with a capital of $100,000 and offices at Sault Ste. Marie, Ont., to carry on a dredging and general contracting business; to build, acquire, own, or operate vessels, ships, wharves, docks, houses or structures; to do a general railroad contracting business, both in construction and equipment, and to trade in goods and property of every description. The provisional directors are: J. and D. P. O'Boyle, J. J. McFadden, J. H. MacCaul, W. O'Brien, J. B. Pardee, Sault Ste. Marie, Ont.

The Quebec Cartage and Transfer Co. has been incorporated under the Dominion Companies' Acts, with a capital of $150,000 and offices at Quebec, Que., for the purpose of collecting, receiving, transferring and forwarding baggage, luggage, grain, goods, wares, produce and merchandise, valuables and all articles of commerce and other effects, and to convey passengers to and from any place in Canada; and to carry on allied businesses. The provisional directors are: Hon. E. B. Garneau, Hon. R. Turner, Hon. A. Turgeon, J. Hone, Jr., C.P.R. City Passenger Agent, Quebec; J. H. Walsh, General Manager Quebec Central Ry., Sherbrooke, Que.; R. Forget, Montreal.

The University of Wisconsin has ordered for its library a complete set of THE RAILWAY AND SHIPPING WORLD from 1898 to 1905, both inclusive, and of THE RAILWAY AND MARINE WORLD for 1906. This is striking evidence of the way in which our publication is valued.

D. G. H. & M.	196,081	166,786	29,295	....
Total.....	£4,653,937	£4,262,879	£391,058	....

The Board of Railway Commissioners held a session at Winnipeg, Jan. 14 and following days, for the consideration of Manitoba and other western cases.

The action of S. A. Stephens for $30,000 against the American Locomotive Co., has been dismissed, by the Quebec Courts, on the ground that the contract was made in the U.S., and that the company had no property in Canada at the time action was instituted.

New Union Station for Toronto.

The plans show that the proposed passenger station building, including baggage buildings and service plant, are to be erected on the south side of Front St. between York St. and Bay St., and will occupy the entire front between these streets. The existing express building west of York St. will be retained for the Canadian Express Co.'s service, and a new building, of similar dimensions, and with the same general relation to the passenger building, will be erected east of Bay St. for the Dominion Express Co. The northerly line of the passenger buildings is to be generally 65 ft. from the south line of Front St., leaving a plaza of this width for carriage and foot walk purposes.

The station building is generally 100 ft. wide, and between the building and the tracks there is a concourse 90 ft. wide for the general circulation of passengers.

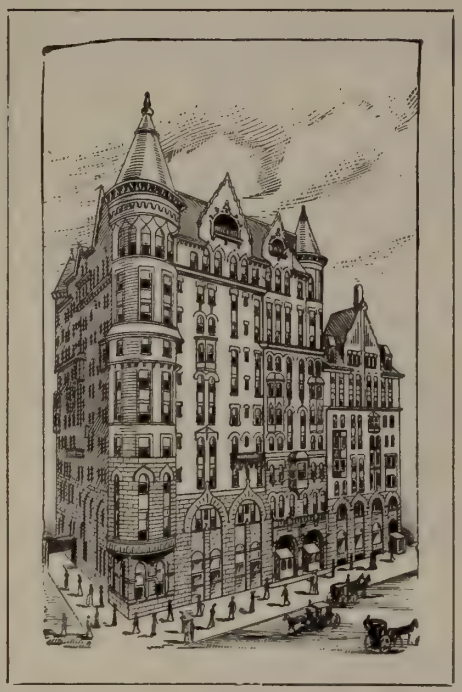
The track layout consists of nine through tracks and two stub tracks, so arranged that there are five platforms for passengers and two platforms for the exclusive trucking of baggage and express matter. The station tracks are connected up at each end with an interlocking switching system, so that they properly join the four main tracks on the east and the two main tracks on the west, generally with double track loads, to give the greatest facility to the train movements. The passenger platforms are designed to be 1,400 ft. long, though this may be increased if found necessary, this distance being sufficient for the longest trains. They are about 20 ft. in width throughout. The new tracks at a point opposite the centre of the station will be 4 ft. higher than the present tracks, and the platforms are designed to be 8 inches above the top of the rail. This leaves a difference of about 5 ft. vertical between the grade of the platforms and the grade of Front St., which difference is overcome by three steps at the waiting-room entrance and inclined surfaces transversely on the concourse between the tracks and the station, and the plaza between the station and Front St. None of the inclined surfaces exceed a slope of three-eighths of an inch per foot. The passages for exit are without any steps whatever. By this arrangement the station and platforms are, in effect, level with the street, a condition which permits of the best possible treatment of any type of station. In order to bring about this condition it has been found necessary to provide for the removal of the York St. overhead bridge, and to substitute in lieu thereof an overhead bridge just east of Bay St. It is also suggested that this bridge easterly of Bay St. can be made to take care of the traffic at the Yonge St. grade crossing, so that the necessity of a bridge at the latter street can be avoided. Foot bridges at any necessary point of crossing can be constructed without interfering with the raising of the tracks. In order that it may not be necessary for any passenger to go upon any track at grade and to make this station absolutely safe and fully up to modern methods and requirements a subway 50 ft. wide is provided, opposite the centre of the station, so that any platform may be reached by means of easy stairways with landings, the total height of stairways for this purpose being about 10 ft. This method allows all trains to come to a stop directly opposite the centre of the station, thus making the least distance for passengers to walk to and from the station and trains.

The baggage and express trucks are to be kept as much as possible on special trucking platforms, 10 ft. wide, which extend the whole length of the station and lie adjacent to four out of the nine through tracks, upon which four tracks it is intended that trains having the bulk of express and baggage matter will be run. The baggage and express trucks cross the track area by subways beneath the tracks, and lead to the basement of the baggage and express buildings. The trucks will be raised and lowered between the subways and the platforms by means of electric lifts. There are three of these cross subways. One leading to the baggage room, one to the express building at the easterly end, and one to the express building at the westerly end of the station.

It is intended that a trainshed roof will be provided to cover the main portion of the platforms and the concourse. This shed will be 800 by 315 ft., covering about six acres. The main structure will be in three spans, and there will be a connecting roof between the trainshed and the station buildings. This roof will be a steel structure and will be well lighted and ventilated. At each end of the station concourse there are spaces for a carriage court for the accommodation of cabs, carriages and baggage transfer waggons, so that it will not be necessary to pass through the station building to get a carriage. At the extreme east end of the station a service building is provided for supplying all heat, light, steam, hot water, compressed air, refrigeration, etc., for the use of the station building and train purposes.

The general layout of the station yards and grounds, including the approach tracks, does not interfere in any way with the present freight yards of either railway.

The station building is planned primarily with a view to convenience and spaciousness and consists of a main central building with two service wings. In the main building on a level with the tracks is located the general waiting room, containing 17,242 sq. ft., which is 5,000 sq. ft. larger in area than the Grand Central Station in New York, or the present station in Toronto. Access to the waiting-room is obtained directly by three spacious openings, containing nine doors each directly from the plaza on Front St. Egress to the trains is obtained by three similar openings containing each nine doors leading to the concourse. Ticket, telegraph, and telephone booth, information bureau, news stands, ample parcel room, and other conveniences are provided along the four sides of the waiting-room, where they are easily accessible and visible. A broad passage at the east end leads directly to the baggage-room, which is located in the east service wing. The capacity of this room, including the basement and first floor, is 28,000 sq. ft., or 15,000 sq. ft. larger than the present baggage-room, and 6,000 sq. ft. larger than the baggage-room at the Grand Central Station, New York, which is one of the largest in the U.S. A similar passage at the west end of the waiting-room leads directly to the west service wing, in which are located waiting-rooms for men and women, each provided with ample toilet accommodations, the women having in addition retiring rooms. Barber shop, bootblacks and other conveniences, as well as a well-equipped, spacious lunch counter, are likewise provided in this section of building. Spacious passages running north and south are placed at each end of the waiting-room, between the waiting-room and the baggage-room on the east, and between the waiting-room and service just mentioned on the west. These passages are intended mainly for exits, so that the travelling public in arriving will pass through and out without crossing the waiting-room. Passengers departing can enter by the easterly passage, check their baggage and buy their tickets without confusion or delay. Carriage courts both east and west of the main building are avail-



HOTEL WALTON

Broad and Locust Streets

Philadelphia, Pa.

THOROUGHLY FIREPROOF

500 Rooms Single and En Suite with Private Baths. European Plan.

Rooms from $1.50 Upwards.

ROBERT STAFFORD
Proprietor

GEORGE W. SWETT
Manager
Formerly Manager Windsor Hotel, Montreal.

HOTEL DENNIS

WALTER J. BUZBY **ATLANTIC CITY, N.J.**

Occupies one-half square of unobstructed beach front.
New fireproof addition of 100 rooms and baths with sea and fresh water.
Most favorably located and best appointed hotel in the North for winter business.

able for cab service, the east court being likewise available for transfer companies and baggage service. The main waiting-room as planned cannot conveniently be used as a thoroughfare, which will increase its efficiency and comfort. This room extends to a height of three stories, and is lighted by 14 very large windows, seven on the north and seven on the south. A gallery extends on all four sides of the same at the height of the second story of the service wings, the north gallery giving access to a series of spacious offices for the use of the employes directly in charge of the station traffic. On this floor and in the west wing is provided a spacious dining-room, serving rooms, kitchen and all accessories. In the east wing is a large hall for the segregation and handling of immigrants, with retiring rooms and toilet rooms for both sexes, and ample accommodations for the officers in charge of this service. In the story extending over the entire waiting-room and in the top of third story of the service wings accommodation about 6,000 sq. ft. in excess of those existing in the union station are provided for the offices of both railway companies. Two staircases, each with two elevators, are provided, one at the east and the other at the west end of the main waiting-room, giving access to the galleries, offices and other service.

The architectural treatment of the exterior is designed with a view of obtaining a monumental effect in a simple, dignified and reposeful manner; of expressing clearly on the exterior the function of each part of the building on the interior; thus, the main waiting-room is clearly suggested by the large windows and the solid basement treatment, the wings indicating clearly the subordinate function which they have to perform; so likewise the baggage and service buildings. The treatment will be maintained on the interior of the building on the same lines. The style of architecture is classic, and though inspired as to detail from the fine examples of the eighteenth century, is treated so as to be distinctly modern in its expression, and to clearly indicate the purpose of the building as a whole, and of each part of the building as well. It is intended to build the exterior of some light stone.

Railway Finance, Meetings, etc.

Alberta Ry. and Irrigation Co.—Net earnings from all sources exclusive of land sales, for Nov., $3,654, making for five months ended Nov. 30, $15,378.

Atlantic and Lake Superior Ry.—In the action brought by Galindez Bros., London, Eng., to recover money advanced on bonds, and arrears of interest, the company has admitted liability for $330,000, and judgment has been entered for the amount. The case has been before the courts on several issues, for the last three or four years.

A notice signed by E. N. Armstrong, Secretary, has been issued calling a meeting of shareholders to be held at Montreal Feb. 9, for the purpose of electing directors and the transaction of other business.

Dominion Atlantic Ry.—Gross earnings for Nov., $95,200, against $90,795 for Nov., 1905. Total for 11 months ended Nov. 30, $1,123,306, against $989,033 for same period 1905.

Canada Atlantic Ry.—A meeting of shareholders has been called to be held at Ottawa Feb. 7, for the purpose of approving an agreement entered into between the company and the Pembroke Southern Ry. Co., S. R. Poulin, et al. authorizing the directors of the C.A. Ry. to guarantee the payment of the principal and interest of the first mortgage bonds to be issued by the P.S. Ry. Co.

Great Northern Ry. (U.S.)—An action has been commenced in Ramsey county, Minn., on behalf of the State against the G.N. Ry., asking for a permanent injunction against the company, its officials, agents and servants from proceeding with the proposed issue of capital stock recently authorized by the directors. It is claimed that the G. N. Ry. is a Minnesota corporation, and bound by law to obtain the consent of the Railway and Warehouse Commission before increasing its capital stock, which has not been done.

Intercolonial Ry.—The gross earnings during Nov. are reported to have been $674,353, against $615,859 for Nov., 1905. From July 1 to Dec. 22, the increase in gross revenue over the corresponding period of 1905 is reported to have been $534,594

The Joliette and Brandon Ry. Co. was incorporated by the Quebec Legislature in 1905 for the purpose of owning and operating the line heretofore known as the Montreal and Lake Maskinonge Ry., about 15 miles in length. By the act which the Dominion Parliament is being asked to pass at its current session, the railway is declared to be a work for the general advantage of Canada; it is authorized to issue bonds to the extent of $20,000 a mile, and the lease to the C.P.R. dated Oct. 31, 1906, is confirmed.

London and Port Stanley Ry.—At the annual meeting in London, Ont., Dec. 28, Mayor Judd, President, presented a report showing what had been done during the year, and referring to the rejection of the offer of the Pere Marquette Rd. Co. for an extension of the lease. The financial report showed the receipts to have been $21,185.81, made up as follows: Rental for 12 months ended Sept. 30, $10,000; interest on rental for same period, $2,596.60; percentage, $8,589.21.

New Brunswick Southern Ry.—Petitions are being signed in St. George, N.B., and other places asking the Dominion Government to acquire the N.B.S. Ry. from the trustees of the Russell Sage estate and amalgamate it with the I.C.R. The St. John Board of Trade passed a resolution Jan. 8 endorsing a memorial to the Government favoring the purchase of the line.

Pere Marquette Rd.—A New York despatch of Jan. 9 says that the tangle in the affairs of the P.M. Rd. and the Cincinnati, Hamilton and Dayton Rd., is being straightened out, and that the receivership will be withdrawn at an early date. It is stated that the two companies will be operated entirely separate, properly financed and placed under new management. The question of the future management of the P.M. Rd. will be with the preferred stockholders' protective committee, which comprises N. Thayer, W. W. Crapo, M .T. Cox, G. H. Norman and F. R. Hart.

The Phillipsburg Ry. and Quarry Co. is applying at the current session of the Quebec Legislature for an act confirming and ratifying the issue of stock made by the company, defining and enlarging its powers, and authorizing it to sell, lease or otherwise dispose of its railway and other property and assets in whole or in part.

Quebec Southern Ry.—The action brought by H. A. Hodge to have the sale of the three railways formerly operated as the Q.S. Ry. to Senator Beique, acting for the Delaware and Hudson Co., set aside, has been dismissed, the court holding that it had no superintending, revisory or appellate jurisdiction in respect of the proceedings and decrees of the Excehquer Court, which directed and approved of the sale under the terms of a special statute. Furthermore, the sale had been confirmed by the Superior Courts, and another action to have the sale set aside had also been dismissed.

Qu'Appelle, Long Lake and Saskatchewan Rd. and Steamboat Co.—By an act which the Dominion Parliament is being asked to pass at its current session, a mortgage of the line and its assets is confirmed, as also is an agreement with the Canadian Northern Ry. It is also provided that the company has had the power to get in the whole or part of its bond or debenture issues, and may apply the same or portions of the same in the retirement by purchase or otherwise of other securities of the company. The new securities to be issued when all existing securities have been got in and cancelled, shall apply to existing and future property of the company.

Temisconata Ry.—Traffic receipts for Dec., $12,082.22, against $10,021.84 for Dec., 1905.

Temiskaming and Northern Ontario Ry.—Receipts for Oct., $52,828.91; expenditure, $38,268.77; net earnings, $14,560.14 against $32,623.10 receipts, $16,056.59 expenditure, and $16,566.51 net for Oct., 1905. Net earnings for ten months ended Oct. 31, $159,071.79, against $87,909.16 for same period, 1905. Mileage operated Oct., 1906, 138, against 113 in Oct., 1905

The total cost of the line and its equipment, including the extension to Abitibi River, contracts for which will be let in Feb., is put at $12,000,000.

Toronto, Hamilton and Buffalo Ry.—Earnings for Dec., $66,272.59, against $68,456.10 for Dec., 1905.

Mr. Emmerson at St. John, N.B.

Speaking at a banquet at St. John, N.B., Dec. 28, the Minister of Railways and Canals, in referring to development, said chief in importance of the questions pressing for attention was that of transportation, and the vital interests of St. John were connected with it. Probably they had read the statement that there would be expended in Canada during the next twelve months in the construction of railways some $62,000,000, which sum, however, did not include the cost of the construction of the G.T. Pacific Ry. from Winnipeg to Moncton. This expansion must attract to the country large numbers of people with an inevitable increase of business opportunities. The great prairies of the West will produce additional millions of bushels of wheat which must find its way to the seaboard for shipment. It was the policy of the Government that this grain should be brought over railways within Canadian territory for shipment through Canadian ports. One of the great railway men of Canada said when discussing the question, "Produce enough for one port." There will be produce enough in Canada for many ports. Some people had argued that St. John as a port must suffer loss, but he did not think so. St. John would, of necessity, command the major portion of the great export trade of the West. But there were other ports which would receive a share of the trade. It was a fact, acknowledged by the representatives in parliament from all sections of the country, that no people in Canada had made greater sacrifices than had the people of St. John for the development of their port. They deserved aid from the Government, and that aid would be freely given. Personally, whatever influence he had at Ottawa would always be exercised for St. John. This brought him to the railway branch of the question. It is to the interest of St. John that the Intercolonial Ry. should prosper. The day will come when the I.C.R. will prove itself, not a burden to the country, but a source of profit. Even now it is a self-sustaining proposition, and that notwithstanding the

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

fact that the three most profitable months of the year are not included in the nine months for which the accounts are made up. Not only is it self-sustaining, but it will have quite a sum to its credit. He would venture to predict that its surplus for the next year will not be far short of $500,000. When that time does come hostile interests will say if it can show a surplus how much better it would be if its branches showed in all directions? These branches have been subsidized, but are not performing their mission. The representative in parliament of the C.P.R. stands up and says the I.C.R. capital account should be closed. Has the C.P.R. closed its capital account? On the contrary it has appeared before parliament several times in recent years asking for power to increase its capital on one occasion by $20,000,000. The I.C.R. requires new rolling stock, ties have to be renewed and rails changed, the same as any other road. The branch roads cannot fulfil their functions because they have no credit, and their capital is exhausted. These conditions show the necessity of taking steps whereby the people can get the full fruition of the expenditures. In answer to the criticism that too much is charged on the I.C.R. to capital account, he might say that neither under his administration of the department or that of Mr. Blair, has there been one dollar charged to capital account for ballasting.

It is in the interests of St. John to see the I.C.R. expand in these different directions. By branch lines the different sections of the province are brought together. Anything that strikes at the I.C.R. strikes at the interests of St. John.

He would tell them plainly that he would never favor the carrying of the products of the West over any line to the exclusion of the I.C.R. Formerly the I.C.R. was discriminated against by steamship companies who would refuse to sell a through ticket which would enable one to travel over the I.C.R. if they wished. To subsidize steamers that will work against the great national road, is not in the interests of Canada. He would not injure any other steamship or railroad company. He did, however, claim that the I.C.R. should participate in some of these expenditures.

He might say that he had worked for the promotion of the interest of the port of St. John. It may be that eventually this great trade from the West will seek an outlet at other ports as well, but it is with the present conditions that we are now concerned. The solution of these problems must be proceeded with before the broader and greater question of nationalization. Those who have read the report of the Transportation Commission must have been struck with the recommendation that the port of St. John should be made free. While not arguing against the nationalization of the Atlantic ports and the ports of the St. Lawrence and the Great Lakes, there are weighty questions to be considered. Many of the ports have great debts, which would have to be assumed by the people of New Brunswick in common with the people of the whole of Canada. Before being able to accomplish the solution of all these great questions there is preliminary and essential work to be done at the port of St. John, and if he could be of any service to the port, he was ready to render it.

Upon the application of certain railway companies the Board of Railway Commissioners has decided that the reports of persons appointed by the Board to investigate railway accidents shall be privileged, and shall only be made public or given out upon application therefor by order of the Board.

MAINLY ABOUT PEOPLE.

Lord Strathcona has subscribed 1,000 guineas to the Scottish National Exhibition of 1908.

Andrew Thompson, President Quebec Ry., Light and Power Co., died at Quebec, Jan. 10, aged 76.

Mrs. E. Tiffin, wife of the General Traffic Manager of the Intercolonial Ry., is in Southern California.

D. Matheson, for many years a grain inspector on the C.P.R., died at Kildonan East, Man., Jan. 5.

J. M. Browning, who died at Montreal Dec. 22, was at one time C.P.R. Land Commissioner in British Columbia.

G. J. Page, who died in Toronto, Jan. 6, aged 86, was in the G.T.R. service for many years, retiring some 15 years ago.

A. Sheere, local manager Canada Railway News Co., London, Ont., was presented with a gold chain by the staff, Dec. 24.

A. A. Wright, of Toronto, an active member of the Dominion Marine Association, has gone on a Mediterranean trip.

W. Smith, at one time bridge superintendent for the Esquimalt and Nanaimo Ry., died at Chadboro Bay, B.C., Jan. 7.

W. W. Beckett, who died at Sherbrooke, Que., recently, was father of A. F. Beckett, Assistant Solicitor G.T.R., Montreal.

R. Dunlop, foreman of the Intercolonial car shop, Sydney, N.S., was presented with a gold ring by the employes, Dec. 24.

A. C. Killam, Chief Railway Commissioner, gave an address on the work of the Commission before the Canadian Club, Montreal, Jan. 20.

M. C. Dickson, agent G.T.R., Woodstock, Ont., Mrs. and Miss Dickson, have returned from a two months' visit to Great Britain.

Elwood B. Hosmer, son of C. R. Hosmer, director C.P.R., has entered the firm of Alex. Paterson & Co., stock brokers, Montreal.

Hon. C. C. Colby, who died at Montreal, Jan. 11, was a director of the Massawippi Ry. and of the Waterloo and Magog Ry.

Lieut. A. Piddington has been elected a director of the Quebec and Lake St. John Ry., succeeding the late T. A. Piddington.

F. R. Porter, Assistant Foreign Freight Agent G.T.R., Toronto, was married to Miss O. E. Baker, in Stratford, Ont., Dec. 20.

N. A. Rhodes, of Rhodes, Curry & Co., Amherst, N.S., has been elected President Standard Fuel Manufacturing Co., Fairview, N.S.

Mrs. A. Alexander, who died at Hamilton, Ont., Dec. 29, was mother of G. W. Alexander, Local Treasurer G.T.R., Detroit, Mich.

Miss L. Jaques, daughter of C. A. Jaques, Manager Merchants' Line of steamers, Montreal, was married there, Dec. 26, to J. W. Nicoll.

F. B. Scott, night chief operator C.P.R. telegraphs, Winnipeg, was presented with an address and a Morris chair by the staff, Jan. 6

C. E. Morgan, City Passenger and Ticket Agent G.T.R., Hamilton, Ont., who was taken ill suddenly early in Jan., has considerably improved.

D. B. Hanna, Third Vice-President Canadian Northern Ry., and Mrs. Hanna, left Toronto Jan. 24 for a fortnight's trip to Florida and Cuba.

Sir Wm. P. Howland, who died in Toronto, Jan. 2, aged 95, was a member of the Canadian syndicate which in 1880 offered to build the C.P.R.

F. W. Tye, formerly Chief Engineer C.P.R., returned to Montreal at the end of 1906, from a trip to Mexico in the interests of the Canada Electric Syndicate.

The Ontario Government has granted a gratuity of $1,000 to the daughters of the late K. Tully, consulting engineer of the Provincial Public Works Department.

R. McLennan, formerly a train dispatcher on the G.T.R. at Brockville, Ont., has been appointed secretary to F. H. McGuigan, Fourth Vice-President G.T.R.

R. Forget, M.P., President Richelieu and Ontario Navigation Co., has subscribed $200,000 to the building fund of the new Notre Dame Hospital, Montreal.

W. H. Grant, heretofore Superintendent of Construction Halifax and Southwestern Ry., Bridgewater, N.S., has been removed to Toronto, the line being completed.

Mrs. P. Mullarkey, who died at Ottawa, Ont., Dec. 27, aged 86, was mother of J. P. Mullarkey, railway contractor, Montreal, and heretofore Manager Montreal Terminal Ry.

R. Forget, President Richelieu and Ontario Navigation Co., Mrs. and Miss Forget, left Montreal, Sept. 20, for New York and London, Eng., intending to be absent for some time.

G. H. Duggan, Second Vice-President, and C. C. Fergie, have been elected directors Dominion Coal Co., Sydney, N.S., in place of Sir Wm. C. Van Horne and F. S. Pearson, resigned.

G. H. Ham of the C.P.R. head office staff, who underwent a serious operation at the Western Hospital, Montreal, Jan. 16, is reported to be making good progress towards recovery.

W. E. Blumhart, who died at Montreal recently, aged 62, was one of the contractors on the I.C.R., but subsequently engaged in the newspaper business, founding La Presse.

H. A. Fabien, at one time clerk in the C.P.R. General Passenger Department, Montreal, has been appointed Assistant to C. S. Mellen, President New York, New Haven and Hartford Rd.

J. J. Hill, President Great Northern Ry., U.S., states that however much he would like to be relieved of the responsibilities of his position, he could not see his way to retiring at present.

G. L. G. Sutherland, until 1900, foreman of the Michigan Central Rd. car shops at Detroit, Mich., who died there, Jan. 3, was a brother of D. S. Sutherland, Superintendent M.C.R., Detroit.

C. A. McGrath, who has resigned his position as Land Commissioner, Alberta Ry. and Irrigation Co., was presented with a service of silver plate by the Lethbridge, Alta., officials, Jan. 7.

Mrs. Keefer, wife of T. C. Keefer, C.E., C.M.G., died at Rockliffe, Ont., recently, aged 84. She was a daughter of the late Hon. Thos. Mackay, one of the contractors for the Rideau canal locks.

G. F. Hichborn, heretofore agent Great Eastern Fast Freight Line, New York City, has been appointed General Traffic Manager United States Rubber Co., with office at 42 Broadway, New York City.

Mrs. Troop, wife of H. D. Troop, of Troop and Son, shipowners, St. John, N.B., who died there Dec. 20, was mother of Mrs. C. E. MacPherson, wife of the Assistant General Passenger Agent, C.P.R., Winnipeg.

F. J. Hayden, formerly State Senator of Indiana, who died at Fort Wayne, Ind., Jan. 16, was a native of Cobourg, Ont., and was for a number of years Secretary of the Cobourg, Peterboro' and Marmora Ry. Co.

Miss K. Hanson, sister of the members of the firm of Hanson Bros., Montreal, died at Fowey, Cornwall, Eng., recently, at the residence of her brother, C. A. Hanson, of the firm of Coates, Son & Co., London, Eng.

THE BAKER HOT WATER CAR HEATERS

RIVETED STEEL SHELL HEATER

Attention is especially called to our FIRE PROOF HEATERS, with jointless steel casings, made of ¼ in. steel; Fire Proof and Break Proof. Single and Double Coils.

RIVETED STEEL HEATER, with Double Coils. Meets the demand for a smaller and cheaper Heater than our Fire Proofs.

PERFECTED HEATERS, Single and Double Coils.

The "MIGHTY MIDGET" HEATER, 19 inches in diameter. This Heater is especially adapted to ELECTRIC CARS.

STEAM ATTACHMENTS, to circulate the water of the Baker Heater by steam from the locomotive; or will circulate hot water independently of any Heater.

PIPE AND PIPE FITTINGS for Baker Heater work.

Avoid Infringements by ordering direct from the makers.

DOUBLE COIL JOINTLESS FIREPROOF STEEL HEATER

THE WILLIAM C. BAKER HEATING AND SUPPLY COMPANY

143 Liberty Street - NEW YORK, U.S.A.

THE ENGINE OF

RUSSELL INSPECTION CAR No. 12

Is Two Cycle, Air Cooled, consists of five parts only—Cylinder, Piston, Connecting Rod, Crank Shaft, and Crank Case.

Just think of the simplicity: no cams, valves or gears to get out of order.

Has abundance of power to carry four passengers and luggage over any railway grade.

Complete Car weighs only 300 lbs.

WRITE FOR DESCRIPTIVE MATTER.

C. B. FOSTER,
District Passenger Agent
TORONTO

W. R. Tiffin, Superintendent Northern Division G.T.R., who has been granted three months' leave of absence, left Allandale, Ont., Jan. 13 for Vancouver, B.C., and proposes to visit California before returning to duty in April.

J. A. Cuttle, Managing Director, Montreal Transportation Co., left Jan. 17 for the Mediterranean, whence he will proceed to Scotland, in connection with the two steamships which his company is having built at Dumbarton.

J. P. O'Doherty, formerly connected with the mechanical department of the Canada Atlantic Ry., and latterly with the G.T.R., Ottawa, has been appointed general agent at Sorel, Que., for the Richelieu and Ontario Navigation Co.

Capt. McMaster, who died in Toronto, Jan. 7, aged 85, organized the Toronto Naval Brigade, which did service during the Fenian Raid. One of his daughters is the wife of A. L. Hertzberg, Engineer of Maintenance of Way, C.P.R., Montreal.

E. F. Seixas, General Manager Niagara, St. Catharines and Toronto Ry., who has not been very well for some time past, left at the end of Dec. with Mrs. Seixas for the Isle of Wight, expecting to return to St. Catharines, Ont., early in March.

C. A. Magrath, who recently resigned the Land Commissionership of the Alberta Railway & Irrigation Co., has gone to Europe for a few months' pleasure trip. He expects to continue to reside in the west, and to continue to be a factor in its development.

J. Camsell, at one time chief factor of the Hudson's Bay Co., Mackenzie River District, died at Winnipeg, Jan. 16. He was father of F. Camsell, of the G.T. Pacific Ry. engineering staff, and of P. Camsell, Canadian Northern Ry. Passenger Department, Winnipeg.

S. King, heretofore Assistant Master Car Builder, C.P.R., Montreal, who was recently appointed Superintendent of the Canada Car Co., Montreal, was presented with a cabinet of silver by the C.P.R. staff at the Angus shops, prior to taking up his new position.

F. Dane, who has been appointed a member of the Temiskaming and Northern Ontario Ry. Commission, is a native of Belfast, Ireland, but has resided in Toronto for a number of years. He is a grocery broker, and is best known for his work in connection with the Orange Order.

H. W. Pearson, who has resigned the Secretary-Treasurership of the Temiskaming and Northern Ontario Railway Commission, has been appointed Secretary of the Canadian Railway Accident Insurance Co., vice J. P. Dickson, who has resigned to engage in mining enterprises.

A. L. Smith, who has been appointed Superintendent District 3, C.P.R., Toronto, entered the company's service in 1885, and has occupied the positions of operator, agent, chief operator, train dispatcher, Chief Train Dispatcher, and latterly Chief Inspector of Train Dispatching.

Sir Percy Girouard, at one time on the C.P.R. engineering staff, has been appointed High Commissioner of Northern Nigeria, Africa. It is stated that the appointment is for a year, and that Sir Percy's chief work is to arrange for some railway construction in the country for the Imperial Government.

G. W. Hay was presented by G.T.R. officials and the staff in Toronto with a gold locket, set with a diamond, on leaving the G.T.R. General Baggage Agents' office, Toronto, Dec. 31, to become General Baggage Agent Lehigh Valley Rd. They also gave Mrs. Hay a brooch, set with pearls, emeralds and a diamond.

P. G. Grant, Assistant District Engineer Transcontinental Ry. surveys, was married at Quebec, Dec. 27, to Miss K. M. McCarthy, daughter of W. McCarthy, Government Inspector of Railways, Winnipeg. He was presented with a silver tea service and a cabinet of cutlery, Dec. 24, by the staff of the district at Quebec, A. E. Doucet, District Engineer, making the presentation.

R. Miller, of the C.P.R. Windsor St. station, Montreal, sailed for England on the Empress of Britain, Jan 11, for a holiday. Prior to leaving he was given a purse of gold from the heads of the departments, the presentation being made Jan. 9, by R. Kerr, Passenger Traffic Manager, and a second purse of gold from the station staff, Jan. 10, the presentation being made by W. G. Annable, General Baggage Agent.

H. G. Hunt, who died in the hospital at St. Boniface, Man., Jan. 1, aged 61, from hemorrhage of the brain, was at one time G.T.R. ticket agent in St. Catharines, Ont., and was the first President of the Canadian Ticket Agents' Association, holding that position in 1887, 1888 and 1889. In 1898 and 1899 he was employed in the editorial department of THE RAILWAY AND SHIPPING WORLD. Some five years ago he went to Manitoba, where he was engaged in newspaper work up to the time of his fatal illness.

A. E. Edmonds, who has been appointed District Passenger Agent C.P.R. at Detroit, Mich., was born at Woodstock, Ont., April 8, 1866. He commenced railway service on the G.T.R. as an operator in 1882, remaining in that company's service for about five years. In 1887 he entered the C.P.R. service as station agent and operator, subsequently becoming assistant ticket agent at Toronto Union Station. In 1893 he was appointed city passenger agent at Detroit, remaining in that position until promoted as District Passenger Agent Feb. 1.

W. Stitt, who has been appointed General Passenger Agent C.P.R. Eastern Lines at Montreal, was born in Kirkcudbrightshire, Scotland, Aug. 3, 1855, and entered transportation service with the Caledonian Ry., subsequently entering the service of the Glasgow and West of Ireland Steam Packet Co. He came to Canada in 1888, and entered the service of the C.P.R. Passenger Department at Winnipeg. In 1901 he went to Australia to represent that company in connection with the Canadian-Australian Steamship Line, of which he was appointed General Passenger Agent with office at Sydney, N.S.W.

Hon. G. A. Cox, who has resigned his position as President of the Canadian Bank of Commerce, Toronto, is officially connected with the following transportation and allied companies: Canada Foundry Co., director; Canada General Electric Co., director; Canadian Shipbuilding Co., director; Crow's Nest Pass Coal Co., owning the Morrissey, Michel and Fernie Ry., President; Dominion Iron and Steel Co., operating a steel rail mill, director; G.T. Pacific Ry., director; Ottawa Electric Ry., director; Toronto and Niagara Power Co., director; Toronto and York Radial Ry., director; Toronto Ry., director.

C. E. E. Ussher, who arrived in Winnipeg, Man., Jan. 16, to take up the duties of his new position, Assistant Passenger Traffic Manager C.P.R., was the recipient of a number of presentations at Montreal prior to his departure. On Jan. 9 he was the guest at a dinner at the Canada Club, at which there were present 200 of the principal commercial and transportation men of Ontario and Quebec. Ald. W. J. King presided in the absence through illness of the Mayor, the speakers including W. E. Davis, Passenger Traffic Manager, G.T.R.; R. Kerr, Passenger Traffic Manager, C.P.R.; G. T. Bell, General Passenger Agent, G.T.R.; Hon. J. I. Tarte; R. S. White, Collector of Customs; L. T. Marechal, W. Stitt, who succeeds Mr. Ussher at Montreal as General Passenger Agent; G. H. Ham, M. K. Cowan, K.C., Assistant Solicitor G.T.R., and C. W. Spencer, General Manager Mackenzie, Mann & Co.'s eastern lines. The Eastern Canadian Passenger Association entertained Mr. Ussher at luncheon, and presented him with a silver loving cup, on which was a suitable inscription. The Ontario passenger staff presented him with a gold watch and chain, and the New York staff sent a silver-mounted cut glass vase.

T. C. Burpee, whose portrait appears on the first page of this issue, was born at Sheffield, N.B., Dec. 11, 1852. He was educated at Sheffield, and his record is as follows: Aug. to Nov., 1875, chainman, New Brunswick Ry.; Nov., 1876, to Jan., 1877, levelman, New Brunswick Ry.; June, 1881, to Jan., 1882, rodman, Chicago, Milwaukee & St. Paul Rd., Spirit Lake branch, Iowa; Nov., 1884, to Jan., 1885, International Ry. survey through Northern Maine; Aug., 1885, to Jan., 1887, rodman and Assistant Engineer on Maintenance of Way, New Brunswick Ry.; Jan., 1887, to Jan., 1890, Assistant Engineer C.P.R. lines in New Brunswick and Maine; June, 1890, to Aug., 1890, transitman on preliminary survey of Bangor and Aroostook Rd.; Aug., 1890, to April, 1891, chief of location party, same road; April, 1891, to Jan., 1896, Assistant Engineer of Construction, same road; Jan. to May, 1896, chief of party of location on Woodstock & Centerville Ry., N.B.; June to Dec., 1896, Assistant Engineer in charge of construction of yard at Old Town, Me., for Bangor and Aroostook Rd.; May to Aug., 1897, Assistant Engineer on Canal Construction, Cardinal, Ont.; Aug., 1897, to 1899, Chief Assistant Engineer Intercolonial Ry.; July, 1899, to the present, Engineer of Maintenance of Way, same road.

I.C.R. Trans-Atlantic Mail Trains.

In our Jan. issue it was mentioned that the Intercolonial Ry. had put on a special train to run between Halifax and Montreal for the speedy conveyance of mails and passengers from trans-Atlantic steamships, that the first train had made the run in 22 hours, and that it was expected to cut this to 20 hours or less. We have been favored with official figures of nine runs of this train between Halifax and Montreal as follows: Nov. 16 and 17, S.S. Virginian, 22.05 hours; Nov. 23, Empress of Ireland, 19.43 hours; Dec. 1 and 2, Tunisian, 22.55 hours; Dec. 7, Empress of Britain, 21.10 hours; Dec. 15, and 16, Ionian, 22.10 hours; Dec. 29 and 30, Parisian, 18.27 hours; Jan. 4, Empress of Britain, 21.49 hours; Jan. 14 and 15, Pretorian, 23.01 hours. It will be observed that the fastest run was 18.27 hours. The average time of the 9 runs was 21.34, and the average speed per hour for the 9 runs was 38.8 miles

The C.P.R. has presented the town of Calgary, Alta., with a site for the proposed municipal waterworks station.

An agreement is said to have been reached between the railway employes' association in Canada and the companies for the enforcement of rest after duty. Under the terms of the agreement every train man who has been on duty 16 hours must be given 10 hours' rest, and if he is out for 12 to 15 hours, he must book rest for eight hours.

Under the act passed in 1906 the Ontario Government collected $375,689 in taxes from railway companies doing business in Ontario. From this $30,000 was deducted to meet the expenses of the Ontario Railway and Municipal Board, and the balance is being distributed, at the rate of 8 cents per head, to the municipalities of the province

GENERAL SALES AGENTS

National Transcontinental Railway.

Tenders are being received to Feb. 14, by the Commissioners, for the construction of the following sections of the projected line:

DISTRICT A.—From at or near Moncton, N.B., westerly for about 50 miles. From at or near Grand Falls, N.B., westerly to the boundary between New Brunswick and Quebec, about 62 miles.

DISTRICT B.—From at or near Quebec Bridge easterly for about 150 miles. From about 150 miles west of Quebec Bridge, westerly to Weymontachene, Que., about 45 miles.

DISTRICTS C AND D.—From about 8 miles west of the Abitibi River crossing easterly for about 150 miles.

The plans for these sections of the line were approved by the Government at the end of 1906.

Referring to the two sections under contract, the Minister of Railways, replying to a question in the House of Commons, Jan. 21, said between Quebec and La Tuque, the common earth excavation was estimated at 6,303,682 cubic yards, and the solid rock at 1,169,150 cubic yards. At the end of the year there had been removed 664,955 cubic yards of earth and 322,367 cubic yards of rock. On the line between Winnipeg and Lake Superior Junction, there was estimated to be 11,233,247 cubic yards of earth excavation and 3,696,336 cubic yards of rock cutting. At the end of 1906 there had been removed 282,000 cubic yards of earth and 179,920 yards of rock.

The Commissioners have practically purchased a site in the east part of Winnipeg as a site for shops and yards. The site will have a length of about two miles and a width of about a mile, and the price is said to be about $200,000.

We have been advised that no track was laid on the main line up to the end of 1906, with the exception of a few hundred feet at St. Boniface, Man.

GRAND TRUNK PACIFIC RY.

On the first section put under contract from Portage la Prairie, Man., westerly, 35 miles of steel had been laid to the vicinity of Pine Creek, to Dec. 31, 1906, and the company's officers state that it is expected to have track laid into Saskatoon, Sask., by the end of 1907. Five mile of tracks have been laid in the yards at Portage la Prairie, where large quantities of material are being assembled for construction during the current year. An agreement was reached, Jan. 13, with the Portage la Prairie council for the sale of a portion of Pacific Ave. to the Company, the closing of several streets, and the opening up of a new street the length of Pacific Ave., south of the G.T.P. right of way. The May-Sharp Construction Co. is pushing the excavation for the bridge at Clover Bar, Sask., so as to be ready to start the concrete work early in the spring. The survey work through British Columbia, according to a statement credited to Division Engineer Van Arsdol, is progressing satisfactorily. The actual locating of the line has not been made for any great part of the way, but lines have been run over the whole of the route intended.

The G.T.P. Ry. has purchased altogether about 1,200 acres of land in the east part of Winnipeg, including the Arctic ice farm, upon which it will locate its shops and yards. It is reported that the plans for the shops are completed, and that tenders for their erection are to be asked for at an early date. Another report states that the property in question has been acquired by the G.T.P. Ry. in conjunction with the Commissioners of the Transcontinental Ry., and that it will be used for shop and yard purposes by the Eastern and Western Divisions of the line.

With respect to the construction of branch lines we were advised, Jan. 1, that while the company's charters provide for branch lines from either Orillia or North Bay, Ont., to a junction with the National Transcontinental Ry., it had not made any arrangement for the construction of these lines, and it was not probable anything would be done in that direction in the immediate future, as it was concentrating all forces and all labor procurable on the branch line from Fort William, Ont., and on the main line from Portage la Prairie to Edmonton, Alta.

Surveys for the branch into Regina, Sask., have been completed. The route passes through Fort Qu'Appelle. (Jan., pg. 29.)

Canadian Northern Railway Construction.

Canadian Northern Quebec Ry.—Good progress is reported to have been made upon the construction of the line from Garneau Junction to Quebec. The roadbed easterly to Portneuf is ready for the rails, and the piers and abutments for the bridges over the Batiscan and Ste. Anne rivers are almost completed. The work between Portneuf and Quebec is fairly heavy, and gangs of men are working throughout the winter on the rock cuttings near Portneuf, Cap Saute, St. Augustin, Les Ecureuils, and Cap Rouge.

Canadian Northern Ontario Ry.—The contractors have several gangs of men engaged upon the rock cuttings east of Rockland, Ont., on the line from Hawkesbury to Ottawa. There are 30 trestles to be built, several of them being over 400 ft. in length, and construction on these has been delayed owing to difficulty in obtaining the necessary timber. A spur line of about a mile will be laid in L'Orignal, and spur tracks will also be constructed to the pulp mills, and the Hawkesbury Lumber Co.'s premises. The line is expected to be completed into Ottawa in Sept.

The plans for the entrance of the lines from the east into Toronto and from the James Bay section of the line are being considered by the Minister of Railways. Survey parties are in the field upon location work between Toronto and Ottawa, between Key Inlet and Ottawa, and upon various branch lines throughout western Ontario, for the construction of which authority is being asked at the current session of the Dominion Parliament.

A contract has been let to the Central Contracting Co. for the construction of the Nepigon Ry. from Nepigon, on Lake Superior, to Lake Nepigon, about 40 miles. No work has as yet been done, but the location is being revised. The Ontario Legislature will be asked at its current session to pass an act extending the time for the commencement and completion of the projected railway, and authorizing an amalgamation with the Canadian Northern Ontario Ry.

Canadian Northern Ry.—In his annual report to the Manitoba Legislature as Railway Commissioner, Premier Roblin recounted what had been done since 1896 in the way of railway construction by Mackenzie, Mann & Co., in Manitoba, Saskatchewan, Alberta, and Ontario. Referring particularly to the work done in Manitoba during 1906, he said: "Track has been laid on the branch from Emerson to the main line at Sprague. This line was completed to Ridgeville, about 10 miles east from Emerson, in 1904, and the extension now makes a line altogether 73 miles long. The line gives a new and short route from southern Manitoba to Port Arthur, Ont., and will enable the hauling of grain from the Morris-Brandon branch through the province to the main port without passing through Winnipeg, thus saving a very considerable mileage. Considerable work has also been done on the line from Oakland on the Portage la Prairie-Delta branch, grading having been done as far as Sandy Bay on the west shore of Lake Manitoba, a distance of about 37 miles, and steel having been laid on about 17 miles thereof. It is the intention to resume construction of this work during the forthcoming spring and to carry the line further on. About 7 miles of additional steel has been laid on the Oak Point branch, which it is the intention to extend northerly along the east shore of Lake Manitoba. In addition to the foregoing, about 55 miles of grading has been done on the Brandon-Regina line, and also an additional 20 miles of grading on the Rossburn branch. Tracklaying and other work upon these lines will be prosecuted during 1907."

The Mayor of Portage la Prairie, Man., told the Council recently that he had been informed by M. H. McLeod, Chief Engineer, that it was the intention of the company to go ahead with the construction of machine shops and a 21-stall roundhouse there during the summer.

The branch line from Edmonton to Morinville, Alta., 22 miles, was opened for traffic Jan. 11.

Application is being made to the Minister of Railways to utilize the Yellowhead Pass for the company's line from Edmonton to the Pacific coast. The G.T. Pacific Ry. has also filed plans for a line through the same pass, and the two applications will likely be heard together. The location shows a line about 250 miles in length, from Edmonton to the summit, which is 3,708 ft. above sea level. (Jan., pg. 36).

G.T.R. Betterments, Construction, Etc.

Montreal Track Elevation.—A conference has been held in Montreal between representatives of the company and the City Council respecting the elevation of the tracks in the city. W. Wainwright, General Assistant and Comptroller G.T.R., said the conference was a preliminary one for the purpose of placing the plans before the council so that they might be studied prior to an agreement being discussed. The details of the plan were being worked out by the company's engineers, and after these had been completed and a statement of the estimated cost prepared, Mr. Hays would be prepared to confer with the Council upon the whole question. The company desired to get rid of the level crossings, but as the railway was in existence before many of the streets were, it had rights which could not be sacrificed. The committee, it is understood, will arrange to visit Philadelphia and other places where a similar work of track elevation has been carried out in order to see what had been done.

Central Station, Ottawa.—A new agreement between the G.T.R. and the Government for a lease of the canal reserve at Ottawa for the purpose of a central station was signed Jan. 7. The lease is for 999 years, the rental being $1,100 a year, to be readjusted every 21 years. The station building is to cost at least $250,000, to be under the control of the G.T.R., but terminal facilities are to be afforded to other companies upon fair terms. The Sparks estate, which originally granted the land to the Crown for canal purposes, objected to its utilization for railway purposes, and an agreement was reached whereby the estate was to receive $80,000 in full settlement of its claim. This sum the G.T.R. agrees to pay. Plans are to be prepared by the company and submitted to the Government for approval within six months.

Madoc to Eldorado.—The Madoc, Ont., Board of Trade has passed a resolution asking the G.T.R. to extend its line from Madoc northerly to Eldorado, about seven miles.

Stratford Shops and Station.—The improvements at the Stratford, Ont., terminals,

station and locomotive shops, are estimated to cost $250,000. The plans for the new station are to be submitted to the City Council at an early date. The City Council has passed the by-laws necessary for the closing of certain streets as agreed upon, such by-laws to become operative upon the work of the shop extension being gone on with at once.

London Improvements.—The improvements west of London, Ont., are nearing completion, the filling for one track on the new elevation was expected to be finished by the end of Jan., and work on the Cove bridge was expected to be done about the same time. It is stated that when the elevation west of Rideout St. is completed and the big cut on the Hyde Park grade finished, the company will have expended $750,000. Mayor Judd stated Jan. 14, that it was his intention to take up with the company the question of the elevation of the tracks from Rideout St. as far east as possible. (Jan., pg. 23).

TRANSPORTATION APPOINTMENTS.

Alberta Ry. and Irrigation Co.—C. A. Magrath, Land Commissioner, has resigned.

Canadian Northern Ontario Ry.—W. H. Grant, heretofore Manager of Construction, Halifax and Southwestern Ry., has been appointed Manager of Construction, C.N.O.R. Office, Toronto.

Canadian Pacific Ry.—As announced in our December issue, C. F. Rydberg was appointed Superintendent Angus car shops, Montreal. He really succeeds S. King, Assistant Master Car Builder, who resigned to accept service elsewhere, the title being changed.

G. T. Rooke, formerly train dispatcher at Toronto, and latterly rules examiner, has been appointed Train and Station Inspector, vice A. L. Smith, promoted. Office, Montreal.

W. Tansley, heretofore Night Chief Train Dispatcher, Ontario Division, Toronto, has been appointed Chief Train Dispatcher, districts 1 and 3, Ontario Division, Toronto.

R. R. Jelly, heretofore train dispatcher old district 2, Ontario Division, Toronto, has been appointed Night Chief Train Dispatcher, districts 1 and 3, Toronto.

C. L. White has been appointed Superintendent's Accountant district 1, Ontario Division. Office, Toronto.

E. Pattison, heretofore Superintendent's accountant, Ontario Division, district 1, Toronto, has been transferred to district 3, Toronto.

W. A. Killingsworth, heretofore Chief Train Dispatcher, Ontario Division, who has been transferred from Toronto to London, Ont., has now jurisdiction over district 2, Ontario Division.

V. A. Harshaw, Trainmaster, has been transferred from Toronto Jct. to London, Ont.

G. W. Thornton, heretofore chief clerk to Division Engineer, Toronto, has been appointed Superintendent's chief clerk at London, Ont.

R. J. How, heretofore Superintendent's Accountant district 2, Ontario Division, at Toronto, has been appointed Superintendent's Accountant district 2, at London, Ont.

G. J. Bury, heretofore General Superintendent, Central Division, has been appointed Assistant General Manager. Office, Winnipeg.

A. Price, heretofore Superintendent of Transportation, Western Lines, has been appointed General Superintendent, Central Division, vice G. J. Bury, promoted. The position of Superintendent of Transportation has been abolished.

J. McLellan was appointed Acting Superintendent of Terminals at Winnipeg, during the absence on a month's leave of A. Belbeck.

R. Sinclair has been appointed Bridge and Building Master district 2, Western Division, succeeding J. K. Smith, resigned.

M. Newland has been appointed acting Roadmaster of the Sirdar section, district 2, Western Division, succeeding R. Sinclair, appointed Bridge and Building Master.

R. Marpole, General Superintendent, Pacific Division, is to be appointed to an executive position, with headquarters at Vancouver, B.C.

F. F. Busteed, heretofore Assistant Chief Engineer, Western Lines, has been appointed General Superintendent, Pacific Division, vice R. Marpole.

J. E. Sutherland, heretofore clerk in the office of the Manager C.P.R. Steamship lines, has been appointed Chief Clerk in the office of the General Superintendent C.P.R. trans-Pacific Steamship lines at Vancouver, B.C.

A. E. Edmonds, heretofore City Passenger Agent, Detroit, Mich., has been appointed District Passenger Agent. Office, 7 Fort Street West., Detroit; territory lower peninsula of Michigan and along the line of the Lake Shore and Michigan Southern Ry. from Toledo to Ashtabula, Ohio.

J. H. Griffin has been appointed District Freight Agent at San Francisco, Cal., vice M. M. Stern, resigned.

Delaware, Lackawanna and Western Rd.—F. P. Fox, heretofore Division Passenger Agent, Buffalo, N.Y., has been appointed Advertising Manager. Office, New York.

E. J. Quackenbush, heretofore Division Passenger Agent, Syracuse, N.Y., has been appointed Division Passenger Agent, Buffalo, succeeding F. P. Fox.

Dominion Atlantic Ry.—D. J. Murphy, in addition to his duties as Trainmaster, will assist the Traffic Superintendent in the matters of transportation of passengers and freight.

Grand Trunk Pacific Ry.—L. B. Merriam has been appointed Division Engineer at Winnipeg, vice A. C. Dennis, resigned.

Grand Trunk Ry.—H. F. Coyle, heretofore Trainmaster at Belleville, Ont., has been appointed Assistant Superintendent districts 1, 2 and 3, vice C. L. Mayne, transferred. Office, Island Pond, Vt.

W. P. Hinton, heretofore General Agent Passenger Department, Ottawa, Ont., has been appointed Assistant General Passenger and Ticket Agent. Office, Montreal. He will have charge of trans-Atlantic passenger traffic and such other duties in connection with the General Passenger Department as are assigned to him.

C. L. Mayne, heretofore Assistant Superintendent at Island Pond, Vt., has been appointed Assistant Superintendent Montreal Terminals, including lines to St. Lambert and Lachine, and the Jacques Cartier branch, vice J. L. Gogerty, resigned, and will have jurisdiction over district 4, vice J. J. Conelly, transferred. Office, Montreal.

S. Ennes, heretofore Master of Transportation at London, Ont., has been appointed Assistant Superintendent, Ottawa Division, with jurisdiction over station employes, train and yard service, vice L. G. Coleman, transferred. Office, Ottawa, Ont.

L. G. Coleman, heretofore Assistant Superintendent, Ottawa Division, has been appointed Assistant Superintendent districts 5, 6 and 7, vice H. F. Coyle and J. J. Conelly, transferred. Office, Belleville, Ont.

G. R. MacLeod, heretofore Chief Clerk to the Fourth Vice-President, has been appointed Resident Engineer, vice F. L. Somerville, resigned. Office, Toronto.

W. R. Tiffin, Superintendent Northern Division, having been granted leave of absence, T. J. Lynch, Assistant Superintendent, will have full charge of the division during his absence. Office, Allandale, Ont.

N. B. Walton, heretofore Secretary to the Fourth Vice-President, has been appointed Assistant Trainmaster, districts 22 and 23, and will report direct to Trainmaster A. J. Nixon. Office, Palmerston, Ont.

J. J. Conelly, heretofore Trainmaster at Montreal, has been transferred to Richmond, Que., with jurisdiction over districts 1 and 2.

The office of trainmaster districts 4 and 5 is abolished.

Great Eastern Fast Freight Line.—W. P. Snyder has been appointed agent at New York, succeeding G. F. Hichborn, who has been appointed General Traffic Manager U.S. Rubber Co.

Halifax and Southwestern Ry.—L. H. Wheaton, heretofore Chief Engineer, has been appointed Engineer of Maintenance of Way. Office, Bridgewater, N.S.

Intercolonial Ry.—We were advised from the General Manager's office, Jan. 2, that nothing was known there of the reported resignation of E. H. Allen, Claims Agent.

M. P. Shields has been appointed mechanical foreman at Chaudiere Jct., Que., vice M. Henchey, assigned to other duties.

Merchants Despatch Transportation Co.—Carl Howe, heretofore Assistant General Freight Agent Michigan Central Rd., Buffalo, N.Y., has been appointed Traffic Manager Merchants Despatch Transportation Co., vice H. B. Tindall, resigned. Office, 350 Broadway, New York.

Michigan Central Rd.—G. C. Ransom has been appointed Division Freight Agent, with headquarters at Buffalo, N.Y. The office of Assistant General Freight Agent, heretofore held by Carl Howe, has been abolished.

New York Central and West Shore Rd.—The western division was divided into three divisions, Jan. 1, known as the Western, Buffalo and Rochester Divisions. L. H. Van Allen has been appointed Superintendent of the Buffalo division, which comprises all terminals of all N.Y.C. lines terminating in Buffalo, the main line from Depew west, the Niagara Falls, Lewiston and Lockport branches, the Terminal Rd. of Buffalo, the yards at Buffalo, and the Suspension Bridge.

F. W. Everett has been appointed Superintendent of the Western Division, office Syracuse, N.Y., and S. R. Payne is Superintendent at Rochester, N.Y.

Pere Marquette Rd.—G. G. Little, heretofore contracting freight agent at Buffalo, N.Y., has been appointed Travelling Freight Agent in Southern New York and Northern Pennsylvania. Office, New York.

Richelieu and Ontario Navigation Co.—H. Foster Chaffee, heretofore Western Passenger Agent, has been appointed Assistant General Passenger Agent. Office, Toronto.

Temiskaming and Northern Ontario Ry.—F. Dane, Toronto, has been appointed a commissioner succeeding C. B. Smith, resigned.

H. W. Pearson, Secretary-Treasurer, having resigned, A. J. McGee, heretofore General Accountant, has been appointed to succeed him.

H. F. MacDonald, of the Commission's Toronto staff, has been appointed acting accountant.

Wabash Rd.—L. J. Ferritor, Superintendent at Decatur, Mich., is reported to have resigned.

White Star Line (Lake Steamers).—G. E. Phillips has been appointed Assistant Traffic Manager. Office at Detroit, Mich.

Winnipeg Jobbers' and Shippers' Association.—G. E. Carpenter, heretofore chief clerk to the General Freight Agent C.P.R., Winnipeg, has been appointed Manager of this association's freight department. The association was formed for the purpose of obtaining better facilities from the transportation companies, correcting any detrimental legislation affecting the jobbing and shipping trade and for procuring favorable legislation in the interests of the association.

Steam Railway Track Laid in 1906

The figures of track laid in 1906, as published in our Jan. issue, are only slightly altered upon receipt of further information. The G.T. Pacific Ry. laid about 35 miles westerly from Portage la Prairie, and this brings the total of additional track laid to 1204.06 miles. The C.P.R. laid the largest mileage, 394.50 miles; if the Nicola, Kamloops and Similkameen Ry., which it will operate, is included, 441.50 miles; while the Mackenzie, Mann & Co. lines laid 340.85 miles. The Great Northern Ry., U.S.A., through its three Canadian companies, laid 175.55 miles of new track. The mileage laid in the different provinces follows:

Ontario	336.06
Manitoba	272.69
Saskatchewan	171.76
Quebec	113.10
Alberta	97.63
Nova Scotia	89.88
British Columbia	76.09
Yukon Territory	32.00
New Brunswick	14.85
	1,204.06

Railway Statistics for 1905-6.

The mileage of completed railways in the Dominion on June 30, 1906, was 21,518, an increase of 917 miles, besides 4,085 miles of sidings. The paid-up capital was $1,332,498,705, an increase of $83,832,291; the C.P.R. has 8,506 miles, the G.T.R. 3,111 miles, the Intercolonial 1,483 miles, the Canada Atlantic Ry. 453 miles and the Canadian Northern Ry. 2,482 miles.

The total expenditure of the year on the I.C.R. was $15,732,812, of which $6,102,565 was charged to capital, $7,895,653 to revenue, and $1,736,593 to income. The expenditure on Government railways prior to and since Confederation up to July 1, 1906, on capital was $154,876,086, on income $159,466,261, making a total expenditure of $314,342,348. The revenue received from July 1, 1867, to July 1, 1906, was $112,571,053. The expenditure on canals was $114,395,281, and the revenue derived therefrom $13,513,583.

The operation of the I.C.R. during the year resulted in earnings of $7,950,552, an increase of $899,660 over 1905. The gross working expenses of $7,893,653 represented a decrease of $1,012,600. The I.C.R. gave a profit of $61,915, the Windsor branch a profit of $31,966, and the P.E.I. Ry. a loss of $36,982. During the year there was an addition of $3,765,170 to the capital expenditure on the I.C.R., making the total capital expenditure on the whole road, together with the acquired Canada Eastern Ry., $81,238,728.

The passenger traffic produced 30.06% of the gross earnings, and the freight traffic, 65.67%, and the carriage of mail and express, 4.27%. There was a decrease of 73,800 in the number of passengers carried. The decline was in the local passengers, there being an increase of 24,656 in the number of through passengers. There was a substantial increase in both the local and through tonnage in regard to the freight.

The accident returns show a total of 361 persons killed; 16 being passengers, 139 employes, and 242 others. By train collisions and derailment one passenger, 35 employes and two others were killed, and 102 passengers, 95 employes and 12 others were injured. Through jumping on or off trains or engines in motion, 5 passengers, 8 employes and 20 others were killed, and 49 passengers, 70 employes and 40 others were injured. Through walking, lying or being on the track, 5 passengers, 38 employes and 125 others were killed, and 2 passengers, 43 employes and 65 others were injured. Through falling from cars or engines 4 passengers, 12 employes and 3 others were killed and 20 passengers, 163 employes and 22 others were injured. Through being struck by engines or cars at highway crossings, 1 passenger, 2 employes and 47 others were killed, and 2 employes and 74 others were injured. In the work of coupling cars, 10 employes were killed and 128 employes were injured, a total of 138, as against 130, 178, 211, 241 and 290 in the five preceding years, respectively; a very satisfactory testimony to the efficiency and value of the automatic car couplers now growing into general use.

There were 814 miles of electric railway, the paid-up capital of which was $63,857,970. The gross earnings were $10,966,872. The working expenses were $6,675,038. The car mileage was 50,618,836 ,an increase of 4,659,735 miles. There were 47 persons killed, 12 being passengers, 2 employes and 32 others. There were 1,653 persons injured.

Northern Navigation Co. of Ontario.

Following is the report for the year 1906 presented at the annual meeting in Toronto, Jan. 29: Navigation opened on Lake Superior on April 15, and on the Georgian Bay on April 23, which was about ten days earlier than in 1905, with bright prospects for the season's business, which were fully realized as to the gross earnings, but not as to the net result. Last winter the company acquired the str. City of Windsor, and during Aug. purchased the iron package freight str. Cuba, now Ionic, cost $41,000, for the Lake Superior route, to take care of the steadily increasing business. On May 13, the str. Huronic, eastbound trip, while entering the Canadian canal at Sault Ste Marie at night ran out of the channel through the range lights not being lit, and was damaged, which was fully covered by insurance, excepting the extra wages paid workmen for overtime in the dry dock, and the profits of the two trips. The str. Monarch, on Dec. 6, eastbound, ran ashore on Blake's Point, Isle Royale, and became a total loss. She was valued in the books at $100,000, and was insured for that, but $9,000 was for fire only, and there is in the profit and loss account a debit of $11,051.67, which covers expenses incurred in the relief of passengers and crew, and the usual charges for collecting insurance. The str. Ionic, on Dec. 7, westbound, while lying at anchor in shelter under White Fish Point, Lake Superior, was blown ashore on account of a sudden change of wind. She was released by tugs, taken to Sault Ste. Marie, viewed by underwriters' inspector and afterwards proceeded to Port Arthur, accompanied by a tug, where she arrived on Dec. 21, and will remain there until the opening of navigation, when she will go to Duluth for repairs which are covered by insurance.

Last year eight steamers appeared in the balance sheet at $800,000. Deducting the loss of the Monarch, $100,000, and adding the value of the City of Windsor, $9,000, and $41,000 for the Ionic, shows a total value

The Hudson's Bay Company

THE COMPANY OFFERS FOR SALE

Farming and Grazing Lands in Manitoba and the Northwest Territories

ON EASY TERMS OF PAYMENT

Town Lots for sale at Winnipeg, Ft. William, Edmonton, Prince Albert, etc.

The Company has General Stores at Winnipeg, Vancouver, Calgary, Edmonton, and other places where purchasers will find the best of goods at moderate prices.

Transportation by the Company's Steamers, brigades of boats and canoes throughout the Territories not traversed by railways.

of $750,000 this year for nine steamers. The gross earnings of the steamers were $606,950.20, and the expenditure $471,876.63, leaving a net balance of $135,073.57, which with the balance at credit of profit and loss account for 1905, the amount received from J. J. Long's estate, $27,750, and the conscience money and dividend on stock and bonds, $298.00, make a total of $183,216.23. This account was charged during 1906 with claims for 1903, 1904 and 1905, $4,937.66; loss on Monarch and expenses therewith, $11,051.67; written off special account for linen and freight carriers, etc., $2,000; reducing that amount to $2,000, which should be written off next year; car demurrage not expected to be charged against the company, $1,524.00; written off diving suit and piano account, $673.00; repair and maintenance account for repairs on steamers, $9,202.49, leaving a balance of $153,827.41; from which a dividend of 6% and a bonus of 1½% for the year ended Dec. 31, was declared, amounting to $63,000, and a bonus paid to officers on the steamers and office staffs amounting to $3,728.00, of which $3,126.00 went to the steamers' officers, and balance to office staff, the increased business and long season making more work all round, and as most of the officers had not received any increase for some years, it was thought well to recognize in this way their loyalty and devotion to the company's interests, leaving $87,099.41, from which has been transferred amounts as follows: steamer renewal fund, $25,000; repair and maintenance, $13,000; marine insurance fund, $7,000, as your directors believe it wise to set aside each year amounts for this purpose, based on percentage of value and age of each steamer, to take care of their up-keep and provide a renewal fund, and also establish a marine insurance fund to take care of marine losses on the Georgian Bay fleet, which have hitherto only been insured against fire. Percentage of expenses to gross earnings, not including claims paid for the last four years, are as follows: 1903, 94.16%; 1904, 89.71%; 1905, 80.73%; 1906, 77.73%. Although the gross earnings for 1906 were 33% higher than in 1905, the percentage of operating expenses has only been reduced 3% on account of increased price of coal, increased cost of handling freight at Point Edward, because of higher wages and inadequate facilities for the increased tonnage, the outfit of City of Windsor, heavy legal and other unexpected expenses, amounting in all to $28,567.00, or over 4½% of the operating.

The loss of the Monarch made it necessary to strengthen the fleet, and as a steamer could not be built in time for 1907, the steel str. Tadousac was purchased and is being fitted up as a package freighter, costing in all about $150,000. It is proposed to run a freight steamer from Midland, Collingwood and Owen Sound to head of Lake Superior during the coming season. In order to do justice to the increased business sure to accrue when the Grand Trunk Pacific Ry is in operation, two new steamers of the Huronic type should be added to the fleet, but so far the board has not been able to make an arrangement that would warrant such an expenditure, although negotiations are in progress.

The officers and directors were re-elected for the current year as follows: President, H. C. Hammond; Vice-President, W. J. Sheppard; Secretary-Treasurer, C. E. Stephens; other directors: Hon. Lt.-Col. J. S. Hendrie, F. A. Lett, W. D. Matthews, H. P. Smith, H. Y. Telfer.

Eastern Canadian Passenger Association.—C. E. E. Ussher, on account of his removal from Montreal to Winnipeg, consequent on his appointment as Assistant Passenger Traffic Manager C.P.R., has resigned his membership in the Association, and has been elected as its first honorary member. The officers, etc., of the Association for the current year are: Chairman, G. Tombs; executive committee, W. Stitt, G. T. Bell, F. E. Barbour; rules committee, W. Stitt, G. T. Bell, T. Henry, F. E. Barbour, E. O. Grundy, F. F. Backus, J. W. Hanley, J. M. Lyons, W. Phillips; Secretary, G. H. Webster.

The Canadian Northern Ry. for failure to take the mails out of Edmonton, Alta., Jan. 8, was fined $5,000 by the Dominion Government.

The committee of the C.P.R. carmen's organization has completed an arrangement by which an advance of 10% has been secured for the men.

The Ontario Railway and Municipal Board has reduced one-half of the Niagara Suspension bridge assessment at Niagara Falls, Ont., from $175,000 to $135,000. The Board rejected the company's contention that as the upper half of the bridge was used exclusively for railway purposes it was not liable to assessment

Eastern Railway Entrance to Toronto.

The Department of Railways has under consideration an important problem affecting the interests of the G.T.R., the C.P.R. and the Canadian Northern Ontario Ry., in connection with their applications for the approval of plans for new lines east of Toronto. The G.T.R. is desirous of securing a better entrance into the city, with the object of reducing the gradient at Scarboro Heights; the C.P.R. has made surveys for a new line into the city, giving connection with the lake shore towns not now directly served by the G.T.R., and the Canadian Northern Ontario Ry. has prepared plans for its projected line from Toronto to Ottawa. In addition to the demand for additional main line accommodation, there are numerous applications for additional spur lines to accommodate the increasing numbers of factories in the eastern district of the city, and a call for the elevation of all the railway tracks in the city. Objection has been taken by residents of outside areas to so much cutting up of property for railway lines converging upon the city, and the City Council has taken up the whole question of railway accommodation in the east end of the city. The East End Business Men's Association has passed a resolution urging the construction of an independent line into the city, over which all railways be given rights. The Guild of Civic Art urges that the railways be compelled to keep their lines north of the Kingston Road. C. B. Smith, C.E., has been engaged by the city engineer to make surveys with a view of securing an alternative route so as to save Kew Beach and other of the beaches east of the city. When the question of the approval of the plans came before the Minister of Railways, Jan. 17, it was adjourned to March 18. The Minister suggested the appointment of an advisory committee of three engineers representing the municipalities, the railways and the Department, to consider the whole question with a view to minimize the injury to property, as well as to get good grades. The suggestion is being considered by the railways and the municipalities.

Reciprocal Demurrage.

The following resolution has been passed by the Montreal Corn Exchange: "Resolved, that the great loss and inconvenience suffered by the trade from the failure of railways to supply cars when requested, and from the intolerable delays which have occurred in transporting and discharging the cars into elevators after their arrival at terminal points, demand adequate compensation; that the Committee of Management of the Corn Exchange Association is hereby requested to associate itself with other commercial organizations interested in endeavoring to secure from the Railway Commission a ruling to the effect that demurrage charges shall be reciprocal, so that consignees shall have the equal right with the railways of collecting demurrage when cars are not promptly supplied, when there is any undue delay in transit or in placing cars for delivery on arrival in the freight yards, and in cases of undue delay in storing in elevators at stations where elevators are provided."

E. Brown, leader of the Liberals in the Manitoba Legislature, said Jan. 18: "Legislation providing for a reciprocal demurrage charge, by means of which the railway companies would be compelled to pay the farmer a fine because of the delay in furnishing cars, just as at present a farmer has to pay a demurrage charge if, after ordering a car he does not immediately use it, has been suggested. This, I think, would vastly improve the situation, but it might work out a hardship to the railway companies under certain conditions such as at present, for which some provision would have to be made."

PROFESSIONAL CARDS.

THE RAILWAY AND MARINE WORLD is especially adapted for the publication of professional cards of engineers, inspectors, analysts, electrical experts, naval, grain elevator and other architects, solicitors, etc., who desire to bring themselves under the notice of the managements and officials of the various steam and electric railway, steamship, grain elevator, telegraph, telephone and power companies throughout Canada, as well as the locomotive, car and shipbuilders, contractors and promoters of railway enterprises. THE RAILWAY AND MARINE WORLD is the only one medium through which all these important classes can be reached.

Rates will be quoted on application.

Government Railways' Provident Fund.

Consideration is being given by the Dominion Parliament to a bill providing for the establishment of a provident fund for the employes of the Intercolonial and Prince Edward Island Railways. The object of the fund is declared to be for the purpose of providing life allowances to be paid to such persons as are entitled thereto under the provisions of the Act; the fund to be created by means of contributions to be made by the employes and the Government. The amount to be provided by the Government is not to exceed $100,000 a year, in such sums as the Governor-in-Council may determine to be necessary to maintain the fund; and the contribution of the employes is fixed at 3% of the monthly pay for the first month and 1½% per month thereafter. The fund shall be vested in the Crown, and 3% interest added thereto annually. The management of the fund is to be vested in a board of five persons, the General Manager being chairman; two members to be appointed from time to time by the Minister of Railways, and two elected annually by the employes contributing to the fund. The Board has power to make regulations for various purposes affecting the management and distribution of the fund within certain limits, and shall report to the Minister of Railways. The allowance to be paid shall be a monthly allowance of 1½% of the average monthly pay of the employe for ten years immediately preceding his retirement. The following classes of persons upon retirement shall be entitled to the allowance: Class A. Those who have attained the age of 70 years after being 15 years in the service; Class B. Those who have attained an age over 60 years and under 70 years, after being 15 years in the service and becoming physically or mentally incapacitated from performing the service required of them; Class C. Those who have attained the age of 65 years after being 15 years in the service, and request to be retired from the service; Class D. Those who, after being 25 years in the service, are permanently disabled from performing the service required of them as a result of injuries received while on duty and actually at work in the service; Class E. Those who, previous to the coming into force of this Act, entered the service at such an advanced age as to cause them to reach the age of 70 years before being 15 years in the service; provided that on attaining the age of 70 years they have been at least 10 years in the service. Other sections provide for the refund of payments made under various circumstances, etc.

The British Columbia General Contract Co. has been registered in the province of Saskatchewan, under the provisions of the act relating to foreign corporations.

D. Tremblay, light-keeper, Quebec; G. Bonner, light-keeper, Point Aconi, N.S., and G. Currie, light-keeper, Isle of Coves, N.S., have been given the Imperial service medal.

The Cowan Construction Co. has been incorporated under the Manitoba Companies' Acts, with a capital of $150,000 and offices at Winnipeg, for the purpose of acquiring and taking over as a going concern the railway contracting business now carried on in Manitoba under the style of W. J. Cowan P Co. and W. J. Cowan, including the contracts, plants, assets, etc., of the firms (but not including the interests of W. J. Cowan in connection with his contract on the line between Erwood and Pas Mission); to engage in general contracting work and various other allied businesses. The provisional directors are W. J. Cowan, D. R. Campbell, P. C. Andrews, C. G. Cowan, and F. W. Tisdale, of Winnipeg.

ELECTRIC RAILWAYS.

Electric Railway Track Laid in 1906.

The figures relating to the new track laid by the electric railways of Canada in 1906, as published in our January issue, continue to be incomplete, owing to the neglect of several companies to furnish statements. Using approximate figures from companies which have not reported, additional track was laid by nine companies, the total new mileage being 93.32. Of this, 88.42 miles were laid in Toronto, Quebec and British Columbia:

	Miles.	Miles.
BRITISH COLUMBIA ELECTRIC RY.—Various extensions (Approximate).		2.00
LONDON STREET RY.—Extensions within London, Ont.		1.90
MONTREAL PARK AND ISLAND RY.—From main line to rail track.		0.59

Electric Ry. Finance, Meetings, Etc.

Berlin and Waterloo Street Ry.—The arbitrators, Judge Morgan, Toronto; Judge Jamieson, Guelph; and J. M. Scully, Waterloo, Ont., handed in an award in the proceedings initiated by the Berlin Town Council asking to have a price fixed for the railway, etc., of the B. and W. St. Ry. The award was taken up by the corporation, the price fixed being $75,200, with costs of $3,000.

Application will be made at the current session of the Ontario Legislature for an act declaring that the corporation of the town of Berlin may, upon the payment of $75,200, being the amount of the award delivered by the arbitrators as above mentioned, take over the property and effects of the company as set out in the award; empowering the corporation to pay any further sum which may be fixed upon appeal from the said award, and declaring that the payment of $75,200 shall not prejudice the right of the corporation to appeal; authorizing the borrowing of the money to pay the award without first obtaining the consent of the ratepayers; empowering the corporation to pass by-laws for the management of the railway, and to place the railway under the management and control of the Light Commissioners, and other necessary powers.

Halifax Electric Tramway.—Railway receipts for Dec. $13,751.41, against $12,642.40 for Dec., 1905. Total receipts railway, electric light and gas for Dec., $38,604.73, against $36,702.75 for Dec., 1905.

The percentage payable to the city upon the company's gross passenger receipts from May 1 to Oct 31, 1903, was reported to the City Council, Jan. 11, to be $3,866.06.

Hamilton, Grimsby and Beamsville Ry.—The directors have announced that no dividend will be paid for the last financial year. It was expected when the adjourned annual meeting was held, Jan. 28, that a statement would be made showing that the control of the company had been acquired by the Hamilton Cataract Light, Power and Traction Co.

Montreal Street Ry.—Passenger earnings for Dec., $262,334.37; total earnings $366,953.33, against $234,710.30 passenger, and $236,945.59 total for Dec., 1905. Operating expenses, $185,571.22; city percentage on earnings, $8,189.93; interest on bonds and loans, $16,615.07; contingent for renewals, $13,361.95; surplus $42,260.16, against $161,995.10 operating expenses; $8,363.84 city percentage on earnings; $14,246.73, interest on bonds and loans; there was no contingent fund in Dec., 1905; and $52,339.92 surplus in 1905. Net earnings for three months ended Dec. 31, $295,603.02; surplus $176,594.79, against $262,065.54 net earnings, and $196,318.16 surplus for same period 1905.

Niagara Gorge Rd.—Following are the officers and directors for the current year: President, J. T. Jones; Vice-President, H. B. Bissell; Treasurer and General Manager, B. L. Jones; Secretary and Assistant Treasurer, R. E. Powers; other directors, J. A. Jones, F. V. Greene, W. H. Hotchkiss, W. G. Case, R. R. Hefford, C. M. Bushnell, and G. C. Riley. At the annual meeting held at Niagara Falls, N.Y., Jan. 3, only routine business was transacted. The financial reports are not made public.

Ottawa Street Ry.—It has been announced that the dividend for the year 1906 will be at the rate of 8%, and there will also be a bonus of 4%. This is the largest distribution of profits in the history of the company.

Toronto Ry.—Car earnings for Dec. $269,058.41, against $241,489.22 for Dec., 1905.

Projects, Construction and Betterments.

Barrie, Ont.—A vote was taken at Barrie Jan. 7, upon a proposal to grant a franchise to a syndicate of which F. Nicholls, Toronto, is the head, to construct an electric railway in the town. A majority of 43 in favor of the proposal was recorded, but Mr. Nicholls said the syndicate had decided not to proceed any further with the project at present. (Nov., 1906, pg. 675).

Brantford and Hamilton Ry.—An officer of the Hamilton Cataract Power, Light and Traction Co. was quoted, Dec. 29, as saying that that company was behind the B. and H. Ry. (Jan., pg. 45).

British Columbia Electric Ry.—A third party, in charge of F. N. Sinclair, has been sent out to make a survey into the Clover Valley district in connection with the projected electric railway between New Westminster and Chilliwack. H. N. Smith has charge of the first party, and C. P. Moss is in charge of the second, the whole of the projected route now being covered.

An announcement has been made that construction will be commenced at an early date by the C.P.R. upon a line from New Westminster to Eburne. The line will be electrically equipped by the B.C.E. Ry., and will be operated by it. (Dec., 1906, pg. 753).

Buffalo, Niagara and Toronto Ry.—Plans have been filed for the construction of this line from Niagara-on-the-Lake, via St. David's, to St. Catharines, Ont. (Oct., 1906, pg. 597.)

Edmonton, Alta.—The Edmonton Commissioners have placed an order for 470 tons of 80-lb. T rails, delivery to be made from March, for a city owned electric railway, and it is said that construction will be started at an early date. (Dec., 1906, pg. 753).

Grand Valley Ry.—Application will be made at the current session of the Dominion Parliament for an act authorizing the company to construct a line from Woodstock to and through Ingersoll, to and into London, Ont., and to increase the company's capital. The manager states that the report that the line had been sold to Pittsburg, Pa., people is incorrect, but it was true that U.S. capitalists had inspected the line with a view of purchasing it, as well as the Woodstock,

THE LONGEST DOUBLE TRACK RAILWAY IN THE WORLD UNDER ONE MANAGEMENT AND THE ONLY DOUBLE TRACK LINE IN CANADA

ARTHUR M. GRANT, **MANAGER.**

Thames Valley and Ingersol Ry., owned by the same interests. The company had under consideration the extension of the line to Burford, Simcoe and Port Dover, Ont. (Sept., 1906, pg. 549).

Halifax and Suburban Electric Co.—A company has been organized in Halifax, N.S., with this title for the purpose of constructing an electric railway from Halifax through Rockingham, Bedford and Sackville to Waverley, N.S. The company, it is stated, has secured the charter of the Bedford Electric Co., which was incorporated by the Nova Scotia Legislature in 1903, with power to construct an electric railway within the territory named. The promoter is H. E. Harding, of St. John, N.B., who is said to have interested U.S. capital in the project, and the Halifax directors of the company are G. E. Boak, ex-Mayor Keefe, and W. Chisholm.

Hamilton Radial Electric Ry.—Application is being made at the current session of the Dominion Parliament for an act authorizing it to extend its lines to Toronto, and to obtain terminal facilities there; to extend its line from Hamilton to Brantford, Woodstock and Windsor, Ont.; to make running or traffic agreements with the Hamilton, Ancaster and Brantford Ry., the Hamilton, Grimsby and Beamsville Ry., and other electric railways; and to construct electric railways generally in the county of Wentworth. It is also desired to have the company's undertaking declared to be one for the general advantage of Canada, and to have its bonding powers increased from $20,000 to $30,000 a mile. (Dec., 1906, pg. 753).

Manitoba Radial Ry.—In addition to the powers asked for in the original application for an act of incorporation now before the Railway Committee of the House of Commons, it is proposed to ask for power to extend the projected line from Lundar to the shore of Lake Winnipeg at or near the Hudson's Bay Co.'s post in the district of Keewatin. (Dec., 1906, pg. 753.)

Moncton, N.B.—The Legislation Committee of the City Council has recommended that a charter be secured at the next session of the N.B. Legislature to operate a street railway in the city and in the parishes of Moncton and Shediac. The report is under consideration. A street railway was formerly operated in the city, but it did not succeed and was taken up in 1901. (Nov., 1906, pg. 675).

Mount McKay and Kakabeka Falls Ry.—Plans and profiles have been approved by the Ontario Railway and Municipal Board for the construction of a railway from Fort William to Mount McKay and Kakabeka Falls. The officials of the company include: Vice-President, W. F. Hogarth; Chief Engineer, J. L. Davidson, of Fort William.

Niagara, St. Catharines and Toronto Ry.—A contract is reported let to Jos. Battle for the extension of the line from Fonthill to Welland, Ont., five miles. The company is making surveys for a line from St. Catharines to Niagara-on-the-Lake. (Dec., 1906, pg. 754).

Ottawa River Ry.—The Ontario Legislature will be asked at its current session to pass an act extending the time for the commencement and completion of this railway, and changing the location of the western branch to run south of Lake Simcoe towards London, Ont. Hogg and Magee, Ottawa, are solicitors in the matter.

Petrolia Rapid Ry.—The Ontario Legislature will be asked at its current session for an act extending the time for the commencement and completion of the authorized line, and for power to extend the lines as follows: from Petrolia to London, from Brigden to Wallaceburg, and from Courtright to Wallaceburg, Ont. T. J. Gordon, Sarnia, Ont., is Secretary.

Port Arthur Electric Street Ry.—The Port Arthur corporation will apply at the current session of the Ontario Legislature for an act confirming a number of by-laws, and conferring on it various powers, including the following: To double-track the electric street railway, and to construct a belt line railway as an extension of the same, upon the passing of the necessary by-law or by-laws by the taxpayers, and to authorize the operation of the electric street railway on Sundays. (May, 1906, pg. 277.)

Quebec and Isle of Orleans Ry.—The members of the company which is applying at the current session of the Quebec Legislature for an act incorporating a company with this title to construct a railway from Quebec, round the Isle of Orleans, with a bridge to the Beaufort shore, are Hon. E. B. Garneau, P. Corriveau, F. Turcot, E. Laliberté, D. O. Lesperence, of Quebec. (Jan., pg. 5.)

Sandwich, Windsor and Amherstburg Ry.—Application will be made at the current session of the Ontario Legislature for an act authorizing the S.W. and A. Ry. and the Windsor and Tecumseh Electric Ry. to agree with one another for connections, or to make running arrangements, or enter into an agreement for the sale or lease of any portion of the last named railway; to authorize the S.W. and A. Ry. Co. to acquire the capital stock, bonds or other securities of the W. and T.E. Ry. Co.; to empower the S.W. and A. Ry. to supply power to the W. and T.E. Ry.; to extend the time for the completion of the W. and T.E. Ry.; to confirm and validate the proceedings of the provisional directors of the W. and T.E. Ry.; to confirm a mortgage of the W. and T.E. Ry. to the International Trust Co. of Boston, Mass., and to change the head office of the W. and T.E. Ry. from Walkerville to Windsor, Ont (May, 1906, pg. 2 7, Windsor and Tecumseh Electrical Ry., Dec., 1906, pg. 753.)

Stratford and St. Joseph Radial Ry.—The Dominion Parliament is being asked at its current session for an act incorporating a company with this title for the purpose of constructing a railway of any gauge, to be operated by steam, electric, gasoline or any other kind of motive power, for the conveyance of passengers and freight from Stratford to St. Joseph, Ont., passing through Fullarton, Russeldale, Farquhar, Exeter, Hensall, and Zurich; and from St. Joseph to Grand Bend, or from Exeter westerly to St. Joseph and on to Grand Bend and Park Hill, with power to construct branches. It is also desired to have power to construct telegraph and telephone lines, to generate and sell electric power and to operate ferries in connection with its railway. The company desires that its undertaking be declared to be for the general advantage of Canada. J. U. Vincent, Ottawa, is solicitor for the applicants.

N. M. Cantin, St. Joseph, Ont., the principal promoter of this company, is reported as saying that the branch from St. Joseph to Parkhill to get a connection with the G.T.R., will be built at once. If Stratford will give a civic franchise the line to that city will also be built at an early date. The men interested in the project include: H. G. Lajoie, J. H. Laurandeau, S. Vincent, L. G. Routhier, J. P. Prudhomme, J. M. Lavoie, Dr. Chevrier, of Montreal, and some Buffalo and New York men, whose names are not given.

Suburban Electric Ry.—Application is being made at the current session of the Manitoba Legislature for an act incorporating a company with this title for the purpose of constructing a railway of standard or other gauge, to be operated by steam, electric, gasoline or other power, from Winnipeg westerly and northerly to Lake Manitoba; to generate electric power, to construct telegraph and telephone lines, to operate ferries, to lay out parks and pleasure grounds, to conduct hotels, and to enter into contracts with other similar companies. Morley and Suffield, Winnipeg, are solicitors for the applicants.

Suburban Tramway and Power Co.—The parish of Longue Pointe is applying at the current session of the Quebec Legislature for an act confirming a number of by-laws, among them being one to confirm the Suburban Tramway and Power Co. in the possession and enjoyment of the right of way which was granted for the tramway.

Toronto Radial Railways.—The Mayor of Toronto has written to the suburban railway companies asking them to reply to the proposition made by the City Council some time ago, as to conditions under which they would be permitted to enter and operate in the city.

Twentieth Century Transportation Co.—A company with this title is making a proposal for a ferry franchise between Windsor, Ont., and Detroit, Mich., says it desires to construct an electric railway from Buffalo, N.Y., to Detroit, Mich. The projected line would run by way of Welland, St. Thomas and Ridgetown, Ont., and the ferry franchise was desired so that a through fare could be made between the two U.S. points. The names of the promoters have not been made public.

Woodstock and Houlton Electric Ry.—The New Brunswick Legislature will be asked next session for an act incorporating a company with this title with power to construct an electric railway from Woodstock, N.B., to the International boundary in the parish of Richmond, Carleton county, J. N. W. Winslow, Woodstock, N.B., is solicitor for the applicants.

Windsor and Tecumseh Electric Ry.—See Sandwich, Windsor and Amherstburg Ry.

Electric Railway Notes.

J. Doucette, Superintendent of the Hamilton Cataract Power, Light and Traction Co., died in Hamilton, Ont., Jan. 9.

A. Oldfield, resident engineer, Winnipeg Electric Street Ry., will be married to Miss L. Houlton, of Hyde Park, Leeds, Eng., at an early date.

The Montreal Street Ry. has under construction 25 of a new type of car, and, it is reported, will place an order for 20 more for delivery in July.

A. N. McLennan, Manager Sydney and Glace Bay Ry., Sydney, N.S., was presented with a walking cane and an address by the employes recently.

The investigation into the condition of the Hamilton Street Ry. by the Ontario Railway and Municipal Board was completed Jan. 4, but it is not expected that judgment will be delivered for some time.

The appeal of the Hamilton Street Ry. Co. to the Supreme Court in the action in which it sought to have a regulation limiting the sale of workmen's tickets, was dismissed with costs. The City Council claimed that the sale of these tickets must be unrestricted.

The question of providing vestibules on street cars is being considered by the Ontario Railway and Municipal Board, upon the application of the employes of the Toronto Ry. Three cars were fitted with samples and inspected by the Board and the men, so that the best may be selected.

The C.P.R., owning the Hull Electric Ry., has arrived at an understanding with the Hull, Que., City Council, as to various matters in dispute, and the actions entered will be withdrawn. Freight hauling is to be continued during the winter, and in the spring a loop line is to be constructed which will do away with the necessity of hauling freight over the line in future.

The Power House.

By J. C. Rothery, General Manager East Liverpool, Ohio, Traction and Light Co.

This subject is so large and has such an important bearing upon electric traction, being the foundation of the whole system, that only a few salient features can be touched upon By reason of the higher voltages generated in modern power stations, it is no longer a necessity for a power-house to be situated in immediate proximity to the point where the power will be utilized. This is particularly advantageous in larger cities, as it may be built upon cheaper land, nearer the water and coal supply, and where the best railway shipping facilities are available, taxes low and insurance rates at a minimum. The buildings should be of fireproof construction throughout. In this connection, many power houses, both steam and hydraulic, are being constructed of reinforced concrete, walls, roofs, floors and partitions, thus rendering the building absolutely fireproof. A notable example of this construction in a hydraulic power-house is that of the Ontario Power Co.'s generating and distributing stations at Niagara Falls, Ont.

Water tube boilers of the Babcock and Wilcox type predominate in modern power stations, and the tendency is towards the use of large units in order to economize space and labor, the most popular sizes ranging from 400 to 500 h.p. All plants of 1,500 h.p., or over, can economically operate mechanical stokers. These will generally make such a saving in fuel and labor as will not only pay interest upon the investment, but will in a short period return the principal. Coal conveyors which will take the fuel directly from the cars, place it in overhead bins so that it will flow by gravity to the stoker hoppers, is an essential feature in the economical operation of a modern power-house. A similar conveyor may also be utilized for the removal of ashes and thus a still further saving obtained in the handling of fuel.

Modern plants which are unable to obtain soft water, may install purifying tanks, into which the water is pumped, a certain proportion of chemicals adapted to that particular water being added, thus causing all inorganic matter to settle, the pure soft water being used in the boilers. The modern practice of installing pumps is in groups, ample clearance being allowed between the units, and the grouping plan permits the widest flexibility in case of trouble. If all of the power feed pumps are installed in a row in a separate pump room, the piping can easily be arranged to enable any pump to take up the load. Air and circulating pumps are generally installed in the basement close to the condensers which they serve, but there is often not the same opportunity for co-ordinating them in a group with the feed, oil, step-bearing pumps, etc., that there is when the pumps are located in a separate compartment on the floor above. The pump installation should, in any event, be placed well under the control of the operators, and the plan of segregating this equipment in a group apart from the boilers and engine room apparatus, is well worth bearing in mind in the designing of a new plant.

The majority of the power stations being built at the present time are installing steam turbines instead of reciprocating engines, of a capacity from 1,000 kw. upwards. Current is being generated as low as four and one-half mills per kw. hour with this type of equipment; this is at least one mill per kw. hour less than has been obtained with reciprocating engines of the best type, the steam turbine plant having an inherent economy 20% better than the best type of reciprocating engine plant.

Direct current generators and d.c. transmission is being superseded by alternating current transmission, employing a potential of from 13,000 to 33,000 volts, thus interurban railroads having from 100 to 200 miles of track are being economically operated from a central power station. A notable example of such centralization is the Indiana Union Traction system, its power house being situated at Anderson, Ind., and the farthest point served is Lima, a distance of 85 miles, the transmission potential being 33,000 volts. In most modern plants, particularly those in course of construction, provision is made for superheating the steam supply of the turbine or reciprocating engine equipment. For this purpose, an independently fired superheater is installed in the boiler room, directly connected to the main steam heaters in such a manner that by opening and closing certain valves, all steam on its passage from the boilers to the engines may be deflected through the superheater, raising the temperature thereof and eliminating all moisture. Where alternating current is generated and transmitted under high voltage to sub-stations, the switches for transferring the current for the feeders and the leads to the main transformers are three and four-pole for three and two-phase current, with two stationary contacts per pole, one from the transformer, the other from the buss bar of the same phase. The connections between the switch terminations of these leads is made by raising into contact with them, against the force of gravity, a bridging piece which is held against the contact mechanically. The contacts are submerged in oil, the bridging piece of each pole of the switch being at the power end of a heavy, vertical rod, each of the oil circuit breakers being enclosed in a separate, fireproof chamber of brick, capped with a slab of stone, upon which the bearing gear is mounted, the front of each compartment being enclosed by a cover of asbestos board, held in place by eccentric clamps. The position of the switch is indicated to the operator by means of a red and green signal lamp placed on each side of the switch handle upon the control stand, the signal lamps being lighted by current from the exciter or station transformer, and the lamp circuit closed there by a little wicket type, double throw, knife switch on top of the oil switch structures, which is thrown to the one side or the other in opening or closing the circuit. This operates the relay coils which work the automatic control in each circuit breaker. The buss junction and buss connecting switches are non-automatic and are operated by hand. The release is mounted upon a panel with volt and ammeters which are a part of an a.c. operating switchboard. Direct current switchboards are marble or slate panels of the standard direct current type. They are usually situated separately from the high tension and within reach of the same operator who takes care of the a.c. board.

Most station transformers are of the air blast type, electric driven blowers furnishing the necessary draught. The fans are built to deliver from 10,000 to 18,000 ft. of air a minute at 700 Fahrenheit against a maintained pressure of about one ounce per square inch. They are operated by a. c. motors of from six to ten horse-power at 450 to 500 revolutions a minute. They are generally full housed with horizontal top or bottom discharge, and with one or two spiders carrying all the blades. Many station buildings are being furnished with air cleaning sets. These consist of a steam or motor driven compressor supplying a system of air piping running to outlets, conveniently placed to the various machines. The air pressure utilized for cleaning electrical machinery is usually from 30 to 40 lbs., a higher pressure, unless very carefully handled, being liable to injure the insulation of the armatures and fields. Any individual unit may be operated as follows: 1. High pressure and low pressure cylinders in series, condensing or non-condensing. 2. High pressure cylinder in service, alone. 3. Low pressure cylinder in service, alone. The most economical steam pressure has been found to be from 150 to 175 lbs. per square inch.

When installing a system for lubrication, the oils should be fed to bearings by gravity from an overhead oil reservoir. After passing through the bearings it is piped to filters in the basement, and after being filtered raised by means of pumps again to the overhead reservoir, and thus constant circulation is maintained with very little loss.

In designing a new plant, the machinery should be systematically grouped, and placed as closely together as is consistent with safe operation, in order that additional units may be installed, so as to secure joint or independent operation whichever may be desired. When the unit system is used, the line of future extension is foreseen so that rearrangement of the original installation is not necessary.

The so-called unit principle where each group of boilers, engines, turbines, and pumps, constitute in reality a separate operating station, using a common set of buss bars, offers the greatest advantage in economical operation and convenience of enlargement when increased capacity is desired.

Hamilton Electric Railway Employes' Agreement.

As the terms of the settlement of the strike of the employes of the electric railway lines owned by the Hamilton Cataract Power, Light and Traction Co. are of considerable importance to other companies, they are given very fully below. Following is the decision of the Ontario Ry. and Municipal Board:

"Whereas a certain agreement of reference dated Nov. 28, 1906, was made between the Hamilton St. Ry. Co., the Hamilton Radial Ry. Co., and the Hamilton and Dundas St. Ry. Co., and the Amalgamated Association of Street and Electrical Railway Employes of America, division 107, Hamilton, Ont., in the following words: 'We hereby agree to refer all matters and disputes between us to the Ontario Ry. and Municipal Board unconditionally.' And whereas the Board having taken upon themselves the burden of the said reference, and having duly weighed and considered the several allegations of the parties, and also the proofs, vouchers and documents which have been brought before the Board, and having heard what was alleged by the representatives of all parties. The Board on Nov. 30, 1906, awarded, adjudged and directed as follows: 'The Board, in order to serve the comfort, convenience and best interests of all classes of the community hereby orders the strike off and orders and directs all the men now out on strike to return to their respective employment, and also orders and directs the companies to receive the men back, and the companies are forthwith to put a complete service in operation.' The Board further awards, adjudges and directs said parties to sign and execute the agreements, copies of which are hereto annexed. The Board further awards that each of the said parties should pay his own costs of this reference.

Following is the agreement between the Hamilton Street Ry. Co. and the Amalgamated Association of Street and Electrical Railway Employes of America, Division

WRITE FOR NEW STOCK LIST AND SUPPLY CATALOGUE

TORONTO **H. W. PETRIE** MONTREAL

107: "In the operation of the lines of the party of the first part both parties hereunto mutually agree, as follows:

"1. That the Company through its properly accredited officers will continue to treat with its employes, who are members of the Association, through the properly accredited officers and committees of said Association.

"2. That during the continuance of this agreement the wage scale shall be as follows: Motormen and conductors shall be paid for the first year's service at the rate of 16c. an hour, for the second year 18c. an hour, and after the second year's service they shall be paid 20c. an hour. Machinists, blacksmiths and linemen shall be paid 20c. an hour. Shopmen shall be paid at the rate of 15c. an hour for the first year's service, 16c. an hour for the second year, 17c. an hour for the third year, and 18c. an hour thereafter. Carpenters, painters, armature winders, blacksmiths, helpers, trackmen and watchmen to be paid the same rate of wages as at present.

"3. All extra motormen and conductors who report at car barns and relief changes shall be guaranteed a minimum wage by the Company of $6 a week, but should an extra motorman or conductor fail to report at any time during the week, then the Company will not be required to guarantee the $6 a week.

"4. For all work performed by motormen, conductors, linemen, shopmen, machinists and blacksmiths over schedule time, and for all work performed on Sundays, they shall be paid at the rate of 2c. an hour extra.

"5. All work for extra men shall be divided as near as practicable equally among them.

"6. In order to establish a work day for motormen and conductors that will meet the Deering and other tripper conditions that prevail on the system, or may arise from time to time in the future, there shall be established: 1st. The priority system of dealing out runs; each motorman and conductor to hold his promotion in accordance with his continuous age in the service, they to have the right to select their runs in accordance with their age in the service of the Company. All runs to be posted for motormen and conductors to make their selection as to the run they may desire, at least once in each three months, commencing with Jan. 1 in each year. Should there be a vacancy between the periods of selection the men below such vacancies shall have the right to move up in accordance with their age in the service on the first of each month. 2nd. All runs shall be scheduled and divided in such manner as to give as many regular day runs as possible of 10 hours each, to be completed inside of 12 consecutive hours, with a lee way of a half trip to complete schedule. 3rd. As many runs as possible shall be scheduled and divided into runs to be known as late regular runs of 10½ hours work day, to be completed inside of 12½ consecutive hours, with a lee way of 15 minutes to complete the schedule. 4th. The balance of the runs to be known as swing and mixed runs, and to be scheduled in the shortest number of hours possible to arrange them. The swing runs to be a 12 hour work day, and to have at least one day off each week. The mixed runs to be at least a 10 hour work day. That whenever the organization, through their committees, can show to the Company that a greater percentage of the runs can be advanced from swing and mixed runs to regular early and late runs, as specified above; the change giving the same service desired by the Company; they shall have the right to do so, and on the presentation of these changes to the Company the same will be adopted by them and put into effect.

"7. In cases where employes are required by the Company to secure evidence in connection with accidents, collisions, or for any other cause, or are taken off duty by the Company to give evidence in legal or other matters, said employes shall be paid for the loss of such time at the same pay they would have received had they been working at their regular employment.

"8. Conductors to be supplied by the Company with a sufficient quantity of tickets to run their cars, providing the said conductor pays to the Company one-half of the cost of a guarantee bond covering the amount of tickets furnished.

"9. Any member elected or appointed to an office in the Association shall be permitted to serve in such official capacity without prejudice to his service or line of promotion in the employment of the Company. If a shopman is elected or appointed to office in the Association, he shall not act except when questions of interest to shopmen are concerned.

"10. In case any member of the Association is suspended or discharged for any cause whatsoever, the Company, through its manager, upon request in writing, shall grant an interview to the grievance committee and if, upon investigation, it is found by the manager that the man is not at fault, he shall be reinstated in his former position and paid for all time lost, in the discretion of the President to whom the matter can be referred.

"11. All differences between the Company and the Association shall be adjusted as follows: 1st. Any and all differences or disputes arising between them shall be submitted through the properly accredited committees of the Association to the Traction Manager of the Company in writing, and if they cannot agree the President or General Manager may be called into conference.

"12. Every motorman and conductor, who has been continuously in the Company's employ for six months prior to the letting of the contract for uniforms, shall be supplied with a uniform suit upon the following conditions: (a) It is understood and agreed that the Association, if they so desire shall have the right to purchase uniforms in the open market, but the style and color and finish are to be subject to the Company's approval, and the Company agrees to pay one-half the cost of uniforms for all men who have been in the employ of the Company six months prior to the letting of said contract. (b) It is further agreed that in case any employe leaves the service of the Company within one month after receiving his uniform, the Company retains from his wages the said one-half cost of his uniform, and any employe leaving the service of the Company within three months of the time of receiving his uniform, the Company may retain from his wages one-quarter of the cost of said uniform.

"13. The Company will fit all 10 bench open cars with eaves on both sides, the said work to be done before the cars are put in service for the season of 1907.

"14. In case of a breakage or other damage to cars while in the custody of employes, they will be liable only for such breakages or damages as have been caused by their negligence or their carelessness, any payment in respect of damage so caused to be not greater than half the actual cost of the repair thereof.

"15. This agreement and all provisions contained therein shall remain in force and be binding on the respective parties until April 1, 1909."

The agreement between the Hamilton and Dundas St. Ry. and the Hamilton Radial Electric Ry. companies and their employes are very similar to the foregoing. In the Hamilton and Dundas Ry. Co.'s agreement no change was made in the rate of wages, which remained the same as before for motormen and conductors, viz., 14c. an hour for first year' sservice; 16c. an hour for second year; 18½c. an hour for third year and thereafter, and 2c. an hour extra for extra work over schedule time and on Sundays. In the Hamilton Radial Electric Ry. Co.'s agreement the previous rate of wages was maintained, viz., 14c. an hour for first year's service; 15c. an hour for second year; 16c. an hour for third year; 17c. an hour for fourth year and thereafter, and 2c. an hour extra for extra work over schedule time and on Sundays.

Grain Elevator Notes.

Over 12,000,000 bush. of grain were transhipped at Kingston, Ont., during the season of navigation of 1906.

An agitation has been started in Alberta, with a view of having a system of elevators owned and operated by the provincial government.

The British America Elevator Co. has been registered in the Province of Saskatchewan, under the provisions of the act relating to foreign corporations.

The Vancouver Board of Trade, at a meeting held Jan. 3, expressed an opinion in favor of the establishment of a grain elevator having a capacity of 250,000 bush., at that port, by the Dominion Government.

The Grand Trunk Pacific Elevator Co., incorporated under the Dominion Companies' Act, has been registered in Ontario under the act respecting the licensing of extra provincial corporations. W. L. Morton, solicitor, Fort William, Ont., has been named its Attorney.

We have been advised that arrangements have not been completed for the rebuilding of the workhouse at the C.P.R. elevator D, Fort William, Ont., which was recently burned. The plans for the new building are being prepared in the company's engineering department.

Figures compiled at Winnipeg show that there are over 1,200 elevators at interior points in Manitoba, Saskatchewan and Alberta. Notwithstanding the largely increased number of elevators as compared with 1905, they were insufficient to handle the grain crop of the year.

An agitation has been started in Minneapolis, Minn., for the purpose of having special wheat trains from Canadian points to that city run regularly between Sept. 1 and Feb. 1. A. L. Porter, Hanley, Sask., is representing the Northwestern grain growers in connection with the movement.

The International Waterways Commission concluded a two days' joint session at Toronto, Jan. 5, at which an agreement was reached by which the city of Chicago is to be allowed to divert a certain quantity of water from Lake Michigan for the purposes of the Chicago drainage canal; and recommending that on account of the inaccuracy of existing charts the International boundary along Lake Erie be surveyed either by the Commission or by some other authority to be appointed specially for that purpose. The next question which will be discussed by the Commission will be the construction of dams at the lower outlet of Lake Erie so as to raise the levels. Lake marine interests have been urging the matter for a considerable time, but no definite plan has been suggested. In connection with the report R. Bickerdike, M.P., will bring before Parliament a question of the effect that the diversion of so much water to the Chicago drainage canal will have on the level of water in the St. Lawrence.

Trolley Tug Boat at Niagara Falls.

A trolley propelled tug boat is operated by the Canadian Niagara Power Co. at its works, Niagara Falls, Ont. The hull is of wood, 40 ft. long, 10 ft. beam, and 6 ft. draught, the propeller being 5 ft. in diameter. The electrical equipment consists of a 125 k.w. air blast transformer with ratio of reduction 1,100 volts to 220 volts. There are several low voltage taps on the transformer which are used for bringing the motors up to speed or for running at a reduced speed. There are two motors, known as Westinghouse no. 106 alternating current design, to develop 75 h.p. each at a speed of 1,050 revolutions. This type of motor was developed by the Westinghouse Co. for alternating current street railway service. The motors are geared to the extension of propeller shaft through pinions and gears having a ratio of 16 to 66, thus at full load the motors will develop 150 h.p. at about 1,000 revolutions of armature, or 240 revolutions of the propeller shaft. The motors and transformer, which are located on the boat, are arranged to be cooled with forced draught supplied by a 1 h.p. alternating current motor direct connected to a blower. Air pipes with suitable dampers for properly distributing the air flow lead from the blower to the motor and transformer cases. In this manner cold air is forced through the portion of the motors and transformers near the windings. This is especially necessary in a boat equipment, as the hull offers very little opportunity for radiation necessary in all self-cooled electrical apparatus. The trolley structure consists of two no. 2/0 trolley wires supported parallel to each other and 2 ft. apart at a distance of 60 ft. above the water. The trolley wire extends the entire length of the forebay, a distance of about 600 ft. These trolley wires are secured through strain insulators and current at a voltage of 1,100 volts is conducted to them by duplex no. 3/0 lead sheathed cable, which is brought up to the trolley wires alongside of one of the guy rods of the trolley poles. Power for operating the boat is supplied from the main switchboard at 11,000 volts and is stepped down through a 125 k.w. water-cooled transformer having a ratio of 11,000 to 1,100 volts. Suitable meters, switches, circuitbreakers, etc., are installed in the 1,100-volt circuit for the purpose of controlling the current and measuring the power used by the equipment. The hull was constructed in Buffalo, N.Y. The electrical equipment was supplied by the Canadian Westinghouse Co. The installation of the machinery in the boat and the construction of the overhead trolley equipment was carried out by the Canadian Niagara Power Co.'s engineers.

A New Steamship Route.

The Great Britain, Ireland and Canada Express Route is the title of a syndicate formed in London, Eng., for the purpose of establishing a fast line of steamers between Blacksod Bay, County Mayo, Ireland, and Halifax, N.S., with the necessary railway connection in Ireland. It is stated that Chaplin, Milne and Grenfell, bankers, London, Eng.; Linton-Clarke Co., engineers, Glasgow, Scotland; Vickers, Son & Maxim, shipbuilders, Barrow-in-Furness, Eng.; and Swan & Hunter, shipbuilders, Newcastle-on-Tyne, Eng., are interested in the project, and that Lord Strathcona has intimated his willingness to take stock to the extent of $500,000 in the company. As set out it is proposed to establish a line of steamers capable of crossing the Atlantic in 3½ days at an average speed of 25 knots an hour; to establish ferries between the east coast of Ireland and the west coast of Scotland by means of steamships so constructed as to be capable of conveying passenger and goods trains entire from port to port without disturbing passengers or unloading trucks; the construction of such railways as may be necessary in conjunction with existing lines; to provide for an express passenger service between Blacksod Bay and the east coast at a speed of not less than 50 miles an hour.

The cost of four steamers necessary to maintain a service of two trips a week each way, with a fifth steamer ready for emergencies, is estimated at £4,000,000. The ocean distance between Blacksod Bay and Halifax is 2,100 miles, and with 25-knot steamers the ocean service as suggested could be maintained. The present nearest railway point to Blacksod Bay is Collooney, on the Midland, Great Western Ry., a distance of 88 miles, and the estimated cost of the construction of this line is put at £880,000 as a single line. The existing line between Collooney and Enniskillen is not in a fit condition for traffic such as is proposed, and unless it was brought up to the standard of the projected line, a new line would have to be constructed. Between Enniskillen or Clones and Belfast, the proposal is to obtain running powers over the Great Northern Ry. of Ireland. In Belfast it would be necessary to construct a connection between the Great Northern Ry. and the Belfast and Northern Counties Division of the Midland Ry. of England, over which running powers would be obtained from Belfast to Larne. The distance between these two stations in Belfast is about two miles, and although there is the old Belfast Central Ry., which was constructed to give a connection between the two lines, it has only been used for freight purposes for years, and is, neither from its location or other conditions, likely to form part of a through express route. In 1892 elaborate plans were prepared by H. O. Lanyon, C.E., Belfast, for a central railway station, but as there is but little travel through Belfast, the three railways having their terminals in that city would not join in the cost of a work which would be little, if any, financial advantage to either of them. At Larne, some 14 miles from Belfast, and at Stranraer in Scotland, facilities for ferry steamers would have to be constructed at an estimated cost of £200,000, and three ferry steamers are considered necessary at a cost of £130,000 each. A fast steamship service is maintained by the railway companies between Larne and Stranraer, it having been found that these points are more convenient than Donaghadee in Ireland, and Port Patrick in Scotland, which are nearer, and between which the mail steamers plied about 1870. The total estimated cost of establishing the service as given by the promotors is £6,470,000, but there is one omission which they have made. It is that the gauge of the Irish railways is 5 ft. 3 in., while that of the English and Scottish railways is 4 ft. 8½ inches, so that the ferrying of freight and passenger trains entire will either have to be abandoned, or an extra expenditure incurred to lay a third rail between Larne and Enniskillen or Clones, so as to permit the English standard gauge rolling stock to be operated over existing Irish lines. The promoters evidently do do not regard as feasible the construction of a tunnel between Larne and Stranraer, for which plans have been made and a considerable sum expended upon surveys and trial borings.

In connection with this project a meeting was held at Ballina, Ireland, for the purpose of considering proposals to submit to the Imperial Parliament an application for the passing of an act entitled the Collooney, Ballina, Belmullet Ry. and Piers Act, authorizing the construction of 100 miles of railway in Sligo and Mayo, and the construction of a deep water pier at Blacksod Bay.

R. Bickerdike, M.P., Montreal, is the Canadian representative of the syndicate, and he is bringing the matter officially before the Dominion Government. Lord Strathcona has continually been impressing upon the Government the necessity for establishing a really fast line of steamers, and during his present visit to Canada has no doubt discussed the matter with the Government.

St. Lawrence and Chicago Steam Navigation Company.

The report presented at the annual meeting at Toronto Jan. 9 stated that the season of 1906 on the lakes was a fairly good one, but the falling off of the deliveries of grain at Fort William caused a decided drop in freights about the first week in Nov., and made the closing rates of freight very low. The directors have entered into a contract for the construction of a steamer which it is expected will be ready for the fall trade next season. It has been decided to issue $187,700 of new stock, and to offer the same to the present shareholders in the first instance at par.

Dominion Marine Association.

The annual meeting was held at Ottawa, Jan. 16, the President, J. A. Cuttle, of the Montreal Transportation Co., occupying the chair, the others present being S. C. Calvin, Calvin Co., Ltd.; J. and T. Donnelly, Donnelly Salvage and Wrecking Co.; W. Overton, Dominion Fish Co. and Northwest Navigation Co.; E. A. Hall, F. E. Hall & Co.; W. E. Bishop, Hamilton Steamboat Co.; E. E. Horsey, Lake Ontario and Bay of Quinte Steamboat Co.; C. A. Jaques, Montreal and Great Lakes S.S. Co., Montreal and Lake Erie S.S. Co.; D. J. McIntosh, Niagara, St. Catharines and Toronto Navigation Co.; J. Hannan, J. P. Kavanagh, C. E. Loomis, Ogdensburg Coal and Towing Co.; J. H. Hall, R. T. Holcomb, Ottawa Forwarding Co.; R. W. Shepherd, F. Elliot, Ottawa River Navigation Co.; D. Murphy, Ottawa Transportation Co.; W. E. Lawlor, W. Lawlor & Son; C. J. Smith, G. Johnston, Richelieu and Ontario Navigation Co.; D. Noonan, Rideau Lakes Navigation Co.; J. H. G. Hagarty, St. Lawrence and Chicago Steam Navigation Co.; G. Sommerville, Toronto and Montreal Steamboat Co.; G. B. Greene, Upper Ottawa Improvement Co.; F. King, Secretary-Treasurer of the Association; Acton Burrows, Managing Director, RAILWAY AND MARINE WORLD.

The report of the Executive Committee upon the work of the Association during the past year showed that a large number of matters had been given consideration, and that definite action had been taken in several of them, which had resulted in improved conditions.

LEGISLATION.—In connection with the passing of the Lord's Day Act it was impossible to procure the complete relief desired by the Association, and pressed upon the consideration of Parliament by deputation, memorial and by conference, but substantial recognition was given to the arguments as advanced, and the act will be obeyed with less difficulty than if it had been passed as introduced. Acting in conjunction with the Shipping Federation, a protest was made to a proposed amendment of the pilotage laws to make vessels trading between Montreal and Father Point liable to compulsory pilotage dues, and the bill was withdrawn. Subsequently the draft of a new bill was submitted amending the pilotage law in several particulars, and omitting the clause exempting vessels under 16 ft. draught trading between the Great Lakes and St. Lawrence ports, but conferring upon the Montreal Pilotage authorities the power to decide what vessels should be exempt. The executive filed an objection to the withdrawal of the statutory exemption now enjoyed, and if the bill is introduced at the present session of Parliament, it will require careful consideration by the Association. The bill brought forward by the Department of Marine requiring all barges, whether propelled by sail or not, to carry certificated masters, was objected to by the Association, and has been dropped for the present. Further correspondence took place upon the subject of extending the Port Warden's Act to apply at grain shipping ports on inland waters, and the committee's views expressed against the proposal were promised consideration. In connection with this matter a bill, no. 35, introduced at the present session of Parliament, providing for a loading on barges and an official inspection to secure seaworthiness and proper loading, should be considered. A further step in advance had been taken in connection with the efforts made to obtain for all Canadian vessels the exemption from the U.S. tonnage taxes to which they are entitled by the reciprocal exemption clauses of the U.S. statute, and the time being appropriate the abolition of the hospital tax on vessels in Quebec was urged. A bill passed the U.S. Senate, which would have rendered Ontario vessels liable to the tonnage tax, and destroyed the chance of relief from the hospital tax in Quebec, but representations were made by this Association, the Lake Carriers' Association, the Association of Passenger Steamboat Lines, and the Canadian Government, with the result that the bill was not reported to the House of Representatives, but stood over to the present session. The committee of Association of Passenger Steamboat Lines is taking active measures to oppose the bill, and it is not likely that it will be passed this session, at any rate so far as it affects the Great Lakes and St. Lawrence. Members of the Association are asked to urge upon their members of Parliament the importance of taking steps to have the hospital tax in Canada abolished. Further correspondence had taken place with respect to the U.S. head tax, and the responsibility of a steamboat under its implied contract to land a passenger to whom it has sold a ticket to a port in the U.S. The Canadian Court of Appeal had decided the point adversely to the carrier, and the latter must therefore protect himself in making his contract to carry. A bill to amend the Act respecting masters and mates providing that none but British subjects may hold certificates, has been introduced at the current session of Parliament, and has been referred to a special committee. The executive committee is of opinion that the bill should be opposed and will attend before the committee when the sittings are held. The bill to amend the Steamboat Inspection Act in regard to the employment of certificated engineers, which has been brought forward for several years past, has been again introduced in the House of Commons, and as before is being opposed by the Association.

AIDS TO NAVIGATION.—The committee on aids to navigation appointed at the last annual meeting compiled and adopted, from many recommendations, a complete list of aids and improvements required between the head of the lakes and Montreal, subdividing this list, and making the recommendations in due course by memorial to the Lighthouse Board, the Department of Public Works and the Department of Railways and Canals respectively. A special report of this committee gives a list of aids recommended with the decision of the departments as follows:—

Northport Shoal, Bay of Quinte.—Gas buoy to be placed on opening of navigation.

Presq' Ile Point.—Two inch diaphone under construction.

Brighton Harbor.—The matter of lighting at Salt Point is under consideration.

Trenton Harbor.—Tenders have been called for dredging at the dock, and some additional buoys will be placed during the coming season.

Belleville Harbor.—Additional dredging ordered.

Rideau Lakes and River.—Some dredging has been done between Kingston and Brewer's mill, and more will be done during the summer. No action has been taken upon the recommendation for additional lights at the locks between Smith's Falls and Merrickville.

Ottawa River.—Dredging has been done at many points; two additional range lights have been erected, and the electric lighting of the Carillon and Grenville canal undertaken. Improvements in the lighting between Montreal and Ottawa, generally, is asked for.

Long Point, west end of Wolfe Island.—Gas buoy, not approved.

Suez Channel, above Dickenson's Landing.—Channel will be buoyed in 1907.

Lake St. Louis.—Two gas buoys will be placed between Windmill Point on Ile Perrot and Lightship No. 3, during the coming season.

Brockville Narrows.—Gas buoy abreast of first island above Brockville to be placed next season.

Port Colborne Range Lights.—The lighting to be changed during the coming season.

Port Dalhousie.—Request for a fog horn approved.

Surprise Shoal, Georgian Bay, and other points in Lakes Huron and Superior.—Recommendations approved and a suggestion made that others be asked for.

SUBMARINE SIGNAL CO.

88 BROAD STREET
BOSTON, MASS.

North Shore of Georgian Bay and Lake Huron.—Consideration should be given to a proposal to light and buoy this route.

Port Colborne Harbor.—The widening and deepening of the entrance is asked for.

Gun Shoal, Kingston Harbor.—Removal of shoal asked for.

Lake St. Francis.—Black spar buoy at Lancaster bar to be replaced by a gas buoy.

Belleville Bridge.—Better protection for channel through draw of bridge to be provided.

Goderich Harbor.—Electric light to be placed on breakwater at harbor entrance.

Shoals in St. Lawrence.—Shoals at Cardinal canal removed.

Toronto Harbor.—Proposals for the improvement of entrance to the harbor are under consideration.

With reference to recommendations made by a deputation of the Association at the time of the last annual meeting in Ottawa, it may be noted: That the order-in-council regarding electric traction on the Cornwall canal was modified to exempt mail and passenger boats, tugs, pleasure yachts, and government steamers from the requirement to use the electric traction; and that on the request for protecting dams and fenders at bridge piers on the Lachine canal the department undertook to add the desired protection in all cases where it had not already been furnished.

INTERNATIONAL WATERWAYS COMMISSION.—The various subjects discussed at the sessions of International Waterways Commission are commended to the serious consideration of the new executive committee.

COASTING LAWS.—Alleged breaches of the coasting laws in connection with the carriage of grain from Upper Lakes ports, have been brought to the notice of the Government. It might be noted in this connection that the department has decided that the carriage of a cargo of grain from Fort William to Port Huron, Mich., in a U.S. vessel, and thence into Canada by G.T.R. for Canadian consumption, is not a violation of the law.

BILLS OF LADING.—The committee is of opinion that it would be advisable for vessel owners to agree to insist upon the insertion in bills of lading of Sec. 3 of the Harter Act (U.S.), as follows: "That if the owner of any vessel transporting merchandise or property to or from any port in the U.S. shall exercise due diligence to make the said vessel in all respects seaworthy and properly manned, equipped and supplied, neither the vessel, her owner or owners, agent or charterers, shall become or be held responsible for damage or loss resulting from faults or errors in navigation or in the management of said vessel, nor shall the vessel, her owner or owners, charterers, agent or master be held liable for losses arising from dangers of the sea or other navigable waters, acts of God or public enemies, or the inherent defect, quality or vice of the thing carried, or from insufficiency of package or seizure under legal process, or loss resulting from any act or omission of the shipper or owner of the goods, his agent or representative, or from saving or attempting to save life or property at sea, or from any deviation in rendering such service." The Winnipeg Grain Exchange has refused to assent to the proposal to incorporate this clause in bills of lading.

GRAIN CLEARING HOUSE, ETC.—The secretary is keeping in touch with the proceedings in connection with the proposal to establish a grain clearing house for despatch in loading and unloading, and the adjustment of shortages, and the outcome of the action will be awaited with interest.

ROYAL COMMISSION ON GRAIN TRADE.—Statements showing in detail for each fleet engaged the delays experienced in unloading, the actual out-turns in question and various other particulars were prepared and presented to the Commission.

MISCELLANEOUS.—The Association renewed its request to the Government to take steps to secure an extension of the period of navigation on the Upper Lakes, so as to correspond with the natural opening and closing conditions on St. Mary's River; a formal protest against the withdrawal of water from Welland Canal for power development purposes has been filed. The committee recommends that the Government be asked to amend the Inland Seamen's Act so as to render it legal to carry a seaman without articles, and so as to impose the same penalties upon the seaman at least during the round trip to the port of engagement, as he is now subject to when lawfully engaged under the act. The grain section of the Association has continued to devote attention to matters of special interest in the business and in connection with the routes traversed.

P154

A. A. WRIGHT,
President Dominion Marine Association.

MEMBERSHIP AND EXPENSES.—The tonnage entered in the Association is 110,343 net registered tons, of which 76,570 is steam and 33,773 is barge and sailing property. The new vessels put in commission during the course of the season are not included in this, and with those recently launched, may be expected as additions to the list in 1907. The total tonnage shown, however, is lightly, increased above that of the precedings year and the treasurer's report shows a revenue just sufficient to meet expenses. The present rate of assessment should therefore be continued.

The report was considered clause by clause, and the following resolutions arising out of the report and its discussion were adopted:

RESOLVED not to oppose the proper imposition of a load-line on vessels, said to be proposed by bill 35, respecting the loading and inspection of barges.

RESOLVED to postpone the appointment arranged with the Premier and the Minister of Marine and Fisheries, regarding hospital taxes, etc., until the Shipping Federation of Canada, which had failed at the last moment to complete its arrangements to join with this Association, could be represented.

RESOLVED to make no further opposition to the present bill respecting masters and mates, introduced in the House of Commons by Mr. Lancaster.

RESOLVED to present to the Government protests similar to those already made to the International Waterways Commission against any withdrawal of water or any action upon the Great Lakes, whether in connection with the Chicago Drainage Canal or elsewhere, which might have the effect of lowering the levels in the Welland Canal or the St. Lawrence and its canals.

RESOLVED to petition for legislation in Canada similar to the Harter Act in the United States, so as to provide vessel-owners with similar protection against the negligence and perils enumerated.

RESOLVED to protest against the proposed further withdrawal of water for power purposes from the Welland or any other canal, and to urge the Government to assume responsibility for accidents arising in any way from such withdrawal of water. A committee, consisting of Messrs. Murphy, Donnelly, Smith and the Secretary was appointed to present the matter to the Department of Railways and Canals in the afternoon.

RESOLVED to ask for the legislation proposed in the report regarding the engagement of crews, but to make it clear that both the benefits and penalties proposed are to be enjoyed and borne by both parties, just as they would be where articles are signed.

The report of the Executive Committee, subject to any alterations made by the above resolutions, was adopted.

The Secretary-Treasurer's report gave the following figures: Balance from 1905, $1,307.31; interest, $32.04; membership fees, $1,700,35; total receipts, $3,039.70; disbursements, $1,688.99; balance on hand, $1,350.71. The rate of assessment for 1907 was fixed the same as for 1906.

The President spoke very highly of the valuable services performed by the Secretary-Treasurer in connection with legislation and other matters, and $200 was voted him as a bonus in addition to his regular salary, for special work done during the past year.

It was resolved to ask the Grand Trunk Pacific Ry. to amend its plans for a bridge over the Kaministikwia River at West Fort William, so as to provide a wider span than 80 ft., and also to communicate with the Premier, the Ministers of Public Works, Marine, and Railways and Canals, and with the Railway Commission, referring to the matter and asking due consideration in all such cases for the requirements of the largest modern vessels.

It was resolved that the Dominion Marine Association, in annual general meeting assembled, re-affirms its opinion that the immediate enlargement and improvement of the Welland Canal is urgently necessary, and that copies of this resolution be forwarded to the Premier, to the Minister of Railways and Canals, and to the Kingston Board of Trade.

It was resolved that the Government be asked not to reduce the capacity of the proposed Port Colborne grain elevator or elevators, but to proceed promptly with the work of erection and to provide at least the capacity originally intended as soon as possible.

The following Committee on Aids to Navigation was appointed: A. A. Wright, C. J. Smith, D. Noonan, R. W. Shepherd, L. L. Henderson, T. Donnelly, S. Crangle, H. H. Gildersleeve, G. T. Marks and the President.

IDEAL RAILWAY FENCING

MADE TO LAST

Large gauge (No. 9) hard steel wire is used throughout, decreasing cost of maintenance, insuring durability and serviceability.

IDEAL FENCE has been adopted as a standard by all the leading Railways in Canada. More IDEAL is used by Railways this year than all other makes combined.

J. W. TOWNSEND

190 Robie Street
HALIFAX, - N.S.

A suggestion from S. C. Calvin for telephone connection from the lights on the False Ducks, Lake Ontario, to the mainland, the necessity for which was proved by frequent recent occurrences, was referred to the committee last mentioned.

A vote of thanks was tendered the retiring President, J. A. Cuttle, who expressed his wish to surrender his place on the executive committee in favor of some other member.

The following officers were elected for the current year: President, A. A. Wright; First Vice-President, C. J. Smith; Second Vice-President, G. T. Marks; other members executive committee: T. Donnelly, H. H. Gildersleeve, J. H. Hall, L. Henderson, C. A. Jaques, J. P. Kavanagh, D. Murphy, J. Playfair, F. Plummer.

On adjourning the representatives attending the meeting repaired to the Laurentian Club, where, as last year, they were most hospitably entertained at luncheon by Dennis Murphy.

In the afternoon the deputation appointed waited upon the Deputy Minister of Railways and Canals, and presented the request regarding the withdrawal of water from canals, referring particularly to the application of the Hamilton Cataract Power, Light and Traction Co. for more water power from the Welland. The deputation received an emphatic assurance from Mr. Butler that they had nothing to fear in the matter, and that the Department would adhere to the principle that the canals must be absolutely protected for their primary purpose, viz., the safe transportation of vessels. The Department could not entertain the proposal that it should assume responsibility for accidents, as the question of negligence and fault must be determined on the facts of each case, but everything possible would be done to preserve and improve the safety of navigation. The appointment with the Premier and the Minister of Marine was postponed until the Shipping Federation could join in a deputation. Regarding the proposed amendment of the Inland Waters Seaman's Act, the Minister of Marine has already expressed his appreciation of the vessel-owners' difficulty, especially on short runs, and has asked the Secretary for a draft of such amendments as are proposed to meet the cases alluded to.

In connection with the discussion by a special committee of the House of Commons of the bill respecting certificates to masters and mates, it was stated Jan. 15, that of the 3,659 coasting, inland and ocean certificates issued in the Dominion since Jan. 1, 1906, there had been 154 issued to foreigners after they had been domiciled in Canada for three years. The bill was opposed by the members for Essex and West Lambton, who stated that over 100 men, whose families were domiciled in their constituencies, held certificates in the U.S., and if this bill were passed it would lead to reprisals. The Government will announce its policy on the bill at a future date.

J. B. Black, M.P., asked the House of Commons recently to assent to a resolution requesting the Government to take the necessary steps to secure the cancellation of the existing coasting privileges now enjoyed by foreign countries under Imperial treaties. The discussion brought out the fact that a big share of the coasting trade of the Maritime provinces, and between the Maritime provinces and Montreal, had got into the control of Norwegians and Swedes, who worked for less than Canadians, lived poorer and brought all their supplies from their own countries. The Premier stated that the matter was under the consideration of the Government, and the motion was withdrawn.

Marine Notes from Twin Ports.

Our Port Arthur, Ont., correspondent writes: "The total grain shipments out of Port Arthur and Fort William for the whole season of navigation of 1906, April 17 to the close Dec. 12, were as follows:

Wheat carried in Canadian vessels	31,978,334.50	bush.
Oats carried in Canadian vessels.	5,741,564.28	"
Barley carried in Canadian vessels	683,759.44	"
Flax carried in Canadian vessels	284,923.45	"
Wheat carried in Foreign vessels.	12,398,003.40	"
Flax carried in Foreign vessels..	97,130.51	"
Total	51,183,718.	"

"The destinations were as follows:

	Wheat bush.	Oats bush.	Barley bush.	Flax bush.
Owen Sound	1,817,688	2,465,586	76,850	49,108
Midland	3,527,309	115,195	.....	.....
D. Harbor	5,246,248	793,991	17,578	.....
Collingwood	690,618	.....	30,737	.....

Pt. Huron	1,473,108	.....	.....	.....
Buffalo	13,535,739	.....	.....	.....
Erie	1,371,754	.....	.....	.....
Chicago	71,307	.....	.....	.....

"The wheat shipments showed an increase over 1905 of 3,350,493 bush., other grain an increase of 5,301,776 bush. Wheat shipped to Canadian ports showed an increase of 640,087 bush., and other grain an increase of 5,516,457 bush. Wheat shipped to foreign ports showed an increase of 1,710,406 bush., other grain shipped to foreign ports showed a decrease of 117,550 bush. The total wheat shipments were not up to expectations; the very small export demand during Nov. and Dec. resulted in a great falling off in the movement. There will consequently be a large amount of the present year's crop to come forward during 1907. The weather during the last three weeks of navigation was unusually stormy and resulted in a number of bad disasters, the steamers Theano, Monarch and Golspie becoming total losses on Lake Superior, fortunately with little loss of life, but entailing great sufferings on the crews, several of the crew of the Golspie being still in hospital at Sault Ste. Marie. This latter wreck is to be investigated by the Government, and it is to be hoped that the blame, if blame there be, will be brought home to the rightful shoulders, as from present appearances, and the stories told by the crew, it would appear to have been the most inhuman act in the whole annals of the lakes."

Atlantic and Pacific Ocean Marine.

The Furness Line S.S. Evangeline, from London, Eng., for Halifax, N.S., put into Queenstown, Ireland, Jan. 7, disabled.

Dr. C. Neville, who died at Sutton, Surrey, Eng., recently, was for a number of years medical officer on the Allan Line S.S. Parisian.

The C.P.R. has purchased the Liverpool tug Cruizer, to act as a tender to the company's steamers at St. John, N.B., and Quebec.

The Elder-Dempster Co.'s steamship line between Canadian and Mexican ports is attracting an increasing amount of freight, according to a statement made by D. W. Campbell, Montreal, the manager.

The S.S. Briardene, which was towed into Halifax, N.S., disabled, Dec. 7, has been repaired, coming out of dock Jan. 7. She then proceeded to Liscombe, N.S., to complete loading for Bordeaux, France.

C.P.R. officials state the management does not contemplate removing the English end of its steamship business from Liverpool at present, neither does it contemplate putting on steamers to run into Manchester, Eng.

Jas Piper, for many years in the service of the Allan Line Steamships at Quebec, died in hospital there, Jan. 5, aged 75. Mrs. J. B. Lambkin, wife of the Assistant General Passenger Agent, Intercolonial Ry., Halifax, N.S., is a daughter.

The C.P.R. S.S. Empress of Ireland touched bottom in the Mersey, Jan. 4, and got off without injury early in the following morning. The company's officials say that the passengers were not aware of the fact that the steamer was ashore.

A bottle was found on the beach at Castlerock, Derry County, Ireland, Jan. 1, containing a message signed by several members of the crew of the Allan Line S.S. Huronian. This steamer sailed from Glasgow for St. John, N.B., Feb. 11, 1902, and has never been heard of since.

An investigation held at Liverpool, Eng., resulted in a finding that the Thomson Line S.S. Nemea, abandoned on fire, at sea, Oct. 16, on the voyage from St. John, N.B., to Manchester, Eng., carried an excessive deck load of lumber. The officers were found not to be to blame in any way.

Robert Reford & Co. (Ltd.), Montreal, agents for the Donaldson, Thomson and Lord lines of steamers trading from various English, Scotch and Irish ports to Canada, have arranged to open an office in Quebec for freight and passenger business, May 1. S. Barrow, of Quebec, will be the local representative.

The C.P.R. S.S. Lake Michigan was seized at Halifax, N.S., for a breach of the customs regulations, Jan. 4, but was released on putting up a deposit of $400 to cover any fine. The offence is said to be the breaking of a seal and the removal of stores between St. John, N.B., and Halifax, the steamer being then trading coastwise.

Capt. Worsnop left Ottawa, Jan. 14, for Vancouver, B.C., to complete arrangements for the starting of the Pacific ocean steamship service to Mexico. The first steamer, the Georgia, has left England, and will make her first trip in March between Mexico and Victoria and Vancouver, and the second steamer, the Lonsdale, follows.

The marine casualties for the season of 1906 on the Atlantic seaboard, the Gulf and River St. Lawrence, show a total of 30, against 21 in 1905; 17 vessels, representing a tonnage of 18,649, were abandoned as total wrecks. There were 13 casualties on the River St. Lawrence and Gulf, of which two, the ship Dybraag and the barque Magda, were total losses.

A recent issue of the Marine Engineer, published in London, Eng., stated that the C.P.R. was having two steamships for its Pacific Ocean trade built at Philadelphia. The report is evidently an error, as although two steamships are under construction at Philadelphia for the Pacific coast, they are for the Puget Sound Steamship Co., and not for the C.P.R.

The capital of the Bucknall Steamship Lines, Limited, has been reduced by the British Chancery Court by £765,000. The loss was occasioned by the shrinkage in value of vessels, and the decreased business. The company was largely engaged in trading to South Africa. It is now operating two of its steamers—the Bucentaur and the Pondo—between Vancouver and New Zealand.

The White Star Line has arranged to run a bi-weekly service of steamers between New York and Great Britain, the Saturday sailings being to Liverpool, and the Wednesday sailing to Southampton, calling at

Temiskaming and Northern Ontario Ry. Commission.

SEALED tenders addressed to the undersigned at 25 Toronto street, Toronto, and endorsed, "Tender for Grading, Ballasting, etc.," will be received up to five o'clock p.m. of Wednesday, the thirteenth day of February, 1907, for the construction of an extension of the Temiskaming and Northern Ontario Railway, including clearing of right-of-way, bridging, grading, ballasting and tracklaying, complete and ready for operation, in accordance with plans and specifications prepared by the Chief Engineer of the Commission, such extension being from a point on the T. & N.O. Railway, 100 miles north of New Liskeard, northerly or north-westerly direction, to a point forming a junction with the Grand Trunk Pacific (Transcontinental) Railway, a distance of forty (40) miles, more or less.

Plans and specifications of the work may be seen at the office of the Chief Engineer of the Commission at North Bay

The rails, fastenings and ties will be delivered to the contractor at the southerly end of the work (say 100 miles north of New Liskeard).

Tenders will not be considered unless made on the form supplied by the Commission and signed with the actual signatures of the parties tendering. An accepted cheque on a chartered bank for $10,000.00, payable to the order of the Chairman and Secretary-Treasurer of the Commission, must accompany each tender

The cheque of the party whose tender is accepted will be forfeited if such party fails or declines to enter into a contract in form satisfactory to the Commission, or fails or declines to furnish security to the satisfaction of the Commission for the due completion of the work at the rates and on the terms stated in the offer submitted.

The cheques of parties whose tenders are not accepted will be returned to them on the contract being awarded. The Commission is not bound to accept the lowest or any tender. Dated at Toronto this seventh day of January, 1907.

H. W. PEARSON, Secretary-Treasurer.

Papers inserting this advertisement without authority will not be paid for same.

ARMAND LALONDE, Can. P. & F.A., Montreal, P.Q.

Plymouth and Cherbourg. This alteration has been made in order to secure a share of the heavy continental tourist traffic of which the French and German lines now have the monopoly.

A. Harriman, an English iron moulder, is suing the Allan Steamship Co. for $8,912.75 damages. He was a steerage passenger on the Carthagenian, and claims that he has been permanently injured by not being provided with proper accommodation; that the water entered the cabin which he occupied with 12 other passengers (contrary to the provisions of the act) and reached his berth, in consequence of which he contracted inflammatory rheumatism and has been unable to follow his regular employment in consequence.

J. Thom, Manager of the Dominion Line in Montreal, states that he has been informed from the head offices of the company in Liverpool, that two new steamships had been ordered for the St. Lawrence route to meet the demands for high-class and speedy vessels. The new steamships will be about 12,000 tons capacity, and will have a speed of 17 or 18 knots an hour. They will be built by Harland & Wolff, Belfast, Ireland, which has an arrangement to build all vessels for the lines owned by the International Mercantile Marine Co.

A. Piers, Manager C.P.R. Steamships, sailed for Great Britain, Jan. 15, and expects to be absent for some time. He stated in Montreal, Jan. 9, that one of the purposes of his visit was to arrange for the enlargement of the company's fleet. The plans for this were not sufficiently far advanced for an official statement to be made. Press reports state that the Empress of Britain and Empress of Ireland are to be transferred to the Pacific Ocean, and are to be replaced on the Atlantic by somewhat larger and faster steamers; and another report says that the company is desirous of acquiring the Donaldson Line, trading between Canadian ports and Glasgow, Scotland.

Maritime Provinces and Newfoundland.

The iron ship Eskasoni, formerly owned at Sydney, N.S., and sailed by Sydney masters, has been sold to be broken up at Hong Kong.

C. Gunn has been appointed wharfinger of the Government wharf at Hampton, N.B., and L. D. Curry, to a similar position at Harbourville, N.S.

The St. John, N.B., river tug Sea King, owned by Batley Bros., was badly damaged by fire, Jan. 8, while lying at her winter berth, Indiantown.

The str. Amelia, which was put on the Nova Scotia eastern shore run to replace the burned str. Strathcona, went ashore near Guysboro, N.S., Jan. 14.

Commander E. B. Tinling, R.N., at one time a resident of Winnipeg, and latterly examiner of masters and mates at Halifax, N.S., died there Dec. 23.

C. Smith has been appointed wharfinger at Port Hood, N.S.; D. Livingstone, wharfinger at Whycocomagh, N.S., and Capt. Jas. Ryan, harbormaster at Liverpool, N.S.

The Three Rivers Steamship Co., of Prince Edward Island, is having a steamer built at Shelburne, N.S. The hull will be towed to Yarmouth, N.S., where the engines will be fitted.

The Reid-Newfoundland Co.'s str. Glencoe struck on an island just outside Port aux Basques, Nfld., sustaining some injuries, which necessitated her going to St. John's Nfld., for repairs recently.

The Newfoundland whaling steamers are being dispersed. The St. Lawrence is about due at Victoria, B.C.; the Fin and Avalon have been sold to go to Japan; and the Neptune has been sold to a Norwegian firm.

The company organized to take over the Eastern Steamship Co. and other companies controlled by C. W. Morse has been registered at Portland, Me., as the Consolidated Steamship Lines Co., with a capital of $60,000,000.

Two steel hopper barges are being built for the Dominion Government by I. Matheson & Co., New Glasgow, N.S. Their dimensions are: length over all, 105 ft.; breadth, 22 ft.; depth, 8 ft.; capacity, 200 cubic yards.

The Department of Marine has decided that the evidence adduced fully proves the charges laid against Capt. Pratt of the cruiser Curlew. Action will be taken on this finding either by calling upon Capt. Pratt for his resignation, or by dismissing him from the service.

The Swedish str. Garibaldi, coal laden from Port Morien, N.S., for Wabana, Nfld., went ashore at St. Pierre, Miquelon, Dec. 23. She was floated by the Sydney wrecking tug, Douglas H. Thomas, and reached Halifax, Jan. 5, under her own steam, for repairs.

During a heavy storm which raged on the Newfoundland coast Dec. 25, a number of vessels were considerably damaged. The fishing vessels, for the most part, remained in port. The schooner Mendora was driven ashore near St. John's, and was afterwards burned.

The Belle Isle Steamship Co. has purchased the str. Mary, now lying at Quebec, from the White Friars Steamship Co., and will take her to St. John's, Nfld., at the opening of navigation. The Mary will carry freight and passengers between St. John's, Wabana and Conception Bay points.

The Cape Breton Steamship Co.'s str. Beatrice, which was bought in Ireland in 1906, to replace the Baines Hawkins, lost off Scattarie, Mar. 10, ran on Cranberry Head, Sydney, Dec. 24, and was badly damaged. A survey made Dec. 30, showed that she may be successfully floated.

There is under construction at Yarmouth, N.S., a wooden freight steamer for T. F. Smith & Co., Halifax, N.S., having a length of 60 ft., and of 25 tons gross register. She will be fitted with steeple compound, surface condensing engine, driving a single screw, steam being supplied by a vertical boiler.

C. W. Spencer, General Manager Mackenzie, Mann & Co.'s Railways System, Eastern Lines, was in St. John, N.B., Jan. 7, in connection with a project for the establishment of a steamship service between Victoria Beach, N.S., the terminus of a branch of the Halifax and South-Western Ry., and Digby and St. John, N.B.

The coasting str. Strathcona, trading along the east coast of Nova Scotia, was destroyed by fire at Port Dufferin, Dec. 22. She left Halifax on her regular trip for Guysboro and intermediate points at noon, and eight hours later fire was discovered under the saloon. The flames spread quickly, and to prevent disaster, 40 boxes of dynamite, which were among the cargo, were thrown overboard The steamer was beached at Sunley's Point, Port Dufferin, and the passengers and crew succeeded in escaping. The steamer was valued at $70,000 and was insured for $35,000. The burned-out hull has been towed to Halifax.

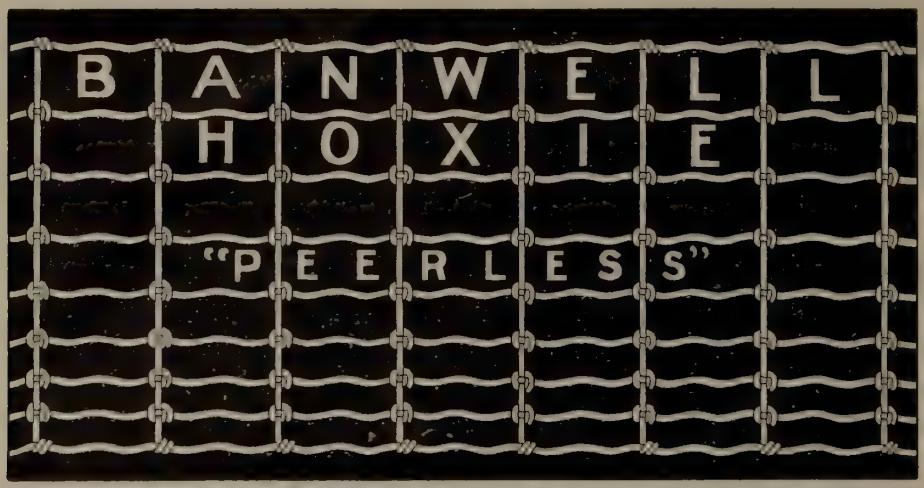
The Supreme Court at Ottawa has reserved judgment in the appeal of the Cumberland Ry. and Coal Co. against the decision of the New Brunswick courts giving judgment for $8,192 against the St. John Pilotage Commissioners. The action was originally brought to recover $15,680 paid by the C. Ry. and C. Co. as compulsory pilotage dues on its barges. The Quebec courts held that barges did not come under the compulsory pilotage regulations, and the company sought to recover the money it had paid. The difference between the amount of the judgment and the amount claimed was barred by the statute of limitations.

Lieut.-Col. Gourdeau, Deputy Minister of Marine; Lieut.-Col. Anderson, Chief Engineer of the Department of Marine, and Commander Spain, formally took over the Halifax dockyard from the Imperial Government Jan. 1. The Dominion cruiser Canada entered the dockyard, and her officers and crew landed at noon, when the Canadian ensign was formally hoisted. Capt. Knowlton is at present in charge for the Government. The property will be used by the Marine Department as a headquarters for all its maritime province vessels, as a depot for lighthouse stores, etc. The Imperial Government may use the dock when necessity arises for the repair of its men-of-war, and has the right to take it over again should Imperial policy render such a step necessary.

The St. John, N.B., City Council is considering a report from the committee appointed to consider a proposal for the nationalization of the port. The report stated that over $1,500,000 has been expended on wharves and terminals, and the exports have increased from nothing to more than $23,000,000. The tonnage amounts to half of that of Montreal, and is the result of only ten years' development. The total revenue from the whole of the harbor properties, including fisheries, for 1905, was $54,508.06, and for last year, $76,332.64, an increase of $21,824.58. Approximately the bonded debt for all the harbor properties is $1,042,090, and of this amount bonds to the extent of $172,990 have been redeemed, leaving $869,100 outstanding, on which the citizens are taxed $44,266.15. St. John was carrying this burden for the benefit of the whole Dominion. Based on the present cost of construction all the wharf properties would reach a valuation of over $3,000,000. The suggestion is that a proposition be made to transfer the properties and the sites on which they stand on St. John receiving a sum equal to the bonds that have already been redeemed, and also make an annual payment to provide for interest and sinking fund on outstanding bonds, the Carleton flats and Courtenay Bay flats to be given over free to enable the Government to extend facilities as trade demands. The ferries and landing would remain in control of the city.

Reports as to the injuries received by the British man-of-war Dominion, when she went ashore in Chaleur Bay, Que., in 1906, are rather contradictory. One report says that the injuries are so serious that the vessel is being sheathed with teak in order to prepare her for the voyage to Chatham dockyard; while Capt. Kingsmill, the commander, says the injuries, while extensive, are not so serious as the newspaper reports indicate.

The New York and Continental Line is being organized in New Jersey, to do business between New York, Hamburg, Rotterdam and other ports in northern continental Europe. The only interest the company has for Canadians is that the promoter is Wm. Peterson, of Newcastle-on-Tyne, England, who introduced the turret type of vessels into Canada, and made unsuccessful attempts to establish steamship lines between Great Britain and continental ports and Canada. The first steamer of the new service will be the Tropic, sailing about Feb. 2, from New York, and the second will be the Lord Erne, a 6,000 ton freight steamer, owned by the Lord Line, of Belfast. T. R. McCarthy has been appointed Montreal agent for the new line.



PEERLESS WOVEN WIRE FENCING

Made from uniformly heavy hard steel wire, well galvanized.
Made in large rolls ready to stretch up.
Requires but few posts; costs very little to erect.
Conforms perfectly to any surface, no matter how rough.
Reduces the cost of fence maintenance to a minimum.

BANWELL HOXIE WIRE FENCE COMPANY
HAMILTON, ONTARIO LIMITED

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 10,500,000 acres of choice farming lands for sale in Manitoba, Saskatchewan and Alberta. Ranching lands generally $4.00 to $5.00 per acre. Lands adapted to grain growing and mixed farming $5.00 to $15.00 per acre according to quality and location. Maps showing the lands in detail will be sent free on application.

TERMS OF PAYMENT.

An actual settler may purchase not more than 640 acres, on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal with interest in nine equal instalments annually thereafter as shewn in the following table:—

160	Acres at	$4.00	per acre,	cash payment	$95.85,	first year's interest	$32.64	and nine instalments of	$80.00
"	"	4.50	"	"	107.85,	" " "	36.73	" "	90.00
"	"	5.00	"	"	119.85,	" " "	40.81	" "	100.00
"	"	5.50	"	"	131.80,	" " "	44.89	" "	110.00
"	"	6.00	"	"	143.80,	" " "	48.98	" "	120.00
"	"	6.50	"	"	155.80,	" " "	53.05	" "	130.00
"	"	7.00	"	"	167.80,	" " "	57.16	" "	140.00
"	"	7.50	"	"	179.75,	" " "	61.22	" "	150.00
"	"	8.00	"	"	186.75,	" " "	65.28	" "	160.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of 6 per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN,
Land Commissioner C.P.R. Co., Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 650,000 acres of selected lands in Manitoba and Assiniboia which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

Gen. Passenger Agent, - - ALBANY, N.Y.

Ontario and the Great Lakes.

The str. Bothnia, tied up at Kingston, Ont., was slightly damaged by a fire which broke out on board Jan. 10.

W. Gordon, Secretary of the Lighthouse Board, Department of Marine and Fisheries, died at Ottawa, Jan. 3, aged 35.

Capt. Jos. Powell, of Amherstburg, Ont., master of the str. Grammar, died at Buffalo, N.Y., from typhoid fever, Jan. 4.

Judge Hodgins presided at a sitting of the Admiralty Court at Sarnia, Ont., Dec. 27, when several small cases were disposed of.

The Hamilton and Fort William Navigation Co. has decided to place an order for an 8,500 ton steamer, to be built at Lake Erie.

The Northern Navigation Co. of Ontario declared a dividend at the rate of 6% per annum and a bonus of 1½% on the capital stock, payable Jan. 19.

The Upper Ottawa Improvement Co. is having two alligator scows built at Toronto, their dimensions being: length, 66 ft.; breadth, 14 ft.; depth, 6 ft.

The tug James Whalen towed the str. Woods into Fort William, Ont., Dec. 25, the first time on record on which a vessel has arrived in that port on so late a day.

The underwriters are advertising the Hamilton str. Winona for sale, as she now lies afloat in Collingwood, Ont., harbor. She was described in our Dec. issue, pg. 763.

The steel freight str. Tadousac, built at Toronto 1903, and of 2,359 tons register, has been sold by Waldie & Wright, Toronto, to the Northern Navigation Co. of Ontario.

The U.S. gunboat Sandoval, which it is proposed to station at Detroit, Mich., for the use of the naval militia, is being repaired at New York, before coming to the Upper Lakes.

C. Murphy, Ottawa, Ont., has been commissioned by the Dominion Government to make an enquiry and to report upon the administration of affairs at the Sault Ste. Marie, Ont., canal.

The vessels lying up for the winter at Fort William include six large steamers, 26 tugs and small steamers, three tow barges, and four dredges, the largest number of vessels that ever wintered there.

A body, on which was a lifebuoy belonging to the str. J. H. Jones, has been discovered by Indians on the east side of Christian Island, Lake Huron. The Jones was lost in a storm at the end of Nov.

A steam yacht, 108 ft. keel, 16½ ft. beam, and having a draught of 8 ft., is being built at Forester's Island, Ont., for Oronhyatekha, Supreme Chief Ranger, I.O.F. She is expected to be ready in June.

H. Hacker, for over 50 years a resident of Port Hope, Ont., died there Dec. 18, aged 86. He learned shipbuilding at Charlottetown, P.E.I., and subsequently lived at Chicago, Ill., and Rochester, N.Y.

Haney & Miller's tug Skylark left Port Colborne, Ont., for Port Stanley, Ont., Jan. 3, and went ashore in a dense fog off Port Maitland, Ont., Jan. 4. The tug went to pieces during the heavy gale of the night.

W. G. Walton, son of W. G. Walton, Hamilton, Ont., Vice-President of the company owning the str. Glenellah, fell into the hold of the steamer at Collingwood, Ont., Jan. 1, and died from concussion of the brain the same day.

The Hamilton and Fort William Navigation Co., Ltd., one of the companies controlled by R. O. & A. B. Mackay, Hamilton, Ont., has decided to build an 8,000 ton steamship for the upper lakes trade. She will be built on the Niagara River.

Capt. J. Sentimore, of the Huntsville, Lake of Bays and Lake Simcoe Navigation Co.'s str. Florence Maine, was presented with an address and a purse of gold, Dec. 25, in recognition of his rescuing Miss Slocum, a visitor at Port Cunnington, from drowning during the summer.

The hull of the new steamer to run the St. Lawrence River rapids, which the Richelieu and Ontario Navigation Co. is having built at Toronto, was launched Jan. 9, and named Rapids King by Mrs. Caverhill, of Montreal, wife of the chairman of the Executive Committee of the R. and O.N. Co.

The Superintendent of the Welland Canal reports that for the season of 1906, there were lightered at Port Colborne elevator, 1,009,473 bush. of wheat, 116,622 bush. of corn, 2,102 bush. of barley, 13,659 bush. of flax, and 29,111 bush. of oats, and that 383,437 bush. of wheat were taken to Thorold mills.

Two actions have been instituted in the Quebec courts against the Ottawa River Navigation Co., arising out of the collision between the steamers Maude and Ottawan, the plaintiffs being the widows of the engineer and a passenger, respectively, of the Maude. The damages claimed in each case is $10,000.

The Northern Navigation Co. of Ontario has presented a diamond ring to Jas. Whalen, managing owner of the tug James Whalen, which went to the rescue of the passengers of the N.N. Co.'s str. Monarch, recently wrecked on Isle Royale, Lake Superior. The Monarch, a Sarnia paper states, was the last vessel built at that port.

Capt. D. Milloy, at one time captain and owner of the str. Chicora, when she first came to the Great Lakes after her short period of blockade running in the Southern States, subsequently Manager of the Niagara Navigation Co., and until about five years ago lessee of Milloy's wharf, Toronto, died at his stock farm, Paris, Ont., Jan. 12, aged 70.

During the season of navigation of 1906, the number of vessels entering the port of Toronto was 3,406, against 3,332 in 1905; the aggregate tonnage being 1,524,827, an increase of 118,968 tons over the tonnage entered in 1905. The western gap had been dredged to give 16 feet of water, and the depth of water at the eastern gap had been increased to 16½ ft.

By an order-in-council the limits of the port of Amherstburg, Ont., are defined as being: All the waters of the Detroit River and of Lake Erie, on the Canadian side of the International boundary line, south of the parallel of 40° 10′ north latitude and west of the meridian of 83° 5′ west longitude. It is also declared that the act relating to harbor masters shall apply to the harbor.

The Farrar Transportation Co., Ltd., declared a dividend of 10% for the year 1906, at its annual meeting at Collingwood, Ont., Jan. 8. Following are the officers and directors for the current year: President, C. A. Farrar, Meaford, Ont.; Vice-President, F. Scott; Manager, G. P. Pearsall; Secretary, G. E. Fair; Treasurer, W. R. Rowland; other directors: J. G. Ferris, W. McCallum, W. J. Smith, H. Baird, D. D. Lewis.

The Collingwood Shipping Co. has been incorporated under the Ontario Companies' Acts, with a capital of $90,000 and offices at Collingwood, Ont., to buy, sell, own and operate steamships, tugs, elevators, warehouses, tramways, wharves, docks, and coal docks for freight and passenger business, and to buy, sell, own and operate a wrecking plant. The provisional directors are: W. T. Allan, M. Brophy, J. R. Arthur, W. A. Hogg, W. Carmichael, of Collingwood.

At the adjourned annual meeting of the Hamilton Steamboat Co. in Toronto Jan. 10, the old directors were re-elected for the current year except M. Leggatt, President, whose place on the board was taken by W.

THE STEAMSHIP WINONA.

This vessel, which was owned by the Winona Steamship Company, Limited, Hamilton, Ont., was fully described in our Dec. issue, pg. 763. She ran ashore on one of the Duck Islands, Lake Huron, Nov. 17, but was subsequently floated and taken to a Georgian Bay port for repairs, the owners subsequently abandoning her to the underwriters.

51,000 PAIRS IN USE

Underwood

The latest and best method of simplifying and systematizing the entering of orders and the rendering of bills is by the use of the new Underwood Billing Typewriter—insures accuracy, gives as many copies of as many different forms as you require at one writing. The special features of the machine in no way interfere with its use for correspondence work.

If you are using the old method the Underwood way will save 50 per cent. in the time required; if you are using an up-to-date system the Underwood is necessary to perfect it. A book is necessary to fully explain the advantages of the Underwood Biller. Let us send you the book.

UNITED TYPEWRITER COMPANY, LIMITED

Adelaide Street East
TORONTO

And in all the principal cities

E. Bishop, manager. The directors and officers now are: President, Æmilius Jarvis; Vice-President, H. G. Nicholls; Treasurer, C. E. A. Goldman; other directors: A. Bruce, K.C.; W. E. Bishop, H. B. Whitton, A. Angstrom. With the exception of Mr. Whitton, of Hamilton, they are all Torontonians.

The Nautical Gazette, New York, Dec. 27, 1906, contained the following item: "It is a singular coincidence that all of the British-built boats operating on the Great Lakes this year were lost in a single week." In a previous issue it contained an article on the losses on the great lakes during the season, giving the following figures: Vessels, total losses, 47; strandings 132, collisions 32. Out of the 47 vessels named by the Nautical Gazette as being total losses we fail to recognize any British-built steamer at all. The new British-built steamer Winona had two accidents and is now being offered for sale by the underwriters, and there were several accidents to British-built steamers at different points on the Great Lakes, but no total losses.

Capt. T. Donnelly, of Kingston, was directed by the Department of Marine, to take evidence and report as to the loss of the Golspie, one of the steamers managed by R. O. and A. B. Mackay, Hamilton, Ont., near Michipicoten, Lake Superior, Dec. 4, and the subsequent treatment of the crew. Evidence was taken at Owen Sound and Collingwood, Ont., and a report made to the Department. A subscription in aid of the wrecked seamen has been made, several thousand dollars having been received. An action for libel has been instituted by the managers of the steamer against the Toronto Globe. The representative of the underwriters who visited the wreck says the steamer is resting easy, and can be floated.

The Turbine Steamship Co. is reported to have lost between $17,000 and $18,000 as the result of its operations during 1906. The trip south to the West Indies resulted in a heavy loss, and a lot of repair work was necessary, as a result. It has been decided to make two trips a day between Hamilton and Toronto during the season of 1907, and to make a weekly trip on Saturday night to Charlotte, N.Y., returning on Monday morning. Capt. Crawford has been appointed master, succeeding Capt. Bongard. Following were the directors elected at the annual meeting held at Hamilton, Ont., Jan. 14: J. C. Eaton, J. J. Vaughan, H. McGee, J. Hyslop, Toronto; J. Moodie, W. Marshall, W. C. Hawkins, Hamilton. The meeting of directors for the election of officers will be held in Toronto.

B.C. and Pacific Coast Marine.

The Alaska Steamship Association has been broken up, on account of the proposed investigation by the U.S. Government.

The str. Indianapolis is about to be withdrawn from the Victoria-Seattle run, and will be run between Seattle and Tacoma, Wash.

The B. F. Graham Lumber Co. is arranging to purchase a 600 ton steamer for its lumber trade at San Juan and Esquimalt, B.C.

The Victoria, B.C., Board of Trade has passed resolutions in favor of making Victoria a free port, and doing away with compulsory pilotage.

The C.P.R. has been given a contract by the Dominion Government for carrying the mail by steamer between Victoria, B.C., and Seattle, Wash.

The repairs to the C.P.R. str. Princess Victoria, necessitated by her stranding on Lewis rock near Victoria, B.C., in Oct., 1906, have been completed.

Capt. Reid, of the C.P.R. str. Beaver, is reported to have been suspended for six months from Jan. 1. Capt. Gardner has taken charge of the steamer.

The name of the steam tug Sarah M. Renton, official number 121,761, registered at Vancouver, B.C., has been changed by order-in-council to that of Erin.

The str. Themis, chartered by MacKenzie Bros., Vancouver, B.C., ran on Cardigan reef, Queen Charlotte Sound, recently, and has become a total loss. The crew were landed in Vancouver by a passing fishing steamer Dec. 16.

A contract has been let by the Puget Sound Excursion Co. for the complete overhaul of the str. Yosemite, recently purchased from the C.P.R. The steamer is expected to be again in service in May, for excursions on Puget Sound.

It is understood that the Department of Marine has decided that a hydrographic survey should be made during the current year of the harbor of Clayoquot, B.C. The survey is made necessary by the increasing number of vessels frequenting the harbor.

It is reported in Victoria that the plans for the consolidation of the shipbuilding yards at B.C. coast points are being worked out by Fowler, Perks & Co., Parliamentary solicitors, London, Eng., and that some of the British steel shipbuilders and engineers are interested.

The Alaska Steamship Co. has had plans prepared for the erection of a wharf on Humbolt St., Victoria, B.C., at a cost of $25,000. The company has a frontage of 251 ft., and it is proposed to construct a fan-shaped wharf, with offices and accommodation for handling freight. The wharf will be built on pontoons so that it will rise and fall with the tide.

The Graham Island Lumber Co. has chartered a small steamer to run between Ketchikan and Masset, B.C. It has also arranged for two steamers having a capacity of 3,000,000 ft., each to carry lumber from Graham Island, the northernmost of the Queen Charlotte group, to Mexico and Southern California. W. Shannon, of Vancouver, is one of the principal men in the company.

The Dominion Government str. Quadra has been instructed to patrol the west coast of Vancouver Island during Jan. and Feb., for the protection of life and property. An arrangement was made with the owners of the whaling str. Orion some time ago to carry a life-saving equipment, and to be ready to proceed to aid vessels in danger, but it is not considered that the steamer can cover the whole of the coast where the dangers lie.

Sault Ste. Marie Canals Traffic

The following commerce passed through the Sault Ste. Marie canals during 1906:

ARTICLES.			CANADIAN CANAL	U.S. CANAL	TOTAL
Copper	Eastbound	Net tons	8,061	99,572	107,633

HEAD OFFICE - - TORONTO

Manitoba, Saskatchewan, Alberta, Etc.

E. S. Cooper, Winnipeg, has been at Ottawa interviewing the Government departments with a view of securing improvements to aid navigation on the Red and Assiniboine rivers.

Capt. Ross has returned to Medicine Hat, Sask., from B.C., where he has been purchasing lumber for the construction of a steamer for the South Saskatchewan River. The machinery has been purchased in Chicago, Ill.

The condition of the South Saskatchewan River at The Elbow, Sask., is causing considerable anxiety to many people in the vicinity. It is apparently making a new channel for itself, and appears to be cutting an outlet into the Qu'Appelle River valley.

Capt. Barbour, master of the str. Northern Light, trading on Lesser Slave Lake and adjacent waters, has been in Ottawa, with a view of impressing upon the Government the necessity of improving the navigation in these northern waters. The deepening of the Lesser Slave River is the particular portion of the route to which Capt. Barbour has directed attention.

Province of Quebec Marine.

N. Rioux, who died at Quebec, Jan. 1, was a member of the Quebec Harbor Commission.

L. Reford, brother of R. Reford, ship broker and agent, Montreal, died in Toronto, Jan. 8, aged 83.

The Montreal Marine Underwriters' Association has become affiliated with the Montreal Board of Trade.

Capt. A. Robillard, master of the Richelieu and Ontario Navigation Co.'s str. Berthier, died in Notre Dame Hospital, Montreal, Jan. 7.

A. J. C. Robertson, naval architect, Montreal, delivered the first of a series of four lectures on ships and shipbuilding, in Montreal, Jan. 17.

An order-in-council has been passed approving of regulations for the operation of the railway swing bridge over the St. Charles River at Quebec.

R. La Rue has been appointed by the Dominion Government its representative on the Quebec Harbor Commission, to succeed the late N. Rioux.

E. Guerin, K.C., who has been appointed a Judge of the Superior Court for Montreal district, was local commissioner of the Montreal Pilots' Court during its existence.

The Quebec Transportation and Forwarding Co. is giving its eight vessels a thorough overhaul at Quebec in preparation for the season of navigation of 1907.

The Richelieu and Ontario Navigation Co. is discussing the construction of a new steamer for the Montreal-Quebec run with representatives of the Fairfield Engineering Co., Glasgow, Scotland.

F. Gunn, Quebec, has purchased the wreck of the iron ship Dybraag, which went ashore near the Government wharf, Escoumains, Que., in Nov. It is expected to float the vessel in the spring.

The Montreal Transportation Co. is having built on the Clyde, Scotland, two steamers for the purpose of carrying steel rails between Sydney, N.S., and Fort William, Ont. Capt. R. Fraser is in Scotland looking after the completion of the steamers.

The owners of coasting steamers trading between Ste. Anne de Beaupre and Murray Bay have petitioned the Dominion Government for the necessary light protection to enable them to navigate their vessels after dark between Cape Brule and Ste. Anne de Beaupre.

The suits arising out of the collision July 5, 1906, between the steamer Gaspesian and the Montreal Grain Elevating Co.'s floating elevator no. 7, have been consolidated, and have been ordered for trial at Quebec, Feb. 5. The evidence on the part of the Montreal Grain Elevating Co. will be taken later on at Montreal.

An effort is being made in Stanstead, Que., and vicinity, to form a company to put a new steamer on Lake Memphremagog. It is suggested that a steamer 120 ft. long, with a capacity for 200 passengers and a speed of 18 miles an hour, be purchased. Capt. H. W. Mann, of Manchester, N.H., is active in the promotion of the company.

The reports of trade on Lake Champlain and its connecting waters in the U.S. and Canada showed that 414,662 tons of freight were cleared, against 360,519 tons in 1905. Coal shipments to Canada show a falling off and iron ore shipments had also decreased. The report states that there is a scarcity of vessels, and that more towing power is required.

Press reports were current in Montreal early in Jan. to the effect that the C.P.R. had approached the directors of the Richelieu and Ontario Navigation Co. with a view of purchasing the company's steamers and entire business. R. Forget, President R. and O. N. Co., is reported as saying Jan. 6 that he had heard something of the matter, but was not prepared to make any official announcement.

The North Shore Transportation and Wrecking Co. has been incorporated under the Dominion Companies' Acts, with a capital of $250,000 and offices at Quebec, for the purpose of building, repairing, selling and navigating vessels, buying and selling steel, iron and other material entering into the construction of vessels; to float or raise sunken or wrecked vessels and cargoes, and various other purposes connected with the ownership and navigation of vessels. The provisional directors are: J. B. A. Martin, D. Hatton, Montreal; T. and A. Gagnon, J. B. D. Leglare, J. A. Fafard, and Capt. O. S. Bernier, Quebec. It is proposed to start a steamer on a regular run between Quebec and Natashquan about April, and to engage in the fishing and fur trade along the north shore of the St. Lawrence.

Under the terms of sec. 2 of an act passed last session of the Dominion Parliament respecting the Harbor Commissioners of Montreal, a proclamation has been issued by the Governor-in-Council, declaring that the act came into effect Jan. 1. By the terms of the act, the constitution of the Harbor Commission as heretofore existing was determined, and the control of the harbor placed in the hands of three commissioners to be appointed by the Government, such commissioners to be paid salaries and to devote the main portion of their time to the duties. The appointment of G. W. Stephens, L. E. Geoffrion and C. C. Ballantyne, Montreal, was notified in the Gazette, Dec. 29, as members of the corporation of "The Harbor Commissioners of Montreal," to date from Jan. 1, 1907. The first named is designated President of the corporation. G. W. Stephens is President of the Canadian Rubber Co., L. E. Geoffrion is a wholesale grocer and provision merchant, and C. C. Ballantyne is associated with a number of industrial concerns. At the first meeting of the new Commission, Jan. 2, G. W. Stephens, the chairman, said: "We commissioners came down here in good faith; we have taken office under the present Government on the understanding that we shall organize the business of the office to be operated on a business basis. If the Government keep faith with us we will stay, and if they do not we will not stay. Personally, I will not stay here five minutes if we are going to be plastered up with influence which we cannot control."

The Loss of the Resolute.

Following is the decision of Commander Spain, R.N., Dominion Wreck Commissioner, who, assisted by Capts. T. Donnelly and J. Trowell as assessors, held an enquiry into the foundering of the steamboat Resolute near the western entrance to Toronto Harbor, on Nov. 22, 1906: "That the S.S. Resolute was, as far as can be ascertained, both by the Hull and Steamboat Inspectors' reports, in a sound and seaworthy condition, and well fitted and equipped for the service in which she was employed; That the officers and crew were in accordance with the Government rules and customs of the trade in which the ship was employed, with the exception of Haney, the first mate, who did not hold a Canadian certificate of any description, and the court considers that the owners of the vessel are responsible for this man being on board the ship without proper qualifications; That the Resolute was navigated in a seamanlike manner, but, owing to the very heavy sea, and the shallowness of the entrances to Toronto harbor, she was unable to enter the port; That, after anchoring under the lee of Toronto Island, two efforts were made to enter the port of Toronto by the only available entrance, that is to say, the Eastern Gap, but this was found impossible; That all measures were taken for the safety of the vessel, and that no disaster was anticipated until a few minutes previous to the foundering of the ship, which was caused by water entering the hull of the steamer from some source which the court was unable to determine, owing to the impossibility of procuring any evidence in regard to it; That the sudden change from comparative safety to the foundering of the steamer prevented more efficient measures being taken for the preservation of the crew by the use of life preservers, and the better handling of the lifeboats; That Capt. John Sullivan, Marine Superintendent of the Company, who was on board the ship at the time, though not actually in command, made every effort towards the safety of the vessel, by going ashore to ascertain the depth of water in the western channel, and, having then found out that a heavy gale was expected, in returning to the ship; and his subsequent efforts towards the safety of the steamer, and the preservation of the crew, deserve credit. The court considers that, if Capt. Sullivan had not been washed overboard immediately after notifying the crew to take to the boats, more lives might have been saved."

Niagara Navigation Company, Limited.

The report for the year ended Nov. 30, 1906, presented at the annual meeting in Toronto Jan. 8, stated that the failure of the builders to complete the new steamship Cayuga in time for service during the season of 1906 was a disappointment. A reduction of the price was made on account of delay in delivery. The trial trips were most satisfactory, and the vessel will be ready for the season of 1907. The cost of the Cayuga has been nearly covered by cash on hand and proceeds from the sale of stock, so that of the bonds authorized it will probably suffice to sell only whatever

The old board was re-elected with the exception of R. H. McBride, who was replaced by W. D. Matthews. The directors for the current year are: President, E. B. Osler; Vice-President, Barlow Cumberland; other directors: Hon. J. J. Foy, J. Bruce Macdonald, C. Cockshutt, Col. J. S. Hendrie, W. D. Matthews.

Notices to Mariners.

The Department of Marine has issued the following notices to mariners:—

No. 149. Dec. 5.—Nova Scotia—368. Bay of Fundy, Chignecto channel, Cumberland basin, buoys established. 369. Bay of Fundy, Basin of Minas, mouth of Avon River, Crossbars shoal gas buoy to be removed for the winter. 370. West coast, Port Maitland, fog bell established at lighthouse. 371. South coast, off Cape Canso, Roaring Bull rock, change in position of buoy. 372. North coast, Tatamagouche bay, Brule harbor, buoys established.

No. 151. Dec. 7.—New Brunswick—374. South coast, Shepody River, wreck removed. 375. East coast, Strait of Northumberland, Cape Tormentine, range lights maintained throughout the year.

No. 152. Dec. 10.—Nova Scotia—376. Northumberland strait. Pictou Island west wharf, lighthouse established.

No. 153. Dec. 13.—General—377. Numbering of Canadian lightships.

154. Dec. 14.—Ontario—378. Lake Ontario, west end, Bronte, light house established.

No. 155. Dec. 13.—British Columbia—380. Graham Reach, Swanson bay, wharf erected.

No. 156. Dec. 15.—Nova Scotia.—381. West coast, Yarmouth Sound, John's Cove ledge, buoy established. New Brunswick—382. East coast, Miramichi Bay, Sheldrake Island, range lights, intended change in illuminating apparatus.

No. 157. Dec. 18.—Quebec—388. Saguenay River, Grosse Roche, lighthouse established. 389. River St. Lawrence below Quebec, Island of Orleans, St. Laurent, change in color of freight shed and lantern.

No. 158. Dec. 21.—British Columbia—391. Chatham Sound, Prince Rupert harbor, gas buoys to be established. 392. Chatham Sound, Prince Rupert harbor, gas-lighted beacons to be established.

No. 159. Dec. 26.—British Columbia—393. Vancouver Island, west coast, Barkley sound, Sechart channel, eastern entrance, Swale rock, light not shown temporarily.

No. 160. Dec. 26.—Newfoundland—394. South coast, Port Basque, channel head, change in fog alarm.

No. 161. Dec. 28.—Nova Scotia—396. West coast, Yarmouth harbor, Bunker Island, north end, lighthouse established. Newfoundland—397. North coast, Strait of Belle Isle, Cape Norman, change in fog alarm.

For the purpose of identifying them, all Canadian lightships will hereafter be numbered on a system already established. These numbers will be kept by the several vessels unchanged, even if they change their stations. The numbers allotted are as follows:—

Number.	Present Station.	No. in List of Lights.
1	Barrington	241
2	Miramichi	869
3	Red Islet	1107
4	Upper Traverse (not now in use)	
5	White Island reef	1142
6	Pointe à la Garde	963
7	Prince shoal	1109
8	Lake St. Peter, east	1330
9	" " centre	1336
10	" " West	1339
11	Lake St. Louis, east	1506
12	" " centre	1508
13	" " west	1512
14	Lurcher	198
15	Anticosti	1040
16	Fraser river	2309

Hereafter the number of each vessel is to be painted in white on her topsides, in addition to the name of her station.

The following have been issued by the U.S. Hydrographic office:

No. 1. Jan. 5.—Lake Superior—1. Portage Lake, Rouleau Point range lights moved.

No. 2. Jan. 12.—Lake Ontario—35. Niagara River mouth, shoal spot, further information.

Prince Edward Island Car Ferry.

In connection with the project under discussion at Charlottetown, P.E.I., for the establishment of a car ferry between Prince Edward Island and the mainland, it is reported that a capital of about $250,000 has already been promised, the subscribers including W. E. Weeks, G. E. Fall, L. E. Prowse, E. Heartz, G. E. Hughes, B. Stewart, N. Rattenbury, G. Auld, J. A. Farquharson, G. H. Toombes, E. H. and F. H. Beer, all of Charlottetown. A car ferry between Charlottetown and Pictou, N.S., for instance, would mean a great deal in the saving of handling freight. A car ferry would take I.C.R. cars to Charlottetown, where they would be switched off to broad gauge tracks parallel to the P.E.I. Ry. narrow gauge tracks, and the transferring would be done from one car to another. The loading would be done in the same way, the I.C.R. cars being loaded at Charlottetown and going through to their various destinations. The handling of perishable freight, such as potatoes, eggs, oysters, fresh meats and fish of all kinds, which constitutes the bulk of the trade from P.E.I., injures it considerably. With a regular car ferry service the refrigerator cars would be loaded at Charlottetown and iced, thereby ensuring good condition at destination. The unloading of freight from cars into the warehouse, from the warehouse to the steamer, from the steamer at Charlottetown into the warehouse, and out of that into cars again means a great deal of time and costs considerable. In addition to all that the winter steamers have never been able to make the round trip between Pictou and Charlottetown in one day, for the reason of the time taken in discharging and reloading, which generally occupies not less than 12 hours. With a car ferry service it is expected that the loading and unloading would occupy a few minutes only so that daily round trips could be made with plenty of time to spare. The ultimate result of the establishment of such a car ferry service, would probably be the conversion of the P.E.I Ry. from a narrow to a standard gauge railway.

Among the Express Companies.

The Dominion Ex. Co. is investigating the burning of a carload of express matter between Toronto and North Bay, Ont., Dec. 24.

R. Murphy has been appointed General Agent Canadian Ex. Co., and F. W. Holland, assistant to the General Agent at Montreal.

I. Hertel, Canadian Ex. Company's agent at Waterloo, Ont., has been transferred to the company's office in London, Ont., as chief clerk.

The Great Northern Ex. Co. has placed its service on the Vancouver, Victoria and Eastern Ry., and its U.S. continuation, the Washington and Great Northern Rd., between Curlew, Wash., and Molson, Wash. The offices are at Bergen, Myncaster, Syackan, and Bridesville, Wash., and Molson, B.C.

Canadian Ex. Co. officials state that the company transported 3,100 carcases of deer, having an aggregate weight of 318,215 lbs., over the northern and Ottawa divisions of the G.T.R., during the 15 days' open season of 1906. During the season of 1905 the company carried 2,796 carcases of deer, having an aggregate weight of 306,395 lbs.

The Dominion Ex. Co. is continuing to operate over the Qu'Appelle, Long Lake and Saskatchewan Rd. and Steamboat Co.'s railway between Regina and Prince Albert, Sask., although the line has been transferred to the Canadian Northern Ry. When the Dominion Ex. Co.'s contract expires, the Canadian Northern Ex. Co. will place its service in operation over the line.

Telegraph and Cable Matters.

The Temiskaming and Northern Ontario Ry. Commission has decided to string a fourth telegraph line from North Bay to Cobalt.

J. Oppe, Managing Director for Canada for the Marconi Wireless Telegraph Co., Montreal, was married in that city, Jan. 8, to Miss S. Stephen.

H. P. Dwight, President G.N.W. Telegraph Co., Toronto, received the congratulations of his friends, Dec. 23, 1906, upon the 78th anniversary of his birth.

S. Edwards, heretofore Assistant Superintendent C.P.R. Telegraphs, Winnipeg, Man., has been appointed Superintendent Western Division, with office at Calgary, Alta.

The New Brunswick Telephone Co.'s system at St. John, N.B., has been connected with the Marconi wireless telegraph station, so as to facilitate the reporting of vessels arriving in the port.

The Anglo-American Telegraph Co.'s Cable between Prince Edward Island and the mainland, was broken Jan. 5, and for several days there was no telegraphic communication with the outside world.

OWEN SOUND, ONTARIO

The U.S. cable str. Burnside arrived at Ketchintan, Alaska, Dec. 24, and completed a cable connection with Fort Wrangle and other points on the southeastern coast of Alaska, as well as with Seattle, Wash.

C. H. Reynolds, Manager of the All-British Pacific Cable, who has returned to London, Eng., after a tour of organization in Australia, and a visit of inspection of the Canadian office in Vancouver Island, states that at present there is no possibility of a reduction of rates over the route.

The De Forest Wireless Telegraph Co. is appealing against the Quebec city tax of $1,000, on the ground that at the time this tax on telegraph companies was imposed, there was no such thing as wireless telegraphy, and that the tax was only for those companies which used poles, wires, etc. The Recorder has reserved judgment.

The De Forest Wireless Telegraph Co. is reported to have submitted a proposal to the Dominion Government to take over the Government telegraph line from Ashcroft, B.C., to Dawson, Yukon. The company asks for a subsidy of $50,000 for the installation of its plant, and a further subsidy of $50,000 for its maintenance each year it is in operation.

The C.P.R. Telegraph Department is continuing to operate a commercial service between Regina and Prince Albert, Sask., along the line of the Qu'Appelle, Long Lake and Saskatchewan Rd. and Steamboat Co., and it is understood will do so for some time yet. A date for the withdrawal of the C.P.R. telegraph service is under arrangement between the head offices of the C.P.R. and the Canadian Northern Ry.

The British Government has promised to appoint a Select Commission to enquire into the proposals embodied in the wireless telegraph conference recently held in Berlin, Germany, previous to the ratification of the convention. The Postmaster-General stated that the British delegates to the wireless telegraph conference secured all they were instructed to get, but as the convention would not be ratified for some time, there would be no harm in appointing the Select Commission.

Montreal Telegraph Company.

The sixtieth annual meeting was held in Montreal Jan. 10. The report showed assets of $2,151,823. These consist of: telegraph lines in Canada and the U.S., $1,625,890; telegraph cables in Canada and the U.S., $33,487; telegraph offices and equipment of offices in Canada and the U.S., $212,500; real estate in Montreal, Ottawa, Quebec, and Toronto, $279,946; and cash, accounts receivable, bonds and other securities and real estate (not included in lease to Great North Western Telegraph Co., $138,558. The liabilities are made up as follows: Shareholders' capital, $2,000,000; excess in value of property operated by G.N.W. Telegraph Co. over shareholders' capital, $151,823; dividend payable January 15, 1907, $40,000; unclaimed dividends, $460; and contingent fund, $98,098. The dividend guaranteed by the Western Union Telegraph Co. under the terms of the agreement of Aug. 17, 1881, was distributed in the usual manner and on the fixed dates, with a payment of 10c a share to shareholders of record of Sept. 30 last. The company continues free from debt or encumbrance of any kind.

The report was adopted and the retiring directors were re-elected. The officers and directors for the current year are: President, A. J. Allen; Vice-President, A. T. Paterson; other directors: W. Wainwright, W. McMaster and W. R. Miller.

C.P.R. Telegraph-Telephone Circuit

Two of the C.P.R. telegraph duplex circuits between Montreal and Winnipeg are operated on 210-lb. copper wires with repeaters at Fort William, Ont. These two wires are transposed every half mile and a telephone circuit is being worked between Montreal and North Bay on the same two wires. The telephone circuit was thrown into service on Dec. 11, and it was found to work exceedingly well, being almost as silent as the regular city telephone circuits. The distances are: Montreal to North Bay, 360 miles; North Bay to Fort William, 635 miles; Fort William to Winnipeg, 427 miles; a total of 1,422 miles.

The voltage used for the duplexes at Fort William and Montreal is 200. On the same line of poles for the whole distance there is a wire on which is being worked the phantoplex between Montreal and North Bay without disturbing the conversation on the telephone circuit. This has been a complete surprise to the officials and to a number of experts in New York, as it was expeeted it would be necessary to abandon the phantoplex in order to obtain a satisfactory telephone circuit.

This is thought to be the first instance where a telephone circuit is worked on two duplex wires with one of the telephone offices being located at a point where there are no telegraph repeaters. It is contemplated adding other telephone circuits on the C.P.R. telegraph system, the whole matter being in charge of W. J. Camp, the electrical engineer. Telegraph Age.

General Telephone Matters.

The Caledonia Telephone Co. has been granted a franchise by the village council of Caledonia, Ont.

The telephone line recently strung at Byron, Ont., is being extended to Komoka, an adjoining village.

J. J. Tilley, local manager Bell Telephone Co., Lindsay, Ont., was presented with a smoking set by the staff, Dec. 25.

The Bell Telephone Co. is constructing a line in North Battleford, Sask., and is installing an exchange in the towns on both sides of the river.

The Calgary, Alta., Board of Trade has passed a resolution calling upon the City Council to proceed with the installation of a municipal telephone system.

The North Vancouver, B.C., Board of Trade has passed a resolution opposing a proposed application of the B.C. Telephone Co. for a Dominion subsidy.

The Board of Railway Commissioners has issued an order requiring telephone companies to keep their tariffs on file for inspection by the public during business hours.

The Moncton, N.B., City Council by majority of one decided to apply to the New Brunswick Legislature for an act authorizing it to establish a municipal telephone system.

T. A. Wright, heretofore Assistant Superintendent Nova Scotia Telephone Co., Halifax, N.S., has resigned to enter the service of the Commercial Telephone Co., of Port-of-Spain, Trinidad.

Telephone poles are reported to be very scarce at the present time, and the scarcity is considered likely to affect the construction of new lines, of which a very extensive mileage is projected in Canada during the current year.

The municipality of South Norfolk, Man., passed a resolution, Jan. 4, expressing the opinion that the Government should control the long distance telephone lines only, the municipalities retaining control of the local exchanges.

A representative of the Bell Telephone Co. recently stated that if the London, Ont., City Council did not accept its offer of $4,000 for an exclusive franchise, it would continue doing business in the city and the offer would be withdrawn. There will not be any reduction in the rates.

Application will be made next session of the British Columbia Legislature for an act incorporating a company with power to construct telephone lines throughout the whole of Yale county. E. Bloomfield, Victoria, B.C., is solicitor for the applicants.

The Municipal Union of Manitoba has prepared a lengthy statement showing the various amendments which it considers advisable should be made in the law so as to render the proposed provincial and municipal telephone system a success.

F. W. Dewar, local manager Bell Telephone Co., Woodstock, Ont., has been transferred to a similar position at Niagara Falls, Ont., succeeding B. Douglas, transferred to Owen Sound, Ont. K. Weldren, formerly at Owen Sound, succeeds F. W. Dewar at Woodstock.

The Macleod, Alta., Telephone Co. is making preparations for the general improvement of its telephone system. New poles are to be put up, some cables are to be laid, and other improvements made, so as to be in readiness for the long distance lines which are now under construction.

The total receipts of the municipal telephone line at Fort William, Ont., for 1906, were $12,628, and the expenses were $9,328. Included in the expenses are provision for a sinking fund, and a depreciation fund of 10% of the gross receipts. There are 775 telephones in use in the town.

The Wallacetown and Lake Shore Telephone Association's officers for the current year are: President, T. Lunn; Vice-President, J. Watkins; Secretary-Treasurer, Dr. J. W. Crane; other directors: G. Braddon, J. Steele. A dividend of 6% was declared on the working for 1906, $100 was voted to a sinking fund, $70 to a contingent fund, and $30 to the Secretary.

The Bellechasse Telephone Co. is applying at the current session of the Quebec Legislature for an act amending its charter, changing its name to the National Telephone Co., increasing its capital to $5,000,000; giving the right to issue debentures to the like amount, allowing it to expropriate property, and to establish telephone and telegraph lines throughout the province.

The Strathcona and Edmonton, Alta., councils are discussing terms for the construction of a joint municipal telephone service. It is understood that Edmonton proposes to string a 300-cable to Strathcona and to connect the Edmonton automatic board direct, making one big central for both towns, and giving Strathcona exactly the same telephone service at the same price as Edmonton gets.

The Bonaventure and Gaspe Telephone Co. is the title of a company for which an act of incorporation is being asked at the current session of the Dominion Parliament. Power is being asked to construct and operate telephone and telegraph lines in Quebec and New Brunswick; to acquire lands and water powers along the route of its lines, and to develop and sell electric power. J. H. Kelly, New Carlisle, Que., is solicitor for the applicants.

The Bell Telephone Co. has notified the Montreal City Council that it has decided to bury all its wires in the city, and desires to discuss the plans for the work with the council. A meeting for this purpose will be held at an early date. In connection with the proposal the Montreal City Council is applying at the current session of the

Quebec Legislature for additional powers in connection with the construction of conduits for electric wires in the city.

The route for the proposed long distance telephone line which the Alberta Government proposes to construct during the year, will be from Edmonton along the section and range lines, in the general direction of the Canadian Northern Ry. to Lloydminster, about 200 miles. Every town on the railway will be connected with the line, and later on branch lines will be strung so as to give telephone connection to the places off the railway. Work upon the line is to be started as early in the spring as possible, and as soon as it is well in hand, the Government proposes to go on with the construction of a line from Edmonton to Athabasca Landing. Plans for the construction of telephone lines in Southern Alberta are under consideration.

Manitoba's Public Telephone Service.

The final result of the voting in Manitoba upon the proposal to establish a Government and municipal telephone service, shows that the by-law was carried in 55 municipalities and rejected in 68. The policy of the Government was announced in the Lieut.-Governor's speech at the opening of the Manitoba Legislature, Jan. 3, which said: "The recent vote on the principle of a public-owned system of telephones has been accepted as a declaration of approval, and my Gov-

ernment has already taken the necessary steps to construct at least 1,000 miles of long distance lines this coming summer, which is a guarantee of reduced rates for that very important service." In an interview the Premier stated that the question of the routes of these lines was under consideration, but generally it was the intention of the Government to construct in the first instance through those municipalities which have given a majority of votes in favor of public ownership, starting at Winnipeg and building west and south. The question of the construction of municipal exchanges and rural lines rested entirely with the municipalities. At a meeting of the executive of the Liberal party in the Province Dec. 28, a resolution was passed declaring in favor of complete government ownership and operation of a provincial telephone system. Tenders for poles were received to Jan. 15, the specifications calling for 5,000 poles 30 ft. long, and 45,000 of 25 ft. long, to be delivered at the rate of 10,000 a month from April 1.

RAILWAY SPRINGS

Locomotive, Tender and Passenger Car Springs of every description

Equalizing, Draw-bar, Buffer and Spiral Springs of all kinds

Street Railway Springs from the largest to the smallest

Manufactured by

B. J. COGHLIN & CO., 432 St. Paul St., Montreal, Can.

THE W. H. KELSON CO.

80 ST. FRANCOIS XAVIER ST. - MONTREAL

RAILWAY AND STEAMSHIP SUPPLIES
NEW AND SECOND-HAND LOCOMOTIVES
CARS, STEAM SHOVELS AND GENERAL CONTRACTORS' PLANT

AS GOOD AS "NOVO"

A claim made by other makers which has yet to be proved.

Have you tried the new Sectional "NOVO" Steel for Lathe, Planer and Cut-off Tools?

REQUIRES NO FORGING. A SAVING OF 35% to 45%.

WILLIAM ABBOTT, 334 St. James St., MONTREAL

ELLIS PATENT BUMPING POST

SIMPLE, STRONG AND LASTING.
ADAPTED TO ALL POSITIONS ON THE GROUND OR TRESTLES

MECHANICAL MFG. CO.
CHICAGO, ILL., U.S.A.

THE CLIMAX CATTLE GUARD

MANUFACTURED OF **Shale Clay**

Will not burn, warp, rust or decay, will last longer, look better and cost less than any other.

THE CLIMAX STOCK GUARD CO.

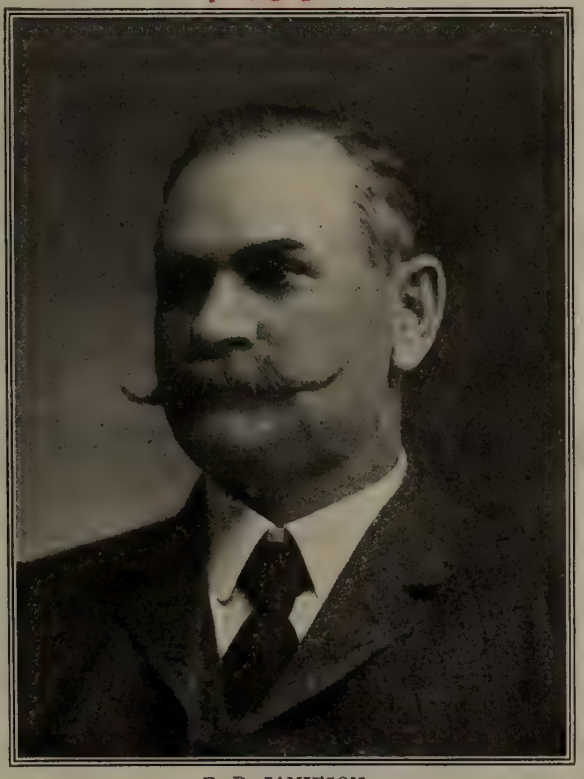
The Railway Commission's Work

The Chief Railway Commissioner, A. C. Killam, addressed the Canadian Club in Montreal, Jan. 21, as follows:

When asked to address the Club on the work of the Railway Commission I gladly availed myself of the opportunity to endeavor to disseminate information respecting that body, because I feel that in some respects its functions and its work are not fully understood, and that the more information the public can get about the Commission the better they will appreciate its operations.

The subjects committed to the jurisdiction of the Commission are so numerous that a full discussion of them would occupy much more time than you have placed at my disposal. I am not in the position of a statesman who can announce a policy. The Commission is a judicial body which has to decide in a judicial spirit, on matters that come before it, and it would not be proper for one occupying my position to assume to outline what will be the future policy of the board upon questions on which it has not yet adjudicated. The Board of Railway Commissioners was constituted under an act of the Parliament of Canada passed in 1903, and it came into operation on Feb. 1, 1904. The three commissioners who constitute the the board have under their authority a staff of 31, a number which will have to be considerably increased in the near future. The jurisdiction of the board does not extend—as a great many people seem to think—to all the railways of Canada, but only to those to which the Railway Act applies. The Provincial Legislatures have certain powers to authorize the construction of railways within a province, and to these railways the Dominion Act applies only as to certain specified matters such as crossings over or junctions with Dominion railways, or the exchange of traffic between them and Dominion railways. But the Railway Act, 1903, is full of provisions giving express power to our board over particular matters. Even before railways are constructed we have to approve of location plans, of the gradients and curves proposed, etc., and before they are opened for traffic, they have to be inspected by our engineer and the board must give leave for them to be operated. The plans of their bridges have to be approved by the board; one railway cannot cross another without the board's consent, nor can a railway cross or run along a highway nor can a new highway be opened across a railway without such permission. The board has also certain legislative powers on subjects which Parliament has not seen fit to deal with in detail. We are empowered to make orders requiring railway companies or others to do things that are required by the general railway act, or by the special act relating to the particular railway, or to forbid them to do that which these acts forbid. The board is a court of record with the same power to enforce its judgments as superior courts have. The Governor-General-in-Council is given jurisdiction to set aside or vary any order of the board, and to the Governor-General-in-Council an appeal lies, but that is the only general appeal. In cases where it is claimed we have exceeded our jurisdiction, an appeal may be had to the Supreme Court of Canada by leave of one of the judges of that Court; in certain other matters an appeal may be had to the Supreme Court by leave of the board itself. These are the remedies available to those who think the board has done wrong. But, although the board is constituted a court, it is constituted a court only for the purpose of exercising the jurisdiction that is given it by statute; it has not a general jurisdiction to determine all disputes between the public and railway companies. We have nothing to do with the contracts which railway companies enter into with the public, except so far as they may incidentally come into consideration in the exercise of the powers specifically given to us. We have no power to enforce these contracts as such, to give damages for their breach, or to compel obedience to them, By the laws of the different provinces the relation between carriers, and shippers, or consignees, give rise to numerous obligations and liabilities which it is not the duty of our board to enforce. These arise under the provincial laws and are regulated by the courts of the different provinces. The duty of the board is simply to enforce the Railway Act, and nothing else. Persons may complain we are not doing our duty because we do not compel the railway companies to do something or other, but we would be usurping functions which do not belong to us were we to go outside the jurisdiction that Parliament has conferred upon us, and attempt to regulate railways in all matters.



R. R. JAMIESON,
General Superintendent Western Division Canadian Pacific Railway.

Probably, you will be more interested in matters relating to freight tariffs and rates, and to the facilities which railways are bound to afford the public, than in any other phase of the question. The board is invested with very large powers respecting the rates and tolls to be charged for transportation on railways. We have power to prescribe the classification of goods for the purpose of determining the tolls to be charged for their carriage. The tariffs are made with regard to these classes by the railway companies primarily, but the railway companies have special commodity rates which, though they may be included in a particular classification are, it is thought, properly to be considered subjects of separate and different treatment. The principle upon which the Railway Act proceeds in regard to the tariffs of railways is this: The railway companies are required to make up what are called standard tariffs, in which they give the maximum tolls according to mileage, which they are entitled to charge for passenger traffic or for the different classes of freight traffic. These tolls are approved by the board and they cannot be exceeded, nor can railways charge anything for the carriage of goods until these standard tariffs are approved. Then the railway companies are allowed to make what are called special tariffs for the carriage of these different classes or of special commodities. These tariffs do not require the approval of the board; the only limitation is that the rates must not be higher than the standard tariffs which have been approved, and that they must conform to the provisions of the Railway Act, with regard to discrimination and preference and other matters. The

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

STREET RAILWAY LUBRICATION A SPECIALTY.

GALENA RAILWAY SAFETY OIL

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT.

railway companies are also allowed to make what are called competitive freight tariffs, which, however, must be lower than the standard tariff rates. These tariffs are for traffic between competitive points, and a company may be allowed to violate the long and short haul clause by charging less for a longer distance than for a shorter distance, so as to meet competitive conditions, such as competition by water carriage or by other railways, which do not reach the intermediate points on their line. The railways are allowed to do this because it is thought to be a benefit to them to be allowed to carry, although at less profit, this traffic between competitive points, and because the earnings derived from that source helps them in such a way that they can be reasonably expected to cut down the rates between intermediate points. Then, railway companies may be compelled to make what are called joint tariffs. In the case of two or more railways which form a continuous line between a point on one railway and a point on the other, they may be required to make through rates less than the sum of their local rates on the two lines would be. The board has power to fix the proportion in which the through rate is to be divided between them. Although the board is not required to approve of these special tariffs and commodity tariffs, yet it has a general power of disallowance of all tariffs. It is distinctly provided by the act that all tariffs or portions of tariffs shall be subject to disallowance by the board when the board considers them unreasonable or unjust, or in any way contrary to the provisions of the statute. Thus, there are two grounds and two grounds only on which the board is authorized to interfere. One is that the tariffs cannot conflict with the act. Of course, it is understood these tariffs can be set aside if they do disobey the provisions of the statute. That raises differences of a kind that an ordinary court has to deal with, and questions of fact have to be determined, and questions of law as to the construction of the act. But in the other feature as to the reasonableness of rates other difficulties arise. The act says that if the board considers rates unreasonable or unjust, it can disallow them, and the reasonableness or justness of a rate is a question of fact and not a question of law. The board's findings are by the act made final and binding upon all courts, and the act provides that if the board considers the rates unreasonable or unjust, it can disallow the tariffs. Full control is thus given to the board, and these tariffs are made subject to its discretion. On such a question an appeal from the board may be had to the Governor-in-Council. In the United States they have had a great deal of controversy upon the question of whether railway rates and tolls should be subject to governmental regulation. Tons upon tons of literature have been written on that question, and hours and hours have been devoted to speeches pro and con as to whether such would be in the best interests of the public, and as to whether it was fair to the railway companies that had invested their money, and as some people claim, ought to have the same right to manage their investment as people who have invested in other enterprises have. But these points are settled so far as Canada is concerned, and they have practically always been settled. In the first place, it was always a principle of the English common law that common carriers were bound to carry at reasonable rates, and if an unreasonable rate were extorted the party could afterwards sue in the courts to recover the excess above what was reasonable. It is nothing new, therefore, to subject carriers to some jurisdiction to determine whether freight rates are reasonable or not. Almost from the beginning of railway legislation in the old Province of Canada, long before the incorporation of the Grand Trunk Ry. Co., there was provision that the rates of railway companies should be subject to approval by Government, and not only were they to be subject to approval, but they were subject to revision from time to time. Long before the incorporation of the G.T.R.—and I cite that as being the oldest of our great railway systems—there was such legislation, and the charter of that company embodied it as part of its terms. There is, therefore, no injustice to the railway companies in now making their rates subject to governmental control in this country. Of course, our board is not the Governor-in-Council, but under the old act there was the Railway Committee of the Privy Council, which was given, among other subjects of jurisdiction, that of disputes respecting rates and tolls on railways, and our board is made by statute the direct successor of the Railway Committee of the Privy Council. At one time there was embodied in some of the former railway acts a provision that Parliament might reduce railway tolls, but that such should not be done by Parliament unless for a year previous it could be found that the railway company had had a net income from all sources of 15% upon the capital actually expended upon the construction of the railway. When the C.P.R. charter was passed that amount was reduced from 15% to 10%. There are some provisions in the C.P.R. charter which the company claims prevent our board from exercising full control over the rates, and these provisions may yet lead to some litigation. But with that exception, Canada is likely to be free from that large litigation and agitation that has prevailed in the U.S. over the question of governmental control of railway rates.

As regards this question of the reasonableness of railway rates, we have had cases in which rates on special commodities, or, a special series of rates between different points, or rates of a particular character have been in question, and we have dealt with many of these. But, except when the board allowed the standard tariff originally we have not dealt seriously with the general question as to what the whole system of the rates of a railway company should be, or what it was reasonable to allow them to earn wholly. It is difficult to form any guide for the determination of such a question. The Railway Act affords us no guide whatever. In the U.S. the action of the Interstate Commerce Commission, and of the various state boards, has been largely paralyzed by the litigation upon constitutional questions as to the power of the legislature to give boards authority to reduce tolls beyond the rate which the courts thought would give a reasonable return. In one state, acting on some remarks of judges in the U.S. Supreme Court, they have established a series of rates on this principle: They have had persons to make a valuation of all the railways in the state, to determine as far as they could what it would cost to reproduce these railways, and to say what was fair to allow a reasonable return upon the amount thus ascertained. You can all imagine what would be the enormous task of anybody who assumed to determine what railway rates should prevail in Canada upon a basis of that kind. There are a great many things to be said pro and con on the question of what is a proper basis for determining reasonable rates.

Probably you may think, as I thought in my innocence at one time, that there is some basic principle on which tariffs of railway rates are formed, something that might be taken as a foundation upon which to judge of the reasonableness of rates. However, in one case which we had before us not long ago, we had as a witness a gentleman who had grown old in railway service and had retired to private life. He had passed all of his life dealing with tariffs and tolls, and he was asked in the course of the case on what principles the formation of railway rates was based. And the best answer this gentleman could give was this—he said: When the first man made a railway tariff he had a Chinese puzzle; he did not know what he had to do, but he had to make a tariff and he made one of some kind, and the people who came after him have been acting on it ever since. You can, therefore, judge what are going to be the difficulties of the board when they come to determine, as probably they will have to yet, what shall be the general basis on which railway rates in Canada shall be framed?

There is another question on which many of you would no doubt like to hear something. I refer to the question of car shortage. That question is always with us, but it has been accentuated in the last two years. The business development of Canada has been very great of recent years, and I do not think I am going beyond what my judicial position warrants when I say, that we could hardly expect the railway companies—any more than we could expect others engaged in different businesses—to have been fully supplied with all the cars and all the equipment that would have been necessary to move all the traffic offered during the busy seasons of the last two years. The main question is, whether the railways have gone as far as they ought, and whether they have been prepared for what they reasonably ought to be prepared for? It is upon that principle we think we should deal with the question. It is not our business to compensate people for the past; the act distinctly provides that the remedy of parties who are not furnished with accommodation for the transportation of their goods, is to be had in the courts. But our duty is to look to the future and to see that a proper remedy is applied. We may be asked to apply it quickly or after a time, but you will all see the difficulty we have in getting at the facts in sufficient time to act quickly. We have had a number of cases in which we have been able to afford relief to some extent; we have had other cases in which when the complaints were forwarded to the railway companies, they have acted promptly, and in that way we have been able to render assistance. But the general question has appeared in this way to us: For instance, if a railway company is short of cars and equipment, and some person applies to us to order the railway company to furnish him with cars—well, railway cars and railway locomotives are not on sale every day; the railway company cannot go into the market and buy offhand, and it cannot immediately obey any order we might make in that direction. There would be a fear, of course, that they could only obey our order by taking the cars and equipment from some other places and persons who are equally entitled to them with those who made complaint to the board. That is one difficulty the board experiences, in making an effective order when such an application is made to it. Therefore, we think, except so far as special circumstances would appear to warrant it, that the only course we can adopt is to make enquiry into the question generally, and if we find that railway companies are not reasonably supplied with what is necessary to meet what they ought to meet under the statute, to take some steps to see that they supply themselves in future sufficiently beforehand to accommodate the traffic. If they are given that opportunity and the railways do not avail of it, then more stringent measures might be advisable. With this view we, some months ago, made up our mind that we would ask the chief railway officials to meet the board for the discussion of that and some other questions, and we appointed

Westminster, S.W.

Feb. 5, 1907, to hold such a meeting, so that we might learn something as to what the railways are prepared to do, and which will help us to determine what it would be reasonably possible to require them to do in the future.

It may be interesting to give you a few figures as to the work of the board. The board was in existence for eleven months in 1904, and in that time there were 705 applications to the board. In 1905 there were 1,197, and in 1906, 2,269. You will see the enormous growth of the number of applications, and when I speak of applications I speak of those made to us in formal shape. Apart from these, we receive letters by the hundreds, complaining of certain things, on which we take action as they seem to deserve, and as to which we make enquiry and endeavor to obtain or to effect relief. The following figures show the number of orders made by the board: 1904, 304; 1905, 538; 1906, 1,544. The difference between the number of applications and the number of orders is accounted for by the fact that sometimes, of course, applications are refused, and then there is no order; that very often compromises are made and the matter does not come up for final adjudication; that often the board makes informal decisions which are obeyed without question. In the case of informal applications and complaints by letter, we, in most cases, send them to the railway companies, and often it is found that mistakes have been made and restitution is done by the companies, while in other cases it is found that the companies have acted in accordance with their tariffs. Of course, then it becomes a question as to whether a change ought to be made in the particular tariff, and that has to be considered afterwards.

I wish to say with reference to the future that we have certain rules under which applications to the board are to be made formally, but there are parties who apply to the board and who cannot conveniently serve the proper officers with the necessary notice to bring them before the board. There are also many people who write letters to the board, but who appear to think it something terrible to draw up a formal application even though all they need do in the formal application is to use the language which they use in letters to the board, and serve the notice on the railway companies. It very often occurs that we make copies of these letters and send them to the railway companies and ask for an answer, but that involves delay. If the parties who complain would do this for themselves they would save a great deal of trouble and a great deal of time which is now lost. A large number of our cases are disposed of on the papers without coming to open court, but if parties wish it, they are entitled to have a hearing in open court. However, those who desire a hearing in open court should prepare themselves for that hearing. They should learn something of the facts, and in an important case, employ a lawyer or some one having expert knowledge in railway matters to conduct the case for them. If that were done it would assist the board a great deal. Many people think that the duty of the board is, the moment they hear of a complaint, to ferret out all about it and to give relief. Well, we have not disputed the idea that we may be fairly asked to do that, but I can tell you, that it would involve an enormous amount of labor and take an enormous amount of time to do so. However, if parties do lay a case before us which has been ill-considered, and without the information necessary with regard to it, although we may think that they have not established a case, yet we may still enquire fully into the case afterwards. Of course, if there is an accumulation of such cases, they cannot be taken up at once by the official in charge of them, and considerable loss of time occurs. On the other hand, if the parties would get their cases properly before the board they might immediately ask for a decision. I trust, that from what I have said, you may know a little of the difficulty that faces the Commission in exercising its jurisdiction, and the kind of work it has to do. I trust that these difficulties or some of them will disappear, as the members of the board and the public get better acquainted with the difficulties underlying many of these matters.

There is one thing more I ought to say. I think this country owes a deep debt of gratitude to the first Chief Commissioner of the board, Mr. Blair. He is a very able lawyer; he had much experience as Minister of Railways, and as the head of the Railway Committee of the Privy Council; he took great part in drawing up the Railway Act under which we are working at present, and in order to frame it he must have inquired fully into the different systems in vogue elsewhere. He went to the board with a large amount of knowledge; more than any other man could have had in undertaking such work. He did great work in establishing the Canadian Railway Commission; he established it upon broad lines; I very much regret, and I think the country should regret, that he saw fit to retire so soon from the work of the board. I can only say that it appears to me, from my experience since I have been with the board, that any defects in the system, or in the organization of that board, are almost if not wholly in regard to matters as to which Mr. Blair's ideas were disregarded and overruled, rather than as to those matters with regard to which his ideas were carried out.

March Birthdays.

Many happy returns of the day to

J. N. Sutherland, ex-General Freight Agent C.P.R., St. John, N.B., born at Sydney, N.S., Mar. 17, 1843.

E. J. Travers, Manager British Columbia Car Service Bureau, Nelson, B.C., born at Hamilton, Ont., Mar. 31, 1872.

W. F. Tye, ex-Chief Engineer C.P.R., Montreal, born at Haysville, Ont., Mar. 5, 1861.

G. W. Vaux, Assistant General Passenger and Ticket Agent, G.T.R., Chicago, Ill., born at Montreal, Mar. 21, 1866.

H. Wallis, ex-Chief Mechanical Superintendent G.T.R., Montreal, born at Derby, Eng., Mar. 10, 1844.

D. O. Wood, General Freight Agent for Ontario, Allan Line Steamships, Toronto, born at Kleinburg, Ont., Mar. 16, 1864.

The C.P.R. oil boring outfit has been operating at Bullshead bridge, about five miles east of Medicine Hat, Alta., and has reached a depth of 1,000 ft., where the mud bed, found at Medicine Hat at a depth of 650 ft., was encountered. The company is using the gas in every possible capacity at its shops there, the latest development being the manufacture of engine springs.

Orders by the Railway Commissioners.

2139. Dec. 6.—Re tariffs of telephone tolls.

2140. Oct. 24.—Directing the G.T.R. to provide protection at Wilson, Norwich, Dundas, and Peel streets, Woodstock, Ont.

2141 to 2254. Nov. 22.—Bell Telephone Co. crossings over various railways.

2255. Dec. 13.—Authorizing the town of Cobourg, Ont., to erect and maintain electric light wires across G.T.R. tracks on William St.

2256 to 2259. Dec. 13.—North American Telegraph Co. crossings over various railways.

2260 to 2268. Dec. 13.—Bell Telephone Co. crossings over various railways.

2269. Dec. 12.—Authorizing the C.P.R. to construct and operate a spur in Okanagan Landing, B.C.

2270. Dec. 12.—Authorizing the C.P.R. to construct a spur to Reid Bros. premises, Elkhorn, Man.

2271. Dec. 12.—Authorizing the village of Clifford, Ont., to lay a gas pipe under G.T.R. tracks.

2272 to 2321. Dec. 13.—Bell Telephone Co. crossings over various railways.

2322. Dec. 12.—Authorizing the G.T.R. to lay a siding across Elgin and Colborne streets to Tait-Carss Lumber Co.'s premises, Barrie, Ont.

2323. Dec. 15.—Authorizing the Montreal St. Ry. Co. to cross the Chateauguay & Northern Ry. tracks at Pius IX Ave., Maisonneuve, Que.,

2324. Dec. 15.—Authorizing the Canadian Northern Ry.'s revised location of its line in Sudbury, Ont. Mileage 117.2 to 118.5 north from Parry Sound.

2325. Dec. 4.—Authorizing the Walkerton and Lucknow Ry. to cross the G.T.R. tracks to the furniture factory in Hanover, Ont.

2326. Nov. 15.—Authorizing the C.P.R. Co. to construct a siding to the James Smart Mfg. Co.'s premises, Brockville, Ont.

2327. Nov. 20.—Authorizing the C.P.R. to dispense with the services of permanent watchman at drawbridge about 1¼ miles from Nomininge station, Quebec.

2328. Dec. 15.—Authorizing the C.P.R. to construct a spur to the Anglo-American Lumber Co.'s premises, Vancouver, B.C.

2329. Dec. 15.—Approving the Canadian Northern Ontario Ry.'s revised location of its line through the tps. of McKim and Neelon, Ont.

2330. Dec. 14.—Authorizing the C.P.R.'s revision of the location of its Lauder Branch in Manitoba.

2331. Dec. 14.—Authorizing the Grand Valley Ry. Co. to open for traffic the portion of its railway extending from the southern limit of Galt, Ont., to its junction with the G., P. & H. Ry.

2332. Dec. 15.—Authorizing the C.P.R. to construct and operate a spur line to the premises of the Rideau Malleable & Foundry Co., Smith's Falls, Ont.

2333. Dec. 18.—Authorizing the G.T.R. to construct a branch line between its main line east of Port Hope viaduct and a point north of Ontario St., Port Hope, Ont.

2334. Dec. 17.—Authorizing the town of Gibson, N.B., to lay a waterpipe under C.P.R. tracks on Neil St.

2335. Nov. 13.—Re forms of contracts of the Canadian and Dominion Express companies.

2336. Dec. 12.—Authorizing the G.T.R. to construct and operate a branch line in Toronto Jct., Ont.; and authorizing the Union Stock Yards, Ltd., and the C.P.R. to construct and operate a branch line from the C.P.R. line in Toronto Junction.

2337 to 2345. Nov. 28.—Bell Telephone Co. crossings over various railways.

2346. Nov. 27.—Authorizing the C.P.R. to build a bridge at mileage 135.96. Chapleau section.

2347. Nov. 27.—Authorizing the C.P.R. to construct bridges at mileage 124.3 and 144.6, Medicine Hat section.

2348. Nov. 27.—Authorizing the C.P.R. to construct a bridge at mileage 50.02, Ignace section.

2349. Nov. 27.—Authorizing the C.P.R. to construct bridges at mileages 106.37, 49.23, and 48.23, Algoma section.

2350. Nov. 28.—Authorizing the Canadian Northern Ontario Ry. to construct a bridge over Irwin Creek, Nipissing, Ont.

2351. Dec. 19.—Authorizing the C.P.R. to construct two bridges on the Molson cut-off, Kenora section, one over Cook's Creek, the other over the east branch thereof.

2352. Dec. 19.—Authorizing the Barrie Gas Co. to lay a waterpipe under G.T.R. tracks.

2353. Dec. 19.—Authorizing the C.P.R. to construct and operate a spur line to the Danville Lumber Co.'s premises, Montreal.

2354. Nov. 16.—Authorizing the C.P.R. to open for traffic a spur in the town of Cote St. Paul, Que.

2355. Dec. 5.—Authorizing the C.P.R. to cross Wickett & Craig's siding and Morse siding to connect with the Davies shipping siding of the Toronto Belt Line Co.

2356. Dec. 19.—Authorizing the C.P.R. to open for traffic its railway, Wolseley-Reston Branch, Sask.

2357. Dec. 17.—Authorizing the C.P.R. to install an interlocking plant where the C.P.R. crosses the G.T.R. in Milton, Ont.

2358. Nov. 16.—Authorizing the Midland Ry. of Manitoba to cross C.P.R. tracks at Clifton Ave. and McPhillips St., Winnipeg.

2359. Nov. 29.—Authorizing the C.P.R. to construct a level crossing over the G.T.R. track leading to Goldie's Mills, Guelph, Ont.

2360. Dec. 17.—Authorizing the Great Northern Ry. Co., U.S.A., to waive notice of a rate of $4.05 net per ton on coal from Coal Creek, B.C., to Helena, Mont.

2361. Dec. 17.—Directing the G.T.R. to construct a farm crossing where its line crosses E. M. Kelly's farm in East Oxford, Ont.

2362. Dec. 26.—Approving the G.T.P. Ry.'s located line in the districts of Portage la Prairie and Winnipeg, Man.

2363. Dec. 20.—Authorizing the Windsor, Essex and Lake Shore Ry. to operate its trains for construction purposes on its line where it crosses the M.C.R. at Talbot St., Essex, Ont.

2364. Dec. 19.—Directing all express companies to furnish to the Board on or before Feb. 1, 1907, copies of their annual, semi-annual or other statements of their affairs and business, etc.

2365. Dec. 18.—Extending the time for filing and approving of all tariffs of tolls of express companies until Mar. 1, 1907.

2366. Dec. 19.—Approving the C.P.R.'s supplement 5 to its standard passenger tariff W no. 38 and cancelling no. 3 and that part of supplement 4 applying between Daysland and Hardisty, Alta.

2367. Dec. 20.—Authorizing the Pembroke Electric Light Co. to erect wires over the C.P.R. tracks 2½ miles east of Pembroke, Ont.

2368. Dec. 19.—Granting application of C.P.R. for order varying order of Aug. 6, 1906, granting leave to the C.P.R. to cross the C.N.R. track at West Ft. William, Ont.

2369. Dec. 26.—Authorizing the G.T.R. to construct a branch line in Southampton, Ont., to the W. C. Williams' flour mill.

2370. Dec. 26.—Authorizing the Montreal Street Ry. to cross the C.P.R. tracks at Papineau Ave., Montreal.

2371. Dec. 26.—Approving the C.P.R.'s supplement 6 to its standard passenger tariff W38, applying between Spence's Bridge at Nicola, B.C., on the basis of 4c. per mile.

2372. Dec. 26.—Approving the C.P.R.'s supplement 2 to its standard freight tariff C.R.C. no. W4.

2373. Dec. 29.—Authorizing the St. Maurice Valley Ry. to open for traffic the portion of its line between Three Rivers and Shawinigan Falls, Que.

2374. Dec. 28.—Extending the time fixed in order 1741 authorizing the Ottawa Electric Ry. to cross by an overhead bridge the Canada Atlantic Ry. tracks on Bell St., Ottawa.

2375. Dec. 28.—Authorizing the Vancouver, Westminster and Yukon Ry. to cross the C.P.R. tracks, and to join with the C.P.R. spur to Fraser River mills at Millside, New Westminster, B.C.

2376. Dec. 28.—Authorizing the C.P.R. to cross the Canadian Northern Ry. spur line to Bird's Hill ballast pit, Man.

2377. Authorizing the Canadian Northern Ontario Ry. to build a bridge over the Wahnapitae River, Ont.

2378, 2379 and 2380. Authorizing the Canadian Northern Quebec Ry. to construct bridges over the St. Anne, Batiscan and Blanche Rivers, Que.

2381. Jan. 3.—Approving the Quebec, Montreal and Southern Ry.'s revised location between St. Gregoire to a junction with the Lotbiniere and Megantic Ry. at St. Philomene, Que.

2382. Jan. 4.—Approving the Vancouver, Victoria and Eastern Ry. and Navigation Co.'s amended location between Cloverdale and east line of sec. 15, tp. 16, New Westminster district, B.C.

2383. Jan. 4.—Authorizing the C.P.R. to construct a branch line to the Sinnot Sand Co.'s premises, Man.

2385. Jan. 4.—Authorizing the Dunnville Gas Development Co. to lay a gas main under the G.T.R. tracks at Forks Road, east of Dunnville Station, Ont.

2386. Jan. 4.—Approving Grand Trunk Pacific Ry. Co.'s by-law, dated Nov. 8, 1906, authorizing the chief executive officer of the company or such other officer as he may from time to time designate to prepare and issue tariffs of tolls.

2387. Jan. 4.—Authorizing the Canadian Northern Ontario Ry. to construct a deviation of the Great North Road, a highway in Parry Sound, Ont.

2388. Jan. 4.—Authorizing the Essex Terminal Ry. Co. to build its line across McDougall St. and Dougall Road in Sandwich East, Ont.

2389. Jan. 4.—Authorizing the St. Maurice Valley Ry. to join its track with the Shawinigan Falls Terminal Ry. tracks in Shawinigan Falls, Que.

2390. Jan. 4.—Authorizing the village of Dublin, Ont., to lay a gas pipe under the G.T.R. tracks

2391. Jan. 4.—Authorizing the C.P.R. to build a branch line on the Lac du Bonnet Branch, Man., to the Inter-West Peat Fuel Co.'s premises.

"HART" CONVERTIBLE CARS

Our Cars are not an Experiment. **Over 25,000 in actual service.**

Hart Convertible Cars have been in successful operation for the last four years on many of the leading railroads and during that time have been working under exceptionally hard conditions. This year we offer a car stronger in every way than heretofore produced, and guaranteed to stand up under the hardest steam shovel work and general road service.

2392. Jan. 7.—Authorizing the C.P.R. to build a bridge at Shepherd Lake, Toronto-Sudbury branch.

2393. Jan. 7.—Authorizing the town of Tillsonburg to carry a water main under G.T.R. tracks.

2394. Jan. 7.—Approving the North American Telegraph Co.'s by-law, authorizing the General Manager and Secretary, or such other officer as may at any time be designated, to prepare and issue tariffs of tolls.

2395. Jan. 7.—Approving the Bell Telephone Co.'s by-law authorizing C. F. Sise, Jr., General Superintendent, or such other officer as he may designate, to prepare and issue tariffs of tolls.

2396, 2397, 2398 and 2399. Authorizing the Midland Ry. of Manitoba to operate its trains over the crossings of the Canadian Northern Ry. tracks at Carman and Roland, and over the C.P.R. tracks at Plum Coulee and Elm Creek, Man.

2400. Jan. 7.—Approving the Michigan Central Rd.'s interlocking plant at La Salette, Ont., at the crossing of the G.T.R., and authorizing it to operate its trains over the crossing.

2401. Nov. 29.—Complaint of I. Hansler, of Allanburgh, Ont., that cattle pass erected by the N., St. C. & T. Ry. under the railway on his farm is unsuitable.

2402. Dec. 10.—Approving the Canadian Northern Ontario Ry.'s shipping bill, form 64.

2403. Jan. 8.—Bell Telephone Co. crossing C.P.R. and public crossing one mile north-east of St. Martin Jct., Que.

2404. Nov. 29.—Directing the Guelph and Goderich Ry. to provide an undercrossing under its tracks on J. Barr's farm, Blyth, Ont.

2405. Dec. 12.—Authorizing the G.T.R. to construct a branch line to the Pommer & Cowan Furniture Mfg. Co.'s premises, Berlin, Ont.

2406. Jan. 10.—Petition of residents and ratepayers of Rossport, Ont., to authorize the C.P.R. to open McKay and Boon Sts.

2407. Jan. 10.—Authorizing the Harrietsville Telephone Association, Ont., to erect poles and wires across G.T.R. tracks east of Dorchester station, Ont.

2408. Jan. 10.—Authorizing the C.P.R. to construct a diversion of its line at Emery, Ont.

2409. Jan. 10.—Authorizing the Canadian Northern Quebec Ry. to place its tracks across the C.P.R. tracks in Deschambault parish, Que.

2410. Jan. 10.—Authorizing the C.P.R. to construct a branch line to J. A. Jamieson's premises, Grattan, Ont.

2411. Nov. 29.—Directing that reports of any person appointed by the Board to inquire into any accident be privileged, and shall only be made public or given out upon application therefor by order of the Board.

2412. Jan. 9.—Authorizing the C.P.R. to build a bridge across the Seguin River, Ont.

2413. Dec. 1.—Authorizing the C.P.R. to cross the Guelph Radial Ry.

2414. Jan. 9.—Amending a certificate granted by the Deputy Minister of Railways and Canals respecting additional lands acquired by the B.C. Southern Ry. along its route.

2415. Nov. 29.—Directing the C.P.R. to construct and maintain a farm crossing for D. McOuat, Staynerville, Que.

2416. Jan. 8.—Approving the Vancouver, Victoria and Eastern Ry. and Navigation Co.'s located line between Fraser River bridge and the junction with the Victoria Terminal Ry. at Oliver's, B.C.

2417. Jan. 10.—Authorizing the city of Hamilton, Ont., to lay a gas main under G.T.R. tracks on Ferguson Ave. and Barton St.

2418. Jan. 10.—Authorizing the Consumers Gas Co., Toronto, to lay a main under the G.T.R. tracks at crossing of Eastern Ave.

2419. Jan. 9.—Authorizing the G.T.R. to construct sidings and spurs therefrom across streets in Toronto for the accommodation of industries in the vicinity of Thackeray and Dickens streets and Carlaw Ave.

2420. Jan. 11.—Approving the Vancouver, Westminster and Yukon Ry.'s location of the fifth section of its line from station 1671+10 to station 3306+52, being the north boundary of North Vancouver to the Cheakamus River, B.C.

2421. Jan. 11.—Authorizing the Toronto Ry. Co. to operate its east track crossing the C.P.R. tracks on Avenue Road, Toronto.

2422. Jan. 7.—Authorizing the C.P.R. to give a rate of 17 cents per 100 lbs. on 1,000 lbs. of wool in grease from Montreal to Peterboro, said shipment having been originally made from Lethbridge, Alta., to Montreal, and refused.

2423. Jan. 9.—Approving the Canadian Northern Ry.'s standard passenger tariff C.R.C. 186, applying on the Ridgeville section, Man.

2424. Jan. 9.—Authorizing the Canadian Northern Ry. to charge 3½c. per mile per passenger between stations on the Q., L.L. & S. Ry. & S. Co.'s line Regina to Prince Albert, Sask.

2425. Jan. 9.—Approving the Canadian Northern Ry.'s supplement 1 to standard passenger tariff C.R.C. 190, applying a rate of 3½c. between stations on the Stony Plains section and Morinville branch, Alta.

2426 to 2452. Dec. 27.—Bell Telephone Co. crossings over various railways.

2453 and 2454. Jan. 14.—Authorizing the Canadian Northern Ontario Ry. to construct two bridges over the Vermillion River.

2455. Jan. 14.—Authorizing the town of Dunnville, Ont., to lay a water pipe under G.T.R. tracks.

2456. Jan. 14.—Approving the Preston and Berlin St. Ry.'s place and mode of crossing by its railway of the G.T.R. spur line from its main line in Waterloo, Ont., and crossing Wilmot St. and the switches leading from the spur in Berlin, Ont.

2457. Nov. 29.—Authorizing the town of Owen Sound to lay a sewer pipe under G.T.R. tracks.

2458, 2459, 2460, 2461 and 2462. Jan. 18.—Approving Grand Trunk Pacific Ry.'s plans of located lines shown on plan, and profile filed under case 64, file 2236, also between mileage 14 and 17 west of Yellowhead Pass, B.C., from mileage 0 to mileage 84.3 in Alberta, from mileage 32.3 west to mileage 0 in Alberta, and from mileage 0 east to mileage 35 in Alberta, and from mileage 0 west to mileage 14 in British Columbia.

2463. Jan. 18.—Approving the Quebec, New Brunswick and Nova Scotia Ry.'s revised location through the county of Champlain, Que.

2464. Dec. 19.—Directing the G.T.R. to provide better protection on Simcoe St., Cedardale, Ont.

2465. Jan. 18.—Authorizing the C.P.R. to construct a branch line to J. Y. Griffin & Co.'s premises, West Fort William, Ont.

2466. Jan. 18.—Authorizing the Vancouver, Victoria and Eastern Ry. and Navigation Co. to construct a branch line from its main line to Victoria shaft, Phœnix, B.C.

2467. Jan. 18.—Authorizing the township of Grey, Ont., to carry a drain across the right of way and under the G.T.R. tracks.

2468. Jan. 18.—Authorizing J. H. Hager to lay a gas pipe under G.T.R. tracks at Hagersville, Ont.

2469. Jan. 18.—Approving the Niagara, St. Catharines and Toronto Ry. Co.'s location of its line from the Welland Canal, tp. of Grantham, to Virgil, Ont.

Summaries of orders issued since the foregoing are given on a later page of this issue.

G.T.R. Passenger Rates.

The stated case for the opinion of the superior courts, as to the jurisdiction of the Toronto Police Magistrate, in the recent proceedings in which C. M. Hays, Second Vice-President and General Manager G.T.R., was charged with failing to carry third-class passengers for a penny a mile, and to provide at least one train a day having in it third-class carriages throughout the entire length of the line, as required by sec. 3, chap. 37, 16 Vic., has been approved by the parties, and will come on for argument at an early date. The information was laid by W. N. Robertson, Toronto, a newspaper reporter, who said in the evidence given, Dec. 1, that he made attempts to get a third-class ticket at the G.T.R. ticket office at the Union Station, Oct. 17, and offered the rate of 2c. a mile to the conductors on all trains going east that day, but was obliged to pay 2½c. a mile until he got off either at Riverdale, York or Scarboro' stations; and also that he failed to find any third-class carriages. Evidence was also given by J. D. McDonald, District Passenger Agent, G.T.R., Toronto, who stated that the company had no penny rate between Toronto and Montreal, except to Montreal itself, as a regular thing, but often had special excursions at a low rate; the company did not have any cars labelled third class. The Police Magistrate entered a conviction, finding as facts that the G.T.R., of which Mr. Hays was the responsible head in Canada, had not at any time during 1906 fixed or issued a tariff of fares or charges payable by each third-class passenger; that the company had not permitted a third-class passenger to travel on its line at the fare or charge of one penny currency for each mile travelled, and that at least one train a day having in it third-class carriages had not been run between Toronto and Kingston, Ont., being part of the G.T.R. line. W. Nesbitt, who represented Mr. Hays, objected to the jurisdiction of the court on the ground that as a special penalty is provided by sec. 294 of the Railway Act, 1903, sec. 138 of the Criminal Code does not apply. The case sets out that the conviction having been questioned on the ground that it is without jurisdiction, and is erroneous in point of law, the question is asked whether upon the facts as found the conviction is right. If the court finds it has been made without jurisdiction and is erroneous, it will be quashed, otherwise it will stand, and the court will proceed to determine the penalty, the case having been adjourned indefinitely to enable the point to be argued.

The case has been argued and the Court of Appeal has reserved judgment. On Feb. 6, W. N. Robertson moved in Toronto before Justice Teetzel, for a peremptory writ of mandamus directing the G.T.R. to run a train daily and to issue tickets in accordance with the terms of the act of incorporation, but the application was refused.

The Dominion Government is being asked by various persons interested to suspend the operations of the Alien Labor Act in the spring in view of the demands of railway construction.

We either sell or lease our tracklayers at reasonable rates and will be pleased to quote terms upon receipt of information regarding amount of track to be laid, speed desired and the length of time it will probably take to complete the work.

Railway Location Surveys

H. D. Lumsden, Chief Engineer National Transcontinental Ry. Commission, in his recent address as retiring President of the Canadian Society of Civil Engineers, gave some interesting particulars of the surveys for that line. He said: "The assumed distance between Moncton and Winnipeg was 1,890 miles, and this was divided into six districts, averaging, say, 315 miles each. A district engineer was appointed to each district as the work progressed, and the control of the survey parties in each was directly with such district engineer. In District A, New Brunswick; District B, Eastern Quebec, and the prairie or westerly portion, or about 65 miles of District F, being comparatively easily accessible, the parties on preliminary surveys consisted of an engineer-in-charge, transitman, leveller, topographer, two rodmen, two chainmen, picketman, five axemen, and a cook. When location was commenced these parties were supplemented by the addition of a draughtsman and one or two axemen.

"The country from the St. Maurice River westerly to within, say, 100 miles of Winnipeg, on the route laid down to be explored, was one of which little was known outside of explorations made by the Geological Survey up various streams, which almost all ran at right angles to the general course of our line, and one or two survey lines in Northern Ontario and Manitoba. The survey parties employed in the unknown districts were considerably larger, having in addition to the members before mentioned, five or eight men as axemen and packers, who were continuously employed in bringing in to their parties provisions from the nearest caches or depots. Previous to our commencing work the Grand Trunk Pacific Ry. Co. had put a number of parties in the field between Winnipeg and North Bay, and made a preliminary survey of a greater portion of the route, and in the winter of 1904-05 we took over from them all the plans, profiles and information they had obtained of that portion of the country, and made use of them where practicable, also taking over what provisions they had on hand in that district. During the winter of 1904-05 we had in all 11 parties making preliminary surveys in New Brunswick, 11 parties between New Brunswick and the Quebec boundary and Weymontachene on the St. Maurice River, or Clear Lake, eight parties between the last mentioned points and the boundary between Ontario and Quebec and two parties, one south and one north of Lake Abitibi. In Jan., 1905, one preliminary and five exploration parties were sent out in District F, between the northwest angle of Lake Nepigon and the Manitoba boundary, to make a thorough examination of the country, with a view of shortening and improving the line previously run by the G.T.P. Co. At the end of Mar., 1905, we had 38 parties, and by the middle of the summer, 45 parties in the field, of which about one-half were in inacessible districts, necessitating the transport of supplies for their maintenance for distances up to say 200 miles from the nearest available transport routes. Owing to the heavy snow and lack of much knowledge of the possible routes to reach the various parties, great difficulty was experienced during the first winter in keeping parties fully supplied, but since then, by better knowledge of the country and the cutting of a few winter roads to the principal distributing points or depots, and pack trails thence to caches on or near our line, or to points to which transport by water in the summer is good, we have now little trouble, and not one-third the expense in keeping parties fully supplied, and maintaining at least a bi-monthly communication with all of them.

"Printed books of instructions to engineers were issued early in 1905, in which were set out the duties of various classes of engineers, transitmen, levellers, topographers, field-draughtsmen, etc., and giving general instructions as to the plotting of plans, profiles, etc. They also contained memoranda of necessary camp outfit and supplies, medicine chests, stationery boxes, etc., for 18 men for 200 days. These were modified according to the circumstances under which parties were working. Supplementary instructions were also issued from time to time in regard to the engagement and paying off of men, the making up of pay-rolls, expense accounts, the precautions necessary to prevent forest fires, and copies of the regulations in force in each province for that purpose, also instructions and precautions to be taken by men in charge of canoes. During the summer the numerous waterways were practically the only routes available, and with the exception of a few pointers or lumbermen's boats, canoes were the only means of transport. This necessitated a large amount of manual labor, packing outfits and provisions over the numerous portages, varying in length from a few yards to several miles. Great difficulty was found in procuring a sufficient number of men suitable for this service, as only those who had previous experience in this sort of work were at first of much use for the arduous labor of packing. Numbers of men, thinking because they had been frequently in canoes they were quite competent to take part in such work, soon found that canoeing for pleasure was a different matter from this, and that the carrying of numerous loads of 100 lbs. or more, on their backs, over even a portage a quarter of a mile in length, was more than they could stand, while men such as half-breeds and Indians, who had been brought up to such work, would with ease carry double the load the novice could do, and keep at it all day. The principal canoes used for this purpose were made of basswood, but a few cedar and canvas canoes were also employed. They varied in length from 16 ft., which were used for light work and the carrying of mail, to 22 ft., the latter being of extra beam and depth, and capable of carrying over a ton of provisions, together with the necessary crew. During the summer of 1905 we were exceptionally unfortunate, and the accidents to parties in canoes were numerous, causing the loss of a number of valuable lives.

"Our experience has been that by far the most economical means of transport, outside of rail or steamer, is by horses and sleighs where practicable, and the cutting of a few miles of winter road connecting or following large bodies of water, has been the means of saving thousands of dollars. The provisions also were delivered in much better condition, rainy or very hot weather, leaky canoes and carelessness of men contributing largely to the depreciation of the value of many kinds of goods while in transit by canoes. The distribution by teams beyond certain distances was found to be impracticable, owing to the fact that either all fodder had to be brought in at great expense, or no lakes and streams were available, and the amount of provisions required was not sufficient to warrant the cutting of sleigh roads for the entire distance. To overcome this difficulty we have been making use of a number of men, dogs and toboggans with very satisfactory results, distributing from our main caches, or stores, to smaller ones in the vicinity of our line, say 10 or 20 miles apart. Few people who have never had the actual experience with the use of dogs as a means of transport can form any idea of their capabilities, and the ease with which they seem to do their work, provided the men in charge take proper care of them and see that they are regularly fed and sheltered on cold or stormy nights. A team of dogs may consist of any number from two to six, or even more, but in a rough timbered country from three to five is the most one man can conveniently handle. The dogs used by us were all, with a few exceptions, bought in the towns and villages, and as long as they were of sufficient size, and not too young or too old, they were acceptable. Very few days are required to break in a team of dogs, especially if one broken dog can be found for a leader. A man and five dogs will, in a moderately rough timbered country, move 500 lbs. six to eight miles a day and return for another load. In a level country, with a good trail, they can make 10 to 12 miles a day and return. Where lakes and rivers are available, and there is good going, 30 to 50 miles a day have been frequently covered by dogs with a light load. For freighting purposes every dog's load can be considered as 100 lbs. The drivers of dogs should be active, hardy and of good temper, and all that is necessary for a dog trail is that several men go over it with snowshoes, cutting out all brush and logs for a width of say 2 ft., avoiding as far as possible all sharp turns or steep hills. The more such a trail is travelled over the better it becomes, especially where in a timbered country it is protected from drifting snow. The toboggans used are about 8 ft. long and 14 ins. wide, preferably made from split-out strips of birch, maple or ash half an inch thick. Each toboggan is provided with a canvas cover in which all goods are securely covered and lashed to the toboggan with cod-line, or light rope, a light rope being also attached to the rear end of the toboggan for the driver to hold on to, and enable him to hold back when going down hill. Regular leather harness is provided for dogs, the only precaution necessary being to see that the collars fit each individual dog and do not gall the shoulders or neck

"Having personally had considerable experience on the location of railways, I may state that, in my opinion, when surveys are to be conducted in a country which is timbered and little known, it is in the long run a great saving in time and money if it is practicable to have the engineer who is to have charge of the survey, accompanied by a good assistant and say half a dozen or more men, go over the country as best he can, running rough compass lines, using a micrometer, pacing or estimating for distances, taking barometrical altitudes, and generally becoming acquainted with the nature of the country and the principal difficulties he may expect to have to overcome. Having gone over the whole of the section allotted to him, and thoroughly explored the country for several miles on either side of his rough compass line, he will have naturally formed some idea of the best route to be followed, and save the cost of a large party running instrumental lines that may prove after weeks of hard labor utterly impracticable through running into some unforeseen obstacle. The engineer in charge of work of this character should be one who has had considerable experience in a timbered country, able to find his way anywhere and not afraid of being lost. He should be able to establish his latitude and approximate longitude by observation, though owing to the difficulty in carrying a reliable chronometer the latter is seldom to be relied upon. On reaching his point of departure, his aneroid barometers, of which he should have at least two, or better, four, having all been previously compared and rated, he will assume a datum for elevation for his work, and all altitudes should be reduced to that datum. By arranging the movements of his party he can provide that one barometer will always be stationary, and if a half-hourly record of its readings is carefully kept all altitudes taken by the party in the field can be reduced to one datum, the party having kept record of the time at which the observations were

made As it is well known; such barometrical altitudes cannot be explicitly relied upon, but with care and good barometers it is surprising what close approximation to the true altitudes can be obtained My experience has been that the aneroid barometers best suited for rough work are those about 2½ ins. in diameter, divided to read 5 ft. The range of such barometer does not generally exceed 2,800 ft., but they are much less liable to get out of order than the larger ones, which are supposed to read by verniers to one foot.

"Having thoroughly explored the country through which he is to operate, the engineer in charge selects a route for his preliminary line, and having been joined by his transitman and the rest of his party, he proceeds with the running of such a line. If the country is rough and broken a transit should be used, but if tolerably level a picket line, run by the aid of field glasses, the angles being turned with a transit or box sextant, is generally the more rapid method, and sufficiently accurate for preliminary purposes if the line is checked by compass bearings. The chainage should be done with a light steel chain. Having assumed a datum for elevation, the levelling should in all cases be carefully done and checked wherever practicable, bench marks being established at least every half-mile. Cross-sections should be taken by the topographer as frequently as the nature of the country may require, to enable him to show contour lines for every 5 ft. of elevation on either side of the line for considerable distances. As the through levels are not in any way affected by the cross-section work, these sections can be taken with sufficient accuracy with a good hand level, the distances right or left being measured with a chain or tape. It is a good practice to insist that the field notes of all instrument men be plotted up by the men who made them each night as the work progresses; this will save time and avoid many errors. Having completed his preliminary line the engineer in charge lays down on his plan, with the aid of contour lines, a proposed location, and proceeds to stake it on the ground, the levels being checked with those of the preliminary line, and bench marks established every 1,000 ft. Having completed his first location and made any revisions that may have occurred to him, the engineer who has been in charge of such work should be moved on to other work and a new man put in charge for final location. This new man should, before taking charge of the party, be furnished with the plans and the profiles, and given ample time to go over the lines run by his predecessor. He may or may not be able to improve on the previous line, but in any case the judgment of two in place of one is obtained on final location.

"The commissariat for a survey party today is a very different matter from what it was thirty years ago. Formerly, if a party was well supplied with the necessaries of life, in the shape of bacon, beans, flour, tea, and sugar, it was all that they expected, whereas to-day the addition of canned meats, dried fruits, vegetables and canned goods generally, has added much to the variety of food supplied; but the one thing that in the old days contributed more than others to the well-being and comfort of a party is still the same, namely, a good cook."

The Russel-Chambers Co. has been incorporated under the Dominion Companies' Acts, with a capital of $500,000 and offices at Toronto, to carry on a general contracting business, and in connection therewith to construct, charter and operate steam and other vessels. The provisional directors are: W. B. Russel, C.E., Toronto; W. C. Chambers, railway contractor, Harriston, Ont.; S. Johnston and R. H. Parmenter, Toronto.

Canadian Freight Classification.

The Canadian Freight Association is applying to the Board of Railway Commissioners for approval of supplement 8 to Canadian Freight classification 12, and supplement 7 thereto. The following changes are proposed:

Railway Equipment and Service.

The following memorandum over the signature of the Chief Railway Commissioner, A. C. Killam, has been sent to railway companies under the jurisdiction of the Board:

"The Board, both recently and at the end of 1905, received many complaints of insufficiency of the supply of rolling stock and other equipment upon railways, and of delays in the transportation and delivery of traffic. The Board has made some inquiries into these matters, and it has reason to believe that some railway companies have not been supplied with rolling stock and other equipment necessary for enabling them, without delay, to receive, carry and deliver traffic; and have failed to carry and deliver with due diligence. The Board also fears that railway companies have not fully realized their responsibilities in these respects, and have not made the efforts which they might and should have made to give proper and efficient service. The Board realizes that circumstances beyond the control of railway officials, and an unprecedented development of traffic, which was not and could not reasonably have been foreseen, have contributed to make the situation worse than it would otherwise have been.

"The Railway Act requires companies, according to their respective powers, to furnish adequate and suitable accommodation for the receiving, loading, carrying, unloading and delivering of all traffic offered for carriage upon their railways; and, without delay and with due care and diligence, to receive, carry and deliver all such traffic; and to furnish and use all proper appliances, accommodation and means necessary for these purposes The Board desires to receive from railway companies information as to the extent to which they have complied with these provisions of the statute; to what extent they have failed to do so; and to what circumstances they attribute, and on what grounds they excuse, any such failure. The Board desires, also, to be informed as to the steps which railway companies are taking to provide themselves with the equipment necessary to fulfil the requirements of the statute; whether these steps will, in the opinion of the responsible officials of the respective companies, enable them fully to comply with the requirements of the statute in the future; and, if not, on what grounds they excuse themselves for not taking such steps as appear necessary for the purpose. Also, whether such officials have reason to believe that the traffic upon their respective railways, during the next ensuing year, will be greater, less, or equal to that of the year last preceding, and on what grounds they base their belief in these respects. The Board does not intend to accept this information absolutely, but to make it the subject of further inquiry. The Board thinks that it will be in the interests of the railway companies, as well as of the public, that full and frank answers be given by the companies on the points named by the Board.

"The Board has hitherto felt a difficulty in making orders for the supply of cars or other equipment, upon specific complaints, for fear that this might result in taking from others of the public facilities to which they were equally entitled with the complainants. The Board has also felt that the unprecedented activity of business could not have been fully foreseen by the officials of railway companies; and that it could not reasonably adopt a policy which would have penalized railway companies for failure to have the necessary equipment, or to be fully prepared to handle traffic with due expedition. But the Board thinks that the circumstances of the last two years should serve as a warning; and that measures which would not have been just and reasonable under previously existing circumstances may be so in the future, especially after companies have been fully notified of the views which the Board takes.

"The Board is also of opinion that the making of large expenditures in improvements of railways, and especially in building new lines of railway, furnishes evidence of the powers of railway companies, in respect of financial requirements, to supply all necessary rolling stock and equipment; and the Board will also feel obliged to consider carefully whether railway companies which are extending their lines, and thereby rendering necessary a further supply of men, rolling stock, and equipment, are justified in doing so without fully equipping the lines which they are already operating. The Board does not desire to hold railway companies to a higher standard than seems to it reasonable; but it proposes in the future to adopt all means within its power to make railway companies live up to a reasonable standard and to give to the public, so far as circumstances render it reasonably possible, the service which the statute requires.

"The Board would also like from each railway company a full statement respecting the rolling stock, equipment of various descriptions, showing, among other things: The number of cars of different kinds, such as box, flat, etc.; also the different capacities of same. The number of locomotives of different kinds, such as road, switching, etc.; also different capacities of same. Other kinds of rolling stock of different kinds. The numbers of each of such different kinds and capacities added in 1906. The numbers of each of such different kinds and capacities permanently disabled, used up, or abandoned during the year. The numbers of cars, locomotives, etc., of the various kinds available for use during 1906. The numbers of new ones of each of such different kinds and capacities now contracted for, and the times when these are expected to be received. The numbers of freight cars supplied by railway companies to branch lines not owned but operated or controlled by them and other independent roads known to have limited supplies of their own, and to what extent trunk lines have thereby reduced their own transportation capacities. The numbers of locomotives leased or let to any such lines, and whether, or to what extent, companies

have thus reduced their carrying power. Also a statement whether companies possess terminal facilities sufficient for loading and unloading cars and delivering traffic with expedition, and the extent to which such facilities are defective."

In connection with the foregoing the following Ottawa correspondence of Feb. 16 was published in the Toronto Globe: "Since Nov. 23, 1906, 46 complaints about shortage of cars have been made to the Board—nine against the G.T.R., 11 against the C.P.R., seven against the Canadian Northern, seven against the G.T.R. and C.P.R., one against the Canadian Northern and C.P.R., one against the Bay of Quinte, one against the Michigan Central, one against the Great Northern, and eight general, aimed chiefly against the Canadian Northern, C.P.R. and G.T.R. The Board has given prompt attention to all these complaints—in many cases with satisfactory results—and to the extent of its power has urged and pressed the companies to strain every nerve and use every available resource to meet the demands of shippers at all points, and especially the urgent need for the delivery of coal and wood at stations all over the western Provinces.

"In reference to the attacks which have been made upon the Board by some opposition journals, it should be borne in mind that the wording of the statute regarding the supply of cars and motive power is: 'The company shall, according to its powers, furnish adequate and suitable accommodation for receiving and loading all traffic offered, and shall without delay, and with due care and diligence, receive, carry and deliver, etc.' The Board has been investigating as fully as possible the question as to the powers of the different companies, and when the leading and most reliable officials testify upon oath, under the most searching cross-examination, that they cannot get cars and locomotives made fast enough to handle the traffic of the country—that the car and locomotive shops of the Dominion, including their own, though taxed to the limit of their capacity, are unable to fill the companies' orders with anything like reasonable promptness; that the companies are enlarging and extending their own shops as fast as possible, and, in fact, are in every way exerting themselves to the utmost limits of their powers—when such statements are made on oath (and an examination of the books does not as yet warrant any denial of the allegations), it is not an easy matter for the Board or any other body of men to solve the problem of car shortage equitably and as quickly as the suffering public and some representatives of the press demand.

"From the investigation it seems that many of the terminals of the leading companies are inadequate, and that the shortage of motive power is relatively greater than the shortage of cars."

The Canadian Transfer Co.'s officers and directors for the current year as elected recently, are: President, Lieut.-Col. F. C. Henshaw; General Manager and Secretary, F. M. McRobie; other directors: H. Paton, C. Cassils, G. R. Starke, Sir H. Montagu Allan.

The Eastern Construction Co. has been incorporated under the Dominion Companies' Acts for the purpose of carrying on the construction of railways, canals, telegraph and telephone lines, bridges, wharves, piers, docks, elevators, warehouses, etc.; supplying material for the same, and acquiring and dealing in the stock and bonds of railway and other companies for which construction work may be done. The capital is fixed at $1,000,000, and the offices are at Ottawa. The provisional directors are: Jas. Gillespie, H. H. Short, F. H. Honeywell, S. B. Johnsone, J. B. Prendegrast, Ottawa.

Canadian Northern Ry. Earnings, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1905-06, from July 1, 1906:

	$37,464,474.07	$22,878,607.37	$14,585,866.70	$2,398,467.60+

Approximate earnings for Jan., $4,173,000, against 4,409,000 for Jan., 1906.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross earnings for Dec., $254,418.32; net earnings, $74,325.03, against $253.792.42 gross and $93,323.94 net for Dec., 1905. Net earnings for six months ended Dec. 31, $574,603.48 against $573,268.88 for same period, 1905. Approximate earnings for Jan., $233,089, against $235,863 for Jan., 1906.

MINERAL RANGE RY.—Approximate earnings for Jan. $53,146, against $61,303 for Jan., 1906.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross earnings for Dec., $920,497.79; net earnings, $350,329.49 against $914,689.43 gross and $444,589.74 net for Dec., 1905. Net earnings for six months ended Dec. 31, $3,374,903.13, against $3,451,749.04, for same period 1905. Approximate earnings for Jan., $615,176, against $847,263 for Jan., 1906.

Grand Trunk Ry. Earnings, Expenses, etc.

Subject to audit, the accounts for the half-year ended Dec. 31, 1906, show the following results:

Gross receipts		£3,585,000
Working expenses		2,561,400
Net receipts		£1,023 600
Net revenue charges for the half-year, less credits		481 500
Balance		£ 542 100
Deduct Canada Atlantic Ry. deficiency for half-year	£34,200	
Less Detroit, Grand Haven & Milwaukee surplus for the half-year	15,600	18,600
Surplus		£523,500

This surplus added to the balance of £16,000 from June, 1906, makes a total of £539.500 available for dividend, which will admit of the payment of the dividends for the half-year on the 4% guaranteed stock and first and second preference stocks, and a dividend of 3% for the year on the third preference stock, leaving a balance of about £13,200 to be carried forward.

The accounts of the G.T. Western Co. for the half-year show a surplus of £17,200 which is carried forward to the current half-year.

Approximate earnings for Jan., $3,240,854, against $2,896,439 for Jan., 1906.

TRAFFIC RECEIPTS OF THE SYSTEM.

Total.....	£665,929	£595,159	£70.770	....

The Royal Coal Co. has been incorporated under the New Brunswick Companies' Act for the purpose of acquiring and developing coal and other mines in the province, and in connection therewith to construct and operate railways or tramways to be operated by steam or electricity; to own and operate steam and other vessels, and to construct wharves, docks, canals, etc. The capital is fixed at $100,000, and the offices are at Moncton, N.B. The provisional directors are: H. VonHagen, J. M. Seely, New York; I. Purdy, Purdy Station, N.Y.; L. V. Blum, Boston, Mass.; M. F. Keith, Moncton, N.B.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Alaska and Yukon Ry.—The Railway Committee of the House of Commons has approved of the bill incorporating a company with this title, for the purpose of constructing a railway from near where the International boundary crosses the Klihmi River near Pleasant Camp, B.C., north-westerly along the Klihini, Tatsenshini, Shakwak, and Alsek River valleys, along Kluane Lake, and the valleys of the Donjek and White rivers, by the most feasible route to the International boundary between Yukon and Alaska, between the 62nd and 64th parallels of latitude. The provisional directors are: G. A. McDougall, J. R. Smith, Dawson, Yukon; F. Goslin, Fairbanks, Alaska; C. E. Winn-Johnston and B. L. Allan, Ottawa.

The Algoma Central and Hudson Bay Ry. Co. is applying at the current session of the Dominion Parliament for an act extending the time for the commencement and completion of the line from the main line of the C.P.R. to James Bay and branches. (Jan., pg. 1).

British America Pulp, Paper and Ry. Co.—Application is being made at the current session of the Dominion Parliament for an act extending the time for the completion of the railway and branch lines authorized by sec. 10, chap. 89, 1900, and for the extension of the same to Montreal towards the south, and to the mouth of the Saguenay river towards the east. It is also desired to have power to operate the railway by steam or electricity. Brosseau and Holt, Montreal, are solicitors for the applicants.

Collingwood Southern Ry.—The Dominion Parliament is being asked at its current session to incorporate a company with this title to construct a railway from Collingwood southerly to near Baxter on the Sudbury branch of the C.P.R., and from at or near Collingwood southerly and easterly to the C.P.R. at or near Orillia, Ont. Power is also sought to acquire and operate steam and other vessels, to construct or lease wharves, elevators or other structures; to acquire and utilize steam, electric or other power, and dispose of the same. It is asked that the undertaking be declared to be for the general advantage of Canada. G. Moberly is solicitor for the applicants.

Crow's Nest Pass Coal Co.—The car repair shops of the company at Coal Creek, B.C., were destroyed by a snowslide, Feb. 10.

Detroit River Tunnel—The Board of Railway Commissioners will be asked Mar. 27 to sanction an agreement signed Dec. 19, 1906, leasing to the Michigan Central Rd. the undertaking, rights, powers, works and property of the Detroit River Tunnel Co. (Feb., pg. 87).

Great Northern Ry. in Canada.—J. J. Hill is reported as saying that a large force of men is working on the company's extensions in Canada, principally at the western end, although only the roughest kind of work is possible, but construction will be pushed vigorously in the spring. The line is already practically done from Vancouver through the Rocky Mountains. It will be pushed across the prairies of Alberta, Saskatchewan and Manitoba to Winnipeg, which will be the eastern terminus. The new line will be about 1,500 miles long, and should be finished within the next two years. The Wall Street Journal in connection with this construction says: "This new transcontinental road will be owned by the Great Northern. Its importance to the Hill system could hardly be over-estimated. It will be directly competitive to the C.P.R. from Winnipeg to Vancouver and is retalia-

tion on a gigantic scale for the temerity with which the C.P.R. built down to Spokane. It is interesting to know in connection with this Hill-Canadian Pacific fight that if a new line is built from Fargo to Minot it will very closely parallel the "Soo" line (a C.P.R. line) almost its entire length. It will be possible to throw freight from the Hill lines in Washington, Montana and even North Dakota across into Canada and through to the east on the Canadian route, or it will be possible to route freight from the rapidly developing Canadian territories through into the U.S. for the American route. There are no state legislatures or any interstate commerce commissions in Canada."

Hudson Bay.—It is reported from Winnipeg that the Manitoba Government has decided to make an appeal to the electors upon the question of financing the construction of a railway from Winnipeg to Hudson Bay.

Senator Ferguson had an opportunity of bringing forward the question of such a railway in the Senate Feb. 7. He pointed out its importance in connection with the sea route to Europe, and said the terminus of such a railway would be Fort Churchill, a harbor which was open from June to Nov. each year.

Hudson's Bay and Western Ry.—Application is being made at the current session of the Dominion Parliament for an act extending the time for the commencement and completion of the projected lines of railway, decreasing the amount of capital stock, and authorizing the company to enter into agreements for various purposes with other railway companies.

Intercolonial Ry.—The last group of buildings at Moncton, N.B., for the new I.C.R. shops, for which a contract has been let to E. A. Walberg, comprise the following: machine shop, 176 ft. by 405 ft., having the entire main floor area covered with 10-ton electric cranes; boiler shop, 52 ft. wide and 375 ft. long, the floor being covered with 10-ton electric crane; boiler erecting shop, 52 ft. wide by 375 ft. long, the floor being covered with a 35-ton electric crane; engine erecting shop, 83 ft. wide and 375 ft. long, covered with two 60-ton electric cranes; smith shop, 77 ft. wide and 375 ft. long, covered with jib cranes; the riveting tower, 25 ft. by 50 ft. and 62 ft. to base of rail, and 72 ft. clear height is at one end of the boiler erecting shop. The frame work of all the buildings will be of structural steel, the walls and roof covering will be of reinforced concrete. The lighting will be both from windows and a large number of skylights.

Tenders are under consideration for the erection of several buildings at Halifax, N.S., and a station building at Sackville, N.B.

Plans are reported to have been prepared for the erection of a new station building at Amherst, N.S., adjoining the present building.

Junction Terminal Ry.—The Ontario Legislature is being asked at its current session to pass an act incorporating a company with this title to construct a railway to be operated by steam, electricity or other motive power from the Union Stock yards, Toronto Junction, to other points within the municipality of Toronto Junction, and to make connections with all railways operating within the municipality. Johnston, McKay, Dods and Grant, Toronto, are solicitors for the applicants.

Kettle Valley Lines.—Construction is in progress on the line from Grand Forks to the mining camps at Franklin, B.C., about 50 miles. When this extension is completed it is reported that the company will undertake the construction of an extension from the southern terminus at Republic, Wash., to Spokane, Wash. (Aug., 1906, pg. 455.)

Magdalen River Valley Ry.—The Quebec Legislature is being asked at its current session to incorporate a company with this title to construct a railway from Cap a l'Ours, along the valley of the Magdalen River, to connect with the interior section of the Atlantic, Quebec and Western Ry. Martineau, Lemieux and Brassard, Quebec, are solicitors for the applicants.

Malone and Hopkins Point Ry.—The Board of Railroad Commissioners have issued a certificate of necessity to the Malone, Fort Covington and Hopkins Point Ry., to construct a railway from Malone to Hopkins Point, Franklin County, N.Y., 16 miles. The report from Albany, N.Y., stated that it was proposed to have the line extended to Dundee, Que. (Jan., pg. 3.)

Manitoulin and North Shore Ry.—The Dominion Parliament is being asked at its current session for an act extending the time for the commencement and completion of the projected lines of railway. (Jan., pg. 3.)

Minudie Coal and Ry. Co.—An arrangement is being discussed for the extension of this company's railway from River Hebert across the mouth of the river, through Amherst Point to Amherst, N.S. The projected extension will give Amherst a deep water frontage on Cumberland Basin, and will bring the trade of a considerable mining and farming district to the town. (Sept., 1906, pg. 529.)

Ottawa Terminal Ry.—Application is being made at the current session of the Dominion Parliament for an act incorporating a company with this or such other title, as may finally be determined upon, to acquire all lands necessary or desirable for the undertaking, to construct and operate lines of railway and sidings, to create and issue bonds and other securities, to enter into agreements with railway and other companies or persons, and particularly to take over the rights of the Canada Atlantic Ry. in the lands of the Rideau Canal reserve, obtained from the Government for the purpose of erecting a central station in Ottawa; and authorizing the G.T.R. and the Canada Atlantic Ry. to subscribe for and acquire stock, and to guarantee the bonds of the company, the undertaking of which is declared to be for the general advantage of Canada. (See G.T.R. Betterments, Feb., pg. 101.)

Owen Sound and Meaford Ry.—Application is being made to the Government for approval of the proposed crossings and structures in connection with this projected railway between Owen Sound and Meaford, Ont., plans for which have been deposited in the Registry office at Owen Sound, Ont. (Aug., 1906, pg. 455).

Quebec Bridge and Ry. Co.—Satisfactory progress was made on the erection of the cantilever bridge over the St. Lawrence River during the past working season. The south anchor arm was completed and the south cantilever arm as well. The anchor arm now swings clear of the false work, five bents of which have been removed. A total lineal progress of 762½ ft. was made during the year, including four 50-ft. panels of the anchor arm, the main posts and the entire cantilever arm, 562½ ft. long. The erection has been carried on with a traveller built of steel and enveloping the trusses. It is 54 ft. long, 105 ft. wide, and 220 ft. high, with 70-ft. top and bottom extensions, and fully rigged weighs 1,120 tons. The illustration on this page shows the progress made at the south end of the bridge up to Dec. 31, 1906.

THE QUEBEC BRIDGE AT DEC. 31, 1906.

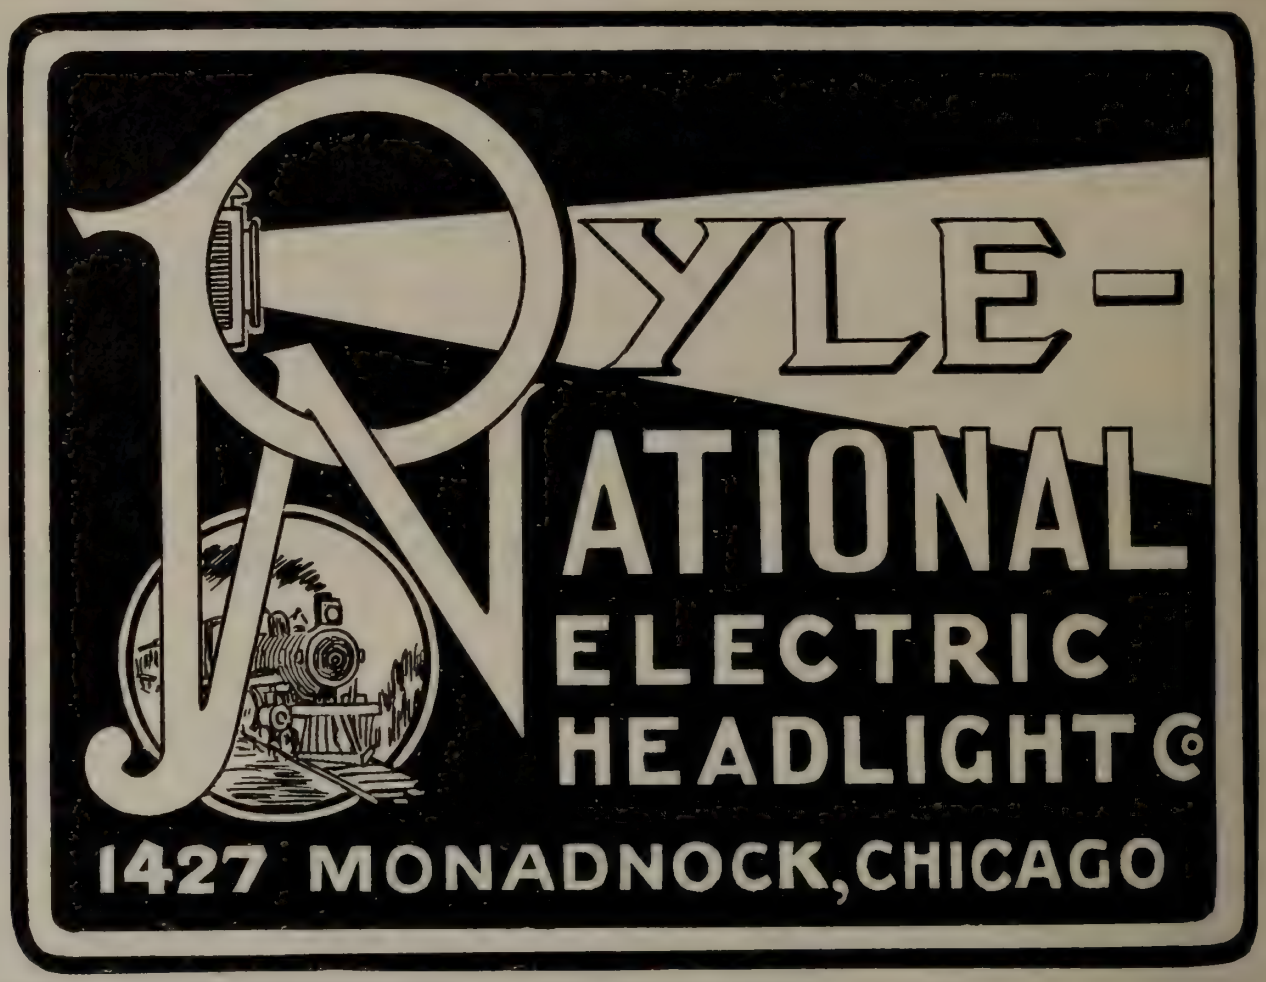
Quebec Central Ry.—The Quebec Government has been asked to provide aid by means of land grants for the construction of the branch from Scott's Junction to the Quebec Bridge, and for the extension from Beauce Jct. to St. George, Que.

Quebec, Montreal and Southern Ry.—Reports from New York state that the Delaware and Hudson Co., which owns the Q.M. and S. Ry., has completed arrangements for financing the entire amount required for the construction of the extensions to the Quebec Bridge. It is expected that the contract for the additional 42 miles from the end of the line at present under contract to the bridge, will be let at an early date.

Quebec and Lake Champlain Ry.—The Quebec Legislature is being asked at its current session for an act incorporating a company with this title for the purpose of constructing "and working a railway between these two points." J. C. Langelier, Quebec, is solicitor for the applicants. (Feb., pg. 89.)

Sault Ste. Marie to C.P.R. Main Line.—A deputation from Sault Ste. Marie, Ont., waited on the Ontario Government, Feb. 13, and urged amongst other things that the Government construct, or aid in the construction of a railway from Sault Ste. Marie northerly to the C.P.R. main line, about 200 miles. Consideration was promised.

The Algoma Central and Hudson Bay Ry. is in operation for some 70 miles, is partially constructed for a considerable further distance, and surveys have been completed to a junction with the C.P.R. Provincial bonuses towards the construction of this line have been voted. Another line is the Bruce Mines and Algoma Ry., which extends from Lake Huron, through Bruce Mines village to the Rock Lake copper mines, and has been given power to extend to the C.P.R. The deputation did not expect that either of these lines were likely to engage in the construction of an extension to the C.P.R., and therefore asked for a Government line if possible.



NOVA SCOTIA STEEL AND COAL CO.

MANUFACTURERS OF LIMITED

Railway and Electric Car Axles, Angle Bars and Tie Plates, Railway Spikes

Tee Rails 12, 18, and 28 lb. per yard

Head Office: NEW GLASGOW, N.S.

St. Mary's River Bridge Co.—Application is being made at the current session of the Dominion Parliament for an act authorizing the company to use its bridge for the passage of steam railway trains. (Aug., 1906, pg. 455.)

St. Mary's and Western Ontario Ry.—Tenders were received to Feb. 23, for the construction of the section of this projected railway between St. Mary's and Embro, Ont. The work to be done includes clearing the right of way, fencing, grading, bridging, ballasting, tracklaying, and the erection of telegraph lines complete and ready for operation. The rails, fastenings, ties and telegraph supplies will be provided by the company and delivered at specified points.

Sudbury-Cobalt Ry.—Application is being made at the current session of the Ontario Legislature for an act incorporating a company with this title to construct and operate a railway from Sudbury to Cobalt, Ont. Clary & Buchanan, Sudbury, are solicitors for the applicants.

Temiskaming and Northern Ontario Ry.—The chairman of the commission recently stated that negotiations were in progress with the G.T.R. which, if successful, would enable the commission to run trains through from North Bay to Toronto. It is expected at an early date to open a further mileage for traffic. Tenders have been asked for the grading of the line from the termination of the present contract to a junction with the G.T. Pacific Ry. near Lake Abitibi. Supplies are being got in for the construction of the branch to Charlton Lake, the contractors for which are the Canadian Construction Co. The tenders which were received for the construction of an office building at North Bay, Ont., were considered too high, and new tenders have been called for.

We have been advised that surveys have not been made for the branch lines proposed to connect the Larder Lake and Portage Bay districts with the main line. (Feb., pg. 89.)

Thessalon and Northern Ry.—The Ontario Legislature is being asked at its current session to incorporate a company with this title for the purpose of constructing a railway from Thessalon Station on the Algoma branch of the C.P.R., south-easterly to Thessalon, thence north-easterly to the Mississaugua River, in the township of Gould. Hearst, McKay and Darling are solicitors for the applicants.

Toronto Eastern Entrance.—The City Board of Control has approved of the expenditure of $12,000 towards the cost of surveys, etc., in connection with the entrance of the railways into Toronto from the east. A meeting of representatives of municipalities outside Toronto interested in the matter was held at Bowmanville, Feb. 7, when a resolution was passed expressing an opinion in favor of a route common to all railways from Port Union to Toronto, along the base of Scarboro bluffs, and favoring a conference of all interested with a view to an agreement being reached.

Toronto Elevated Ry.—Application is being made at the current session of the Ontario Legislature for an act incorporating a company with this title with power to construct and operate an elevated railway in Toronto, East Toronto, North Toronto, Toronto Junction and the township of York. R. F. Segsworth, Toronto, is solicitor for the applicants.

Toronto Union Station.—The City Board of Control has decided to provide $12,000 in the estimates for the current year for the purpose of providing special engineers' reports, etc., in connection with the projected Union Station.

Tusket Wedge Ry.—Application is being made at the current session of the Nova Scotia Legislature for an act incorporating a company with this title for the purpose of constructing a railway from Yarmouth, or Butterwell's Crossing on the Halifax and South-Western Ry. through Yarmouth and Argyle tps., to Tusket Wedge, N.S., with all necessary powers. The applicants are H. T. LeBlanc, F. L. Porthier, J. R. LeBlanc, A. A. Porthier, Yarmouth, N.S.

White River Valley.—Surveys are being made with a view of constructing a railway through the White River Valley, Yukon, the party being in charge of Capt. J. J. Healy. It was stated in Dawson that the preliminary surveys will start at Stewart City, and follow the White River to Ladue Creek, and along that creek to the International boundary. The line is projected as part of the big railway line, which it is proposed to construct to connect the Trans-Siberian Ry. with the lines of the American continent. See Alaska and Yukon Ry.

Winnipeg City Power Plant.—In connection with the construction of the electrical power development plant near Lac Du Bonnet, Man., by the Winnipeg City Council, tenders are being considered for the construction of a tramway 24 miles long. The tramway will extend from Lac Du Bonnet station to Point du Bois; it will be of standard gauge, 2% gradients. The specifications provide for construction of the ordinary railway type, the track being laid with 50 or 60-lb. steel rails. The line will be operated by steam, and will be used for freight purposes, and the carrying of workmen to and from the site of the power works. It is merely a means of approach for the construction of the hydro-electric power plant at Point du Bois, and is being built of necessity, owing to the very large machinery parts which will require to be transported, and which will, in many cases, take the whole capacity of a car. The machinery at the plant will be of the 3,000 k.w. type. The plant will be of 60,000 h.p. capacity, and the part to be constructed immediately is estimated to cost $3,000,000. C. B. Smith is Chief Engineer.

Winnipeg and North-Western Ry.—Application is being made at the current session of the Dominion Parliament for an act incorporating a company with this title to construct a railway from Winnipeg northerly between Lakes Winnipeg and Manitoba, to and along the Carrot River valley, thence westerly by way of Fort la Corne or near thereto, along the north side of the North Saskatchewan River to the Lobstick River, with a branch from near Saddle Lake to Lake la Biclie; from Prince Albert to Battleford, Sask., and from near Victoria, southerly to Edmonton, and northerly to Athabasca Landing, Alta. A. T. Drummond, Toronto, is solicitor for the applicants.

Yonge St. Bridge, Toronto.—Application is being made at the current session of the Dominion Parliament by the city of Toronto, for an act enabling the city, or the city and the G.T.R. and the C.P.R., jointly, or either of them, to construct a bridge across the railway tracks at the foot of Yonge St., pending the decision of the litigation between the parties as to the bridge, and providing for the payment of the cost thereof. (Jan., pg. 7.)

Yukon Central Ry.—Application is being made at the current session of the Dominion Parliament for an act incorporating a company with this title to construct a railway from the northern boundary of B.C. to Dawson City, by way of the Yukon River valley, or by the most feasible route, as an alternative proposition; to operate steam and other vessels, car ferries, telephone and telegraph lines, and all other necessary powers. The notice is signed by H. Blitz and L. Auerbach, Boston, Mass.

Railway Rolling Stock Notes.

The Intercolonial Ry. has received five consolidation locomotives from the Canadian Locomotive Co., Kingston, Ont.

The Canadian Northern Ry. has ordered a 70 ft. combined cafe and day car to be built in the U.S. for delivery in the summer.

The Canada Foundry Co., Toronto, has, since Jan. 1, delivered two 10-wheel locomotives and one switching locomotive to the Canadian Northern Ry.

The Locomotive and Machine Co. of Montreal delivered to the C.P.R. during Jan. 10 locomotives, 22½ by 28 in. cylinders, fitted with the Vaughan-Horsey system of superheating.

The Canadian Northern Ry. received between Jan. 14 and Feb. 12 two first-class day coaches and three mail and express cars from the Crossen Car Manufacturing Co., Cobourg, Ont.

The Manitoba Legislature has added a clause to the Canadian Northern Ry. Co.'s Act., giving the Provincial Railway Commissioner power to order the company to increase its rolling stock from time to time in keeping with the public requirements

The Shawinigan Falls Terminal Ry., operating the railways at Shawinigan Falls, Que., which connect the St. Maurice Valley Ry. and the Canadian Northern Quebec Ry., has placed an order with the Canadian General Electric Co. for a 600 h.p. electric locomotive.

The C.P.R. between Jan. 15 and Feb. 12 placed orders at its Angus, Montreal, shops, for the following rolling stock, etc.: one sleeping car, one dining car, one first-class car, one tourist car, two colonist cars, one baggage and express car, 50 box cars, 33 flat cars, six stock cars, and two pile-drivers.

The C.P.R. between Jan. 15 and Feb. 12 received the following rolling stock: 13 locomotives from the Locomotive and Machine Co. of Montreal; 22 steel ore cars from the Dominion Steel Car Co., Montreal; eight locomotives, three dining cars, two first-class cars and 495 box cars from its Angus, Montreal, shops.

The Canadian Northern Ry. received the following rolling stock between Jan. 15 and Feb. 15: two 1st class cars, 3 mail and express cars from Crossen Car Manufacturing Co., Cobourg Ont.; 15 box cars from Rhodes, Curry & Co., Amherst, N.S.; 4 locomotives and 2 switching locomotives from Canada Foundry Co., Toronto.

The Intercolonial Ry. has received since Dec. 17, 1906, 35 Hart convertible dump cars ordered from the Dominion Dump Car Co., and built by Rhodes, Curry & Co., Amherst N.S.; nine consolidation freight locomotives from the Canadian Locomotive Co.; 58 box cars, 60,000 lbs. capacity, and one snow plough from Rhodes, Curry & Co.

The difficulty which railway companies have in obtaining rolling stock is evidenced from the fact that the capacity of practically all the plants is being taxed to supply orders on hand, and the car and other companies cannot guarantee early delivery. A British locomotive firm recently offered to take a contract from the C.P.R. for 1908 delivery.

The Temiskaming and Northern Ontario Ry. Commission has ordered 100 steel underframe flat cars, 36 ft. 10 ins. over buffers, and 100,000 lbs. capacity, from the Dominion Car and Foundry Co., Montreal. An order has also been placed for 100 wooden flat cars, 36 ft. 9¾ ins. over end sills, and 60,000 capacity, for April and May delivery.

The order for 35 locomotives placed by the C.P.R. with the Locomotive and Machine Co. of Montreal, as mentioned in our

GEORGE W. SWETT
Manager
Formerly Manager Windsor Hotel, Montreal.

last issue, was forwarded to the company during the summer of 1906, but did not actually take effect until the end of Dec. The locomotives are standard 10-wheel passenger engines, and standard consolidation engines, duplicates of those recently constructed. Delivery will run from June to Sept.

The 128 box cars which the C.P.R. is having built at its Angus, Montreal, shops, will be of standard dimensions and will have the following special equipment: Simplex body and truck bolsters, Simplex brake beams, Westinghouse air brakes, McCord journal boxes, Susemihl roller side bearings, Tower malleable couplers with solid steel knuckles, all steel diamond pattern trucks, Barber roller, Simplex. The 89 flat cars, which are also being built at the Angus shops, will be similarly equipped.

Following are dimensions of the 15 10-wheel locomotives which the Canadian Northern Ry is having built by the Canada Foundry Co., Toronto: Cylinders, 20 x 26 in.; driving wheels, 63 in. diameter; boiler, 62 by 71⅞ in. diameter, 200 lbs. working pressure; firebox, 109⅞ in. long, 42½ in. wide; tubes, 240 or 264 of 2 in. diameter and 14 ft. long; wheel base—driving, 15 ft. 3 in.; engine 23 ft. 3½ in.; engine and tender, 52 ft. 7 in. Weight in working order, 300,000 lbs.; driving, 131,000 lbs.; engine, 161,000; tender, 133,000.

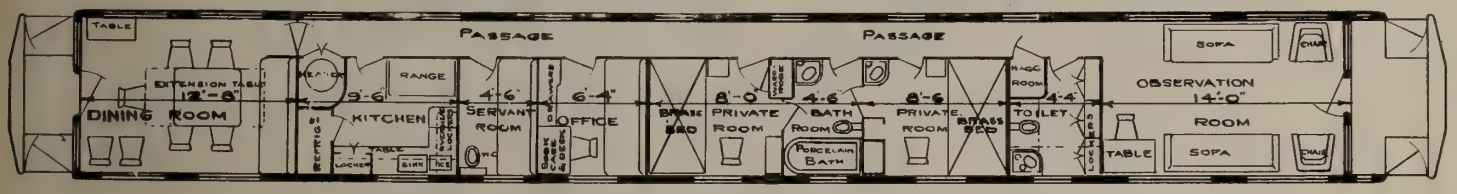
Following are the dimensions of the 25 consolidation engines for which the Canadian Northern Ry. has placed an order with the Canada Foundry, Toronto: Weight in working order—leading, 19,000 lbs.; driving, 150,000 lbs.; engine, 169,000 lbs.; tender, 133,000 lbs.; wheel base—driving, 15 ft. 3 in.; engine, 23 ft. 3½ in.; engine and tender, 52 ft. 7 in.; cylinders, 21 by 26 in., driving wheels, 57 in. diameter; boiler, 62 by 71⅞ in.; 200 lbs. pressure; firebox, 109⅞ in. long by 42½ in. wide; tubes, 240 or 264 of 2 in. diameter and 14 ft. in length.

The 15 mail and express cars which the C.P.R. is having built at its Angus, Montreal, shops, will be 60 ft. long over frame; and the body and under frame will be of wood. The specifications also provide: axles, 5 by 9 in.; bolsters, double; brake beams, Simplex with adjustable head; brake shoes, cast iron; brakes, Westinghouse air, high speed; brasses, 5 by 9 in.; couplers, Tower passenger; heating system, Gold with Frumveller heater; springs, 34 in. quadruple elliptic; trucks, 4-wheel passenger; wheels, 36¼ in. steel tried, no vestibules.

The specifications for the 25 first-class cars, without smoking rooms, for which the C.P.R. has placed an order at its Angus, Montreal, shops, show a seating capacity of 82, the general dimensions being: length, 72 ft. over frame; width, 9 ft. 10½ in. over frame. The springs are 38 in. quadruple elliptic; the trucks, 4-wheel passenger, and the wheels 36¼ in. steel tired; axles, 5 by 9 in.; journal boxes and brasses, 5 by 9 in.; bolsters, double; brake beams, Simplex with adjustable heads; brakes, Westinghouse high speed; heating, Gold with Frumveller heater; couplers, Tower passenger.

The C.P.R. is having built at its Angus shops 30 stock cars having the following general dimensions: length, 36 ft. 8 in.; width, 9 ft. 5 in. over frame; width, inside, 8 ft. 9¾ in.; height, inside, 7 ft. 1¼ in. The specifications provide for: body and underframe, wood; axles, 4¼ by 8 in.; bolsters, Simplex with Susemihl side bearings; brake beams, Simplex; brake shoes, cast iron; brakes, Westinghouse air; journal bearings, 4¼ by 8 in.; couplers, Tower malleable, with solid steel knuckles; journal boxes, McCord; roofs, double board; trucks, all steel diamond pattern; wheels, 53 in. cast iron.

The Saskatchewan Government recently asked the Department of Railways for a loan of locomotives and cars from the Intercolonial Ry., to relieve the shortage on the railways in that Province. The Minister of Railways replying Feb. 8, said owing to lack of motive power and cars on the I.C.R. he regretted that none were available for sending to the west. There were, it was stated, about 1,000 cars on the tracks which could not be moved owing to scarcity of locomotives, and some 18,000 carloads of freight that could not be shipped owing to lack of cars. The Intercolonial Ry., like all other lines, could not get new cars fast enough to keep pace with the growing traffic.



FLOOR PLAN OF SIR THOMAS G. SHAUGHNESSY'S PRIVATE CAR KILLARNEY.

(For description see January issue, page 7.)

The Central Ontario Ry. has ordered two locomotives from the Canadian Locomotive Co., Kingston, Ont. Following are general specifications:

TYPE.—Ten-wheel, 4-6-0.
WEIGHT.—In working order, on drivers, 95,000 lbs.; total, 120,000 lbs.
WHEEL BASE.—Rigid, 10 ft. 11 in.; total, 21 ft. 3½ in.; engine and tender, 46 ft. 11½ in.; length over all, engine and tender, 55 ft. 10¼ in.
HEATING SURFACE.—Firebox, 133.7 sq. ft.; tubes, 1,235 sq. ft.; total, 1,368.7 sq. ft.
WHEELS.—Diameter of drivers, 57 in.; centres, cast steel.
CYLINDERS.—Diameter, 18 in.; stroke, 24 in.
BOILER.—Type, extension wagon top; working pressure, 190 lbs.
TUBES.—Number, 202; diameter, 2 in.; length, 12 ft.
BRAKES.—Westinghouse.
TENDER.—Weight when loaded, 100,000 lbs.; capacity, 4,500 imp. galls. water, six tons coal. Style of tank, U shape; wheels, 33 in. steel tired; journal, 5 by 9 in.; brake beam, Simplex.

Following are the principal dimensions, etc., of the 20 locomotives, class G 2, which the C.P.R. is having built at its Angus, Montreal, shops:

TYPE.—4-6-2. Simple superheater.
WEIGHT.—On drivers, 139,300 lbs.; total, 214,300 lbs.
CYLINDERS.—Diameter, 21 in.; stroke, 28 in.
WHEELS.—Drivers, diameter, 69 in.; tyres, Krupp crucible; engine truck wheel and tender wheel tires, open hearth; centres, cast steel.
BOILER.—Type, radial stayed; working steam pressure, 200 lbs.
HEATING SURFACE.—Tubes, 2,777 sq. ft.; firebox, 180 sq. ft.; total, 2,957 sq. ft.
TUBES.—Number, 190 of 2¼ in.; 24 of 5 in.; material, C.P.R. special; length, 19 ft. 6 in. over sheets.
FIREBOX.—Length, 94⅛ in.; width, 69⅞ in.; material C.P.R. special. Grate area, 45.6 sq. ft.
TANK CAPACITY.—Water, 5,000 Imperial galls.; coal, 10 tons.
SPECIAL FITTINGS.—Westinghouse air brake and straight air brake; axles, Steel, Peech & Tozer; brake beam, Simplex; brake shoe, C.P.R. standard; headlight, Pyle National Electric; journal bearings, C.P.R. standard; superheater, Vaughan and Horsey.

Following are some of the principal general dimensions, etc., of the 25 freight locomotives which the C.P.R. is having built in the United States:

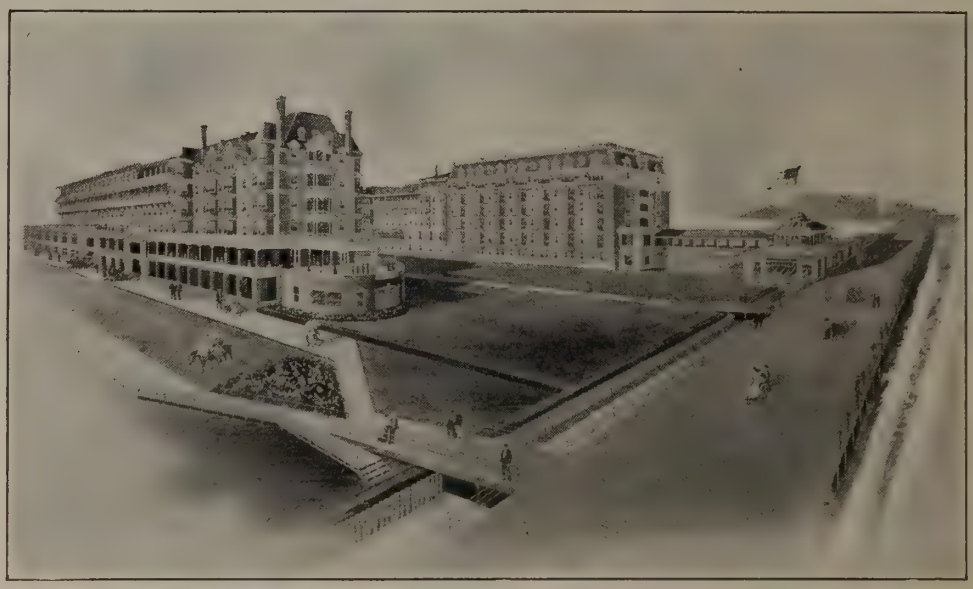
CLASS.—10-38-E.-3165-3189.
CYLINDER.—Diameter, 22½ in.; stroke, 28 in.
BOILER.—Type, wagon; material, steel; diameter, 69 in., inside front ring; thickness of sheets, 11/16, ¾ and 25/32 in.; working pressure, 175 lbs.; staying, radial.
FIREBOX.—Material, steel; length, 95¼ in.; width, 64⅝ in.; depth, 77⅝ in. (front), and 64⅝ in. (back); thickness of sheets—sides, 5/16 in.; back, ⅜ in.; crown, ⅜ in.; tubes, ½ in. water space—front, 5 in.; sides, 4½ in.; back, 3½ in.
TUBES.—Material, iron; wire gauge, 11; number, 236; diameter, 2 in.; length, 14 ft. 2½ in.
WHEELS.—Driving, 58 in.; driving wheel centres, 51 in.; journals—main, 9½ by 12 in.; others, 9 by 12 in. Engine truck wheels, 31 in.; journals, 6 by 11 in.
WHEEL BASE.—Driving and rigid, 15 ft. 10 in.; total engine, 24 ft. 4½ in.; total engine and tender, 53 ft. 9½ in.
WEIGHT.—On driving wheels, 165,000 lbs.; on truck, 23,000 lbs.; total engine, 188,000 lbs.; total engine and tender, 309,000 lbs. These figures are estimated.
TANK CAPACITY.—Water, 5,000 Imperial gallons; coal, 10 tons.
TENDER.—Wheels, 8; diameter, 33 in.; journals, 5½ by 10 in.
SUPERHEATER.—Superheater tubes, number, 24; diameter, 5 in.

Following are the principal dimensions, etc., of the 25 freight locomotives which the C.P.R. is having built at the American Locomotive Co.'s Richmond works, for delivery in March, April and May:

CYLINDER.—Type, piston valve; diameter, 22½ in.; stroke, 28 in.
WHEEL BASE.—Driving, 14 ft. 10 in.; rigid, 14 ft. 10 in.; total, 26 ft. 1 in.; total, engine and tender, 54 ft. 6 in.
WEIGHT.—In working order, 190,000 lbs.; on drivers, 142,000 lbs.; engine and tender, 316,000 lbs.
HEATING SURFACE.—Tubes, 2,237 sq. ft.; firebox, 179 sq. ft.; total, 2,416 sq. ft.; grate area, 49.49 sq. ft.
AXLES.—Driving journals, 9¼ by 12 in.; engine truck journals, 6 by 10 in.; tender truck journals, 5½ by 10 in.
BOILER.—Type, extended wagon top; outside diameter first ring, 70⅜ in.; working pressure, 175 lbs.
FIREBOX.—Type, wide; length, 102⅛ in.; width, 70⅜ in.; thickness of crown, ⅜ in.; tube, ½ in.; sides, 5-16 in.; back, ⅜ in.; water space—front, 5 in.; sides, 4½ in.; back, 3½ in.; crown, staying, radial.
TUBES.—Number, 240; diameter, 2 in.; length, 14 ft. 4 in.; gauge, 11, L.W.G.
SUPERHEATER.—Type, C.P.R. standard; tubes, 24 of 5 in. for superheater, and 96 superheater tubes, 1¼ in.
BOXES.—Cast steel.
BRAKE.—Driver, Westinghouse American combination; tender, Westinghouse.
AIR SIGNAL.—Westinghouse J.
ENGINE TRUCK.—Four-wheel centre bearing.
GRATE.—Style, cast iron rocking type.
TENDER.—Frame, channel; C.P.R. standard; tank, C.P.R. latest design, semi-water bottom; capacity, 5,000 gals. water, 10 tons coal.
VALVES.—Piston, 11 in. diameter; travel, 6 in.; steam lap, ⅞ in.; ex. clearance ⅛ in.
WHEELS.—Drivers, 63 in. diameter, 56 in. centers; engine truck, 31 in.; tender, 34 in.; material, cast steel.

The Manitoulin and North Shore Ry. has received a locomotive from the Locomotive and Machine Co. of Montreal, of which the principal dimensions, etc., are:

CYLINDER.—Type, simple slide; diameter, 20 in.; stroke, 26 in.
TRACTIVE POWER.—Pounds, 28,410.
WHEEL BASE.—Driving and rigid, 14 ft.; total, 21 ft. 7 in.; engine and tender, 49 ft. 5¾ in.
WEIGHT.—In working order, 146,150 lbs.; on drivers, 124,550 lbs.; engine and tender, 249,658.
HEATING SURFACE.—Tubes, 1,636 sq. ft.; firebox, 126 sq. ft.; arch tubes, 6.48 sq. ft.; total, 1,768.48 sq. ft.; grate area, 39 sq. ft.
AXLES.—Main and others, 9¼ by 10 in.; engine truck journals, 6 by 10 in.; tender truck journals, 5 by 9 in.
BOILER.—Type, extension wagon top; outside diameter, first ring, 51⅛ in.; working pressure, 180 lbs.
FIREBOX.—Type wide; length, 90⅞ in.; width, 62¼ in.; thickness of crown, ⅜ in.; tube, ½ in.; sides and back, ⅜ in.; water space, 4 in.; crown staying, 1⅛ in. A. L. Co. standard radial.
TUBES.—Number, 255; diameter, 2 in.; length, 12 ft. 4 in.; gauge, 12, B. W. G.



HOTEL DENNIS

WALTER J. BUZBY **ATLANTIC CITY, N.J.**

Occupies one-half square of unobstructed beach front.
New fireproof addition of 100 rooms and baths with sea and fresh water.
Most favorably located and best appointed hotel in the North for winter business.

LOCOMOTIVE RUNNING AND AIR BRAKE INSTRUCTION

For
Engineers,
Firemen,
Trainmen,
Master Mechanics,
Air Brake Men,
Roundhouse Men, etc.

THE I. C. S. method of correspondence instruction has many advantages for the ambitious railroader. Our Railway Courses are prepared in a clear and simple manner by practical railroad men, who also conduct the instruction. The student is in a class by himself and if he meets with difficulty in his work he is given special instruction. Our training occupies only his spare time.

A complete set of Mitchell's Models accompany each full Course. These models present various working parts systematically and clearly, and assure every student a thorough knowledge of the principles underlying the operation of engines and train apparatus.

Our instruction covers **Locomotive Management; Locomotive Boilers; Steam Cylinders and Valve Gears; Breakdowns; Compound Locomotives; Train Rules; Westinghouse and New York Air Brakes; Car Lighting and Heating; and Electric Headlights.**

The Bound Volumes of our Railroad Courses are thorough and up-to-date treatises on modern railroading, written with such simplicity and clearness that any railroad man can easily understand them.

THESE COURSES ARE SOLD TO RAILROAD MEN ONLY

Write to-day for particulars

RAILROAD DEPARTMENT
International Correspondence Schools
629 Railway Exchange, CHICAGO, ILL.

BRAKE.—Driver, Westinghouse American combined automatic and straight air; tender, Westinghouse air signal.

ENGINE TRUCK.—Two-wheel, swing centre bearing.

GRATE.—Style, C. I. rocking, to shake in four sections.

TENDER.—Frame, A. L. Co. 10 in. channels; tank, U-shape level top; capacity, 5,000 U.S. galls.; 10 tons coal.

VALVES.—Type, Richmond balanced; travel, 5½ in.; steam lap, 1 in.; ex. lap, 0 in. setting line and line in full gear.

WHEELS.—Diameter, outside tire, 56 in.; centres, 50 in.; material, cast iron; engine truck wheels, 30 in. diameter, cast iron double plate; tender truck wheels, cast iron double plate.

Nova Scotia Society of Engineers.—A meeting of civil, electrical and other engineers was held at Halifax, N.S., Jan. 22, when it was decided to form a society with this title for the purpose of solidifying the engineering profession in the Province, to investigate its resources, to conduct investigations in regard to engineering materials and supplies in Nova Scotia, to raise the standing of the profession, to bring together all branches of the profession as well as architects, contractors and those interested in engineering. A constitution was adopted, the province being divided into four districts for organization purposes, and the meeting was adjourned to Feb. 5 for the election of officers. Following are the officers elected for the current year: President, R. McColl, Provincial Engineer, Halifax; First Vice-President, J. H. Winfield, Manager, Nova Scotia Telephone Co., Halifax; Second Vice-President, P. A. Freeman, Chief Engineer Halifax Electric Tramway Co., Halifax; Councillors: Capt. Bogart, Royal Canadian Engineers; W. G. Yorston, City Engineer, Sydney; J. J. Taylor, Halifax and North-Eastern Ry. Surveys; L. H. Wheaton, Engineer of Maintenance of Way, Halifax and South-Western Ry.; Secretary, Professor E. Brydone-Jack; Treasurer, S. Fenn, Superintendent Direct United States Cable Co.; Auditors, H. W. Johnstone and L. Allen, Halifax.

The Temiskaming and Northern Ontario Ry. Commission has ordered 6,300 tons of 80-lb. steel rails from the Algoma Steel Co. for June delivery.

The Ottawa Construction Co., Parry Sound, Ont., which was in the railway contracting business, has made an assignment to T. W. Quinn, Parry Sound, and a meeting of creditors will be held in that town, Mar. 15.

The C.P.R. has issued supplement 2 to W. 97, Western Lines, extending the application of mileage rates as authorized by local freight mileage tariff W. 97 (C. R. C. W. 4), dated Sept. 8, 1902, to the Okanagan branch (Shuswap and Okanagan Ry.) and the Nicola branch (Nicola, Kamloops and Similkameen Coal and Ry. Co.).

The bill introduced into the House of Commons by W. F. Maclean, M.P., to amend the Railway Act in various ways, has been given a good deal of consideration by the Railway Committee. On Feb. 5 the Committee decided, with only two dissentients, not to approve of the clause compelling railway companies to give a fare of 2 cents a mile.

The Canadian Northern Ry. has filed passenger tariffs covering its lines between stations on Stony Plains section and Morinville branch, Alta., on a basis of 3½ cents a mile; on Ridgeville section between Stuartburn and South Junction, Man., on a basis of 3 cents a mile; and between Regina and Prince Albert, Sask., on a basis of 3½ cents a mile.

The C.P.R. is negotiating with the Government for running rights over the Intercolonial Ry. between St. John, N.B., and Halifax, N.S. Sir Thos. G. Shaughnessy, President C.P.R., met the Minister of Railways, the General Manager and the General Traffic Manager of the I.C.R. at Ottawa, Feb. 6, when the matter was fully discussed, and Sir Thomas was asked to submit an offer in writing.

Railway Finance, Meetings, etc.

Baie des Chaleur Ry.—The railway constructed under this title, afterwards transferred to the Atlantic and Lake Superior Ry., and of recent years operated by the bondholders, is reported to have been sold to the Atlantic, Quebec and Western Ry., the price, it is stated, being $1,500,000. The Baie des Chaleur Ry. extends from Matapedia on the Intercolonial Ry. to Paspebiac, Que., 100 miles, and the Atlantic, Quebec and Western Ry. is under construction from Paspebiac to Gaspe. The B. des C. Ry. was one of the C. N. Armstrong enterprises, and has been the subject of a great deal of litigation, as well as of a Royal Commission.

Canadian Northern Ry.—The Manitoba Legislature has passed an act at its current session guaranteeing certain C.N.R. bonds, at the rate of $10,000 a mile, in respect of the construction of a further 115 miles of line in the province.

In connection with the company's bill before the Dominion Parliament seeking the confirmation of the agreement taking over the Qu'Appelle, Long Lake and Saskatchewan Ry., a resolution was submitted in favor of making the rate on the line taken over 3 cents a mile. The Minister of Railways expressed the opinion that this matter should be left to the Railway Commission, and the resolution was defeated.

Canadian Northern Quebec Ry.—Application has been made to the London, Eng., stock exchange to list £1,000,000 of the company's 4% perpetual guaranteed debenture stock.

Canadian Pacific Ry.—A large amount of C.P.R. 4% non-cumulative preferred stock has been sold in London, Eng., at 101½. Reports state that the amount sold is $7,500,000, but the President, while confirming the report as to the price, would not say anything as to the amount sold.

The directors have declared a dividend of 2% on the preference stock and 3% on the common stock for the half-year ended Dec. 31, payable April 2. It was decided to pay at the same time to the holders of common stock ½% as provided for out of the special interest fund accruing from proceeds of land sales.

Official application has been made to list on the London stock exchange £1,000,000 of 4% C.P.R. non-cumulative preference stock, and £1,682,406 of C.P.R. 4% perpetual consolidated debenture stock.

Delaware and Hudson Co.—A loan has been negotiated with the United States Mortgage and Trust Co. for $6,000,000, at 6%, in order to complete the construction of the Quebec Montreal and Southern Ry., the company's line in Canada. The money is to be advanced to the Q.,M. and S. Ry. from time to time as required, the whole being guaranteed for one year by the D. and H. Co.

The Grand Trunk Ry. directors have decided to declare a dividend of 3% on the third preference shares. The amount of these shares is £7,168,055 and they are entitled to receive 4%, but this amount has never been paid. In 1903 a dividend of 1% was paid; in 1904, 2%; in 1905, nothing; and in 1906 there was a dividend of 2%. The first and second preference shareholders receive 5%.

London and Port Stanley Ry.—Following are the officers and directors for the current year: President, Mayor Judd; Vice-President, Alderman Staveley; other directors: A. White and Aldermen Stevenson, Beattie, Gerry, Cooper; Secretary, the City Clerk.

Manitoba and Northwestern Ry.—The Treasurer of Manitoba, in presenting his budget, made the following statement of the dealings of the Province with the railway: The balance due the Province Dec. 31, 1905, was $359,301.42; during 1906, the interest was paid on the amount to the extent of $39,556.89; compound interest on the amount to Dec. 31, 1906, amounted to $22,151.40, making a total of $421,009.71. This amount is less $277,507.48 for land sold during 1906, leaving a balance due the Province of $143,502.23.

Pembroke Southern Ry.—The Ontario Legislature is being asked at its current session for an act authorizing the company to enter into an agreement for amalgamation with the Canada Atlantic Ry. J. A. Thibodeau, Pembroke, Ont., is Secretary of the company.

Temiscouata Ry.—Traffic receipts for Jan. $12,374.60, against $10,898.18 for Jan., 1906.

Toronto, Hamilton and Buffalo Ry.—Earnings for Jan., $55,283.85, against $45,264.13 for Jan., 1906.

White Pass and Yukon Ry.—Unconfirmed reports from White Horse and Vancouver state that the Guggenheim syndicate, which has large investments in the Yukon Territory, has secured the control of this line.

Winnipeg and Hudson Bay Ry.—The Provincial Treasurer of Manitoba laid before the Legislature the following statement of account between the Province and this railway, in his recent budget speech: Balance due the Province Dec. 31, 1905, $258,330.18; interest paid in 1906, $12,806.72; compound interest to Dec. 31, 1906, $15,499.80; total $286,636.70, less amount received from sale of lands in 1906, $79,166.66, leaving a balance still due the Province of $207,470.04.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

J. Penfold, of the Canadian Fairbanks Co.'s staff, Montreal, died recently.

J. W. Duntley, President of the Chicago Pneumatic Tool Company, returned on Feb. 5 from a five weeks' business trip to Europe.

The Locomotive and Machine Co. of Montreal has received an order from the G.T. Pacific Ry. for two 2½-yard Atlantic type steam shovels for May delivery.

The Canadian General Electric Co. is preparing to add another machine shop, with an area of nearly four acres of floor space, to its works at Peterborough, Ont.

C. C. Scott, heretofore in the auditing department of the Quebec and Lake St. John Ry., Que., has opened an office in Quebec in connection with Mussens, Limited, of Montreal.

The Canadian White Co. has secured a contract for the erection of a cement manufacturing plant near Montreal. The cost of the erection and equipment of the plant is estimated at $1,000,000.

Robt. W. Hunt & Co. have been appointed consulting engineers to the receivers of the Union Traction Co., Chicago, and placed in direct charge of the lowering of the car tunnels under the Chicago River.

W. A. Duff, heretofore assistant manager of the Montreal branch office of the Canadian Westinghouse Co., has been transferred to Winnipeg, where he will look after the electrical part of the company's business there.

A. B. Manship, Secretary-Treasurer of the Canadian Wire Co., died at Hamilton, Ont., Feb. 12, aged 56. He came to Hamil-

HOTEL TRAYMORE

ATLANTIC CITY, NEW JERSEY

OPEN ALL THE YEAR

To the original hotel has been added a ten-story fireproof addition, equipped throughout with the most improved sanitary plumbing, steam heating and electric lighting. The sleeping rooms are spacious, light and airy, private bath with hot and cold fresh and salt water connecting each. The building is modern in every respect, each room affording an unobstructed view of the ocean, and the furnishings will be unsurpassed in the point of richness and comfort. Capacity, 600.

ton when the company located there in 1902 from Cleveland, Ohio. The funeral took place on Feb. 14, the body being taken to Hooneybrook, Pa.

The M. McKenzie Company has been incorporated under the Dominion Companies' Acts, with a capital of $75,000 and offices at Montreal, to take over the business now carried on under the title of M. McKenzie & Co., at Montreal, as ship chandlers, etc., and to extend the same. The provisional directors are: W. D. Hamilton, A. A. Lunan, A. Dunn, L. Labaye, Montreal; and A. Lunan, Huntingdon, Que.

The Canadian Gold Car Heating and Lighting Co. has been incorporated under the Dominion Companies' Acts, with a capital of $300,000 and offices at Montreal, to manufacture and sell, hire, lease, use, repair and maintain all articles, machines, devices, etc., for heating and lighting cars of all kinds, and also for heating and lighting steamships and vessels of all kinds, etc. The provisional directors are: R. C. Smith, K.C.; F. H. Markey, K.C.; K. G. Robertson, R. C. Cameron, G. G. Hyde, of Montreal.

The American Locomotive Co. has issued a pamphlet illustrating and describing 10-wheel locomotives weighing over 150,000 lbs. It is a sequel to the pamphlet issued by the company last month describing lighter designs of this type. Thirty different designs are illustrated and the principal dimensions of each design given. The designs presented range in weight from 152,000 to 201,000 lbs., and are adapted to a wide variety of road and service conditions. This is the sixth of the series of pamphlets which is being issued by the company, and which now includes pamphlets on the Atlantic, Pacific, consolidation and 10-wheel types.

The Robb Engineering Co., Amherst, N.S., has executed a mortgage to secure an issue of $850,000 of consolidated 6% bonds, redeemable Jan., 1927. Holders of $60,000 Robb Engineering Co. bonds and of $125,000 of Robb-Mumford Boiler Co. bonds have decided to exchange their bonds for these consoldiated bonds, and there has been deposited with the Commercial Trust Co., $190,000 of the consolidated bonds to be used in the exchange of a like amount of Robb Engineering Co. bonds, and $250,000 to be used in the exchange of a like amount of Robb-Mumford Boiler Co. bonds. The two concerns have recently amalgamated.

Canadian Society of Civil Engineers

The 21st annual meeting was held at Montreal, Jan. 29, and two following days, H. D. Lumsden, President, being in the chair. The report of the council showed that the membership had increased during 1906 from 1,387 to 1,531, and in addition there were 134 candidates for membership. A branch of the society had been formed at Toronto, and arrangements were being made for the formation of branches at Quebec and Winnipeg. A fund for the establishment of a series of annual prizes for engineering students had been established and prizes of $25 each had been awarded as follows: H. K. Deutcher, for a paper on "Installation tests for steel rails"; T. M. Fyshe, for a paper on "Reinforced concrete"; and W. H. Williams, for a paper on "Transformer testing." The Treasurer's report showed receipts of $8,779, an increase of $672; and expenditures of $7,963, a decrease of $2,094. A resolution submitted by Major S. Howard, favoring the formation of a reserve engineering corps for Canada, was referred to a special committee. The address of the President is given on another page.

During the day the members visited a number of the industrial plants interesting from an engineering standpoint, travelling in special cars placed at their disposal by the Montreal Street Ry.

At the annual dinner, M. J. Butler, Deputy Minister of Railways and Canals, presided, owing to the absence of the President. The principal toasts were: The Society, proposed by G. W. Stephens, Chairman of the Montreal Harbor Commission, and replied to by Major S. Howard; Our Guests, proposed by the Chairman and replied to by C. H. Catelli, President of the Chamber of Commerce, and S. King, Superintendent Canada Car Co.; the retiring President and Council, replied to by Professor Porter; the Sister Professions, replied to by A. Chausse, Quebec Association of Architects; Visiting Members, replied to by C. H. Mitchell, C. H. Rust, Toronto, and Lieut.-Col. W. P. Anderson, Ottawa.

Following are the officers and counsel for the current year: President, W. McLea Walbank, Montreal; Vice-Presidents, M. J. Butler, Deputy Minister Railways and Canals, Ottawa; P. Johnson, Dominion Bridge Co., Montreal; J. S. Dennis, C.P.R. Irrigation Works, Calgary, Alta.; Council: G. A. Keefer, Vancouver, B.C.; D. McPherson, Ottawa; G. H. Duggan, Sydney, N.S.; C. E. W. Dodwell, Halifax, N.S.; C. H. Rust, Toronto; E. V. Johnson, Ottawa; H. W. Breithaupt, Berlin, Ont.; A. A. Dion, Ottawa; W. McNab, W. F. Tye, J. A. Jamieson, R. S. Lee, R. A. Ross, G. J. Desbarats, J. Kennedy, F. P. Gutelins, W. H. Laurie, Professor R. J. Darley, L. G. Papineau. Except where otherwise stated the address of the councillors in Montreal.

The following have been elected honorary members: Sir B. Baker, engineer of the Forth Bridge, Scotland; Sir Wm. White, Past President Institute of Civil Engineers of Great Britain; O. Chanute, one of the oldest U.S. engineers.

Motor Cars for Government Railways.

The three motor cars which the Intercolonial Ry. has ordered will be built, so far as the car bodies and passenger fittings are concerned, by Rhodes, Curry & Co., Amherst, N.S., and the motor equipment at the I.C.R. shops, Moncton, N.B. Following are more complete details and specifications than were given in our last issue:

GENERAL DIMENSIONS.—Length over end sills, 66 ft.; width over side sills, 9 ft. 10 in.; height, top of sills to underside of plate, 6 ft. 7¼ in.; length, inside sheathing, 65 ft. 1⅜ in.; width, inside sheathing, 8 ft. 11⅜ in.; width between deck rails, 4 ft. 10 in.; height, inside, top of floor to underside of lower deck rail, 7 ft. 7¼ in.; outside of end sill to centre of body bolster, at motor end, 10 ft.; ditto at passenger end, 7 ft.; centre to centre of body bolsters, 49 ft.; centre to centre of needle beams, 10 ft. 6 in.; centre to centre of transoms, 29 ft. 9 in.; height, top of rail to centre of coupler, 2 ft. 10¼ in.; wheel base of truck, 8 ft.; total wheel base, 57 ft. 2 in.

LIGHTING.—Safety Car Heating and Lighting Co.'s vapor light.

SEATS.—Twenty double seats in main body of car, and six in smoking room; upholstered with rattan.

HEATING.—Safety Car Heating and Lighting Cos.' direct steam heating system.

TRUCKS.—Passenger, 4-wheel lateral motion, swing bolster; wheel base, 8 ft.; wheels, 36 in., Krupp steel tires; journals, M.C.B. for 60,000 lb. capacity cars.

BRAKE, ETC.—Westinghouse air, and Westinghouse air signal equipment schedule K.

The sills are to be of Douglas fir or Georgia pine, the under and deafening flooring to be pine, and the upper flooring of Southern or pitch pine, and spark arresters are to be placed on the bottom of the car on the sills, and deafening floor over each truck wheel. Corner posts and side door posts in baggage compartment and boiler room to be of cherry, and the end door posts faced with cherry, side principal doors to be of cherry, others of ash. The outside sheathing will be of cherry, and the inside of white wood and pine.

The specifications for the locomotive portion of the car provide that it is to be easily detached from the car body. The engine truck is carried on four wheels coupled, the bar frame being of mild steel; the car body supported on a cast steel frame is attached to the equalizing spring gear of the locomotive with four steel struts; this is carried on the frame by means of cross bars and coil springs. Bufler gear and springs are arranged in the cast steel body bolster to take the forward and backward motion. The boiler is the vertical type, carried on a cast steel saddle and properly braced; and is to be attached to the saddle in such a way that it can be taken out and replaced. Following are some of the specifications:

CYLINDERS.—Diameter, 12 in.; stroke, 16 in.

WHEEL BASE.—Engine, 8 ft.

BOILER.—Type, vertical; heating surface in tubes, 684.67 sq. ft.; heating surface in firebox, 44.04 sq. ft.; grate area, 11.54 sq. ft.; working pressure, 180 lbs., test, 250 lbs.

WATER TANKS.—Two tanks, 600 galls.

COAL BUNKER.—Capacity one ton.

SPEED.—1% grade, 25 miles.

WHEELS.—Drivers, 42 in. diameter, coupled.

Two motor cars are also under construction for the Prince Edward Island Ry., the car bodies being built at the railway shops at Charlottetown, and the engine, etc., will probably be built at the I.C.R. shops, Moncton. Owing to the various locomotive building plants in Canada being full of orders, it has been found impossible to place contracts for the mechanical parts of these cars.

Canadian Ticket Agents' Association.—At a meeting of the executive committee at Toronto Feb. 6, it was decided to hold the annual meeting in Winnipeg in October. The members will rendezvous in Toronto on Oct. 5, and travel by a special C.P.R. train to Winnipeg. After the annual meeting they will proceed by the Canadian Northern Ry. to Edmonton, thence by the C.P.R. to Calgary and Banff, and return to Winnipeg. It has not been settled whether the return journey from Winnipeg will be made by the C.P.R. or via St. Paul and Chicago. The arrangement of the details has been left to a sub-committee, consisting of W. McIlroy, W. Bunton, W. Jackson, C. E. Horning, R. J. Craig and E. de la Hooke. It was decided not to send a representative to the American Association of General Passenger Agents' meeting at Atlanta, Ga., in Oct.

The Railway Act 1903.—In consequence of the consolidation of the statutes the whole system of arrangement of sections of the Railway Act, 1903, has been changed. All the numbers of sections have been altered, many sections have been divided, others have been redrafted, transposed, or the form of expression somewhat varied or modified, and in some sections unnecessary words have been omitted and saving words introduced. The revised act contains 431 sections against 311 sections and two schedules. J. E. W. Currier, Ottawa, has prepared a second edition of the concordance of the act issued by him in 1904, which will be issued at an early date. The new volume will contain over 1,000 additional references, making a total of upwards of 2,600 references to the sections and sub-sections of the act as revised. The appendices will contain memoranda showing the changes in the numbers of the sections in the original act, and other valuable information. Copies of the book can be obtained from J. Leslie, Department of Justice, Ottawa, at $3.50 each, linen; or $6, half calf.

A bill is under discussion at the current session of the Dominion Parliament to compel railway companies to stop passenger trains for 20 minutes at regular intervals of not less than six hours, to enable passengers to procure meals.

Representatives of the passenger and freight departments of the transportation companies interested in competitive lake and rail traffic met at Montreal, Feb. 1, when it was decided to adopt the schedules of 1906 for the coming season.

THE DERRY-COLLARD COMPANY

BOOK NEWS SERVICE

A New Kind of a Book on Railroad Matters

Built on a new plan; is self-indexing, cross referenced and practically a cyclopedia of railroad matters boiled down into pocket form.

It is chuck full of information such as appears below and covers every phase of railroading from A to Z.

Coal—Bituminous—Average bituminous coal contains about 80 per cent. of carbon, 5 per cent. of hydrogen, 15 per cent. of other substance generally considered as foreign matter or impurities; ignites at about 1,800 degrees and weighs about 52 pounds per cubic foot. One ton of 2,000 pounds occupies 39 to 40 cubic feet. A bushel of 2,500 cubic inches weighs 75 pounds. Specific gravity 1.40.

Coal	B.T.U. per lb. combustible	Ash per cent.	Moisture per cent.
Anthracite	14,700	10 to 20	1 to 5
Semi-anthracite	14,900	10 to 20	1 to 5
Semi-bituminous	15,800	5 to 10	1 to 6
Bituminous—Eastern	15,000	5 to 20	2 to 6
" Western	14,200	8 to 25	6 to 15
Lignitæ	12,200	5 to 20	10 to 30

Coal—Consumption—Varies greatly with different conditions of trains, roads, locomotives, etc. Exact comparisons are impossible unless we know all conditions, which is seldom the case. Tests on several roads running into New York in 1897 give these results: Hard Coal: Average per train mile, 17.3 freight cars, 122 lbs.; average per train mile, 7 passenger cars, 112 lbs.; average per freight car mile, 7.05 lbs.; average per passenger car mile, 16 lbs. Soft Coal—Average per train mile, 18.15 freight cars, 120 lbs.; average per train mile, 7 passenger cars, 110 lbs.; average per freight car mile, 6.06 lbs.; average per passenger car mile, 15.07 lbs.

This is a book for the President, Manager, S. M. P., M.M., Traveling Engineer, Air Brakeman, Foreman of Shop or Roundhouse, Engineer, Fireman or Machinist: And the Price

Railway Commissioners' Rate Orders.

2360. Dec. 17, 1906. In the matter of the application of the Great Northern Ry. Co. under the Railway Act, 1903, sec. 263, for authority to waive notice of a rate of $4.05 net per ton on coal, the applicant company desires to publish, from Coal Creek, B.C., to Helena, Mont. Upon reading the application and the report of its Chief Traffic Officer, and it appearing to the Board that it is desirable and necessary in the public interests that the said rate shall immediately become effective and put in operation—the Board orders that the applicant company is hereby authorized to act upon and put in immediate operation the said rate. That publication of notice of the said rate, as required by the Railway Act, 1903, be, and is hereby waived.

WOOL RATE, MONTREAL TO PETERBORO.

2422. Jan. 7. In the matter of the application of the C. P. R. Co., under the Railway Act, 1903, sec. 262, for an order authorizing it to put into immediate operation a rate of 17 cents per 100 lbs. on about 100,000 lbs. of wool, in grease, from Montreal to Peterboro, Ont., the shipment having been originally made from Lethbridge, Alta., to Montreal, and delivery at Montreal refused; and to dispense with the publication of the three days' previous notice as required under the act—it is ordered that the company is hereby authorized to put said rate into immediate operation, and publication of the three days' previous notice as required by the act is dispensed with.

MINING STUDENTS' RATE TO BRITISH COLUMBIA.

2545. Feb. 4. In the matter of the application of the C.P.R. Co. under the Railway Act, 1903, sec. 275, sub-section 3, for permission to grant a special rate to a party of mining students of McGill University. Upon the report of the Chief Traffic Officer of the Board, the Board orders that the company is hereby given permission to carry the said party at a special rate of $50 per capita for the trip from Montreal to Vancouver, B.C., and return, including side trips to Rossland and Greenwood, B.C., or a rate of $40 per capita from Montreal, Que., to Greenwood and Rossland, B.C., and return. That any other parties who may desire to travel for the same purpose to British Columbia, or any other mining district, be granted equally favorable terms until otherwise ordered by the Board.

American Railway Engineering and Maintenance of Way Association.—The annual meeting of the executive committee was held in Montreal, Jan. 25. W. McNab, Assistant Engineer G.T.R., was selected for election as Vice-President at the annual convention in Chicago, Ill. The other business discussed had to do with the annual meeting. The members of the committee present were entertained at luncheon at St. James Club, by F. Scott, Treasurer G.T.R., and at dinner at the Windsor Hotel, by F. H. McGuigan, Fourth Vice-President G.T.R.

The Donnelly Salvage and Wrecking Co., Kingston, Ont., wrote us recently: "We are pleased to see the magnificent paper you are sending out."

The Manitoba and Saskatchewan Coal Co. has been incorporated under the Dominion Companies' Act, with a capital of $1,000,000 and offices at Winnipeg, to develop coal and other mines, and in connection therewith to construct railways and tramways; to operate steam and other vessels, and to construct wharves, docks, etc. The provisional directors are: C. Vokes, Quill Lake, Sask.; W. W. McMillan, E. Thomson, A. S. Swinford, J. C. Thomson, Winnipeg, Man.

MAINLY ABOUT PEOPLE.

Geo. Hughes, formerly Inspector of Bridges, G.T.R., died at Toronto, Jan. 31, aged 88.

J. F. McElhenny, baggage master I.C.R., Halifax, N.S., died there suddenly, Feb. 10.

City Engineer Parsons, of Stratford, Ont., has resigned to go into private practice at Winnipeg.

Sir C. Rivers Wilson, President G.T.R., is reported to have been seriously ill in England recently.

C. M. Hays, Second Vice-President and General Manager G.T.R., left Montreal Feb. 22 for England.

C. Moon, of the Toronto City Engineer's Department, has been appointed City Engineer, Prince Albert, Sask.

H. W. Edwards, C.P.R. ticket agent, Winnipeg station, was married in London, Ont., recently, to Miss E. Hawker.

Many happy returns of the day to A. H. Baird, C.P.R. ticket agent, Paris, Ont., born at Montreal, Mar. 1, 1834.

J. H. Phillips, manager Chateau Frontenac, Quebec, fell on the sidewalk in Montreal, Jan. 24, and fractured a bone in his foot.

G. J. Grammer, Vice-President New York Central Lines, and Traffic Manager of the lines west of Buffalo, died in Chicago, Feb. 4.

Mrs. G. G. King, wife of Senator King, one of the Commissioners of the New Brunswick Ry. and Coal Co., died at St. John, N.B., Jan. 29.

Jas. Walton, railway contractor, was found frozen to death on the prairie near Medora, Man., Feb. 12. He had been missing for nearly a week.

D. B. Hanna, Third Vice-President Canadian Northern Ry., and Mrs. Hanna, returned to Toronto early in Feb. from a trip to Florida and Cuba.

Deer Lodge, a suburban hotel near Winnipeg, the property of R. J. Mackenzie, son of W. Mackenzie, President Canadian Northern Ry., was burned recently.

G. McL. Brown, General Passenger Agent, Atlantic Steamship Lines, C.P.R., was born at Hamilton, Ont., Jan. 29, 1866, not 1856, as stated in our Jan. issue.

D. B. Hanna, Third Vice-President, Canadian Northern Ry., been has elected a director of the Western and British America Assurance Companies, Toronto.

I. Curry, son of N. Curry, President Rhodes, Curry & Co., Amherst, N.S., died in New York city, where he was attending college, Feb. 8, of pneumonia, aged 19.

J. J. McGee, who has retired from the office of clerk of the Privy Council of Canada, was for about 13 years after coming to Canada in the service of the Intercolonial Ry.

W. J. Francis, Montreal, has been awarded the Gzowski gold medal for 1906, by the Canadian Society of Civil Engineers, for a paper on "Hydraulic Lift Locks in Canada."

B. H. Bennett, General Agent Chicago and Northwestern Ry., Toronto, has recovered from a severe attack of la grippe and pneumonia, which commenced early in Jan.

C. A. Malbœuf, formerly in the C.P.R. service at Montreal, has been appointed District Freight Agent for all railway lines in Oregon owned or controlled by the Southern Pacific System.

G. Ham, of the C.P.R. headquarters' staff, has sufficiently recovered from the effects of his recent operation to leave the hospital, and will probably start for a trip abroad in March.

G. H. Walker, formerly G.T.R. cashier at Guelph, Ont., who was arrested at Toledo, Ohio, was sentenced to six months' imprisonment for embezzling $2,500 of the company's funds.

H. J. Wicksteed, C.E., of the Mackenzie, Mann & Co.'s railway system, delivered an address upon the Georgian Bay canal project before the Canadian Club, Montreal, Feb. 4.

C. W. Chivers, draughtsman in the office of the Assistant Chief Engineer, C.P.R., Winnipeg, was presented with a silver tea service by the staff on the occasion of his recent marriage.

L. B. Merriam, who was appointed recently as Division Engineer, G.T. Pacific Ry., at Winnipeg, has been engaged in engineering since 1880, almost exclusively engaged in railway work.

A. M. Nanton, Managing Director of the Alberta Ry. and Irrigation Co., Winnipeg, and J. Carruthers, grain merchant, etc., Montreal, have been added to the Dominion Bank directorate.

J. McGrail, chief clerk in the office of the Fourth Vice-President, C.P.R., Montreal, was injured in a runaway, Feb. 1, while attending the funeral of his grandfather, who was killed in a street accident.

H. McMillan, brother of the late Senator Jas. McMillan, who died at Detroit, Mich., Feb. 11, was a native of Hamilton, Ont., and was a son of one of the first officers of the Great Western Ry.

R. B. VanHorne, son of Sir Wm. C. Van Horne, is reported to have been appointed General Manager or Assistant General Manager of the Cuba Rd., with office at Camaguey, Puerto Principe, Cuba.

Myron E. Evans, President Cape Breton Ry., and residing at White Plains, N.Y., was among those killed in a railway accident on the New York Central and Hudson River Ry. in New York City, Feb. 16.

Mrs. Scott Griffin, wife of the Superintendent, Canadian Northern Express and Telegraph Companies, Winnipeg, has, with her children, been visiting her parents, W. and Mrs. Mackenzie, at Benvenuto, Toronto.

T. A. Edison was born at Milan, Ohio, Feb. 11, 1847, his parents being Canadians. He became a railway newsboy at 12 years of age, running on the G.T.R., and he was for a time a telegraph operator on that railway at Stratford, Ont.

N. Dyment, who died at Barrie, Ont., Feb. 4, was at one time engaged in the supplying of timber for the Great Western Ry. construction, and latterly was a director of the Goderich Elevator Co., as well as of a number of other industrial concerns.

R. Dupont, who has been appointed a Dominion Immigration Agent for the New England States, has been for some years engaged in the promotion of immigration to the Lake St. John country, in the interests of the Quebec and Lake St. John Ry.

J. N. Sutherland, who will take up his residence near Toronto on his retirement from the C.P.R. service April 30, entered the company's service about two years after it was formed, and since Jan., 1896, has been General Freight Agent at St. John, N.B.

J. M. Robinson, who died at St. John, N.B., Feb. 2, aged 51, was for some years engaged in marine business in St. John, and in South America; and on the organization of the present St. John Ry. Co., was elected Vice-President, which position he retained until 1905.

The name of A. G. Blair, law clerk of the Board of Railway Commissioners, son of the late Hon. A. G. Blair, and a member of the bar of New Brunswick, will be submitted to the Benchers of the Law Society of Upper Canada, under the rule governing admission to the bar in special cases.

S. S. Fuller, who has retired from the postmastership of Stratford, Ont., was President of the Stratford and Huron Ry., a director of the Port Huron and Lake Erie

Ry., and was also interested in the construction of the line from Stratford to Wiarton, all of which have since passed into the G.T.R. system.

John Ennis, Passenger Manager of the Allan Line Steamships at Liverpool, Eng., has retired to private life after 40 years' service. A committee has been formed, of which Lord Strathcona is chairman, to arrange for the presentation of a testimonial to Mr. Ennis, in recognition of his services to Canadian interests.

W. Mackenzie, President Canadian Northern Ry., left Toronto Feb. 14, accompanied by the Misses Ethel and Kate Mackenzie, and were joined in London, Eng., by Miss Mackenzie and Miss Grace Mackenzie, the whole party going from there to the south of France with the intention of remaining a couple of months.

J. N. Beckley, President Toronto, Hamilton and Buffalo Ry., Rochester, N.Y.; E. Van Etten, Vice-President New York Central and Hudson River Rd., are President and Vice-President respectively, and A. G. Yates, President Buffalo, Rochester and Pittsburg Ry., Rochester, N.Y., is a director of the Bagdad-Chase Gold Mining Co.

D. Macarthur, of Winnipeg, who died in Chicago, Ill., Jan. 23, was engaged in promoting the Alberta and Northwestern Ry., projected from the International boundary, via Medicine Hat, to Edmonton and the Peace River country. He was one of the original promoters of the Manitoba and Northwestern Ry, now part of the C.P.R. system.

D. B. Hanna, Third Vice-President Canadian Northern Ry., has succeeded the late Sir Wm. P. Howland as a director of the London and Canadian Loan and Agency Co. The annual report in referring to the matter says that Mr. Hanna's well-known business ability and long connection with Western Canadian affairs will prove of great advantage to the company.

W. P. Snyder, who has been appointed agent Great Eastern Fast Freight Line, New York, entered railway service April 1, 1894, in the operating department of the Central Rd. of New Jersey. He was transferred to the Transportation Department in 1898, and in May, 1902, was appointed Travelling Freight Agent, G.T.R., New York, which position he held until his present appointment.

In a train wreck on the G.T.R. near Guelph, Ont., Feb. 26, in which three persons were killed, and about 40 injured, W. Alderson, G.T.R. Car Inspector, Toronto, had four ribs broken and his forehead hurt; M. A. Overend, Freight Agent Dominion Line Steamships, Toronto, had an arm slightly injured, and J. H. Hetherman, route agent Canadian Express Co., Stratford, Ont., received two scalp wounds.

John Trutch, C.E., who died at Richmond, Surrey, Eng., Feb. 2, was a son of Wm. Trutch, Ashcott, Somerset, Eng., and was born in Jamaica in 1828. He went to British Columbia, B.C., and constructed the Cariboo wagon road and the Alexander Suspension bridge. Subsequently he was on the engineering staff of the Onderdonk Construction Co., at Yale, B.C., on the C.P.R. construction. A brother, Sir Jos. Trutch, K.C.M.G., was the first Lieutenant-Governor of British Columbia.

G. C. Ransom, who has been appointed Assistant General Freight Agent, Michigan Central Rd., Buffalo, N.Y., was born at Victor, N.Y., Aug. 20, 1864, and entered transportation service in 1887, his record being: June, 1887, to Oct., 1898, with the Blue Line, Rochester, N.Y.; Oct., 1898, to Oct., 1899, New York Central Lines, Buffalo, N.Y.; Oct., 1899, to April, 1896, General Freight Department, Michigan Central Rd., Detroit, Mich.; April, 1896, to April, 1906, assistant chief clerk, same department; April, 1906, to Jan. 31, 1907, chief clerk, same department.

Hon. A. G. Blair, who died suddenly, Jan. 25, at Fredericton, N.B., where he had gone on business connected with the amalgamation of the N.B. Telephone Co. and the Central Telephone Co., was made Minister of Railways and Canals in 1896, and resigned in 1903, when the G. T. Pacific Ry. project was introduced. He had previously carried through Parliament the Railway Act creating a Railway Commission for Canada, and on the constitution of this body was appointed Chief Commissioner, which position he resigned Oct., 1904. Latterly he has acted as counsel for the C.P.R. before the commission.

L. H. Wheaton, who has been appointed Engineer of Maintenance of Way and Structures, Halifax and South-Western Ry., was engaged in the construction of the Joggins Ry.; the line from Oxford to New Glasgow, N.S., and the railway in Cape Breton, now part of the Intercolonial Ry. In 1894 he became Chief Engineer of the Coast Ry. Co. at Yarmouth, N.S., becoming General Superintendent on the opening of the line in 1897. He was also engaged in the construction of the Nova Scotia Southern Ry., which is a part of the Halifax and South-Western Ry. In 1901 he joined the Mackenzie, Mann & Co. staff on location and construction of the H. and S. W. Ry.

R. Marpole, who has been appointed to an executive position on the Pacific Coast for the C.P.R., was born in Montgomeryshire, Wales, in 1850, and served for some seven and a half years on the construction and traffic departments of British railways before coming to Canada. He entered the service of the C.P.R. in 1881, serving successively as contractor, assistant manager of construction, Nipissing Division; Superintendent Lake Superior Division; Superintendent Pacific Division, and General Superintendent Pacific Division, which position he held from 1897 to the date of his present appointment. He is also Vice-President Esquimalt and Nanaimo Ry., which the C.P.R. acquired in 1905.

H. Foster Chaffee, who has been appointed Assistant General Passenger Agent, Richelieu and Ontario Navigation Co., at Toronto, was born at Knowlton, Que., Dec. 18, 1868, being a son of the late A. B. Chaffee, director of the R. and O. N. Co., the Dominion Ex. Co., and on the Board of Management of the old South-Eastern Ry. He entered transportation service in 1883, as ticket clerk at Montreal, with the South-Eastern Ry.; entering the C.P.R. service in the following year, and in 1885 being appointed City Passenger and Ticket Agent, R. and O. N. Co., at Montreal. In 1895 he was given charge of the transfer books in addition, and in 1900 was appointed Western Passenger Agent, R. and O. N. Co., Toronto, which position he held until his present appointment.

F. W. Cowie, who has been temporarily appointed Chief Engineer Montreal Harbor Commission, in addition to his present duties as superintendent of the St. Lawrence ship channel construction, was born in Western Ontario, Mar. 27, 1863, graduating from McGill University in 1886. He joined the engineering staff of Montreal harbor under J. Kennedy in the same year, remaining with the Commission until the end of 1888, when the ship channel was taken over by the Department of Public Works. He was successively assistant engineer and engineer of the ship channel, and subsequently reported on the harbors of the Great Lakes. When the ship channel was taken over by the Department of Marine, he was appointed Superintending Engineer.

W. M. Kirkpatrick, who has been appointed General Freight Agent C.P.R., St. John, N.B., is a son of the late Sir Geo. A. Kirkpatrick, formerly one of the C.P.R. directors. He was born at Kingston, Ont., Oct. 8, 1874, and entered railway service Mar. 7, 1892, in the office of the Vice-President, C.P.R., since which he has filled various positions in the Chief Engineer's office, foreign freight office, Montreal; General Freight Agent's office, Toronto; from July, 1899, to Dec., 1902, he was clerk in the office of the Fourth Vice-President; from Dec., 1902, to April, 1905, he was Assistant General Freight Agent Pacific Division, Vancouver, and from April, 1905, to the date of his present appointment he was Export Freight Agent at Montreal.

R. R. Jamieson, whose portrait appears on the first page of this issue, was born at Westover, Ont., Dec. 12, 1856, and entered railway service 1873, his record being: 1873 to 1874, telegraph operator Great Western Ry.; 1874 to 1878, telegraph operator G.T.R.; 1878 to 1880, on construction in Indiana with the Delphi and Chicago Ry.; 1880 to 1883, agent and train despatcher Credit Valley Ry.; 1883 to 1884, on construction C.P.R. in the Northwest Territories; 1884 to 1890, train dispatcher C.P.R., Toronto; 1890 to 1892, Assistant Superintendent C.P.R., Toronto; 1892 to 1896, Assistant Superintendent C.P.R., Smith's Falls, Ont.; 1896 to 1902, Superintendent C.P.R., Farnham, Que.; 1902 to 1903, Superintendent C.P.R., Cranbrook, B.C.; 1903 to date, General Superintendent C.P.R., Calgary, Alta.

Carl Howe, who has been appointed Traffic Manager Merchants' Despatch Transportation Co., New York, was born at Berrien Springs, Mich., June 11, 1870, and entered railway service in the summer of 1889 with the Michigan Central Rd., at Niles, Mich., remaining with that company until the date of his present appointment. His record is: Oct., 1889, to Oct., 1890, clerk in local freight office, Michigan City, Ind.; Oct., 1890, to April, 1893, chief clerk and cashier, same office; April, 1893, to Sept., 1894, local agent, Chicago Heights, Ill.; Sept., 1894, to May, 1898, Travelling Freight Agent, Chicago, Ill.; May, 1898, to Oct., 1899, assistant chief clerk, Freight Traffic Manager's Office, Detroit, Mich.; Oct., 1899, to July, 1900, chief clerk, same office; July, 1900, to Jan., 1907, Assistant General Freight Agent, Buffalo, N.Y. He was President Canadian Freight Association, 1905-06.

J. N. Sutherland, who has retired from the C.P.R. service, was born at Sydney, N.S., in 1843. He entered railway service in 1866 as ticket clerk on the Great Western Ry. at Suspension Bridge, Niagara Falls, Ont., subsequently becoming joint ticket agent for the G.W.R. and Michigan Central Rd. at Rochester, N.Y., and then G.W.R. station master at St. Catharines, Ont. He entered the C.P.R. service on the opening of the Montreal-Toronto line, first filling a position at Toronto Union Station, then becoming local freight agent at Queen's Wharf, Toronto, and afterwards General Freight Agent, Ontario Division. On Jan. 1, 1896, he was appointed General Freight Agent, Atlantic Division, at St. John, N.B., which position he held up to his recent retirement. Mr. Sutherland will in future reside at Thornhill, Ont., where he has a property on Yonge St.

A. E. Duff, who has been appointed General Agent, G.T.R. Passenger Department at Winnipeg, was born at Sherbrooke, Que., May 1, 1872, his record of railway service being: Winter, 1887, shovelling snow on section at Danby, Que.; summer of 1888, water boy on the train between Richmond and Montreal, Que.; Feb., 1889, to Aug., 1889, switchman at St. Bruno, Que.; Aug., 1889, to April, 1890, switchman, St. Isidore Jct., Que.; April, 1890, to Aug., 1890, night telegraph operator, Upton, Que.; Aug., 1890, to Aug., 1892, night telegraph operator, Ac-

Ontario Jurisdiction Over Railways, etc.

Following is the full text of the bill which has been introduced in the Ontario Legislature by Hon. J. S. Hendrie, with a view of preventing railways, etc., incorporated by the Ontario Legislature from escaping provincial jurisdiction:

1. In this Act the expression "public utility" shall have the same meaning as in the Ontario Railway and Municipal Board Act, 1906, and shall also include railways however operated, street railways and works for the transmission of gas, oil, water or electrical power or energy.

2. In case the undertaking of any company or other corporation operating a public utility and incorporated under a general or special act of the Province of Ontario is, by the Parliament of Canada, declared to be a work for the general advantage of Canada or is absorbed by or amalgamated with or controlled or operated by any company or other corporation whose undertaking has been declared a work for the general advantage of Canada, or which is not subject to the legislative control of this Province, then, unless the Lieutenant-Governor in Council has otherwise declared, all powers, rights, privileges and franchises conferred upon such first mentioned company by letters patent or by any general or special act of this Province, shall thereupon cease and determine, and every municipal by-law passed and every agreement entered into with any municipal corporation authorizing such company to carry on business or granting any franchise thereto shall thereupon become void and be of no effect, and such company shall forfeit all claim to any bonus or other aid granted by any municipal corporation. Provided that nothing in this section contained shall affect the validity of any debentures issued by a municipal corporation for payment of any such bonus in the hands of a bona fide holder for valuable consideration.

3. Notwithstanding anything in any Act contained, no municipal corporation shall hereafter enter into any contract with or pass any by-law in relation to any public utility company, which has been declared to be a work for the general advantage of Canada, or which is not within the legislative jurisdiction of this Province, until the Lieutenant-Governor in Council has approved of such by-law or agreement, and every by-law passed or agreement entered into in violation of this section shall be utterly void and of no effect.

The C.P.R. San Francisco ticket office is now located in the Jas. Flood Building, 77 Ellis Steet.

Senator Davis has given notice of a motion favoring the appointment of a special commissioner to control telephone and telegraph companies, making his work a branch of the Railway Commission.

Canadian Northern Railway Construction.

Canadian Northern Ontario Ry.—A deputation from the company waited on the Ontario Government, Feb. 12, asking aid in the construction of a line from Sudbury to near Port Arthur, connecting the James Bay section of the line with the old Ontario and Rainy River section of the Canadian Northern Ry. The distance is about 500 miles. No definite answer was given to the deputation, but it is understood that a statement of the Government's intention will be made at an early date.

The line from Toronto to Sudbury, of which the portion from Toronto to Parry Sound is open for traffic, is being aided by a guarantee of bonds by the Ontario Government to the extent of $20,000 a mile.

A deputation from Parry Sound has asked the Government to grant the company aid, by means of a guarantee of bonds, for the construction of a line from nine miles north of Parry Sound to North Bay, over which the Temiskaming and Northern Ontario Ry. could have running rights as well as over the main line into Toronto.

The C.N.O. Ry. has acquired 110 acres of the Don Flats, from the north side of Winchester Street bridge to the C.P.R. It is understood that the company proposes to straighten the course of the Don River, and to utilize the land reclaimed for yard and terminal purposes. The company has also agreed to purchase an 80 ft. strip from the city lying between the old Belt Line and the C.P.R. tracks above the Winchester St. bridge in connection with its plans.

The Canadian Northern Ry. is negotiating with the Port Arthur, Ont., Town Council in connection with the proposal to erect an hotel there at a cost of $250,000.

The Manitoba Legislature at its recent session passed an act guaranteeing the company's bonds to the extent of $10,000 a mile, to aid the construction of the following lines: From near Neepawa westerly to the provincial boundary; from near Virden northerly for 20 miles; from near Dundee to near Tyndall, about 15 miles.

Passenger Meetings at Buffalo.

Three passenger meetings were held at Buffalo, N.Y., Feb. 6 and 7, members announcing their rates, arrangements, etc., for the year, in which there were very few new features, except the question of rates to the Muskoka Lakes district, Ont., where the position has changed owing to the opening of the C.P.R. and Canadian Northern Ontario Ry. lines. Some difference of opinion having arisen in this connection, the matter was left over for further discussion.

The Great Lakes and St. Lawrence River Rate Committee elected as Chairman for the current year G. T. Bell, General Passenger Agent G.T.R.; Jas. Morrison, of the C.P.R. General Passenger Department, Montreal, being re-elected Secretary.

The Niagara Frontier Summer Route Committee elected as Chairman for the current year, R. M. Pile, A.G.P.A., Pennsylvania Rd., and Jas. Morrison was elected Secretary, succeeding G. C. Wells, Assistant General Passenger Agent C.P.R., who retired.

The International Water Lines Passenger Association elected the following officers: L. H. Nutting, G.P.A. Southern Pacific Co., New York; Vice-President, C. A. Jacques, T.M. Merchants-Montreal Line, Montreal; Executive Committee: C. H. Nicholson, T. M. Northern Navigation Co., of Ontario; B. W. Folger, Manager Niagara Navigation Co.; T. Henry, T. M. Richelieu and Ontario Navigation Co. Audit Committee: R. F. Church, G.P.A. Northern Michigan Transportation Co.; B. R. Hepburn, Manager Ontario and Quebec Navigation Co.; I. P. Lusk, G.P.A. Diamond Joe Line.

TRANSPORTATION APPOINTMENTS.

Alberta Ry. and Irrigation Co.—Since the resignation of C. A. Magrath as Land Commissioner, the land department is under the control of the General Manager, but the Assistant Land Commissioner, E. H. Wilson, attends to all the land matters of the company.

Algoma Central and Hudson Bay Ry.—K. J. C. Kinck, Maintenance of Way and Construction Engineer, has resigned.

Allan Line Steamships.—F. De Bevoise, heretofore Passenger Agent Royal Mail Steam Packet Co., New York, has been appointed New York Passenger Agent Allan Line Steamships. Office, Flat Iron Building.

Board of Railway Commissioners.—An Ottawa press dispatch says that J. Ogilvie, Master Mechanic G.T.R., Ottawa Division, will probably be appointed inspector of railway rolling stock for the Commission.

Canadian Pacific Ry.—W. M. Kirkpatrick, heretofore export freight agent, Montreal, has been appointed General Freight Agent, Atlantic Division, succeeding J. N. Sutherland, retired. Office, St. John, N.B.

P. B. Earle, heretofore assistant to the Export Freight Agent, has been appointed Export Freight Agent, succeeding W. M. Kirkpatrick, appointed General Freight Agent, St. John, N.B. Office, Montreal.

Geo. Hodge, heretofore chief clerk to the Vice-President, has been appointed Superintendent of Montreal Terminals, reporting direct to the General Superintendent. This is a new office.

J. B. Elliott, in addition to his present duties as General Master Mechanic Eastern Lines, takes charge of the Eastern Division as acting Master Mechanic.

J. Wilkinson, relieving foreman, has been appointed locomotive foreman at Hochelaga, Que., succeeding M. J. Buckley, appointed night foreman at Outremont, Que.

C. A. Stark, heretofore general foreman at Carleton Junction, Ont., has been appointed assistant Master Mechanic, Lake Superior Division, North Bay, Ont.

H. C. Kyle, heretofore Master Mechanic Eastern Division, has been appointed Master Mechanic Lake Superior Division, with office at White River, Ont., vice G. Fulton, appointed general foreman at Carleton Junction, Ont.

A. H. Bilbie is appointed District Master Mechanic, district 2, Lake Superior Division. Office, White River, Ont.

J. E. Schwitzer, heretofore Principal Assistant Engineer at Winnipeg, has been appointed Assistant Chief Engineer, Western Lines, succeeding F. F. Busteed, appointed General-Superintendent Pacific Division. Office, Winnipeg.

A. Hatton, heretofore Chief Train Dispatcher at Kenora, Ont., has been appointed Inspector of Train Dispatching, Western Lines, succeeding J. K. Savage, who has been reappointed Chief Train Dispatcher at Kenora.

O. O. Winter, Superintendent at Brandon, Man., is reported to have resigned to enter the G.T. Pacific Ry. service.

We were officially advised Feb. 27, that the following appointments would probably be made: C. S. Maharg, now Assistant Superintendent at Moose Jaw, to be Superintendent at Brandon, Man.; G. E. Graham, now Assistant Superintendent at Brandon, to be Superintendent of new district to be established, with headquarters at Souris, Man.; J. G. Taylor, now Assistant Superintendent at Fort William, to be Superintendent Winnipeg terminals.

G. J. Evans, chief draughtsman in the motive power department, Montreal, has been appointed inspector of the locomotives now under construction in the U.S. Headquarters, Philadelphia, Pa.

J. B. Perrigo has been appointed Assistant Roadmaster District 2, Pacific Division, succeeding J. Stormont, appointed Roadmaster Shuswap section.

G. G. McKay has been appointed City Passenger Agent at Detroit, Mich., succeeding A. E. Edmonds, appointed District Passenger Agent there.

Dominion Atlantic Ry.—D. J. Murphy, Jr., heretofore Chief Dispatcher and Trainmaster, has been appointed Trainmaster and Assistant Traffic Superintendent.

R. B. Browne has been appointed Chief Train Dispatcher.

Dominion Coal Co.—W. S. Andrews, of Toronto, has been temporarily appointed Comptroller, and will take over the duties heretofore discharged by J. R. Blackett, who has resigned the office of General Auditor.

Grand Trunk Ry.—W. E. Tibbits, heretofore General Freight and Baggage Agent, Niagara Navigation Co., has been appointed chief clerk to the General Baggage Agent, G.T.R., Toronto.

W. Duperow, formerly General Manager Huntsville, Lake of Bays and Lake Simcoe Navigation Co., has been appointed Travelling Passenger Agent G.T.R. Headquarters, Toronto.

R. T. Dass, train dispatcher, Stratford, Ont., has resigned to take service with another company in the United States.

D. Crombie has been appointed Master of Transportation, Middle Division, succeeding S. Ennes, appointed Assistant Superintendent, Ottawa Division. Office, London, Ont.

L.H. Nolan has been appointed Superintendent of Terminals, Detroit, Mich., with office at Milwaukee Jct. He will have charge of all station, train and yard employes of the transportation department. All reports and communications heretofore sent to the General Yardmaster will hereafter be sent to the Superintendent of Terminals. The office of General Yardmaster is abolished.

The following agents have been appointed: Goodwood, Ont., G. Evans; Craigvale, Ont., C. Gordon; Allandale, Ont., A. McNabb; Barrie, Ont., A. McNabb; Thornton, Ont., G. L. Allen; Lucan, Ont., H. J. Craig; Woodstock, Ont., M. C. Dickson; Neustadt, Ont., C. E. Brigham.

A. E. Duff, heretofore Travelling Passenger Agent, Montreal, has been appointed General Agent Passenger Department. Office, 513 Ashdown Block, Winnipeg. His territory will be the Canadian Northwest, Port Arthur, and west to, but not including, the Rocky Mountains. He will report to General Passenger and Ticket Agent, Montreal.

F. P. Dwyer, heretofore Eastern Passenger Agent, has been appointed General Agent Passenger Department. Office 290 Broadway, New York City. His territory is as follows: Connecticut, that portion of the state on the line of the New York, New Haven and Hartford Rd. from New York to New Haven Conn; Delaware, entire state. District of Columbia, Maryland, entire state; New Jersey, entire state; New York City and Long Island; Pennsylvania, that portion of the state south of but not including the lines, of the Cumberland Valley Rd., Philadelphia and Reading Ry., and Lehigh Valley Rd., Mason to Easton, via Carlisle, Harrisburg, Lebanon, Reading and Allentown. He will report to General Passenger and Ticket Agent, Montreal.

R. Bushby, heretofore Travelling Passenger Agent, has been appointed Eastern Passenger Agent. Office, 6 Burgess Block, Cortland, N.Y. His territory is as follows: New York, entire state except New York City and Long Island; except between Buffalo, Suspension and Lewiston, inclusive; except on and north of the lines of the Rutland Rd., New York and Ottawa Rd., and New York Central (Adirondack Division) Rd. from Ogdensburg, N.Y., via Moira, Tupper Lake, and Malone Jct., to Rouses Point, N.Y., except the lines of the Delaware and Hudson Co., north of Plattsburg, N.Y.; also excepting that portion on and north of the lines of the Boston and Albany, and Boston and Maine Railroads and east of the Delaware and Hudson Co., but including the lines of the Delaware and Hudson from Albany, Troy and Mechanicville to Plattsburg inclusive and all west thereof; Pennsylvania, that portion of the state east of but not including the lines of the Baltimore and Ohio Rd., the Pennsylvania Lines, and the Pennsylvania Rd., Hyndman to Buffalo, via Berlin, Johnstown, Blairsville, Freeport and Oil City to and including the lines of the Cumberland Valley Rd., Philadelphia and Reading Ry., and Lehigh Valley Rd., Mason to Easton, via Carlisle, Harrisburg, Lebanon, Reading and Allentown. He will report to General Passenger and Ticket Agent, Montreal.

Halifax and Southwestern Ry.—P. Mooney, heretofore District Freight and Passenger Agent, has been appointed General Freight and Passenger Agent. Office, Halifax, N.S.

Lake Superior Corporation.—G. S. Wynne has been appointed Acting General Manager until a successor to W. K. Sawyer is chosen.

Michigan Central Rd.—C. E. Dearborn has been appointed Division Engineer at St. Thomas, Ont., vice A. S. Zinn, resigned to accept service elsewhere.

Pere Marquette Rd.—W. Turtle has been appointed car foreman at St. Thomas, Ont., vice T. H. Stone, deceased.

Richelieu and Ontario Navigation Co.—R. A. Carter, heretofore Division Freight and Passenger Agent, Toronto, has been appointed Assistant General Freight Agent. Office, Montreal. The office of General Freight Agent is abolished.

R. McEwen, heretofore General Freight and Baggage Agent, has been appointed General Baggage Agent.

G.T.R. Betterments, Construction, Etc.

St. Lambert-Ste. Rosalie Second Track.—Tenders have been asked for the construction of a second track between St. Lambert and Ste. Rosalie Jct., Que., about 33 miles. This section includes the bridge over the Richelieu River between Beloeil and St, Hilaire parishes. It is expected to have the work completed this year.

Ottawa Central Station.—The G.T.R. is carrying forward the negotiations for the construction of a central station and hotel at Ottawa. C. M. Hays, Second Vice-President and General Manager, among other matters discussed with the assessment committee of the City Council the question of a fixed assessment of the property. He asked for an assessment of $200,000 on the hotel and $150,000 on the station building, the widening by the corporation of Little Sussex St., and the closing of certain small streets. The plans of the proposed structures and of the lay-out of the grounds were laid before the committee. The question of the terms upon which the central station will be utilized by the C.P.R. are under consideration by the Board of Railway Commissioners, the matter having been argued by the railway officials Feb 12. See also Ottawa Terminal Co., pg. 161.

Toronto to Hamilton.—A start has been made in the work of laying the line between Toronto and Hamilton, Ont., with 100-lb. rails, in place of the present 80-lb. steel.

London Track Elevation.—Several informal discussions have taken place at meetings of committees of the London, Ont., City Council, respecting the elevation of the tracks there. It is understood that the Railway Committee has decided to visit Chicago and look over the work of track elevation there which the G.T.R. has just completed, before taking up the further discussion of the matter with the G.T.R.

Sarnia Tunnel Electrification.—The work of erecting the structural steel work at the Canadian side of the tunnel has been completed.

HEAD OFFICE AND WORKS: **SYDNEY, CAPE BRETON, CANADA**

National Transcontinental Railway.

The Dominion Parliament has under consideration an act the object of which is to make the statute respecting payment of wages upon public works applicable to the Transcontinental Railway Commissioners' contracts.

In a recent discussion in the House of Commons when papers relating to the projected construction of a central station at Quebec were asked for, the Premier pointed out that the Transcontinental Railway Commissioners had no power to build terminals at Quebec this work rested with the Quebec Bridge and Railway Co., which had been authorized in 1903 to enter Quebec by the bank of the St. Lawrence. The Government had not surrendered its control; it could refuse to guarantee the Q.B. and Ry. Co.'s bonds if its plans were not satisfactory.

Tenders have been opened for the construction of five additional sections as follows:

DISTRICT A.—From Moncton westerly 50 miles: G.T. Pacific Construction Co.; Eastern Construction Co. of Amherst, N.S.; M. T. Schurman & Co., Prince Edward Island; Eastern Construction Co., Ottawa.

From Grand Falls, N.B., westerly to the New Brunswick-Quebec boundary: G.T. Pacific Construction Co.; Toronto Construction Co.; Eastern Construction Co. of Amherst; Eastern Construction Co., Ottawa; Lyons & White, Ottawa.

DISTRICT B.—From Quebec Bridge easterly for about 150 miles: G.T. Pacific Construction Co.; Russell-Chambers, Limited, Toronto; M. P. & J. T. Davis, Ottawa; O'Brien & Mullarkey, Montreal.

From 150 miles west of Quebec Bridge to Weymontachene, Que., about 45 miles: G. T. Pacific Construction Co.; Russell-Chambers, Limited, Toronto; MacDonnell & O'Brien, Renfrew, Ont.

DISTRICT C. AND D.—From about eight miles west of Abitibi River, crossing easterly for 150 miles: G.T. Pacific Construction Co.; E. F. Fauquier, Ottawa.

The contracts were awarded Feb. 26 as follows: district A, from Moncton westerly, 50 miles; district B. from about 150 miles west of Quebec Bridge to Weymontachene, Que., and districts C and D from about eight miles west of Abitibi River easterly for 150 miles, to the Grand Trunk Pacific Construction Co.; district A, from Grand Falls, N.B., westerly to the New Brunswick-Quebec boundary to Lyons & White, Ottawa; district B, from 150 miles west of Quebec Bridge to Weymontachene, Que., to M. P. & J. T. Davis, Ottawa. It is said that the cost of the whole 457 miles, according to the accepted tenders, will be about $13,000,000.

There are now under construction on the Government portion of the Transcontinental Ry. 395 miles, which added to the 457 miles awarded Feb. 26, makes 852. This is nearly the half of the line between Moncton and Winnipeg. In connection with the section between Chipman and Grand Falls, N.B., the route has not yet been definitely decided upon by the Commission, but there is no doubt the report of the resident engineer, which is in favor of the centre route, will be accepted by the Commission and the Government. The statute calls for the most central route through the province easterly. The St. John Valley route would not be a central line. But, apart from the statute, the Transcontinental engineers have been able to discover a shorter and a cheaper route through the centre of the province than was to be found by the St. John River Valley.

GRAND TRUNK PACIFIC RY.

C. Schreiber, C.M.G., General Consulting Engineer to the Government, and Chief Engineer Western Division National Transcontinental Ry., has reported as to the progress made to Sept. 1, 1906, with the surveys, location and construction of the Western Division of the National Transcontinental Ry. (G.T. Pacific Ry.). The preliminary surveys have sufficiently advanced to enable the company to submit route maps of the line from Winnipeg, touching Saskatoon and Edmonton, and passing through the Yellow Head Pass to the Pacific slope at the junction of the Salmon River with the Fraser River, a distance of about 1,247 miles. Of this the Government has approved from Winnipeg to a short distance east of Edmonton, about 776 miles in all. Edmonton being favorably situated for the establishment of the principal workshops, sorting and distributing yards, cattle yards, warehouses and grain elevators, a large area of land has been purchased for the purpose, and will give ample room for quick despatch of business at that important point. Plans and profiles of location have been submitted and approved by the Government from Portage la Prairie, Man., to nine miles east of Edmonton, about 720 miles, upon which construction is in progress. Mr. Schreiber had recently made an inspection of this section of the line, and found the location has been carefully selected with a view to obtaining a first-class alignment and favorable gradients, the curvature is light and the maximum gradients against the traffic going west are 0.50%. In securing so good an alignment and gradients, heavy work has been encountered in the form of high embankments, deep cuttings and large structures at certain points, such as at Pine Mull, Minnawashta, Birdtail and Cut Arm Creeks; the little Saskatchewan River, the Touchwood, Eagle and Beaver hills, the Qu'Appelle valley and at Battle River.

He was disappointed with the progress made with construction; it had not advanced, and was not advancing as rapidly as could be desired. This was due to the impossibility of securing the requisite number of men for a vigorous prosecution of the work. In fact, so short of men were the contractors that in several instances many teams of horses were standing idle in the stables, owing to the inability to secure teamsters to drive them. It is, however, only fair to state that the works executed are of a substantial character. The embankments and cuttings are neatly finished off, and the latter are well drained by side surface ditching. Following is a statement of the approximate quantities on the work on the section between Portage la Prairie and Edmonton, and the amount of work executed thereon up to Sept. 1, 1906:

Character of Work	Total.	Quantity Done.
Clearing, acres	1,420	1,409
Grubbing, acres	260	97
Earth excavation, cubic yards	17,700,000	5,091,000
Rock, cubic yards	797,000	314,700
Culverts, lineal feet	62,000	17,900
Large trestle bridges, lineal feet	16,000	4,400
Smaller pile bridges, lineal feet	11,000	2,060
Steel bridges over large rivers, lineal feet	5,700	Nil.
Telegraph and telephone lines, miles	750	20,000 telegraph poles delivered
Fencing, miles	1,500	Nil.
Track complete, including ballasting	816	50,000 tons rails delivered; 160,000 ties delivered; 2 miles track laid.
Station and other buildings, number	265	Nil.
Cattle-guards and sign boards, number	1,500	Nil.
Rip-rap, cubic yards	20,000	200

The material for the balance of the culverts, trestles and pile bridges, as well as the materials for the fencing, telegraph and telephone lines, can be taken out during the winter and delivered upon the ground with much greater facility than in summer, and if nothing unforeseen occurred, it might be anticipated that the track would reach Edmonton by the latter end of the autumn of 1907.

The Ontario Legislature has under consideration a bill respecting the land grant for the construction of the Lake Superior branch. By the present act the Government is to survey the land into townships, and by the amendments the company will take the land in blocks with areas about the size of three townships, and the Government will have to undertake the work of outlining. This will cost about $24,000, whereas the cost of surveys by townships would have amounted to three times that much.

The McDonald, McMillan Co. expects in a short time to be able to make a start upon construction of the line from Portage la Prairie to Winnipeg. The erection of the concrete piers for the bridge across the Saskatchewan River is being proceeded with by Gunn & Son, contractors. There are four piers and two heavy abutments.

It is expected that a conference between the C.P.R., the Canadian Northern Ry., the Great Northern Ry. U.S., and the G.T.P.Ry. officials will be held in Calgary, Alta., in March, with a view of an arrangement being reached respecting the terminal arrangements for all lines in the city.

Referring to the various mileages mentioned in connection with the Pacific section of the line, Senator Scott stated recently that the first figures were merely estimates, as no surveys had been made. It had now been found from surveys that the line would have to go through the Yellow Head Pass, and that the mileage would be about 766. The plans for the line in B.C. have been filed at Victoria, and approved by the Commissioner of Works. Entering the Province by the Yellow Head Pass the line will pass to the north of Cowdung and Moose lakes, following the northerly banks of the south fork of the Fraser river, until it is joined by the north fork. The latter will be crossed near its mouth and the main river followed to a point in the vicinity of Fort George. This fort, which is at the junction of the Fraser and Lower Nechaco, will be left to the south, and the valley of the latter, on the north bank, followed almost due west to Fraser lake. Skirting to the north of Fraser lake, the line, at the westerly extremity, will change in course, going northwesterly along the northeast banks of Endako river and Burns and Decker lakes to the headwaters of the South Bulkley river. Contrary to general expectation, the map of the proposed route shows that the railway will not be built on the west side of Bulkley river, but on the east. This will take it through the Hudson's Bay ranch and Moricetown, and it will cross the Skeena near Hazelton, thence turning abruptly to the southwest, following the north bank of the Skeena entirely to its mouth. From that point it will cross to Kaien Island and the terminus at Prince Rupert.

Following are the officers and directors of the Quebec Cartage and Transfer Co., elected at the organization meeting, Jan. 22: Pres., Hon. E. B. Garneau; Vice-President, Hon. R. Turner; Managing Director, J. Hone, Jr.; Secretary-Treasurer, N. Belleau; other directors, Hon. A. Turgeon, R. Forget, Montreal; and J. H. Walsh, Sherbrooke, Que. With the exception of the two last named, all the officers and directors reside in Quebec.

The Winnipeg Jobbers and Shippers Association, which established a transportation department recently, has the following officers: President, J H. Ashdown; Vice President, E. D. Martin; Executive Committee, W. Georgeson, A. L. Johnston, D. E. Sprague, G. F. Galt, D. E. Williams, H. M. Belcher, E. F. Hutchings, A. Macdonald; Sec. Treas., A. B. Kent; Manager Transportation Department, G. E. Carpenter.

Quebec and Lake St. John Railway.

We are advised that Mackenzie, Mann & Co., Ltd., have secured control of the Quebec and Lake St. John Ry., the main line of which extends from Quebec to Roberval, 189 miles, with branches from Chambord Jct. to Chicoutimi, 51 miles, and from Valcartier to St. Gabriel, 4 miles; 244 miles in all.

The Great Northern Ry., one of Mackenzie, Mann & Co.'s eastern lines, and now included in the Canadian Northern Quebec Ry., has for some time past had running powers over the Q. and L. St. J. Ry. from Rivière a Pierre Jct. to Quebec City, but is now building a cut-off from near Garneau Jct. to secure a more direct route from Ottawa to Quebec. The Q. and L. St. J. Ry. has extensive and very valuable terminals in Quebec City.

The Q. and L. St. J. Ry. will no doubt be operated as part of the Canadian Northern Quebec Ry., and by the officials of that line. J. G. Scott, General Manager of the Q. and L. St. J. Ry., will probably remain in the service in some other capacity.

Railway to Hudson Bay.

In the House of Commons Feb. 22, W. E. Knowles, M.P. for Assiniboia West, moved an amendment to the motion to go into supply, urging the Government to take all steps possible for the speedy construction of a railway to Hudson Bay. T. Greenway expressed his conviction that the water route via the Bay and Straits would be open for four months of the year. Sir Wilfrid Laurier, in discussing the congestion of railway traffic, said that additional rolling stock was not the only thing needed, an outlet to the sea on Hudson Bay was also required. There had been in the statutes for years a provision that the country would aid in the construction of a line to Hudson Bay, by a subsidy of 12,000 acres of land per mile, but no one had come forward prepared to build on those terms, and he thought the time had come to make a new effort and provide some other means of building it. The matter was engaging the Government's attention and he hoped that before the end of the session a policy in regard to the matter would be announced

C.P.R. Betterments, Construction, Etc.

Algonquin Hotel, St. Andrews, N.B.—Surveys are being made for the enlargement of this hotel.

Sherbrooke Improvements. — Additional land has been purchased in Sherbrooke, Que., in connection with the plans for improvement which the officials are working out. A new station and freight sheds, and a rearranged yard are proposed.

Reported New Quebec Extensions.—In connection with the reported purchase of the control of the Quebec Ry., Light and Power Co., press reports credit the company with being about to undertake an extensive programme of development throughout the northern and northeastern parts of the province. The plan suggested is a line through Labrador, carrying the C.P.R. main line to Cap Charles, and involving the construction of about 1,000 miles of railway. Sir Thos. G. Shaughnessy when shown the report is said to have remarked that it was a very ingenious scheme, and could only have originated in Quebec.

Place Viger Hotel, Montreal.—Plans are said to be under consideration for an enlargement of this hotel.

Westmount Improvements.—Transfers have been registered showing that the C.P.R. has acquired, through the Ontario and Quebec Ry., a leased line, about 150,000 sq. ft. of land in Westmount and St. Henri ward, Montreal, from the Mackay estate, for $111,000. This property adjoins other land recently acquired by the company and has been purchased for the purpose of giving access to the Glen yards.

At the meeting of the Westmount Town Council, Feb. 4, D. McNicoll, Vice-President, stated that it was the company's intention to erect a new station at the bend of Victoria Avenue.

Montreal City Ticket Office.—The C.P.R. has purchased the St. Lawrence Hall Hotel property from the Hogan estate, and it is reported it will be taken down and that a new block of buildings will be erected thereon, in which will be located the city ticket office, telegraph offices, Dominion Express Co. town office, etc.

Northern Colonization Ry.—A deputation from Nominique, Que., waited on the President, Jan. 29, asking that the branch line serving that district be extended 30 miles further. Sir Thos. G. Shaughnessy said that the line would be built and put in operation within a couple of years if the Provincial Government would give a land grant of 4,000 acres a mile.

Second Track Work.—A contract has been let to the Toronto Construction Co. to construct a second track from Finch to Smith's Falls, Ont., a distance of about 50 miles. Construction will be started at once at the west end, and it is expected that the work will be completed this season. The work will be in charge of A. Fronhoefer, Assistant Engineer.

Bridge Improvements at Peterborough.—The company has applied to the Board of Railway Commissioners to vary an order requiring it to leave an opening of 63 ft. in the trestle bridge carrying its branch line to Dickson's Mills in Peterborough, and permitting it to fill in the opening and substitute a solid embankment for the trestle. The matter was adjourned to permit the Dominion Government, the C.P.R., and the Cereal Co., who are interested, to discuss the matter and reach an agreement.

Walkerton and Lucknow Ry.—A deputation from Tiverton waited on J. W. Leonard, Assistant General Manager Eastern Lines, recently, and urged the extension of the line from Walkerton to Lake Huron, Inverhuron or Baie-de-dore being suggested as suitable points for a harbor. One of the company's construction engineers has been directed to make a survey of the route.

Proposed Shops at London, Ont.—The company has bonded about 100 acres of the Platt estate at the north end of West London, Ont., bordering its line, and it is stated that it is intended to construct car repair shops there. We have been advised that it is not the intention to erect shops there.

Temiscamingue to Fort Temiskaming.—The C.P.R. branch from Mattawa, Ont., running along the east bank of the Ottawa River now terminates at Temiscamingue, Que., at which point navigation on Lake Temiskaming begins. There is a charter giving the company power to extend this line, and it is reported that the surveys have been completed for the work. It is said that it is proposed to make an extension on the Quebec side of the river to Fort Temiskaming, about 50 miles; to construct a bridge to the Ontario side, and continue the line to Cobalt, Ont.

Western Lines Construction.—The programme of construction, etc., for the current year includes in addition to the second track work between Fort William and Winnipeg, the following: Continuation of Pheasant Hills branch to connect with the branch easterly from Wetaskiwin, Alta. Completion of the Wolseley-Reston line. Completion of the Weyburn-Stoughton branch. Construction of 50 miles further on the line northerly from Moose Jaw, Sask. Extension from Sheho to connect with the Pheasant Hills branch. Grade reduction Medicine Hat section. Grade reduction Lethbridge to McLeod, including bridge one mile in length and 280 ft. high. Grade reduction between Field and Hector, B.C. Changing 331 miles of light steel for 80-lb. rails. New station at Port Arthur, Ont.; recreation and lodging building for engineers at Ignace, Ont.; making Higgins Ave. subway, Winnipeg, available for second track, and completion of the Victoria Hotel. These works are in addition to the general work of maintenance on the line, and the work of replacing temporary structures with permanent ones. We have been advised that it is intended to proceed with the construction of the several lines mentioned as soon as the weather conditions will permit. The contracts will be let for grading, etc., and the company will lay the steel.

Calgary Station.—The plans for the proposed new station at Calgary, Alta., are being prepared at Montreal, and details are not available. Press reports state that the new building will cost $200,000.

Subways at Calgary.—The question of the construction of subways at Calgary, Alta., is still the subject of negotiations between the company and the City Council. The Board of Railway Commissioners had the matter before them in Sept. last, and subsequently an agreement was reached. A draft order was submitted for approval in Oct., but this was not completed. The City Council discussed the matter Jan. 30, and the question was further discussed with the Second Vice-President at a subsequent date.

Edmonton Entrance.—The question of the entrance of the C.P.R. into Edmonton, Alta., was discussed Feb. 10, by W. Whyte, Second Vice-President; General Superintendent Jamieson and N. E. Brooks, Division Engineer, and the City Commissioners. The Commissioners state that they are confident that a solution of the whole question will shortly be arrived at.

Belly River Bridge.—We have been officially advised that at present the C.P.R. bridge engineers are only making a study of the projected bridge over the Belly River, Lethbridge, Alta. The bridge will likely be designed as a steel trestle; it will be approximately 5,400 ft. long, and will average about 280 ft. in height.

Bridge at Revelstoke, B.C.—The question the reconstruction of the bridge across the Columbia River at Revelstoke, B.C, is under consideration, but we were advised recently that no appropriation had been made for the work.

Kootenay Central Ry.—Progress is being made by the C.P.R. with the construction of this line from Golden, B.C. Labor is very scarce, and considerable trouble has been experienced with the frost.

B, C. Hotels.—J. P. O'Leary, who has succeeded F. M. Rattenbury as architect for the company's hotels in British Columbia, stated at Vancouver recently that it was proposed to add 52 bedrooms and 42 bathrooms to the hotel at Lake Louise; to construct three new wings at the Banff Hotel, practically doubling its capacity, and to take in hand at once the rebuilding of the old wing of the Hotel Vancouver at the corner of Georgia and Granville streets, Vancouver. The Empress Hotel at Victoria is expected to be opened in July.

The Newfoundland Government has submitted to the Legislature a proposition to establish a line of trans-Atlantic steamers between Green Bay on the east coast of Newfoundland and a port on the west coast of Ireland. It is proposed to give a subsidy of $75,000 a year for 25 years. The proposal involves the construction of a tunnel under the Straits of Belle Isle.

PROFESSIONAL CARDS.

THE RAILWAY AND MARINE WORLD is especially adapted for the publication of professional cards of engineers, inspectors, analysts, electrical experts, naval, grain elevator and other architects, solicitors, etc., who desire to bring themselves under the notice of the managements and officials of the various steam and electric railway, steamship, grain elevator, telegraph, telephone and power companies throughout Canada, as well as the locomotive, car and shipbuilders, contractors and promoters of railway enterprises. THE RAILWAY AND MARINE WORLD is the only one medium through which all these important classes can be reached.

Rates will be quoted on application.

Canadian Pacific Ry. Appointments.

The following appointments have been made in addition to those given on pg. 177.

J. G. Sullivan, formerly Division Engineer of Construction, C.P.R. Western Lines, and since then of the Panama Canal engineering staff, has been appointed Manager of Construction, C.P.R. Eastern Lines. Office. Toronto. Division engineers of construction will report to him.

Circulars have been issued confirming the following appointments as announced in our Feb. issue, pg. 103.

G. J. Bury, heretofore General Superintendent Central Division, has been appointed Assistant General Manager, Western Lines, in charge of matters relating to maintenance of way and operation. Office, Winnipeg.

A. Price, heretofore Superintendent of Transportation Western Lines, has been appointed General Superintendent, Central Division. Office, Winnipeg. The position of Superintendent of Transportation has been abolished.

F. F. Busteed, heretofore Assistant Chief Engineer, Western Lines, has been appointed General Superintendent, Pacific Division. Office, Vancouver, B.C.

R. Marpole has been appointed General Executive Assistant for British Columbia, with office at Vancouver. All legislative work, extraordinary litigation and claims affecting the company's interest in the Province will come under his supervision. He will have charge of the company's property interests in Vancouver, Kamloops, Revelstoke, and such other points in British Columbia as may be hereafter designated, and all applications for leases or agreements with reference to these properties shall be submitted to him for approval. He will have supervision of exploration, surveys, and the construction of new lines in the Province. The General Superintendent of the Pacific Division will issue transportation to local employes, and members of their families over his own division only. All other free transportation will be dealt with by the General Executive Assistant. He will perform such other duties as may be assigned to him by the executive from time to time

Buffalo and Lake Huron Railway Co.

Following is the report for the half-year ended Dec. 31, 1906, to be presented at the annual meeting at Liverpool, Eng., Mar. 6. After providing for interest on first and second mortgage bonds, the available balance, including the amount brought forward from the previous half-year, will be £14,490 4s. 7d., which will enable the directors to pay the usual dividend of 5s. 3d. per share, and leave a balance of £705 11s. 1d. to be carried forward as against £637 3s. 9d. The directors' remuneration was many years ago fixed at £900 a year. But since 1875, as the board has consisted of three members only, the amount drawn has been £300. In view of the altered conditions of the company, the directors will, subject to the approval of the shareholders, draw for their remuneration, as from Jan. 1, 1907, £400 instead of £300 a year.

BALANCE SHEET, DEC. 31, 1906.

The directors for the current year are M. H. Maxwell, Chairman; J. M. Sing, and E. Ashton, all of Liverpool, Eng.

Mr. Emmerson on the Intercolonial Ry.

The Minister of Railways in speaking on the Intercolonial Ry. at the Canadian Club, Toronto, Feb. 11, said there were railway companies in Canada which would think they were getting the I.C.R. cheaply if the Government would sell to them for $100,000,000. If the rates charged on it were brought up to the level of those charged by other railways in Canada, its earnings would be increased by 50%, and instead of a surplus of $100,000 there would have been a surplus of $2,300,000, sufficient to pay interest on the capital expended upon its construction and leave $100,000 by way of dividends. The management, he claimed, was most economical, and the present splendid showing was made in the face of the cold fact that the tolls charged on the I.C.R. were the lowest in the world. The manufacturers and farmers of Ontario had benefited by the cheap transportation the line afforded. Its past deficits represented surpluses in the pockets of the people. Canada had spent millions in canals and railway and steamship subsidies without a murmur. These would give no capital return whatever, but the Government was criticized because returns were not made upon the expenditure upon the Intercolonial Ry. He was prepared to defend the system with the full sense that such a defence was amply justified. In conclusion he said the total railway tolls collected in Canada last year had been $125,000,000, of which but $7,500,000 had been collected by the Government railway, the balance had gone to the corporations. This was but a form of taxation and it was well not to forget its relations to other imports. The people of Canada were paying but $8 a head in customs duties, while the transportation tax amounted to over $20. The former affected but few commodities, but there were scarcely any articles entering into general consumption, the cost of which was not directly affected by transportation rates.

The Dominion Government str. Aberdeen has been equipped with the Submarine Signal Co's submarine bell signal.

G. Cooper has been appointed road foreman of locomotives, G.T.R., with headquarters at Sarnia Tunnel, vice G. Renton, deceased.

The Judicial Committee of the Privy Council has given judgment in the case of the C.P.R. appeal against the decision of the Supreme Court regarding the taxation of its land grant in Manitoba, Saskatchewan, and Alberta. The Manitoba and the Supreme Courts decided that the lands in question could be taxed within the 20-year period specified in the charter, and this decision has now been reversed.

In the appeal to the Judicial Committee of the Privy Council arising out of the collision between the S.S. Albano and the Allan Liner Parisian, the court set aside the decrees of the Supreme Court and the local judge in Admiralty at Halifax, and found that the Parisian was alone to blame. The case against the Albano was dismissed with costs, and a verdict was given in the cross action in favor of the Albano, the damages to be found by reference in the usual way.

The Prince Rupert's Timber and Lumber Co. has been incorporated under the Dominion Companies' Acts, with a capital of $450,000 and offices at Ottawa, to carry on a lumber business, and in connection therewith to own and operate steam and other vessels; to construct docks, wharves, piers, warehouses, elevators, etc. The provisional directors are: E. H. Moore, W Anderson, G. H. Rochester, W. W. Dwyer, R. E. McCracken, A. Fleck, Ottawa; J. H. Sanderson, F. C. Baker, A. H. Woodman, Prince Albert, Sask.; J. H. Lamont, Regina, Sask.

The Ontario Railway and Municipal Board handed out a lengthened judgment as to its recent enquiry into the condition of the Hamilton Street Railway The Board makes extensive orders as to repairs, etc., which must be made within the six months from April 1, directs the City Council to make certain alterations to street crossings, and to repair the track where it has become disarranged by reason of the street repair and other corporation works, and orders that the city pay one-half of the engineer's cost of the report to the Board.

ELECTRIC RAILWAYS.

Guelph Radial Railway Co.

The annual report for the year ended Sept. 30, 1906, of this company, the stock of which is owned by the city of Guelph, Ont., contains the following figures:

ASSETS.

During the year the capital account was increased $6,170.44 for real estate, park, cars, turnout, new car barn, toboggan slide, rink, etc. The passenger receipts increased $3,596.80 over the previous year. The number of passengers carried was 616,046, an increase of 90,434 over 1905. Out of the net gain of $7,487.28 on the year's operations, $463.09 was paid for the deficits of the two previous years, and a dividend of 4½% on the city's holdings in the company, $108,000 was paid, amounting to $4,860.

Halifax Electric Tramway Company.

Following is the report for the year 1906 presented at the annual meeting Feb. 11:

The net earnings, $141,808.52, show an increase over any previous year. Four quarterly dividends at the rate of 6% per annum have been paid, amounting to $81,000.00.

An unusually large expenditure was made during the year for double tracking, rolling stock and car house, also in street paving ordered by the city, the result being not only a more efficient car service, but a material reduction in the percentage of the cost of operation. The expenditures were as follows: Street paving, $48,000.00; double tracking and extension, $29,906.30; rolling stock, $19,914.14; meters, transformers and arc lamps, $11,529.90; new car house (not quite complete), $12,769.90; a total of $122,120.24; a part of which expenditure has been provided for out of the earnings of the past year. The expenditures for the current year are expected to be comparatively small. The percentage of operating expenses to income shows the gratifying result of 55.68%, the lowest for the past six years.

Washburn Steel Castings & Coupler Co.
MINNEAPOLIS

Ottawa Electric Railway Co.

The report for the year 1906, presented at the annual meeting, Jan. 28, showed gross earnings of $525,746.59, against $449,633.97 for 1905; and net earnings of $218,258.90, against $173,693.54. After providing for interest on bonds and loans, the net earnings show over 18% earned on the capital stock. In 1906, 11,408,422 passengers were carried, against 9,891,311 in 1905. The track renewals recommended in the 1905 report have been completed, and in addition heavy rails have been laid on other portions of the lines. The tracks on Sussex St. and Gladstone Ave. will be relaid with heavy rails this year. A number of closed and open cars were added to the equipment, and additional cars have been ordered to meet the demands of increasing traffic. The popularity of the company's park at Britannia-on-the-Bay was further demonstrated during 1906. It is intended to pave the promenade of the main pier with asphalt or bitulithic, and to extend its outer end 150 ft. The property is all in excellent condition, and the directors confidently look forward to the continued satisfactory development of the business.

The officers and directors were re-elected for the current year as follows: President, T. Ahearn; Vice-President, P. Whelen; other directors, Hon. G. A. Cox, W. Y. Soper, G. P. Brophy, T. Workman; Sec.-Treas., J. D. Fraser.

The Lieutenant-Governor of Alberta, in his speech at the opening of the Legislature, Jan. 24, said the increased activity in railway construction makes it imperative that provision be made for a uniform law governing railways within the province.

The North Atlantic Dock and Shipbuilding Co. has been incorporated under the Dominion Companies' Act, with a capital of $1,500,000 and offices at Montreal, to construct vessels of all kinds; to carry on a general navigation business anywhere in Canada; to construct dry docks, wharves, piers, warehouses, etc; to make contracts with the British and Colonial Governments; to amalgamate with other similar companies, and various other purposes incidental to a shipbuilding and ship-owning corporation. The provisional directors are: A. C. Ross, C. B. Ross, North Sydney, N.S.; T. Brosseau, K.C.; B. Brosseau, Montreal; W. H. Moore, Toronto.

Montreal and Toronto Street Railways.

Following is a comparative statement of the Montreal St. Ry. and the Toronto Ry.'s operations for the past year:

	Montreal.	Toronto.
Gross	$ 3,100,486	$ 3,100,739

Passengers carried	76,356,099	76,106,932
Transfers	24,516,067	28,159,558
Total passengers carried	100,872,166	104,266,490

Dominion Power and Transmission Co.

A company with this title was incorporated under the Dominion Companies' Act Jan. 22, the incorporators being employes of a Toronto law firm, with a capital of $25,000,000 and offices at Toronto, to acquire water powers, to develop electrical power, to distribute the same, to develop and distribute steam, hydraulic, pneumatic or other power, to acquire the businesses of companies engaged in any similar business, or the stocks and bonds of the same; to operate tramways, etc., telegraph and telephone lines, and to carry on in connection therewith a variety of other allied businesses.

At the annual meeting of the Hamilton Cataract Power, Light and Traction Co., Feb. 11, it was announced that an arrangement had been made by which the shares of this company would be taken over by the D.P. and T. Co. Of the authorized capital of $5,000,000 there had been issued $4,700,000. A controlling interest had already been turned over to the new company and the balance of the stock would likely be transferred in the near future. The H.C.P., L. and T. Co. will continue in existence as an operating company. The stock of the new company is divided into three classes—preferred, limited preferred, and common. The preference stock, by the terms of the Dominion company's charter, will pay dividends for three years at 6%, and afterwards at 7% per annum. The limited preferred stock will be preferred stock for five years only, after which it will become common stock. The preferred stock of the Cataract company was taken over by the new company on an equal basis. For every share of Cataract common three shares of limited preferred were given by the Dominion company. The H.C.P., L. and T. Co. own the Hamilton Radial Ry., the Hamilton and Dundas Ry., a control of the Hamilton, Grimsby and Beamsville Electric Ry., the Hamilton Terminal Station Co., certain stock of the Hamilton Street Ry., as well as the Brantford and Hamilton Ry. now under construction, in addition to the electric light and power plants. It is stated that the new company will not take over the Hamilton Street Ry. stock, but that it will continue to be operated as a separate concern. There is, however, a desire on the part of the city to purchase the street railway, and the principal shareholders are prepared to sell at a reasonable price.

The report presented at the annual meeting of the H.C.P., L. and T. Co. showed that the gross earnings for the year from the power and light, traction companies and other sources, were $1,039,341.87, and the surplus carried to profit and loss was $259,412.82. The balance on hand was $262,512.02. During the year two dividends on preferred stock had been paid, amounting to $166,969.75, and on common stock two dividends amounting to $56,000. A final statement was submitted, showing assets of $9,255,350.

Projects, Construction and Betterments.

Calgary, Alta., Street Ry.—The Public Works Committee has recommended that the City Council take steps to construct an electric street railway 12 miles long and equip the same with 12 cars. The line it is proposed shall extend from one end of the city to the other with a loop from Main St. each way in the centre of the city.

Chatham, Wallaceburg and Lake Erie Ry.—It is reported in Chatham, Ont., that arrangements have been made for the financing of the construction of the line to Lake Erie, and that work will be started on an early date.

Fort William, Ont.—Plans have been filed with the Ontario Railway and Municipal Board for the construction of a street railway in Fort William by the Town Council as a municipal enterprise.

Hamilton, Grimsby and Beamsville Electric Ry.—Application is being made at the current session of the Ontario Legislature for an act extending the time for the construction of the extension of the line from Beamsville to St. Catharines, thence to Niagara-on-the-Lake and Niagara Falls, Ont.; for special powers in connection with the construction of a bridge over the old Welland Canal at St. Catharines; for power to enter into agreements with other companies, and to issue additional bonds and other securities.

Hamilton Radial Ry.—The President of the Hamilton Cataract Power, Light and Traction Co., which owns the H.R.Ry., recently stated that it was the company's intention to proceed with the construction of the extension from Oakville to Toronto, as soon as possible, possibly early in the spring. (Feb. pg. 113).

Manitoba Radial Ry.—C. Hoffman, A. Wagner, R. D. Fletcher, J. A. Munro, and W. J. Donovan, are the provisional directors named in the act which the Dominion Parliament is being asked to pass at its current session with this title. The promoters ask power to construct a railway from Winnipeg westerly and northerly to Lake Manitoba; thence northerly to Sundar, with a branch through Stonewall to Lake Francis. The company desires to have authority to use steam, electricity, gasoline or other motive power. The city of Winnipeg is opposing the measure with a view to have a clause inserted making it necessary for the company to secure the consent of the municipalities through which the line will pass before construction is started. (Feb., pg. 113).

Montreal Street Ry.—Negotiations are approaching the final stage with the City Council for the construction of a number of additional lines in the city.

Niagara, St. Catharines and Toronto Ry.—The extension from Thorold to Fonthill, Ont., about six miles, is expected to be opened for traffic early in March. Work will be commenced at an early date upon the extension of the line from Fonthill to Welland, about four miles, and it is expected to have the line completed about the middle of June. We were advised Feb. 18, that the company's plans as to further extensions were not definitely settled. Press reports credited the company with being about to construct a line from Welland to Port Colborne, about seven miles, and from St. Catharines to Niagara-on-the-Lake. It was also stated that the company was considering the construction of a line from Lundy's Lane to the Ferry Landing or Fort Erie, Ont.

Plans have been filed at St. Catharines showing a projected extension from that city to Vorget, near Niagara-on-the-Lake. (Feb., pg. 113).

Ontario Interurban Ry.—Application is being made at the current session of the Ontario Legislature for an act incorporating a company with this title to construct a railway from Belleville, across the Bay of Quinte to Ameliasburg, thence to Wellington and Picton, with a branch to Consecon and Willars Bay; and along the beach between Wellington and West Point. Power is being asked to operate the line either by steam or electricity, to construct telegraph and telephone lines, to construct wharves, elevators, storehouses, etc. W. G. McWilliams, Toronto, is solicitor for the applicants.

Ottawa Electric Ry.—A plan has been deposited with the Minister of Public Works at Ottawa, showing the proposed addition to the company's pier at Britannia-on-the-Bay, and the approval of the Government is to be asked for the carrying out of the work.

The company has notified the city council that it is prepared to construct a line to Beechwood and Notre Dame cemeteries, Ottawa.

Ottawa River Ry.—Application is being made at the current session of the Ontario Legislature for an act authorizing the construction of a branch from Digby tp., through Laxton and Carden tps., to Mara or Thorah tp.; a branch from East Gwillimbury or Whitchurch tp. to the Port Stanley branch at Caledon. An extension of time for the construction of the previously authorized lines is also asked. Hogg and Magee, Ottawa, are solicitors for the applicants.

Owen Sound, Shallow Lake and Wiarton Ry.—Application is being made at the current session of the Ontario Legislature for an act incorporating a company with this title for the purpose of constructing a railway from Owen Sound through the townships of Sarawak, Keppel, and the village of Shallow Lake to Wiarton, Ont. A. D. Creasor, Owen Sound, is solicitor for the applicants.

Silver Bell Electric Ry.—H. D. Graham, B. C. Beach, A. J. Young, C. A. Beach, and A. J. Murphy, are applying at the current session of the Ontario Legislature for an act incorporating a company with this title with power to construct an electric railway in the township of Coleman, Lorraine, Bucke, Dymond, and the towns of Latchford, Cobalt, Haileybury and New Liskeard; with branch lines; to construct telegraph and telephone lines; to acquire docks, wharves, warehouses; to operate steam and other vessels, and to acquire summer resorts and hotels.

Southwestern Traction Co.—The plans for the extension of the lines to Delaware are completed, and construction will be started early in the spring. It is proposed to connect the line now in operation between London and St. Thomas with the Michigan Central Rd. in the latter town.

St. Thomas St. Ry.—The City Engineer of St. Thomas, Ont., has been instructed to prepare estimates for several extensions of lines, and for some double-track construction in the city.

Toronto and York Radial Ry.—A preliminary agreement has been reached with the East Toronto Town Council by which the company will extend its line from the G.T.R. tracks to Luttrel Avenue, the furthest point of the town's northern limit.

Toronto Ry.—The Toronto City Council is discussing plans for new lines which it is proposed to ask the company to construct. The Board of Control has reported favorably on a line on Bay and Teraulay streets to College St.; and the City Engineer has been asked to report on a line along Harbord St. to the western limits of the city.

Toronto Suburban Ry.—The Toronto Junction, Ont., Town Council has under consideration a by-law depriving the company of its charter owing to the failure to operate cars on the tracks laid on certain streets south of Dundas St.

Winnipeg and Lakes Electric Ry.—The Manitoba Legislature has refused to grant a renewal of the charter of the Winnipeg and Lake Shore Ry. Co. under the above title. The recent application was for power to construct an electric railway from Winnipeg to Netley Lake, thence to Winnipeg Beach, and back to the city; and from Winnipeg to Portage la Prairie, then to Lake Winnipeg and back to Winnipeg. The original charter was passed in 1898 and no progress had been made.

Electric Ry. Finance, Meetings, Etc.

Berlin and Waterloo St. Ry.—An appeal has been made to the courts against the decision of the arbitrators in the recent arbitration proceedings in connection with the proposal of the Berlin Town Council to take over the line.

Brantford Street Ry.—The Ontario Legislature is being asked at its current session for an act confirming by-law 742 of the Brantford City Council, and an agreement entered into with the B.S. Ry. Co. in conformity therewith.

The retiring directors have been re-elected, as also were the retiring directors of the Woodstock, Thames Valley and Ingersoll Ry., which is controlled by the same interests.

Cape Breton Electric Co.—Gross earnings for 12 months ended Dec. 31, 1906, $258,416.80, operating expenses, including taxes, $154,472.28; net earnings, $103,944.52; interest charges, $43,160.97; improvement fund, $8,500; 3% dividend preferred stock, $7,020; balance, $45,263.55. The company does the entire electric lighting and electric railway business in Sydney; the entire electric lighting business in North Sydney; the ferry business between Sydney and North Sydney, and operates an interurban line between North Sydney and Sydney Mines. It also owns $200,000 of the $394,000 outstanding first-mortgage bonds and one-half of the common stock of the Sydney and Glace Bay Ry., an interurban electric railway 19 miles long. The company has issued $850,000 of 5% 30 year gold bonds out of its authorized amount of $1,500,000, $234,000 out of an issue of $250,000 of 6% non-cumulative preferred stock, and $1,000,000 of common stock. The figures as to earnings and expenses include one-half of the earnings and expenses of the Sydney and Glace Bay Ry. The Managers of the company are Stone and Webster, Boston, Mass.

Hamilton Cataract Light, Power and Traction Co.—See Dominion Power and Transmission Co.

Halifax Electric Tramway.—Railway earnings for Jan. $12,395.67, against $11,755.69 for Jan., 1906.

Hamilton, Grimsby and Beamsville Ry.—At the annual meeting Jan. 28, it was reported that the gross earnings were $84,300 and the operating expenses about $76,000. The directors said a dividend might be declared in 1908. The proposal to extend the line to St. Catharines was approved and the application will be made to the Ontario Legislature for the necessary powers. The minority shareholders are not satisfied with the position of affairs, and have issued writs asking that the directors be enjoined from proceeding in the matter, and to prevent the transfer of certain shares said to have been illegally issued to the directors and their friends. The directors re-elected are: J. M. Gibson, K.C.; W. C. Hawkins, J. Sutherland, J. Dickenson, J. W. Nesbitt, K.C.; J. G. Gauld, J. R. Moodie. See also Dominion Power and Transmission Co.

London Street Ry.—Following are the officers and directors for the current year: President, H. A. Everett: Vice-President, T. H. Smallman; other directors: W. M. Spencer, P. W. D. Brodrick, C. W. Moore, C. W. Wasson, H. N. Holt; Manager, C. B. King; Secretary-Treasurer, G. H. Benson. The report was not made public, but it is said to have been a satisfactory one, and to show an increase in the number of passengers carried. A committee consisting of the President, W. M. Spencer, and P. W. D. Brodrick, was appointed to meet the committee which the London City Council has appointed to confer in reference to a purchase of the line by the city.

Quebec Ry. Light and Power Co.—It is reported that the C.P.R. has secured the control of this company, but no official announcement has been made.

G. H. Thomson has been elected President, succeeding his father, the late A. Thomson, and W. Price has been elected to fill the vacancy on the directorate.

St. Thomas Street Ry.—Receipts for Jan. $995.71, a decrease of $26.36; passengers carried 37,210, an increase of 720 against Jan., 1906.

Toronto Ry.—The Toronto City Council is applying at the current session of the Ontario Legislature for an act providing, among other things, that the statute relating to the Toronto Ry. be amended so as to provide that the amount payable by the company to the city as liquidated damages in case of the company neglecting or refusing to give a service of cars reasonably complying with the provisions of the agreement and conditions, shall be $500 a day instead of $100 a day.

The Quebec Cartage and Transfer Co. has acquired a site having a frontage of 200 ft. on St. Valier St., Quebec, for the purpose of erecting offices, stables, etc.

Electric Railway Notes.

The Toronto Ry. is building at its shops 100 convertible motor cars of its standard type, 45 ft. long.

The St. Thomas, Ont., City Council is asking prices for two or three street cars for quick delivery.

P. S. Ross, chartered accountant, Montreal, who died there Feb. 1, aged 80, was father of W. G. Ross, Managing Director Montreal Street Ry.

A section of the street railway employes at Hamilton, Ont., have withdrawn from the existing union, and have applied for a charter from the Canadian Association.

The Montreal Street Ry. has at present 75 pay-as-you-enter cars in operation on its lines, and it is expected by the beginning of May to have at least 50 more in service.

T. Smith, of the Gladstone Hotel, Toronto, was fined $5 Feb. 4 for selling intoxicating liquor to a street railway employe in uniform. This is the first charge of the kind brought under the Ontario Railway Act.

It is understood that the Ontario Railway and Municipal Board has decided upon a fender which it will approve for use by the street railways, and expects to be able to approve of a second pattern. When this is done the formal order of approval will be issued.

The Ontario Railway and Municipal Board's inquiry into the overcrowding on the cars of the Toronto Ry., on the complaint of the City Council, was adjourned on Feb. 8 until Feb. 21 to enable the company to make inquiries as to the state of traffic during rush hours in other cities.

The Montreal Street Ry. Co. is asking for legislative authority to enable its conductors and motormen to eject objectionable passengers from its cars. At present, in case of a disturbance it is necessary to wait for a policeman before the objectionable person can be removed.

The Ontario Railway and Municipal Board has decided on a complaint regarding fares charged on the Woodstock, Thames Valley and Ingersoll Ry., that the intention of the act is clearly that no matter where a passenger boards a car he shall pay the minimum fare of 5c. if he travels a distance not exceeding three miles; if he travels a distance exceeding three miles then he shall pay two cents a mile for the distance actually travelled.

The C.P.R. has opened its new ticket office at Main St. and Portage Ave., Winnipeg.

A contract has been let to McRae, Chandler & McNeill for the construction of the main line of the Temiskaming and Northern Ont. Ry. from the end of the present contract to a junction with the route of the G.T. Pacific Ry.

The Treasurer of Quebec, in his budget speech for the year 1905-06, stated that the payments on account of subsidies to railways and to the Q. M. O. and O. Ry. during the year were less by $57,143.47 than in 1904-05; the payments on account of the Quebec Bridge being the same, $30,000. The balance of subsidies to railways authorized by the Legislature, but not earned at June 30, 1906, was $388,787.08. The balance of the subsidy to the Quebec Bridge authorized but not earned June 30, 1906, was $70,000. An act to change the taxes on railways is under consideration. At present certain railway companies pay double taxes; one on their profits or on subsidies they received, the other on their mileage. The new proposal increases the taxation on mileage and assimilates it more to that paid by railway companies in Ontario.

Toronto Railway Company's Report.

The following report was presented at the annual meeting, Feb. 6: "It is with great pleasure that the directors submit the statement for the year ended Dec. 31, 1906, showing, as it does, a continuation of healthy increases in earnings. The gross earnings have now passed the three million dollar mark, and for the year were $3,109,739.61, an increase of 12.8% over 1905. They are also gratified to report that the large expenditures which have been made during the past three years, specially improving the power plant and other properties, have contributed to a reduction in the percentage of operating expenses to gross income from 56.8% in 1905, to 52.9% in 1906. The net result is, therefore, an increase of $276,337.18 in the net earnings, which amount to $1,463,224.34.

"During the year the distribution of gross earnings has been as follows: Operating expenses, $1,646,515.27; bond interest and fixed charges, $217,199.55; payments to the city—percentage on earnings, $348,963.48; pavement charges, $80,965.65, four quarterly dividends of 1½% each, aggregating $460,241.17. From the surplus of $355,854.49 there has been transferred to contingent account $100,000.00, and the balance, $255,854.49, has been carried to profit and loss account, which now shows a credit of $1,970,653.26.

"In pursuance of the policy established some years ago, the directors have charged to contingent account during the year $143,468.90. This represents, in addition to allowance as depreciation on the properties, special renewals of track on Queen St. West, from Yonge to Spadina Ave., and replacing wooden by iron poles. During the year $518,491.79 was expended on capital account, chiefly in connection with the following: Purchase of equipment for new sub-station. Underground conduit for connecting the several sub-stations and power house. Construction of a large number of 40 ft. double truck convertible cars, and motor equipments for same. Track extensions on Avenue Rd., Gerrard St. East, Dupont and Richmond streets, Dovercourt Rd., Lansdowne Ave., Scott, Wellington and Victoria streets. The first supply of current from the Electrical Development Co. was delivered on Nov. 19, 1906, since which date the company has been receiving power continuously. All the properties have been maintained in a high state of efficiency throughout the year.

"On April 17, 1906, the shareholders authorized an increase of $1,000,000 in the capital stock, by the issue of 10,000 shares at par. These shares were offered to the shareholders and were subscribed and are now paid up. The proceeds of this issue, together with the surplus earnings, has enabled the company to undertake the capital expenditure mentioned above, and leaves sufficient cash in the treasury to enable the company to continue extensions and improvements to the system wherever necessary. During the year, the city of Toronto received from the company in percentage on earnings, pavement charges and taxes, a total of $467,365.44.

"The Toronto and York Radial Ry. system has had an exceedingly successful year, and shows gross earnings of $221,450.17 against $168,462.27 for 1905. The net earnings for the year, after providing for operating expenses and fixed charges, are $30,094.16. Of the gross earnings 10.7% represents earnings on express business on the Metropolitan Division. While the proportion to the total earnings is small, the volume of the express business shows an increase of 63% over the previous year, and every indication of a continued healthy increase. The extension of the Metropolitan Division from Newmarket to Jackson's Point has been completed and will be ready for operation in the spring. It is expected with the operation of this extension a very material increase will be made in the business. The company has 49.9 miles under operation, and, with the mileage now constructed and ready for operation, the system consists of 75.7 miles."

Grain Elevator Notes.

The export of grain from Montreal during the season of navigation of 1906, was 56,812,000 bush., an advance of 23% over the season of 1905.

The Bull and Snell Elevator Co. has been incorporated under the Northwest Territories ordinance respecting companies, with office at Yorkton, Sask.

The R. Hunt elevator at Boissevain, Man., containing 20,000 bush. of wheat, which was burned to the ground recently, is to be rebuilt. The fire salvage realized $750.

The Export Elevator Co. has passed a by-law reducing its capital from $500,000 to $389,200, and is seeking confirmation of the same under the Manitoba Companies' Act.

The Winnipeg Elevator Co.'s elevator at West Selkirk, Man., was destroyed by fire Feb. 8. It contained about 5,000 bush., and was valued at $6,000. The building and contents were fully insured.

at its annual convention, which closed at Brandon Feb. 7, passed resolutions asking that railways be compelled to allow the construction of small elevators at the same rates as larger ones, and that there should be Government elevators at Port Arthur and Fort William, Ont.

A proposition is being considered at Sydney, N.S., for the erection of a grain elevator there. It is suggested that the steamships which the Montreal Transportation Co. is having built in Great Britain to carry steel rails from Sydney to Fort William, Ont., bring return cargoes of grain for shipment to Europe through Sydney.

A suggestion has been made to the Manitoba Legislature Committee on Agriculture to the effect that a conference be called of representatives of the municipalities, elevator owners, the Grain Exchange, bankers, exporters, track buyers, and railway men to discuss the whole question of wheat handling, particularly with reference to the question of the government ownership of elevators.

The appeal of the Northern Elevator Co., Winnipeg, against the Lake Huron Milling Co., Goderich, Ont., from the decision of Justice Falconbridge, in its action to recover $16,000 balance alleged to be due on a cargo of 95,000 bush. of wheat, has been dismissed by the Ontario Court of Appeal. The sum claimed represents the difference between May and July values, and the dispute between the two parties arose over a misunderstanding of brokers' terms.

A memorial has been presented to the Dominion Premier asking that the terminal elevator question submitted to the Grain Commission be reported on at once without waiting for the general report. The Manitoba members of Parliament also brought before the Premier the question of the ownership of the terminal elevators at Port Arthur, Ont., with a view of action being taken to prevent them passing into the hands of grain buying or grain operating concerns.

An Edmonton press despatch states that the Canadian Society of Equity is being organized there with a capital of $60,000 for the purpose of endeavoring to control grain prices by erecting its own elevators, warehouses, going into the grain business, and conducting farmers' exchanges. The officers are: President, J. M. Moran, Fort Saskatchewan, Alta.; Vice-President, W. B. Ball, Salisbury, Alta.; Secretary-Treasurer, W. J. Keene, Edmonton, Alta.; other directors: A. A. Shaw, Nanton, Alta.; J. Sanford, Salisbury; A. Von Mielecki, Calgary, Alta.; R. Pearson, Claresholm, Alta., D. B. Wilson, Namao, Alta.

The Grand Trunk Pacific Terminal Elevator Co., which is a G.T. Pacific Ry. subsidiary, has employed the Barnett-McQueen Co. to prepare plans for the erection of an elevator, having a capacity of 2,000,000 bush., at Fort William. We are advised that the details in regard to the structure have not been completed. G. Murray, of the Barnett-McQueen Co., in an interview Jan. 28, said: "It will be one of the most up-to-date houses on this continent. The construction will be concrete, steel and tile, and will be entirely fireproof. It will be built so that four trains can discharge their grain in the house at the same time. I believe that it will be the fastest grain house yet erected. The elevator will be built at the mouth of Mission River, at the G.T. Pacific Ry. terminals; and reports state that it will be one of four to be built by the company.

MARINE DEPARTMENT

Shipping Federation of Canada.

At the annual meeting at Montreal, Feb. 13, there were represented the owners of 475,195 tonnage, an increase of 20,279 as compared with 1906. Following is the address of President H. A. Allan: The season of navigation of 1906 was the longest since 1900. The first ocean steamer arrived April 29, and the last left Dec. 2. The number of seagoing steamers visiting the port was 783, of a combined tonnage of 1,957,615, compared with 786 vessels in 1905 of a tonnage of 1,918,002. The shipments of grain show an increase, but those of corn and barley show a decrease from the previous year; wheat and flaxseed also show an increase. Cheese shows a very large increase, but butter fell off. There was a gain in the shipments of cattle also. The passenger business of the port showed a very large increase.

The season was not, on the whole, satisfactory to owners, though freight rates have been somewhat better. Much detention and consequent expense has been caused to steamers visiting the port on account of the congested state of the wharves, the alterations to sheds that have been dragging along for some years, and car shortages. The large increase in imports was very much handicapped by the condition of the wharves, which seriously interfered with the handling of cargo and the forwarding of through imports as well as the delivery of local goods. This, of course, added extra expense to the steamers, and will continue to do so as long as the present conditions exist. The progress that has been made towards the completion of the new sheds in our harbor has been very disappointing; little or nothing has been done during the past year. Fortunately, pressure was brought to bear on the Harbor Board to prevent 50% of the berths in the inner harbor being taken for the construction of new sheds; otherwise these berths would not have been available and the business of the port would have become paralyzed. It is hoped that with the advent of the new Harbor Board the construction of the sheds will be pressed forward with vigor and in a practical manner, so that the handling of cargo may be effected economically and with despatch, and the port of Montreal may once again be able to compete with the other ports to the south of us, and regain a portion of the traffic which has been lost to the Canadian route for many years past. It is satisfactory to note that no further action has been taken by the Harbor Commissioners in connection with the berth charges referred to in my report of last year.

The question of making Montreal a free port is one that ought to receive the early and favorable consideration of the Government. There has been introduced into the State Legislature at Albany a bill to abolish the present wharfages at the port of New York by repealing the city charter relating thereto, a sacrifice it is said of $13,000,000 a year, as against wharfages at the port of Montreal of $360,000. This action ought to be sufficient to impress upon our own Government the necessity of taking immediate action to meet the competition that may be expected.

Amongst the important parliamentary bills which have come before Parliament during the year was the Lord's Day Bill. This bill was introduced at the instigation of the Lord's Day Alliance, and was adopted as a Government measure, and had it been allowed to pass as introduced it would have prevented vessels, after landing their steerage passengers at Quebec on a Sunday, from proceeding on their journey the same day. It would also have prevented the loading of cattle and the landing of perishable cargo. Strenuous objections were taken by the federation and other transportation interests to this act, and it was considerably modified

Good progress has been made in carrying out the work of deepening and widening the ship channel between Montreal and Quebec. The following extract from the report of the Superintending Engineer of the ship channel, F. W. Cowie, explains the work that has been done and what is in contemplation: "The work in the ship channel through Montreal harbor, known as the Longueuil shoal, which the Montreal Board of Trade and Shipping Federation of Canada urged the Government to undertake, was finally completed on Aug. 9, and has already proved of great benefit to navigation. This shoal, situated at the foot of current St. Mary, will no longer be a serious menace to navigation, as the improvements give a wide, easy channel, and the leading marks are to be of a permanent and distinctive character. The completion of the 30-ft. channel through Lake St. Peter was promised for the end of Oct., 1906. It was actually completed to the old width of 300 feet on Nov. 14. Although the widening in Lake St. Peter has been completed at all the important curves, and over about one-third of the length requiring dredging, there remains yet about 12 miles of channel to be widened, and the dredge Tarte will now be able to undertake the work of the widening of the straight portions without the constant delays, as was the case when she had to stop work for every passing ship. With regard to the promise made by the Minister that the rest of the ship channel down to Batiscan would be completed during Oct., I have to state that this estimate was substantially exceeded, and in addition most of the work of widening and deepening the Batiscan Traverse was completed before the end of the season. The important work at Cap a la Roche was commenced early in the season, and an amount of about 160,000 cubic yards of shale rock has been removed. The lines of the proposed improvements at Cap a la Roche and Cap Charles have been adopted with a view to easy navigability and a minimum of interruption during construction. The Shipping Federation of Canada will be consulted at an early date with a view to a decision as to the locality of the work which should be first undertaken. With the depth of 30 ft. completed between Montreal and Batiscan, that depth is, therefore, available for the whole distance between Montreal and Quebec by waiting for high tide for the division between Batiscan and Quebec. The announcement of the completion of an available channel for navigation between Quebec and Montreal, of 30 ft. at extreme low water, cannot fail but be of very great importance to the trade of Canada. On the opening of the season of navigation of 1907, the gauge of Sorel will be changed, and an additional draft of nearly 4 ft. given. Compared with the lowest stage of water in 1906, the depth would be increased from 26 ft. 10 in. to 30 ft. 6 in. The whole of the elevator dredge fleet will next year be concentrated between Grondines and Batiscan, if possible, four to work day and night at Cap a la Roche and Cap Charles." It will be noted from this report that it is the intention of the Government to centralize the work at Cap a la Roche and Cap Charles, the two points in the river demanding the most pressing attention.

Extract from the British Admiralty Report on

SUBMARINE SIGNALING

If the light-vessels around the coast were fitted with submarine bells it would be possible for ships, fitted with receiving apparatus, to navigate in fog with almost as great certainty as in clear weather.

The saving of time and money, brought about by enabling ships to reach port instead of being delayed by fog and losing tides, etc., would be very considerable and shipwreck and loss of life would be rendered less frequent.

For information, terms, etc., apply to

SUBMARINE SIGNAL CO.

88 BROAD STREET

BOSTON, MASS.

The large expenditure by the Government in improvements in aids to navigation has been justified by resulting in the reduction of the insurance rates for the seven years from 1900 (the year the shipping enquiry was held), to 1906, inclusively of 39% on provisions and 54% on grain, thus clearly showing that the work undertaken by the Government has been beneficial to the country. Although the insurance rates on cargo carried by vessels on the Canadian route is still largely in excess of what it should be, and, as compared with rates on cargo shipped from ports in the U.S., the average for the season being 31½c., as compared with 15c. from New York, this still leaves a very considerable advantage in favor of the U.S. ports.

The trade of the St. Lawrence has grown enormously, and consequently the vessels on the route have improved in speed, size, economy and comfort. In other words, the owners have done their part to meet the trade and it now rests with those in authority to provide the facilities necessary for the proper handling of freight seeking this route. The question of accommodation has become acute, and if the port of Montreal with all its natural advantages is to be developed, it must be placed on a par with U.S. ports.

The cordial relations which have existed between the federation and the different Government departments have continued during the year, and to this I attribute largely the success of our work; and it gives me pleasure to testify to the cordial assistance and co-operation of the Minister of Marine, his deputy, and the engineer of the department. The latter's appointment as engineer of the harbor and ship channel is much appreciated by this interest, and it is pleasing to note that he will still retain his authority of the ship channel; besides, we will have the advantage of his experience in his new position in charge of the improvements in the harbor.

Following are the officers for the current year: President, H. A. Allan; Treasurer, J. R. Binning,; Secretary, T. Robb; Executive Council: D. W. Campbell, C. McLean, R. W. Reford, J. Thom, F. L. Wanklyn. At its first meeting the executive will elect a chairman, the retiring chairman being J. Thom.

The Board of Railway Commissioners has given notice that as the Revised Statutes of Canada come into force on Feb. 1, applications under the Railway Act, and citations, will have to be made having reference to Revised Statutes of Canada, chap. 37.

Port Colborne Elevator.

The building and operation of an elevator at Port Colborne, Ont., the Lake Erie outlet of the Welland Canal, was the first recommendation made to the Government by the Transportation Commission, after hearing evidence at various ports and other places in the Dominion from those interested in the Canadian grain trade. The recommendation was considered a very good one by vessel owners, and others interested. The position of Port Colborne is geographically the same as Buffalo, N.Y., viz., situated at the foot of deep water navigation. Grain can be carried from there in suitable vessels and barges by way of the Welland Canal, Lake Ontario and the St. Lawrence River to Montreal as cheaply as it can be carried from Buffalo to New York, while the rail facilities to all the various Atlantic ports of both Canada and the United States are equal to that of Buffalo. It is also well suited for winter storage for supplying Canadian millers with grain during the winter from cargoes brought down before the close of navigation. These are all very important points and render the location of the elevator at Port Colborne particularly desirable.

The plans for the elevator which the Government originally contemplated erecting, provided for a storage house having a capacity of 2,000,000 bush. This, it was considered by vessel men, was on the small size, considering the increasing size of the vessels engaged in the grain carrying trade on the Upper Lakes—there are several 9,000 ton steamers under construction for the Canadian trade at the present time—but nothing was urged against it, as it was felt that the extra accommodation required would be furnished as soon as the necessity for it was apparent. It is now announced that the elevator to be built will only have a capacity for 1,000,000 bush., a size utterly inadequate to the present requirements of the trade. Three or four of the modern large-sized vessels would fill the elevator at once and block any further business being done, particularly in the absence of a perpetual stream of barges, etc., taking it away. What is required at this, as well as at other points, is adequate provision for the handling of the cargoes of the big vessels now engaging in the trade. A 2,000,000 bush. elevator was contemplated at first, and upon the strength of the recommendation that this would be provided, vessel owners took the necessary steps to prepare themselves by the ordering of larger steamers, for securing for the Canadian route the carriage of the wheat crop of the Northwest. In the light of the complaints of crowded grain elevators on Georgian Bay, and the inadequate supply of railway cars to move the grain thence, it is surprising that the Dominion Government should neglect to provide the most complete facilities at the only point in the country giving the choice of rail or water haul to the ocean port. It is to be hoped that the representations being made to the Government to adhere to the original plan for a 2,000,000 bush. elevator will be successful.

Prince Edward Island Car Ferry.

The title of the company which merchants and others of Charlottetown, P.E.I., are endeavoring to organize for the operation of a car ferry across Northumberland Strait, is the Straits Transportation Co., and the proposition made to the Dominion Government is in return for a reasonable subsidy for 10 or 12 years, to operate a car ferry from Charlottetown to Pictou, N.S., or some other convenient point on the mainland. The company proposes to place on the route a powerful ice-breaking steamer, which will be built in Scotland and be of about the following dimensions: Length, 280 ft.; breadth, 48 ft. The steamer will have a capacity of 12 or 15 loaded 30 ton freight cars, and will have engines of 4,500 I.H.P. This will give a speed of 15 knots an hour, and will, it is claimed, enable her to go through solid ice at six or seven miles an hour, and it is also claimed that her construction will enable her to work through 10 ft. of packed ice. The cost of the steamer will be about $300,000, and it is proposed, in return for the subsidy, to make a daily trip between Dec. and May. The difference in gauge between the I.C.R. and P.E.I.R. will be overcome by placing the two cars together on suitable tracks at Charlottetown, and transferring the freight, which can be done at small cost and without injury to the most perishable products. It is suggested that this proposition will give the agriculturists of Prince Edward Island all the transportation facilities required, and will be the least expensive plan to adopt. A tunnel, which is advocated, is estimated to cost $10,000,000, while a car ferry to run between Cape Tormentine and Cape Traverse is estimated at $2,000,000, including the cost of changing the P.E.I. Ry. to standard gauge.

Atlantic and Pacific Ocean Marine.

D. W. Campbell, Manager of the Elder-Dempster Co.'s steamships at Montreal, sailed Feb. 15 from New York for Liverpool.

The Quebec Transport Co. is completing arrangements for the trans-Atlantic freight trade from Quebec for the coming season of navigation.

The C.P.R. steamships Empress of India, Empress of Japan and Empress of China, are to be equipped with the Marconi wireless telegraph apparatus.

The C.P.R. steamship Empress of Ireland has been in drydock at Liverpool, Eng., to have some repairs made and some overhauling done. Her runs were taken by the Allan Line S.S. Tunisian.

The C.P.R. S.S. Empress of Britain, which reached Halifax, N.S., Jan. 31, made the run from Liverpool, Eng., in 5 days, 18 hours and 31 minutes, the average rate of speed being 18.2 knots an hour.

The London, Eng., Court of Admiralty has found that the S.S. Warnow was alone to blame for damages to the Allan Line S.S. Hibernian, arising out of a collision in the English channel, July 21, 1906.

The Dominion Government has promised to continue the subsidy to the Dominion Line for carrying a mail to Great Britain, to be made up in Montreal on Saturdays, during the 1907 season of navigation.

The C.P.R is credited in Victoria, B.C., with the intention of developing a new port on the Alberni canal, on the west coast of Vancouver Island, and making it a port of call for its Pacific ocean steamship service.

Despatches from Mexico state that all arrangements have been completed for the inauguration of the new steamship service with Victoria and Vancouver, B.C. The first steamer is expected to be on the route early in March.

Capt. G. S. Dale, master in succession of the Quebec, Texas, Dominion and Brooklyn, belonging to the Mississippi and Dominion Steamship Co., and latterly outside manager of the Bush Terminal Docks, Brooklyn, N.Y., died there Jan. 21.

The C.P.R. has secured from the Mersey Docks and Harbor Board the use of the north side of Sandon dock, Liverpool, for its steamers. The company is given permission to build cold storage accommodation for butter, cheese and other perishable food products.

Section 451 of the Merchant Shipping Act of 1894 was repealed by sec. 10 of the Merchant Shipping Act, passed by the Imperial Parliament in 1906, which came into force Dec. 21 last. This section deals with the loading of timber. At the last session of the Dominion Parliament, an act was passed bringing the Canadian Act in line with the British Act.

The Newfoundland Government has closed a contract with a British firm of steamship owners for the maintenance of a 22 knot steamship service between St. John's, Nfld, and a port on the Irish coast. The subsidy payment is to be at the rate of $75,000 a year. An act confirming the contract is being considered at the current session of the colonial Legislature.

The Postmaster-General stated in the House of Commons recently that the Government was going to have in the summer a new steamer as a tender for the landing of passengers and mails at Rimouski, Que. The present condition of the port was a national disgrace, the accommodation was poor and did not compare with that provided at a second or third rate port in Europe.

It is reported from Liverpool, Eng., that the Allan Line intends to resume calling at Moville (Londonderry), Ireland, with its fast steamers. This call was cut out some months ago so as to enable the mail steamers to sail direct from Liverpool to Canada, with a view of saving time. The slower steamers of the Allan Line continued to call at Moville, but the C.P.R. slower steamers made a call off Belfast, Ireland.

The Imperial Privy Council has heard arguments in the case arising out of the collision between the Allan Line S.S. Parisian and the Hamburg-American Line S.S. Albano, at the entrance to Halifax harbor, by which the former sustained such damage that she sank after reaching her wharf. The sealed award of the arbitrators who assessed damages is on file in the Admiralty Court at Halifax, N.S., awaiting the decision of the Council.

The new steamship for the Dominion Line, for which an order has been placed with Harland and Wolff, Belfast, Ireland, will have a length of 550 ft., and a breadth of 67 ft., and will be of 14,000 tons gross and 9,000 tons register. The average sea speed is to be 16 knots an hour. The passenger accommodation will be fitted up in the most modern style, and there will be ample promenade space for all classes of passengers. The new steamer will be named the Alberta.

A resolution was submitted to the House of Commons recently requiring that in contracts with trans-Atlantic steamship companies receiving subsidies provision shall be made for cold storage and cold air chambers; that if the temperatures are not such as is called for, the subsidy shall be forfeited either in whole or in part; that clearance papers shall be refused if the steamers are not equipped with efficient mechanical ventilating apparatus for each chamber; and that facilities for inspection by Government officers be granted.

There was a general discussion on the trans-Atlantic mail service in the Senate recently, when Senator Power asked for the production of correspondence. He pointed out the advantages of Halifax, N.S., claiming that it required 15 hours less steaming than was required to reach St. John, N.B., where there might be a further delay of five hours if the mail steamers reached the port at low tide. Senator Ellis, a St. John man, was willing to have a full comparison made between the two ports, and did not fear the result. Senator Macdonald put forward the claims of Georgetown, P.E.I., with a car ferry connection with the mainland, and Senator Poirier claimed Louisburg to be the best winter port on the Atlantic Ocean. Senator Casgrain advocated an all the year round service to Halifax with 25 knot steamships.

Reports from London, Eng., show that the promoters of the Blaksod Bay-Halifax route are proceeding with their application to the Imperial Parliament, for the necessary powers to construct railways, etc., in Great Britain and Ireland. A number of the Nationalist members of Parliament have promised the proposals their support. The promoters of the tunnel between the Irish coast near Lorne, and the Scottish coast near Strauraer, have revived the project, and are asking Government aid towards the estimated cost of construction of £10,000,000. So far as Canada is concerned the plans for the projected new line have been laid before the Government, and consideration has been promised. Sir H. Montagu Allan expressed an opinion that the proposal would involve too many transfers, five instead of three, between London and Montreal. Halifax, to his mind, was the winter port and Quebec the summer port, but he would cut out the stop at Rimouski, owing to the delay caused. A call might be made at Sydney, N.S., with the mails if there was a fast train in waiting, and clear road, but he thought that passengers, as a general rule, would prefer going right on to Quebec.

Maritime Provinces and Newfoundland.

M. Donnellan has been appointed wharfinger of the Government wharf at Ogilvie Pier, N.S.

Surveys are being made at North Sydney, N.S., for the erection of a lighthouse on the north bar.

Capt. D. McKinnon, of the Dominion Government str. Brant, died at Summerside, P.E.I., Feb. 1.

Capt. A. Jackman, who died at St. Johns, Nfld., Feb. 1, was commander of the Peary Polar expedition in 1886.

The Frontier Steamboat Co. is negotiating for a steam lighter 157 ft. in length, for use on the St. John River.

The coasting str. Harlaw is receiving a thorough overhaul, and having a new deck put in at Dartmouth, N.S.

Capt. Pratt, of the Dominion Government str. Curlew, who has been under suspension for a year, has resigned.

Capt. Knowlton, of the Dominion cruiser Canada, has been appointed Capt.-Superintendent of the dockyard, Halifax, N.S.

The Lunenburg barquentine Ich Dien, 197 tons, has been sold to Crosbie & Co., St. Johns, Nfld., for the Brazilian trade.

The machine shop at the Halifax, N.S., dry dock was destroyed by fire Jan. 30, the damage being estimated at under $2,000.

The barque Erin's Isle, built at St. John, N.B., 1877, and capable of carrying 2,735 tons of coal, has been sold to Norwegian owners.

The str. Garibaldi has been repaired at Halifax, N.S., at a cost of about $20,000. She recently went ashore at St. Pierre, Miquelon.

E. Huntley has been appointed Harbormaster for Ingram River, N.S., and G. McLeod has been appointed to a similar position at Murray Harbor, P.E.I.

The Nova Scotia schooner Percy C., 287 tons register, has been bought by Capt. Hawkes and J. W. McAlary, St. John, N.B., the price paid being, it is stated, $18,000.

The Miramichi Lumber Co. has deposited plans with the Department of Public Works, Ottawa, showing the extension which it proposes to construct at its wharf at Chatham, N.B.

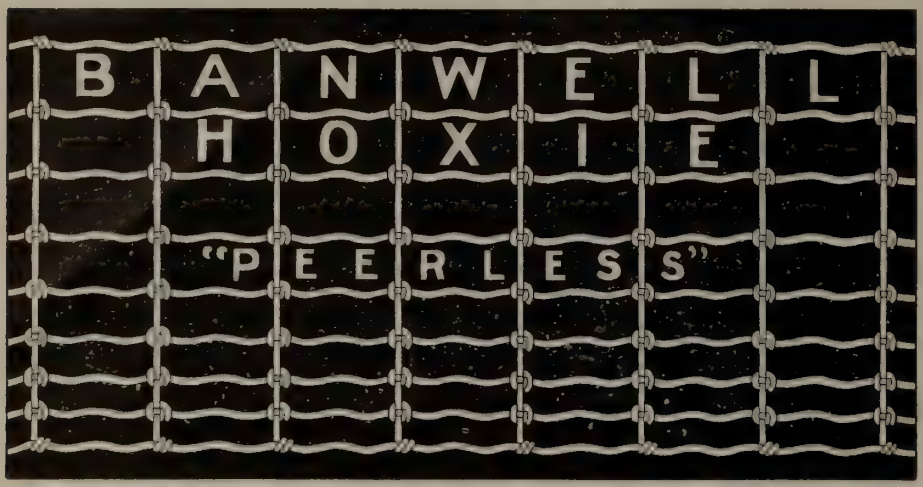
The str. Amelia running between Halifax and Canso, N.S., lost her propeller through collision with ice off Glasgow Head, Feb. 9, and was taken into Arichat, N.S. Her place on the route was taken by the Atlantic.

The winter steamers trading to Prince Edward Island are running from Georgetown, P.E.I., to Pictou, N.S., and return, one boat leaving each place every morning. This is found, we are informed, to be the most reliable service for the winter.

The Maritime-Newfoundland Wrecking Co., St. Johns, Nfld., has made an application to the Dominion Government for a subsidy in connection with its maintenance of a wrecking plant. Capt. A. Manley was recently at Ottawa in connection with the negotiations.

Residences at the Halifax dockyard have been allotted to various officers of the Dominion Department of Marine, including the resident engineer, agent, Superintendent of Lights, Inspector of Hulls, storekeeper, and commander of the str. Lady Laurier. There are four or five other residences which have not yet been allotted.

The St. John, N.B., City Council has accepted the tender of Clark and Adams for the construction of a new deep water berth on the west side, at a cost of $149,000. This berth will be an extension of one now under construction, and will be



PEERLESS WOVEN WIRE FENCING

Made from uniformly heavy hard steel wire, well galvanized.
Made in large rolls ready to stretch up.
Requires but few posts; costs very little to erect.
Conforms perfectly to any surface, no matter how rough.
Reduces the cost of fence maintenance to a minimum.

Underwood

Ten years ago the Underwood introduced visible writing. It was termed by other typewriter manufacturers a fad. Since that time 15 new makes of typewriters have appeared. 13 of them have imitated as closely as possible the Underwood, and have thought recognition of the score of visible writing.

The Underwood is not an experimental imitation. It has proved its worth to over 200,000 satisfied users. 90% of the typewriters sold in Canada are Underwoods.

HALIFAX, - N.S.

600 ft. long, completed on the south side, and faced for 200 ft. on the north side.

The Reid Newfoundland Co. has placed an order with shipbuilders in Scotland for two steamships for the Port-Aux-Basques-North Sydney route. The steamers are to be of the Bruce type, and will be launched in the fall. It is the intention to provide a daily service between Canada and Newfoundland, transferring the Bruce to another route.

The Washademoak Steamship Co. has been incorporated under the New Brunswick Companies' Acts, with a capital of $8,000 and offices at Cody's, N.B., for the purpose of operating the str. Aberdeen, or any other steamers, and the carrying on of a general navigation business. The provisional directors are: J. E. Hetherington, S. G. Perry, Cody's, N.B.; G. H. Perry, A. H. Stevens, J. E. Porter, St. John, N.B.

The Dominion Coal Co.'s chartered str. Mystic towed the Norwegian str. Nanna to Halifax, Feb. 5, with her tail shaft broken. The towing service was rendered in a storm, and in a dangerous position, the Mystic getting on a ledge and damaging a number of her plates. The Nanna was finally towed into harbor by tug, and the Mystic came in under her own steam. The Nanna has been libelled for $60,000 by the Mystic.

The Gloucester Navigation Co. is the title of a company for which an act of incorporation is being asked at the current session of the New Brunswick Legislature. The proposed capital is $25,000, and the object of the company is to maintain a line of freight and passenger steamers or other vessels from a point along Chaleur Bay, in Caraquet, Gloucester county, to Lower Caraquet, Shippigan, Petite Lemeque, Petit Shippegan, Miscou and other points along Chaleur Bay, and to the Intercolonial Ry. at Petit Rocher, N.B., with all the necessary powers. N. A. Landry is solicitor for the applicants.

Province of Quebec Marine.

A. N. Roy has been appointed Dominion wharfinger, Peel Head Bay, Que.

The Richelieu and Ontario Navigation Co. has declared a quarterly dividend of 1¼%, payable Mar. 1, to shareholders of record, Feb. 23.

The Acting Minister of Public Works stated in the House of Commons, Feb. 6, that the Government had under consideration the construction of a dry dock at Montreal.

The Dominion Government str. Montcalm was engaged for several days endeavoring to break up the ice bridge at Cape Rouge, Que., prior to her leaving for the trip with passengers, mails and freight to Seven Islands Bay.

The action brought by the owners of the str. Gaspesian against the Montreal Elevator Co., for damages caused by a collision with a floating elevator at Montreal, was opened at Quebec, by Chief Justice Routhier, in the Exchequer Court, Feb. 1, and adjourned to Montreal, Feb. 20, when further evidence was taken.

Speaking at the annual meeting of the Montreal Board of Trade, the retiring President, F. H. Mathewson, said the foreign trade of the port for 1906 amounted to $546,929,038, an increase of $80,616,612 over that of the previous year. Montreal, he said, handled 32% of the exports and 28% of the imports of the country, while the duty collected was 28% of the gross customs revenues of Canada.

Following are the officers and directors of the newly organized North Shore Transportation and Wrecking Co.: President, T. Gagnon, Quebec; First Vice-President, D. Hatton, Montreal; Second Vice-President, P. Galibert, Montreal; other directors: A. H. Dandurand, T. Gauthier, O. Hebert, Montreal; A. Fafard, Pointe aux Esquimaux, Que.; Secretary-Treasurer, Jos. Cote, Quebec; General Superintendent, J. B. D. Legare, Quebec.

The Dominion Government has expended upon the deepening of the channel of the St. Lawrence between Montreal and Quebec, and other improvements on the St. Lawrence River between these cities, the following sums: Dredging, including supervision of the channel, $5,929,970; plant, shops, services, etc., $3,031,860; total, $8,961,830. These figures were given by the Minister of Marine in reply to a question in the House of Commons.

The Montreal Transportation Co. has been granted a supplementary charter under the Dominion Companies' Acts, increasing its capital from $500,000 to $1,000,000. The company is having two steamships built by A. McMillan & Son, Dumbarton, Scotland. They will be full canal size, about 250 ft. long, about 43 ft. beam and 24 ft. moulded depth. One is expected to be ready by April 2 and the other by May 2. The vessels will be utilized to carry steel rails from Sydney, N.S., to Fort William, Ont., and will have return cargoes of grain.

The Dominion str. Montcalm started on her first winter trip along the north shore, from Quebec, Feb. 12. Stops were made at Escoumaius, English Bay, Godbout River, Pointe des Montes and Seven Islands. There were a number of passengers, but only a limited quantity of freight was accepted. Small packages were to be taken from and to any of the stopping places, and mails will be carried. The Department gives no guarantee that the steamer will call at the various points named, but every endeavor will be made to reach these places. The steamer had to return to Quebec the same day owing to fog and a snow storm, but was under orders to leave as soon as the weather conditions favored. There were 60 passengers on board for the trip. The steamer went out on the trip two days later.

The Montreal Harbor Commission has issued a statement regarding the position of Chief Engineer, in which the resignation of J. Kennedy is announced on account of failing eyesight. The Commissioners "desire to place on record their appreciation of his long life of devoted service, his faithful and zealous performance of difficult duties from 1875 to the present day. And now, upon the occasion of his honorable retirement from active duty after 32 years of public service, they unanimously resolve to appoint him Consulting Engineer to the Board." It is also announced that F. W. Cowie, Superintending Engineer of the St. Lawrence ship channel for the Dominion Government, has been appointed Chief Engineer until the opening of navigation, when the question of a permanent appointment would be considered.

The Department of Trade and Commerce in its report for the year ended June 30, 1906, sets out that 29,816 seagoing vessels, having a registered tonnage of 16,843,429, entered and cleared from Canadian ports. Of these there were 12,201 Canadian vessels, of 2,304,942 tons; 5,104 British vessels of 9,049,453 tons, and 10,351 U.S. vessels of 3,076,529 tons. There was an increase of 2,049 vessels as compared with 1905. During the last season of navigation 56 Canadian and 40 U.S. vessels were engaged in the grain carrying trade from Fort William and Port Arthur. The greatly increased capacity of the U.S. vessels over the Canadian is shown by the fact that 48 U.S. vessels carried 9,336,000 bush. as against 4,757,000 bush. by the 56 Canadian vessels. One U.S. vessel, the William P. Snyder, loaded 380,262 bush. of wheat, the largest cargo of grain ever carried on Lake Superior. The transportation rate to Georgian Bay ports was 3c., and to Buffalo 3½c. a bush.

Ontario and the Great Lakes.

H. Lacasse has been appointed wharfinger of the Government wharf at Wendover, Ont.

The Merchants Montreal Line has joined the Eastern Canadian Passenger Association.

Hon. Clifford Sifton has purchased a new 100 ft. yacht for cruising on the St. Lawrence.

The Department of Public Works is considering tenders for the construction of a pier head at Burlington channel, Ont.

Jos. Robertson, foreman of the Ottawa Transportation Co.'s shipbuilding yards, Ottawa, died there suddenly, Jan. 27, aged 64.

The recent high water in Niagara River swept away the docks and buildings used by the Maid of the Mist at Niagara Falls. No damage was done to the steamer.

The Department of Marine has under consideration tenders for the removal of the tug Castle, now lying sunk at the head of Belle Isle, in Detroit River, Ont.

The Midland Coal Dock Co. has filed with the Minister of Public Works, Ottawa, a plan of a proposed extension of its docks at Midland, Ont., for which approval is being asked.

It is understood that Swan and Hunter, and Wigham-Richardson, Newcastle-on-Tyne, England, the builders, have made a bid to the underwriters for the abandoned str. Winona.

We are advised that the press report that the Northern Navigation Co. has purchased two large package freighters for the forthcoming season's trade "is not true, and is pure imagination."

Capt. Willoughby and R. Baxter, Sandwich, Ont., have purchased the wooden steamer Iron Age from J. Corrigan, of Cleveland, Ohio, and will run her in the coal trade between Sandwich, Ont., and Erie, Ohio.

The Muskoka Lakes Navigation and Hotel Co. will operate a steamboat service during the coming season of navigation in connection with the Canadian Northern Ontario Ry. at Bala, Foote's Bay, and Lake Joseph.

The investigation into the conduct of the officer in charge of the Canadian canal at Sault Ste. Marie, Ont., was practically concluded Feb 12. A good deal of contradictory evidence was taken which will be considered by the Government.

A deputation from Southampton, Ont., asked the Dominion Government, Feb. 2, to provide additional improvements at the harbor there, including a life-saving station, and a gas buoy to mark the reef at the entrance to the harbor.

Capt. G. C. Coles, examiner of masters and mates, Collingwood, Ont., has been conducting a class for instruction in seamanship at that port during the winter. The class has been largely attended, and the lectures have been much appreciated.

The Winnipeg Board of Trade has passed a resolution endorsing the proposal to enlarge the Welland Canal, but made a reservation with respect to the proposal to construct a waterway from Georgian Bay to Montreal by the Ottawa River valley.

The Port Credit Brick Co. has deposited plans with the Minister of Public Works, showing a dock which it proposes to erect on the water lot in front of lots 9 and 10, concession 3, Toronto tp., Peel county, Ont. The consent of the Government is being asked for the proposed work.

The Hamilton Board of Trade on Feb. 4, 1857, passed a resolution that a survey be made at the expense of the Board, with a view of deciding the practicability of constructing a ship canal from the head of Lake Ontario to the waters of Lake Huron. Such a canal is still in the future.

Montreal, P.Q.

A deputation representing the Muskoka Lakes Navigation and Hotel Co. waited on the Ontario Department of Public Works recently, to urge the necessity of making improvements in the navigable waters of the Muskoka Lakes region, and the need of additional wharfage accommodation.

J. U. Vincent, of Ottawa, and others associated with him in the development of St. Joseph, on Lake Huron, are applying at the current session of the Dominion Parliament for an act incorporating the St. Joseph Transportation Co., having for its object the construction of a waterway from Lake Huron to Lake Erie.

The Minister of Marine, replying to a question in the House of Commons recently, said that the Harbor Commissioners of Belleville, Ont., were required to expend any surplus revenue in harbor improvements. A revetment wall was under construction at a cost of $22,428, by Quinlan and Robertson, the plans of which had been approved by the Department.

The str. Strathmore, which was burned on Michipicoten Island, in Nov., 1906, was formerly the Gordon Campbell, which was built in 1871 by Gordon Campbell of Detroit, Mich., a native of Wellington Place, Canada, and sold to the Anchor Line in 1873. After some years of vicissitudes and idleness from 1899 she was purchased by G. Plunkett, Cobourg, Ont., and renamed Strathmore.

Following are the officers and directors of the Rockport Navigation Co. for the current year: Manager, Capt Carnegie; Secretary-Treasurer, R. Poole; directors: A. McL. Tennant, C. W. McCullough, J. A. Carnegie, E. and A. W. Mallory. At the recent annual meeting it was decided not to declare any dividend for the past year's operations, but to put the surplus into a sinking fund.

The Rainy River Navigation Co. owns and operates the steamers Kenora, Agwinde, Brandon and Maple Leaf, on the Lake of the Woods and adjacent waters. Its officers and directors for the current year are: President and Manager, G. A. Graham, Fort William, Ont.; Vice-President, W. Ross, Kenora, Ont.; other directors: J. T. Horne, Fort William; J. C. Graham, Winnipeg; A. R. Bartlett, Windsor, Ont.; Secretary-Treasurer, M. McCullough, Kenora, Ont.

The C.P.R., we are advised, has placed an order with the Fairfield Shipbuilding and Engineering Co., Glasgow, Scotland, for the construction of two freight and passengers for the Upper Lakes service. They will have the following dimensions: length, 336 ft.; width, 43 ft. 9 in.; depth, 27 ft. They will have a cargo capacity of about 2,300 tons, and accommodation for about 360 passengers. Twin screws will be provided and they will be equipped with quadruple expansion engines, balanced.

The Upper Ottawa Improvement Co. is having two alligator warping tugs built—the steel hulls in Toronto; the machinery at Simcoe, Ont., and the upper works will be put on by the U.I. Co. at Ottawa. The dimensions of the tugs are: length, 66 ft.; breadth, 14 ft.; depth, 5 ft. 8 in. The engines are larger than those usually placed in the ordinary alligator tug; the paddle-wheels have a diameter of 11 ft.; and the estimated speed is nine miles an hour. Each tug will carry a crew of seven.

The Brockville Navigation Co. had a profitable season during 1906, but the directors decided not to declare a dividend, devoting the earnings to repairs to the steamer and to the liquidation of the loan to purchase the Victoria. It was decided to raise the Victoria, and to fit her with a new compound engine. Following are the officers and directors for the current year: President, N. Cossitt; Vice-President, O. K. Fraser; Secretary and Managing Director, W. S. Buell; other directors: J. Grant, R. Bowie, J. A. Mackenzie

A company has been formed at Peterborough, Ont., with a capital of $40,000, to be known as the Otonabee Navigation Co., Ltd., for the purpose of carrying on a general navigation business on Rice Lake and adjoining waters. A small steamer now on the lake is reported to have been purchased, and a second steamer is reported to be under construction. The provisional organization consists of: President, W. H. Robertson; General Manager, Capt. W. H. White; Passenger and Traffic Manager, J. E. Henderson; Solicitor, R. F. McWilliams; Secretary-Treasurer, Miss K. Campbell.

In the course of a recent discussion in the House of Commons upon the transportation question, W. H. Bennett urged the importance of Midland as a port, and advocated its nationalization. The G.T.R. had secured a large portion of the water front at Midland, and the C.P.R. was expending considerable sums in developing Victoria Harbor, which was only a few miles distant. This showed the advantageous position of the harbor. A third railway connecting with Montreal and Quebec could be secured by the construction of an 18-mile spur to the Canadian Northern Ontario Ry.

Following are the directors of the Muskoka Lakes Navigation and Hotel Co. for the current year: J. R. Cockburn, R. A. Lucas, H. C. Maclean, J. S. Playfair, F. J. Phillips, M. S. Wilson. F. Wasley has been reappointed Manager of the navigation branch and L. M. Boomer, Manager of the hotel branch. At the annual meeting in Toronto recently, a report and financial statement were presented, but it was decided not to make them public, and not to pay any dividend. The principal dimensions of the steamboat which the company is having constructed in Toronto, for delivery not later than July 1, are: length, 120 ft.; breadth, 25 ft.; depth, 8 ft. She will be propelled by twin screws.

The Peninsula Tug and Towing Co. has been incorporated under the Dominion Companies' Acts, with a capital of $20,000, and offices at Wiarton, Ont., for the purpose of carrying on the business of the transportation of goods, wares, merchandise, timber and passengers upon land and water; to carry on the business of towing, wrecking and salvage in all its branches, in and over any of the navigable waters within, or bordering upon, the Dominion of Canada, to and from any port therein, and to and from any foreign port; and other necessary and incidental powers, and particularly to purchase the business now carried on under the firm name of the Peninsula Tug and Towing Co., and to pay for the same in fully paid-up shares. The provisional directors are: J. G. G. Simpson, F. Wood, W. Fox, D. J. and C. E. Buyers, all of Wiarton.

E. J. Walsh, engineer in charge of surveys for the Trent Valley Canal, in his report of the work done to June 30, 1906, refers to the surveys and preparation of plans for the outlets to Lake Ontario, from Rice Lake to Port Hope, Cobourg and Trenton respectively; and from Lake Couchiching to Georgian Bay, via the Severn River; and the extension from Holland Landing to Newmarket; and to the traverse and contour survey of Rice Lake. A reconnaissance survey had also been made for a proposed outlet to Georgian Bay, via the Nottawasaga River. Plans and estimates for the main outlets were in preparation. The question of the outlets was discussed in the House of Commons, Jan. 23, and the Minister of Railways promised that all reports and plans submitted and prepared in 1905 and 1906 would be brought down as soon as possible, and as soon as the Government received the final reports of the engineers, a decision as to the outlets would be arrived at.

The International Canal and Power Co. is the title of a company for which incorporation is being asked at the current session of the Dominion Parliament. It asks power to construct a canal from Thunder Bay, Lake Superior, or from Pigeon River to Lake of the Woods; from Lake of the Woods to Red River, or from Lake of the Woods to Winnipeg River, and thence by the said river to Lake Winnipeg; from the mouth of the Assiniboine River up said river to Brandon; from Lake Winnipeg to Cross Lake, so as to create a navigable waterway from Lake Superior to the mouth of the Saskatchewan River, and also to Brandon. Wide powers for the construction of wharves, docks, warehouses, elevators, hotels, tramways, telegraph and telephone lines, etc., are asked; it is also desired to have authority to develop waterpowers on the Pigeon and Arrow rivers, and to construct transmission lines for the distribution of electrical energy in the Thunder Bay and Rainy River districts. The company asks for permission to amalgamate with the Winnipeg Canal and Water Power Co., or other company with similar powers. A. E. Honeywell, Ottawa, is solicitor for the applicants.

J. H. Mathers, Halifax, N.S., who represents Canadian shipping interests on the Imperial Commission to enquire into the alleged shipping ring, represents the Lord Line of steamships, and other marine interests of Sir Thos. Dixon, of Belfast, Ireland.

A conference of the outside officers of the Department of Marine was held at Ottawa, recently, for the purpose of classifying lights in the order of their importance and the responsibility attaching to them, and the adoption of a properly graded scale of salaries.

The appointment of the Government Commission to manage the Montreal harbor, is understood to be the introduction of legislation to establish a Dominion Harbor Commission to exercise jurisdiction over all deep water harbors engaged in the ocean trade in all parts of the Dominion.

The U.S. Congress has passed an act extending the powers of its section of the International Waterways Commission, so as to enable it to deal with disputes in any boundary waters. Up to the present the Commission has only been able to discuss questions affecting the Great Lakes and connecting waters.

The London, Eng., Chronicle publishes a despatch stating that the back of H.M.S. Dominion was broken, and her engines thrown out of alignment, as the result of the grounding in Chaleur Bay, when coming into the St. Lawrence in 1906. The despatch adds that the utmost that can be done is to patch the vessel up for harbor service.

Capt. H. O. Jackson, Toronto, in giving evidence before the special committee on the Masters and Mates Bill, now before the Dominion Parliament, stated that in 1906, to his knowledge, 60 or 70 qualified masters and mates had difficulty in procuring positions, or had to remain unemployed, because of U.S. men coming in and taking the positions.

The Minister of Marine stated recently to the committee which has under consideration the bill relating to the certificates to masters and mates, that during the last 10 years, 782 certificates had been issued for masters and mates, of which 10 were issued to foreigners, four of whom belonged to the United States. On the other hand, he said, there are a thousand masters and mates serving on U.S. vessels who have their homes in Canada. The committee decided to obtain the views of the Masters and Mates Association before giving the bill further consideration.

The Department of Marine received tenders to Feb. 15, for the construction of a twin-screw composite steamer for the fisheries protection service on Lake Winnipeg.

Capt. J. K. Marshall, latterly examiner of masters and mates at Winnipeg, and master of the Dominion Government steamer Premier, on Lake Winnipeg, died at Selkirk, Man., recently. Among the vessels he commanded in Manitoba were the Red River, the Princess and the Rocket, prior to being appointed to the Premier.

Pearsons Limited has been incorporated under the Manitoba Companies' Act, with a capital of $250,000 and offices at Winnipeg, Man., for the purpose of acquiring and operating steam and other vessels, docks, wharves, warehouses, etc.; to operate stage coaches, tramways, railways, etc., and to carry on in connection therewith various other businesses. The provisional directors are: E. Brown, Portage la Prairie, Man.; A. N. McPherson, W. Pearson, G. H. Perkins, C. D. Corbould, Winnipeg.

B.C. and Pacific Coast Marine.

The B.C. tug Black Cat, owned by L. W. David, has been shipped by the str. Tottenham to Port San Marques, Mexico, for lumber towing purposes.

The tug Stranger, tender to the Government dredge King Edward, collided with an ice floe in the Fraser River off Westham Island Feb. 6, and sank.

The British Columbia Marine Ry. Co.'s foundry at Esquimalt, B.C., was destroyed by fire Feb. 2. The company has already set about reconstructing the plant on a larger scale.

The investigation into the administration of the Shipping Masters' Office at Vancouver, B.C., was closed Feb. 6. Commissioner Henderson will make a report of the evidence, etc., to the Department of Marine.

The Victoria Sealing Co.'s schooner Casco has been wrecked in Lower California. The Casco was one of the oldest vessels in the sealing fleet, and was the vessel in which R. L. Stevenson made his cruise in the Southern Pacific.

The str. Leelanaw, built at Newcastle-on-Tyne, Eng., 1886, and recently in the Alaska trade, has been purchased by Jas. Dunsmuir, by whom she had been chartered. The Leelanaw is 273 ft. long, and is of 1,378 tons register.

The Pacific Whaling Co.'s str. Orion, subsidized as a wrecking steamer by the Dominion Government, reported to the Department of Marine, Feb. 8, that the barque St. James had been rescued from a dangerous position and towed into Bonfield harbor.

The civil suits arising out of the collision between the C.P.R. str. Princess Victoria and the Chehalis, by which the latter was sunk with loss of life, were opened before Justice Martin and two assessors in the B.C. Supreme Court, Feb. 8. The various actions have been consolidated.

The White Pass and Yukon Ry. has chartered its str. La France for the season, to be run on the Forty-Mile River, not previously navigated by steamboats. It is expected that routes will be opened on the Stewart River and other tributaries of the Yukon during the year.

The proposal for the establishment of a steel shipbuilding and repairing plant in British Columbia, includes the consolidation of the B.C. Marine Ry., Esquimalt; the Vancouver Engineering Works, and the New Westminster Foundry, and the construction of a large floating drydock. The works would be located at Vancouver, and it is reported that one of the Clyde shipbuilding firms is interested.

H. Whitaker, who has been running the small str. New Era between Vancouver and Sechert, B.C., for nine years, is having a steamer built in Great Britain for the service. The new steamer will be 100 ft. long, and will have a speed of 12 miles an hour. The New Era, after being given an overhaul, will be utilized to open up a new route from Sechert.

The White Pass and Yukon Ry. has purchased lumber for the construction of a stern-wheel steamer and six barges for the coming season of navigation. The new steamer will be of light draft, for towing, and the barges will run from 106 to 130 ft in length. The company's shops at Whitehorse, Yukon, it is expected, will be opened early in March, when the work of construction will be started.

The Pacific Whaling Co., Victoria, B.C., has declared a dividend of 23% on preferred stock and 16% on common stock, as the result of its operations for 1906. It is proposed to establish new stations at Ezperanza Inlet, and Benman Island. The steam whaler St. Lawrence is now on her way from St. John, N.B., to the Pacific Coast, but Capt. Balcom of the Pacific Whaling Co. says she has not been purchased by that company.

The C.P.R. is considering a proposal to establish a new steamship route from Victoria, calling at ports between that point and Comox, Van Anda, Texada and the logging camps and settlements between Vancouver Island and the mainland as far north as Alert Bay. Capt. Troup, B. W. Greer, E. J. Coyle, and G. L. Courtney, recently returned to Victoria from a trip of inspection to a number of the points proposed to be reached on the projected new route.

A contract is reported let for the construction of the Alaska Steamship Co.'s wharf at Victoria, B.C. It is said that it will be situated on James Bay, and will have an area of 10,000 square feet.; the shed will be 61 by 76 ft., and will contain a baggage room, bonded baggage room and some warehouses. The passengers will reach the steamers by means of an elevated sidewalk from Wharf St. The ticket office and waiting rooms will be on the sidewalk, while underneath it will be a graded drive for the conveyance of freight.

A Vancouver despatch, Jan. 15, stated that Capt. Troup had received information from Liverpool, Eng., that a contract had been let there for the building of a steam freight steamer of about 1,000 tons register, for the company's Northern B.C. and Alaska trade. The same despatch also states that a contract would be placed in Great Britain for a new steamer to alternate with the Princess Victoria. This steamer would be 30 ft. longer and have 6 ft. more beam than the Princess Victoria, but in other respects would be of the same general design.

The Victoria, B.C., Board of Trade has had under consideration the question of pilotage charges at that port. The investigations of a committee which had been looking into the matter, showed that the pilots had been paid $72,500 for services rendered, and $79,200 for services not rendered. Some of the pilots were in favor of cancelling some of the charges, but would not act. As a result of these charges some vessels had stopped calling at Victoria, and there was a danger that all the Oriental liners would shortly discontinue calling at the port. A Royal Commission had made a recommendation by which some relief would be given, and the Board recently adopted a resolution asking the Minister of Marine to have the recommendation enforced.

Notices to Mariners.

The Department of Marine has issued the following notices to mariners:

No. 1. Jan. 24.—British Columbia—1. Vancouver Island, west coast, Quatsino sound, Entrance island, light established. 2. Vancouver island, west coast, Kyuquot sound, Halibut channel, Lookout Island, light established. 3. Strait of Georgia, Malaspina strait, Lund, Ragged Islands, light established. 4. Queen Charlotte Sound, new channel, Christie passage, Balaklava Island, Scarrett point, change in character of light. 5. Chatham Sound, Prince Rupert harbor (Tuck inlet), buoys established.

No. 2. Jan. 25.—New Brunswick—6. South coast, Bay of Fundy, Passamaquoddy bay, St. Andrew's bar, Navy Island, fog bell established at light station. 7. Bay of Fundy, bank reported, soundings reported inaccurate.

No. 3. Jan. 28.—New Brunswick—9. South coast, Bay of Fundy, St. John harbor, Partridge Island, gas-lighted bell boat replaced in position.

No. 4. Feb. 4.—Ontario—Rver St. Lawrence, Thousand Islands, Burnt Island. Wooden lighthouse replaced by gas-lighted beacon. U.S.A.—12.—River St. Mary, old channel lights discontinued.

The following notices have been issued by the U.S. Hydrographic Department:

No. 3. Jan. 19.—St. Mary's River—92. Old channel, lights permanently discontinued.

No. 5. Feb. 2.—Lake St. Clair—205. St. Clair Flats canal, change in buoyage.

The Toronto Navy League has passed a resolution asking the Dominion Government to make an investigation as to what is necessary to be done in order to develop the mercantile marine of Canada.

A number of British men-of-war will visit Canadian waters during 1907. They will include vessels of the First Cruiser Squadron and the Channel Fleet, and will be under the command of Rear Admiral G. Neville, C.V.O.

The items in the proposed Canadian tariff relating to shipbuilding have been allowed to stand over for further consideration. The Government had not thought it expedient to put a tax on British ships, although it might be a debatable point whether such a duty could been forced. Any vessel purchased in the United States and brought to Canada, the Minister of Finance stated, came under the control of the Department of Marine as to inspection, etc. There were other questions which were under the consideration of the Government affecting the shipbuilding interests of Canada, particularly in regard to dredges and the coasting trade, in regard to which some special legislation might be necessary.

"Sub-marine Signals" is the title of an interesting pamphlet issued by the Submarine Signal Co., of Boston, Mass. It gives details of the British Admiralty tests of submarine signalling, opinions of British ship-owners on the system, and a list of vessels equipped with the submarine bell. The following vessels owned in, or trading to Canadian ports, are equipped: C.P.R. steamships, Empress of Britain, Empress of Ireland, Lake Manitoba, Mount Temple, Montreal, Montezuma, Lake Champlain, Lake Erie, Mount Royal, Milwaukee, Montrose, Lake Michigan, Monmouth, Montfort; Dominion Line steamships, Canada and Dominion; Plant Line steamer Halifax; Thomson Line steamer Cervona; Dominion Coal Co.'s steamers, Cacouna, Cape Breton, Bona Vista, Louisburg and Coban; Canadian Government steamers, Canada, Lady Laurier, Lansdowne, Minto, Stanley.

Lake Freight Outlook.

Our Winnipeg correspondent writes as follows: "The outlook for the Canadian grain carriers for the coming season is very promising, as owing to the severe weather experienced throughout the West during this winter, very little grain has been moved from interior elevators to the lake terminals, and as the snow disappears from the grain country floods are bound to take its place, on account of the excessive amount of snow which has fallen during the winter, and of course this will prevent the railways from moving a great deal of wheat before the opening of navigation. The result of all this will be that there will not be very great stocks of wheat at the lakes at the opening; in fact, Canadian tonnage will be able to move everything in sight and there will be no demand for U.S. tonnage at the opening. After the first week or ten days of navigation, the U.S. vessels will commence on their season ore contracts, leaving the movement of the Canadian crop entirely in the hands of the Canadian boats, and as the movement from the interior will be slow it should mean a first-class grain movement over the lakes until well on to the end of July. Owing to the fears of both shippers and vessel men as to the quantity of wheat which will be in the terminals at the opening, the freight market has opened on a very moderate basis, business already having been done at 2c. to Georgian Bay ports, and 7c. to Montreal direct, which rates will probably last until the end of the first month after the opening.

"During the season there will be a number of additions to the Canadian grain fleet, as the new S.S. Midland Prince will be ready for the opening; the Montreal Transportation Co. have ordered two new canal sized vessels in the old country, to be ready for the fall movement; the Farrar Transportation Co. also will have a new 8,000 ton boat ready for the fall, and the Mackays of Hamilton have ordered a boat of the same capacity which they expect to have before the close of navigation this year."

The Trent Valley Canal.

It is semi-officially announced that the Lake Ontario outlet of the Trent Valley Canal will be at Trenton. Surveys have been made of both routes for the Department of Railways and Canals, and the result has been to indicate that Trenton, on the whole, has more in its favor as an outlet than has Port Hope. The surveys show that the difference between the two routes, so far as construction is concerned, is not very material. In this respect Port Hope has a somewhat stronger claim. The distance, compared with Trenton, is somewhat shorter. The cost of construction therefore would be, according to the engineer's report, about $40,000 less to Port Hope than to Trenton. But this does not take into account the land damages and waterpower privileges, in which respect the Trenton route is found to be better. One great factor in favor of Trenton is that barges can be taken from Midland via the Trent Valley Canal to Montreal with perfect safety, being landlocked all the way. If Port Hope had been selected as an outlet these barges would have to be towed for a considerable distance out in the open lake, a rather risky, if not impossible, experiment in severe weather.

The Golspie Disaster.

The coroner's jury which investigated the circumstances attending the death of Sydney Neale, one of the crew of the Hamilton str. Golspie, at Sault Ste. Marie, Ont., returned a verdict that death was due to frost caused by exposure, adding "This exposure was due directly to Capt. Boult, who drove the said Sydney Neale from shelter when he might have protected him; we also think that Mate McLeod thould be severely censured for not sending prompt assistance on his arrival at the mission." The preliminary report to the Government by Capt. T. Donnelly is understood to set out that the vessel was well handled, that no blame attaches to the officers or owners for the wreck, that the owners, R. O. & A. B. Mackay, of Hamilton, did all that could be expected of them under the circumstances and with the information at their command, and that there is no evidence to show that the disaster to the five sailors whose limbs were frozen after the wreck, was increased or added to in any way by delay in sending a tug or by the inability of any departmental officer to do his duty. Capt. Donnelly finds that if the five unfortunate victims of the wreck, totally unused to Canadian winter conditions in such a barren country, had obeyed the instructions of Mate McLeod and remained by their boat, or gone back three miles to the camp by the wreck, where the captain and other officers were, they would not have been frozen. There is, he says, no evidence to show that anyone was refused admission to the camp, and whatever accommodation it provided near the wreck. On arrival at the mission the mate telegraphed Messrs. Mackay brief particulars of the wreck, exactly as written by Capt. Boult. This telegram evidently led the owners of the Golspie to believe, as it stated, that twelve of the men were at Michipicoten, where they would find accommodation. The first intimation Messrs. Mackay received in Hamilton of the real facts of the case was from Capt. Boult's telegram of Dec. 8, asking that a tug be sent from Sault Ste. Marie, or that arrangements be made to get the men there.

THE BUHOUP 3-STEM PASSENGER EQUIPMENT

THE latest and most complete equipment for passenger service cars. Its advantages over the single stem coupler equipment are:

Greater strength—Three draft stems instead of one.

Greater draft spring resistance—three draft springs to each coupler instead of one.

Rotating head pivoted to three stems, with side motion in stirrup, relieving strains to platforms on curves and tangents.

Adapted to any style of wood or steel platform.

MILLER BROS. & TOMS, MONTREAL, CANADA

Richelieu and Ontario Navigation Co.

The following report for the year 1906 was presented at the annual meeting, Feb. 12: The gross earnings were $1,366,299.21, an increase of $148,925.60 over 1905, and the net profit, after providing for fixed charges, interest, etc., $261,040.19. The operating expenses, including extraordinary repairs, were 79.70% of the gross earnings. A dividend of 1¼% was paid Dec. 1, 1906, being at the rate of 5% per annum. The bond issue, originally $571,833.33 now stands at $323,146.71. During the past year the company redeemed $28,226.64 of the issue. The growth of the tourist and local traffic between Montreal, Quebec and the Saguenay makes it necessary to at once provide additional and more modern accommodation. The steamer Quebec has been lengthened, and is being completely rebuilt and remodelled for this service at the company's yards at Sorel, and when finished will be virtually a duplicate of her sister ship the Montreal. The new rapids steamer, the Rapids King, was launched at Toronto on Jan. 9, and every effort will be made to have these boats in commission for the opening of the tourist traffic the coming season. The directors also have under consideration the building of a second rapids steamer to be called the Rapids Queen, and a freight and passenger boat for the Hamilton line. An insurance fund has been created, and $36,000.00 has been set aside out of last year's earnings to the credit of this account, which will be invested in first-class securities. The steamers, hotels, shops, wharves, etc., have been thoroughly maintained. Parliament having granted the company's application for power to issue bonds, a special meeting of shareholders will be held to authorize the issue.

W. Wainwright, Vice-President, occupied the chair in the absence of the President, Hon. R. Forget, and resolutions were passed adopting the report, ratifying the various acts of the directors, and re-electing the directors for the current year. A subsequent special meeting authorized the directors to issue $2,000,000 of bonds, to bear interest not exceeding 5% was passed.

Among the Express Companies.

The Canadian Northern Ex. Co.'s waybill office at Holmfield, Man., has been closed.

The Canadian Northern Ex. Co. has issued complete local and general tariffs to all points reached by its service.

The Canadian Northern Ex. Co. has opened a route on its new branch line from Edmonton to Stony Plains, Alta.

The Great Northern Ex. Co. has placed its service on the St. John's, N.D., branch, which extends into Canada, and has opened offices at Boissevain, Minto and Hayfield, Man.

The G.T.R. is reported to have purchased the property 202 to 220 St. James St., Montreal, to be utilized as city offices for the Canadian, American and National Express companies.

The Toronto and York Radial Ry.'s report for 1906 shows that of its gross earnings 10.7% were from express business on the Metropolitan Division, an increase of 63% over 1905.

The annual drive and dinner of the staff of the Dominion Ex. Co. at Montreal, took place Feb. 9, W. A. Clark, general agent, presiding. Among the guests were V. G. R. Vickers, Superintendent of the Atlantic Division.

S. B. Buller has been appointed acting agent for the Canadian Northern Express Co. at Toronto, where the company has opened an office, in connection with the operation of its service over the Canadian Northern Ontario Ry.

The Canadian Ex. Co. has passed a by-law increasing its capital to the extent of $1,500,000, the whole of which shares have been subscribed for; but no amount had been paid in respect thereof at the time of the deposit of a copy of the by-law with the Secretary of State.

The Dominion Ex. Co. is preparing to erect a shipping and receiving warehouse on the north side of the C.P.R. tracks at Winnipeg. The new building will be situated on the east side of Main st., fronting on the tracks, almost opposite the present baggage and express room, which is to be given over entirely to baggage. The building will be two stories high, and will have 2,500 sq. ft. more storage space on the station level, so that there will be ample space for handling express packages.

Telegraph and Cable Matters.

Marconi wireless telegraph apparatus has been placed on board the Dominion Government steamer Montcalm.

The C.P.R. proposes to instal wireless telegraphic apparatus on its Pacific Ocean and Pacific coast steamers.

The Pacific Coast Steamship Co.'s steamboats trading to Vancouver, B.C., are to be equipped with wireless telegraph apparatus.

Dr. H. A. Payzant, for some years surgeon of the cable str. Mackay-Bennett, was presented with an address and a travelling case by the crew on resigning from the service recently.

F. J. Telfer, who was for some years local manager G.N.W. Telegraph Co. at Collingwood, Ont., and latterly has been engaged in Toronto, died somewhat suddenly at the latter place, Jan. 25.

Some question affecting the Pacific cable is responsible for the delay in completing the programme of subjects for the colonial conference for which arrangements are being made in London, Eng.

W. Rutherford was presented recently with a gold locket by the operators on the Western Division C.P.R. telegraphs, on being appointed local manager of Winnipeg city office, in succession to J. W. Baker.

Telegraph huts are being erected between Clo-oose and Pachena Point, at Tsuhiat and Seven Mile Creek, on the Dominion telegraph lines in B.C. Linemen to patrol the coast will be stationed at each hut.

The B.C. Government proposes to have an investigation made into the circumstances attending the placing of the stock of the Canadian Marconi Wireless Telegraph Co. in British Columbia in 1904-05.

The telegraph line to connect the Dominion lines with the Pacific Steam Whaling Co.'s station at Sechart, B.C., has been partly completed. The wire for the 700 ft. span across Effingham Inlet will be shipped at an early date.

J. W. Baker, heretofore local manager C.P.R. telegraphs, Winnipeg, has retired from the service, having been elected a member of the city Board of Control. He is succeeded by W. Rutherford, and W. J. Kane becomes divisional chief operator and circuit manager, in succession to W. Rutherford.

Principal Gordon, of Queen's University, Kingston, Ont., addressing the Empire Club, Toronto, Feb. 7, advocated the construction of an all-British cable, connecting the whole British Empire and operated by the various governments. This would necessitate the construction of a cable from Great Britain to Nova Scotia; a cable from Australia and New Zealand to India, and a third section from India to Cape Town, thence to the West Indies, with branches to Nova Scotia and Great Britain. A telegraph line from Nova Scotia across Canada to connect with the Vancouver-Australia cable would also be necessary.

The Acting-Minister of Public Works stated in the House of Commons, Jan. 25, that wireless telegraph messages were being sent from the Government steamers when in Pictou harbor, N.S., to Prince Edward Island. It was the intention of the Government to build a station on the mainland in connection with the existing station on the Island. This information was elicited in connection with the break in the Anglo-American Telegraph Co.'s cable, which, it is feared, may not be repaired until spring, owing to the presence of ice in Northumberland Straits. A temporary Marconi wireless telegraph station is being erected at Pictou, N.S., by the Dominion Government, to connect with the station at Cape Bear, P.E.I. A permanent station will probably be erected during the summer.

The North American Life Assurance Company

Held its Annual Meeting at its Home Office, in Toronto, on Tuesday, the 29th day of January, 1907. The President, Mr. John L. Blaikie, was appointed Chairman, and the Managing Director, Mr. L. Goldman, Secretary, when the following report was submitted:—

NEW BUSINESS The policies issued for the year, together with those revived, amounted to the sum of $4,364,694, being less than the new business transacted for the previous year. Owing to the conditions prevailing in the life insurance business on this continent, the Directors considered that in the interests of the policyholders the reduction in expenses was of greater importance than expansion in new business, and in this respect the Statement presented shows they have been eminently successful, by making the very large reduction of about five per cent. in one year in the ratio of expenses to premium income. This percentage of reduction has resulted in the material saving in expenses of $48,996.49, as compared with the previous year.

SAVING IN EXPENSES

CASH INCOME The cash income for the year from Premiums, Interest, etc., was $1,746,544, showing the satisfactory increase for the year of $86,480.94.

PAYMENTS TO POLICY-HOLDERS The amount paid on policyholders' account was $589,195.68, and of this amount the sum of $306,179.33 represents payments for dividends, matured endowments, etc.

ASSETS The assets increased during the year by the sum of $831,050.79, and now amount to $7,799,064.45.

ADDITION TO RESERVE After making ample provision for all liabilities, including special addition to the reserve fund, and paying a relatively large amount for dividends to policyholders during the year, there was a handsome addition made to the net surplus, which now amounts to $650,209.08, the year's work from the financial standpoint being the best in the Company's history.

NET SURPLUS INCREASED

ASSETS SAFELY INVESTED The assets of the Company have been, as heretofore, invested in the best class of securities; a detailed list of these will be published with the Annual Report for distribution.

FULL REPORT SENT TO GOVERNMENT As heretofore, the Company's books were closed on the last business day of the year, and in due course full reports with detailed list of the securities held by the Company were sent to the Government.

MONTHLY AUDIT A monthly examination of the books of the Company was made by the Auditors, and at the close of the year they made a thorough scrutiny of all the securities held by the Company. In addition to the examination of the securities by the Auditors, a Committee of the Board, consisting of two Directors, audited these securities each quarter.

Owing to Dominion Legislation providing that judges should not be Directors of corporations, the First Vice-President, Hon. Sir William R. Meredith, K.C., who had been associated with the Company for many years, much to its advantage, felt compelled to resign his position on the Board of the Company, and the Directors accepted the same with great reluctance.

It will be the duty of this Meeting to elect a Director to fill the vacancy thus created.

The Insurance Legislation enacted in New York State, which went into effect January 1st, 1907, had the effect of our Managers and Agents there declining to accept the statutory terms of remuneration, and it was therefore found necessary to cease writing new business in the State. Provision has been made at the Syracuse office to look after the interests of Policyholders in that State, while the large deposit will remain there for the security of Policyholders in the United States.

The care and attention manifested in their duties by the Company's Officers, Provincial Managers, Inspectors, District Agents, and all other Agents, are deserving of the highest commendation.

L. GOLDMAN, Managing Director.

J. L. BLAIKIE, President.

The Annual Report, showing marked proofs of the solid position of the Company, and containing a list of the securities held, and also those upon which the Company has made collateral loans, will be sent in due course to each policyholder.

617 Main Street, WINNIPEG

General Telephone Matters.

The Bell Telephone Co. is considering plans for carrying its long distance lines into Edmonton, Alta.

The Canadian Independent Telephone Co. is applying to the Chatham, Ont., City Council for a franchise.

The New Brunswick Telephone Co. has elected Dr. Stockton as President, succeeding the late Hon. A. G. Blair.

The New Brunswick Telephone Co. proposes to move its offices in Woodstock, N.B., into its own building on Queen St., May 1.

The Bell Telephone Co.'s agency at Arnprior, Ont., was burned out Jan. 24, and caused a day's interruption of the service.

The farmers in the vicinity of Neepawa, Man., are organizing for the purpose of constructing a telephone line to Springhill, Man.

The Falkirk Telephone Co. has been granted permission by the municipality of London tp., Ont., to erect telephone posts on the township roads.

The Bell Telephone Co. is replacing its underground cables on a number of streets in Ottawa with larger ones, to meet the demands of increasing business.

The telephone operators in Montreal, where there are two companies carrying on business, to the number of about 700, have joined the Electrical Workers' Union.

The St. Catherine and St. Bazile Telephone Co. has opened a public pay station at St. Bazile Station, Que. At St. Bazile, connection is made with the Bell Telephone Co.'s system.

A company, of which J. H. Kelly is President, is constructing a telephone line between Metapedia and Gaspe Basin, Que., 180 miles, and expects to have it in operation early in the summer.

W. E. Smith, Treasurer of the New Brunswick Telephone Co., Fredericton, N.B., was suspended Jan. 28, it being alleged that an examination of his books showed shortage of about $25,000.

The Bell Telephone Co.'s gross receipts in Toronto for 1906, were $791,682, and in Ottawa, $148,114.78. These figures have been reported by the company under the terms of the law as to the taxation of companies.

A bill has been presented in the Ontario Legislature, seeking to have it declared that no "female person" shall be permitted to work at telephone exchanges in places of over 5,000 inhabitants for more than five hours a day.

The Bell Telephone Co.'s switchboard at its London, Ont., exchange was burned out, Jan. 24, owing to a line which was under repair falling across one of the London St. Ry. Co.'s power wires. The damage was estimated at over $10,000.

The Ontario Legislature has been asked by the Toronto City Council to submit to a general vote the question of the Government constructing and operating trunk telephone lines, the municipalities to have the right to operate the local telephones.

The annual report of the Melita-Arthur Telephone Co., for 1906, shows a profit of 30% on the capital invested, which it was decided to utilize in the payment of a 20% dividend to shareholders, and the appropriation of 15% to a rest account.

The Winnipeg City Council has asked the Manitoba Government to allow it a year, from April 1, to decide whether it will construct a municipal telephone system. The Government desired municipalities to decide this question by April 1 of the current year.

THE RAILWAY MATERIALS COMPANY

OLD COLONY BUILDING, CHICAGO 141 BROADWAY, NEW YORK

Fort Saskatchewan, Alta., asked the Edmonton City Council to reduce its telephone rate from $24 to $15 for business places, and $10 for houses, and the Mayor of Edmonton ordered the service to be discontinued. The Fort Saskatchewan Town Council is getting estimates as to the cost of a municipal service.

The building for the College exchange of the Bell Telephone Co., in Toronto, is expected to be opened at an early date. The new building is situated at the corner of Bellevue Avenue and Oxford St., with a frontage of 55 ft. and 120 ft. respectively, and is of brick, three stories and basement. The lines are brought into the building by underground cables.

The Ahmic Telephone Co. has been incorporated under the Ontario Companies' Act, with a capital of $25,000 and offices at Ahmic Harbor, Ont., for the purpose of carrying on a telephone business in the district of Parry Sound. The provisional directors are: W. Robertson, Dunchurch, Ont.; E. C. Bennett, S. G. Ritter, W. J. Snaith, J. Brown, Ahmic Harbor, Ont.; R. J. Watson, D. R. McLean, Burk's Falls, Ont.

The Calgary, Alta., Board of Trade has been informed that the Bell Telephone Co.'s lines are nearing Macleod; that it proposes to construct lines to Lethbridge, Alta., and to Cranbrook, where connection will be made with other points in British Columbia. The line from Winnipeg was expected to be strung to Medicine Hat, Sask., at an early date, and from thence it would be at once taken on to Calgary.

The Union of Alberta Municipalities at its recent convention at Red Deer discussed the telephone situation and reaffirmed the resolution passed in 1905, that the Government should own the long distance lines. and the municipalities the local systems; while the Alberta Farmers' Association, at its convention at Calgary, expressed itself by resolution in favor of the appointment of an independent commision for the management and control of telephone lines.

Papers are being prepared in connection with the incorporation of a new telephone company in New Brunswick, which will construct and operate long distance toll lines, and will promote the establishment of local exchanges under municipal control. The proposed capital is $500,000 and about $150,000 is reported to have already been subscribed. A. T. Pearson, heretofore General Manager of the Central Telephone Co., is actively promoting the new company.

W. L. M. King, Deputy Minister of Labor, Ottawa, and County Judge J. Winchester, Toronto, were appointed Commissioners by the Dominion Government to investigate and report in the matter of the dispute between the employes of the Bell Telephone Co. of Canada at Toronto and the company. The Commissioners sat for the hearing of evidence at Toronto for a number of days, and took evidence not only as to the recent strike of the operators, but also in regard to a number of other matters affecting the company's operation. A report will be presented to the Government.

The Bell Telephone Co. assented to a proposition of the Winnipeg City Council that it should be assessed at $200,000, and a clause to this effect was put in the act amending the city charter now before the Manitoba Legislature. The clause in the bill has been altered to read $500,000 and to this the company objects. The city electrician values the company's plant at $915,200, and a member of the house said the company's estimate of $130 per telephone as the cost of installation would bring up a valuation of about $900,000. It was stated that the company paid $7,000 yearly in taxes to the city and the Government, about 15% of its net revenue, which would be doubled if the proposal were approved. It was computed that about 20,000 calls a day were made in Winnipeg by the general public from whom the company did not receive a cent of revenue.

Canadian Pacific Railway Company.

Dividends for the half-year ended 31st December, 1906, have been declared as follows:

On the Preference Stock, Two per cent.

On the Common Stock, Three per cent.

A further sum equal to one-half of one per cent. on the Common Stock will be paid thereon at the same time out of interest on the proceeds of land sales.

Warrants for the common stock dividend will be mailed on or about April 2nd next to Shareholders of record at the closing of the books in Montreal, New York and London, respectively.

The Preference Stock Dividend will be paid on Tuesday, April 2nd next, to Shareholders of record at the closing of the books at the Company's London Office, No. 62 Charing Cross, London, S.W. The Common Stock Transfer Books will close in Montreal, New York and London at three p.m. on Friday, March 1st.

The Preference Stock Books will also close at three p.m. on Friday, March 1st.

All books will be reopened on Wednesday, April 3rd next.

By Order of the Board.

CHARLES DRINKWATER,
Secretary.

Montreal, 11th February, 1907.

Canadian Northern Ontario Railway.

NOTICE is hereby given that application will be made to the Parliament of Canada at the next session thereof for an act amending the acts relating to the Canadian Northern Ontario Railway Company (formerly the James Bay Railway Company), as follows:—

Authorizing the construction of the following line of railway—

(j) From Parry Sound northeasterly to North Bay.

GERARD RUEL,
Assistant Solicitor

Toronto, Feb. 14th, 1907.

The Question of Passenger Rates.

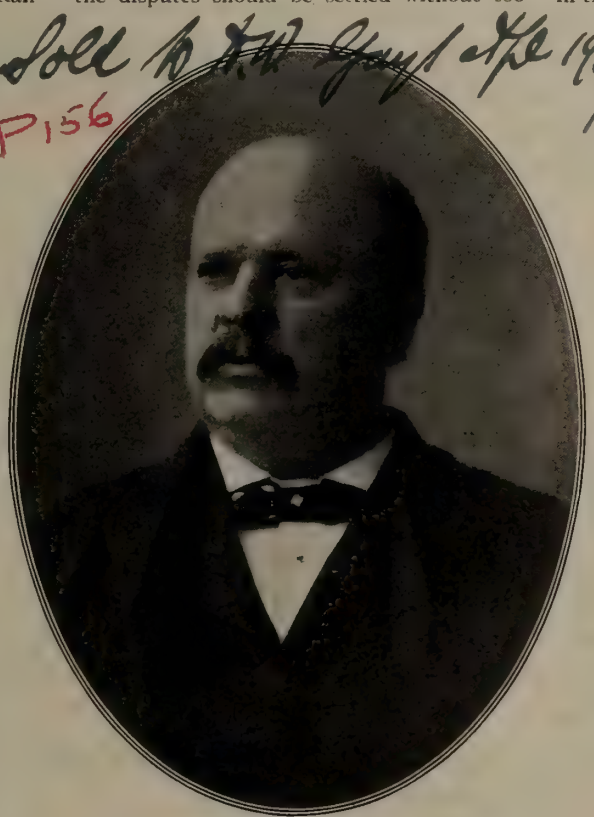
When in the House of Commons recently, R. L. Borden submitted a resolution to the effect that it is expedient that the Board of Railway Commissioners enquire and report whether or not the tolls charged in standard passenger tariffs should be reduced so as not to exceed 2 cents a mile; and that the Government take such steps as are necessary to have the enquiry made, the Minister of Railways said the problem was one presenting many difficulties. The question is: Are the Railway Commissioners attending to their duties with regard to the question of passenger tariff rates? This Parliament delegated to them the power and authority to regulate the passenger tariff rates throughout Canada. That power was given to them in 1903. Have they endeavored to carry out the mandate that was given to them? The following letter had been addressed by A. C. Killam, Chief Commissioner, to the Premier on the subject:

"I have perused the official report of the recent debate in Parliament upon Mr. Maclean's Bill for the amendment of the Railway Act, and desired to lay before you some considerations on the subject.

"The extension of the Board's jurisdiction to sleeping cars, as well as the former extension to the express companies, seems natural. The addition of the telephone and telegraph systems does not follow so naturally, but this is a matter of policy, upon which I desire to make but one observation. The Board should not be asked to perform this additional work, and, at the same time, to exercise more expeditiously than before the jurisdiction which it was originally created to exercise. I have noted that some of the speakers appeared to think that the Board has been, in some respects, dilatory, but that this has usually been ascribed to the pressure of business.

"The Board's work is continually increasing at a rapid rate. Many circumstances prevented our attending to it with the expedition that could be desired. The recent additions to our staff have enabled us to put the record department in order. We are promised an early addition to our office space. We hope with these changes and some further increases of the staff, which will soon be required, to have the ordinary work of the Board so systematized that it will be carried on without the delays and oversights that, unfortunately, have sometimes occurred heretofore. We have proceeded upon the policy that it was important to determine, as soon as reasonably possible, the different applications and complaints made to us.

"I notice that the criticism has been passed that considerable attention has been devoted to disputes between railway companies, rather than to matters affecting the public interest. These disputes, however, generally relate to matters which are necessary to be determined in order to facilitate the construction of new lines or to matters which affect the safety of the public, and in both these classes of cases, it is important in the public interest, that the disputes should be settled without too much delay. The Board has also initiated proceedings for the consideration of several subjects of an important nature upon which it expects in the near future to make such orders or regulations as may seem to be within its powers, and to be needed in the public interest; and it may be obliged to ask for the interference of Parliament either by direct legislation or by adding to the powers of the Board. We have also asked the Minister of Justice to give us legal assistance for the purpose of investigating the positions of the telephone companies and express companies over which we have been given jurisdiction, in order to enable us, with as little delay as possible, to determine how far we should approve the tariffs which those companies submit to us.



H. W. GAYS,
General Manager Ottawa and New York Ry.

"The scheme of the Railway Act, 1903, in regard to railway tariffs was that the railway companies should submit to the Board for approval their maximum mileage rates for both freight and passenger traffic, and that they might then make special tariffs providing for tolls no greater than those embodied in the authorized maximum tariffs. In order to put affairs in working order under the Act, it became necessary for the Board to approve without the delay which would be required for serious inquiry, the maximum tariffs submitted by the companies, which were generally, I believe, based upon the rates previously authorized. It has always been my idea, since I joined the Board and became conversant with the systems and the circumstances, that as soon as possible the Board should make full inquiry for the purpose of enabling it to judge whether the maximum rates thus arrived at are too high. The subject is a very difficult one. No principle has yet been established for the determination of such a question. In parts of the U.S. it has been attempted to be solved by a valuation of the railway property based upon an estimate of the cost of reproduction, and an estimate of the reasonable return to be allowed, over and above the cost of operation and maintenance and other necessary expenses. The Board of Railway Commissioners for Kentucky have recently established a set of rates for traffic within the state upon that basis. In the state of Washington they are now having a valuation made of the railway property for a similar purpose, and an eminent engineer has been employed on high salary to do the work. A similar valuation of railway property in Canada would be an enormous task. It is one which, up to the present time, the Board's staff has not been able to undertake. The work involved in the proposed investigation of the affairs of telephone and express companies will be considerable, but it will be very little as compared with a similar work in regard to railway companies and their properties.

"Recently applications were made to the Board by the C.P.R. Co. and the Canadian Northern Ry. Co., for approval of standard passenger tariffs for new lines in Ontario at rates of 3½c. per mile, and in respect of these the Board laid down the principle that it would not approve of such tariffs at higher rates than 3c. per mile in the well-settled portions of eastern Canada, and these tariffs have been modified accordingly. The C.P.R. Co. has also recently applied to the Board for the approval of standard tariffs for some

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY.

GALENA RAILWAY SAFETY OIL

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT.

of its branch lines in the northwestern provinces at rates of 4c. per mile, but the Board refused to approve of higher rates than 3½c. per mile for those lines, announcing as its opinion that the time had not yet come when it could properly insist upon the rates in the Northwest being reduced to the level of those in Eastern Canada. The result has been that after some conference between the Traffic Officer of the Board and the traffic officials of the C.P.R., the company has agreed to reduce all its standard passenger tariff rates on the Calgary and Edmonton Ry., and lines east thereof in Alberta, to the rate of 3½c. per mile after Dec. 1 next, and the Board has approved of the rate of 4c. per mile only until that date. The interval has been allowed for completing the necessary details. The Board has not felt that, without careful inquiry, it was warranted in going farther than this.

"It appears to me that the question of extensive reductions in passenger rates cannot well be taken up by itself. If it be ascertained that railway companies are charging rates which afford them greater profits than they should reasonably be allowed to receive, it will be important to determine whether the reduction should be made upon passenger traffic, or upon freight traffic, or upon both. If they are not receiving greater profits than they should have, then any reduction in their net earnings from passenger traffic should be made up by the allowance of an increase in such earnings from freight traffic. The members of the Board have not now at their command such information as would enable them reasonably to determine whether railway earnings are greater than they should be, or if they are, from what portion of their traffic reductions in rates should be made. The Traffic Officer of the Board is the official upon whom the Board relies for procuring the necessary information, and for advising it upon all questions of rates. That official is now overworked. The addition of telephone and express companies to the jurisdiction of the Board has already added considerably to the work of his department, and particularly to the work with which he has personally to deal. Upon him the Board has had to rely for the settling of details necessary for the new system. I have suggested to him that he should endeavor to ascertain whether a reliable assistant for himself can be obtained. He informs me that the demand for men of a high class in the railway companies' traffic departments is so great that it would be very difficult, if not impossible, to obtain the services of such an assistant at present.

"It appears to be probable that Parliament or the Railway Committee of the House of Commons will be asked to require the Board to report upon the question of reducing standard passenger tariff rates to 2c. per mile. I desire to urge that the Board should not be required to report upon this question within any limited time, or during the present session of Parliament. We will have soon to decide upon the telephone and express companies' tariffs. We have many important questions which, according to our programme, are to be taken into consideration in the near future. We have much pressing current business. I do not think that it would be possible for us to decide in a brief period of time with satisfaction either to ourselves or to Parliament or the country, upon the important question of the reduction of passenger tolls generally. Our Traffic Officer has already, on his own responsibility and without the instructions of the Board, suggested to the general passenger agents of the C.P.R. Co. and the G.T.R. Co. that they should lower to the rate of 3c. per mile all the passenger tariffs in eastern Canada which provide for higher rates; but they object to this, claiming that their average rates at present are about 2c per mile; and, at the request of the Traffic Officer, they have promised to submit statements in support of their contention. If left to consider the matter in our own way, it is not unlikely that we will see our way to procuring the reduction to 2c. per mile.

"I would, therefore, respectfully urge that the Government should not, at present, countenance the proposal to refer to the Board the question of reducing the rates as proposed by Mr. Maclean's bill, but that the whole matter should be left at large, at least until the next session of Parliament, and the Board left in the meantime, to exercise its discretion unfettered by any order or reference."

There was a good deal of discussion on the motion, which was finally talked out.

April Birthdays.

Many happy returns of the day to—

J. A. Armstrong, Chief Train Dispatcher C.P.R., Ottawa, born at South Durham, Que., April 6, 1863.

Adam Brown, formerly President Wellington, Grey and Bruce Ry. (now G.T.R.), Vice-President G.N.W. Telegraph Co., and Postmaster of Hamilton, born at Edinburgh, Scotland, April 3, 1826.

A. Buchanan, Superintendent of Motive Power, Central Vermont Ry., St. Albans, Vt., born at New York City, April 3, 1870.

W. J. Camp, Electrical Engineer C.P.R. Telegraphs, Montreal, born at Oakville, Ont., April 22, 1855.

A H. Clark, Master Mechanic Irondale, Bancroft and Ottawa Ry., Irondale, Ont., born April 5, 1867.

A. E. Edmonds, District Passenger Agent C.P.R., Detroit, Mich., born at Woodstock, Ont., April 8, 1866.

J. H. Flock, K.C., Honorary Counsel Canadian Ticket Agents' Association, London, Ont., born at Toronto, April 6, 1834.

B. W. Folger, Manager Niagara Navigation Co., Toronto, born at Kingston, Ont., April 8, 1872.

W. E. Fowler, Master Car Builder C.P.R., born at Weymouth, Dorsetshire, Eng., April 27, 1856.

G. H. Garden, C.E., Chief Engineer Alberta Ry. and Irrigation Co., Lethbridge, Alta., born at Woodstock, N.B., April 5, 1849.

F. A. Gascoigne, Car Accountant C.P.R., Montreal, born at Gosport, Hants, England, April, 1866.

J. P. Gay, Manager G.T. Despatch Fast Freight Line, Detroit, Mich., born at Hamilton, Ont., April 26, 1857.

B. C. Gesner, formerly Air Brake Inspector I.C.R., now travelling representative Galena-Signal Oil Co., born at Cornwallis, N.S., April 23, 1859.

A. L. Hertzberg, Engineer Maintenance of Way, C.P.R., Montreal, born in Norway, April 30, 1855.

E. J. Hilliard, Commercial Agent G.T.R., Buffalo, N.Y., born at Montreal, April 14, 1870.

J. M. Horn, city freight agent Canadian Northern Ry., Winnipeg, born at Schoots, Lanarkshire, Scotland, April 12, 1880.

E. A. James, Manager Canadian Northern Ry., Winnipeg, born in London, Eng., April, 1865.

B. S. Jenkins, General Superintendent C.P.R. Telegraphs, Winnipeg, born April 8, 1859.

J. S. Lawrence, Superintendent C.P.R., Nelson, B.C., born at Toronto, April 9, 1863.

D. McNicoll, Vice-President C.P.R., Montreal, born at Arbroath, Scotland, April 7, 1852.

P. Mooney, General Freight and Passenger Agent, Halifax and South Western Ry., Halifax, N.S., born at St. Catherines, Que., April 19, 1871.

W. A. Ritchie, District Superintendent The Pullman Co., Montreal, born at Edinburgh, Scotland, April 13, 1854.

E. V. Skinner, Assistant Traffic Manager C.P.R., New York, born in London, Eng., April 22, 1849.

A. M. Sutherland, Assistant Superintendent Duluth, South Shore and Atlantic Ry., Thomaston, Mich., born at Hartford, Conn., April 2, 1844.

J. R. VanCleve, Master Mechanic, Alaska Central Rd., Seward, Alaska, born at Little Falls, Minn., April 6, 1859.

W. Wainwright, General Assistant and Comptroller G.T.R., Montreal, born at Manchester, Eng., April 30, 1840.

J. J. Wallace, General Freight Agent I.C.R., Moncton, N.B., born in Albert Co., N.B., April 20, 1847.

G. C. Wells, Assistant General Passenger Agent C.P.R. Eastern Lines, Montreal, born at Brockville, Ont., April 15, 1866.

Hon. J. Wood, President and General Manager New Brunswick and Prince Edward Island Ry., Sackville, N.B., born there April 18, 1843.

W. Woollatt, ex-General Superintendent Buffalo Division Pere Marquette Rd., Walkerville, Ont., born at Weedon, Hertfordshire, Eng., April 2, 1855.

J. B. Lambkin, Assistant General Passenger Agent, Intercolonial Ry., Moncton, N.B., born at Quebec city, April 5, 1858.

Recent Provincial Legislation.

The following acts respecting transportation and allied interests were assented to by the Lieutenant-Governor of Quebec in the Legislature, Feb. 28 and Mar. 15:

Bellechasse Telephone Co.—Amending act of incorporation.

Engineers' Club of Montreal.—Respecting the constitution of the club.

Gaspesian Ry.—Extending time for construction.

Little Nation Ry.—Act of incorporation.

Longueuil.—Consolidating and revising the charter of the Town of Longueuil, and confirming a grant of a right of way for a tramway.

Lotbiniere and Megantic Ry.—Amending the charter of incorporation.

Montreal.—Amending city charter, including powers re construction of conduits for telephone, telegraph and other electric wires.

Montreal Street Ry.—Amending the act of incorporation and subsequent acts.

Phillipsburg Ry. and Quarry Co.—Amending the act of incorporation.

Quebec and Eastern Ry.—Act of incorporation.

Quebec and Isle of Orleans Ry.—Act of incorporation.

Quebec and Saguenay Ry.—Amending the act of incorporation.

Temiscamingue, Chibougamou and James Bay Ry.—Act of incorporation.

Magdalen River Ry.—Act of incorporation.

MANITOBA ACTS.

At its recent session the Manitoba Legislature passed an act amending the act providing for the establishment of Government telephone and telegraph systems; an act authorizing the guarantee of certain Canadian Northern Ry. bonds, and an act amending the Manitoba Railway Act.

The Alberta Legislature has passed an act providing for the taxation of corporations doing business within the province. The act provides for the following: Street railways, $200, and $10 per mile for distance over 20 miles. Telegraph companies, $1 a mile for every mile of line. Telephone companies, 50c. an instrument in cities of 10,000, and 75c. an instrument in cities under 10,000. Express companies, $500.

Notes to Steam Railway Statistics.

(1) The Albert Southern extends from Harvey Branch Jct. to Alma, N.B., 16 miles, and from Harvey Branch Albert to Harvey Bank, N.B., 3 miles. It is not being operated. The mileage is not included in the total given.

(2) The Alberta Ry. and Coal Co. is now the Alberta Ry. and Irrigation Co. It has also a third rail on 20 miles making a 3 ft. as well as a standard gauge. The portion of original line from Dunmore to Lethbridge was changed to standard gauge and sold to the C.P.R., Nov. 29, 1893. The A. R. and I. Co.'s mileage includes the St. Mary's River Ry.

(3) The Algoma Central and Hudson Bay Ry. mileage includes the main line Sault Ste. Marie to Chippewa River, 69 miles; and the following branches: Michipicoten to Helen Mines, 12 miles; Josephine Jct. to Josephine Mines, 10.50 miles; mileage 20 to Maple camp, 1.00 mile; Lake Wilde to Breitung Mine, 2.00 miles; mileage 68 to Chippewa River, 1.00 mile. Total 95 miles.

(4) The Atlantic and Lake Superior Ry. includes the Baie des Chaleur Ry., 100 miles; the Great Eastern Ry., 23.00 miles, and the Ottawa Valley Ry., 7.00 miles. The first named only is being operated.

(5) The Atlantic, Quebec and Western Ry. has 102 miles under construction.

(6) The Bay of Quinte Ry. includes the Kingston, Napanee and Western Ry.

(7) The Bedlington and Nelson Ry. has running powers over the C.P.R. from Creston Jct. to Sirdar Jct., B.C., 8.67 miles. It is operated in the interests of the Great Northern Ry., U.S.

(8) The Bruce Mines and Algoma Ry. was not in operation during the year.

(9) The Canada Atlantic Ry. includes the Ottawa, Arnprior and Parry Sound Ry. and the leased lines: Central Counties Ry., 37 40 miles, and the Pembroke Southern Ry., 20.90 miles.

(10) The Canada Southern Ry. includes the leased lines: Sarnia, Chatham and Erie Ry., 7.00 miles; Leamington and St. Clair Ry., 15.95 miles. It has 150.47 miles of double track. The C.S.R. is controlled by the Michigan Central Rd., one of the New York Central and Hudson River Rd. lines.

(11) Canadian Government Railways.—The Intercolonial Ry. mileage is exclusive of the Windsor branch 32 miles, leased to the Dominion Atlantic Ry., but includes the Drummond County, the Canada Eastern Ry., and the Fredericton and St. Mary's Bridge Ry. It has 4.07 miles of double track, and has powers over the G.T.R. from Point Levis to Hadlow, Que., 1.50 miles; from Chaudiere Curve to Chaudiere, Que., 1.18 miles; from Ste. Rosalie Jct. to Montreal, 37.62 miles, total, 40.30 miles.

(12) The Canadian Northern Ry. mileage includes the Winnipeg Great Northern Ry., 40.00 miles; the Port Arthur, Duluth and Western Ry., 85.00 miles; Manitoba and South-Eastern Ry., 107.90 miles; Lake Manitoba Ry. and Canal Co.'s line, 125.00 miles; Ontario and Rainy River Ry., 164 miles; Manitoba Ry. (formerly Northern Pacific and Manitoba Ry. and Portage and North-Western Ry.) leased from the Manitoba Government, 350.48 miles. It also owns 56 miles of line in Minnesota, connecting the Ontario and Rainy River Ry. with the Manitoba and South-Eastern Ry. The figures given refer to the operation of the lines in Canada only.

(13) The Canadian Pacific Ry. mileage includes the following leased lines: Atlantic and North-West, 201.40 miles; British Columbia Southern, 20.40 miles; Calgary and Edmonton, 396.40 miles; Cap de la Madeline, 2.30 miles; Columbia and Western, 157.10 miles; Columbia and Kootenay, 59.50 miles; Credit Valley, 175.70 miles; Fredericton, 22.10 miles; Great North-West Central, 111.70 miles; Guelph Jct., 15.00 miles; Kootenay and Arrowhead, 33.20 miles; Lindsay, Bobcaygeon and Pontypool, 38.70 miles; Manitoba South-Western Colonization, 215.70 miles; Manitoba and North-Western, 294.61 miles; Montreal and Ottawa, 93.50 miles; Montreal and Lake Maskinonge, 11.00 miles; Nakusp and Slocan, 36.50 miles; New Brunswick, 174.60 miles; New Brunswick and Canada, 117.60 miles; Northern Colonization, 23.50 miles; Ontario and Quebec, 474.40 miles; Ottawa Northern and Western, 158.70; Shuswap and Okanagan, 50.80 miles; St. John Bridge and Ry. Extension, 2.00 miles; St. John and Maine, 91.80 miles; St. Lawrence and Ottawa, 58.30 miles; St. Stephen and Milltown, 4.60 miles; Tillsonburg, Lake Erie and Pacific, 33.40 miles; Tobique Valley, 27.50 miles; Toronto, Grey and Bruce, 189.10 miles; Toronto, Hamilton and Buffalo, 2.70 miles; West Ontario Pacific, 26.60 miles; Vancouver and Lulu Island, 16.90 miles. It has 44.20 miles of double track. It has running powers over the G.T.R. from Toronto to Hamilton Jct., 35.80 miles; and over the Canada Atlantic Ry. from Montreal and Ottawa Jct. to Ottawa, 0.90 miles, total 36.70 miles. The Ottawa and North-Western Ry. has running power over 2.50 miles of the Hull Electric Ry.

(14) The Caraquet Ry. also operates the Gulf Shore Ry., 16.78 miles.

(15) The Carillon and Grenville Ry. is operated during the summer only in connection with the steamers of the Ottawa Navigation Co.

(16) The Central Ontario Ry. mileage includes the leased line of the Marmora Ry. and Mining Co., 9.60 miles.

(17) The Chateauguay and Northern Ry. is included in the Great Northern Ry. of Canada.

(18) The Dominion Atlantic Ry. mileage includes the Windsor and Annapolis, 87.50 miles; Cornwallis Valley, 14 miles; Yarmouth and Annapolis (Western Counties), 88 miles; Windsor branch leased from the Intercolonial Ry., 32 miles; and the Midland Ry. of Nova Scotia, 58.00 miles. It has also running powers over the Intercolonial Ry. from Windsor Jct. to Halifax, N.S., 14 miles.

(19) The Edmonton, Yukon and Pacific Ry. is operated by the Canadian Northern Ry. It has running rights over the Calgary and Edmonton Ry. from Strathcona Jct. to Strathcona, Alta., one mile.

(20) The Grand Trunk Ry. mileage includes: G.T.R., 883.35 miles; Great Western, 561.80 miles; Brantford, Norfolk and Port

PINTSCH LIGHT

The new Pintsch Gas Inverted Mantle Lamp for passenger cars increases illumination over three times with the same consumption of gas—a revolution in train lighting.

CAR HEATING

160 railroads are using on 19,000 cars the Safety devices for direct steam and hot water heating.

Burwell, 34.39 miles; Buffalo and Lake Huron, 160.30 miles; Grand Trunk, Georgian Bay and Lake Erie, 175.62 miles; Owen Sound branch, 12.40 miles; London, Huron and Bruce, 68.00 miles; Waterloo Jct., 10.25 miles; South Norfolk, 17.00 miles; Wellington, Grey and Bruce, 168.18, miles; Northern, 163.07 miles; North Simcoe, 33.00 miles; Hamilton and North-Western, 172.23 miles; Northern Pacific Jct., 115.43 miles; Midland, 166.06 miles; Grand Junction, 85.54 miles; Toronto and Nipissing, 85.00 miles; Lake Simcoe Jct., 26 miles; Victoria, 53.00 miles; Whitby, Port Perry and Lindsay, 46.00 miles; Cobourg, Blairton and Marmora, 15.00 miles; Jacques Cartier Union, 6.50 miles; Montreal and Champlain Jct., 61.73 miles; Beauharnois Jct., 6.28 miles. The G.T.R. has 664.22 miles of double track. It has running powers over the Chaudiere branch of the Intercolonial Ry., 5.77 miles; and it also operates the Magnetawan Ry.

(21) The Great Northern Ry. of Canada (now the Canadian Northern Quebec Ry.) includes the Lower Laurentian Ry. and the Montford and Gatineau Colonization Ry. It also operates the Chateauguay and Northern Ry.

(22) The Halifax and South-Western Ry. mileage includes the Halifax and Yarmouth Ry., the Nova Scotia Central Ry., the Nova Scotia Southern, and the Middleton and Victoria Beach Ry.

(23) The Hereford Ry. mileage includes the Dominion Line Co.'s line. It is operated by the Maine Central Rd.

(24) The Lake Erie and Detroit River Ry. mileage includes the Erie and Huron Ry., and the leased line, the London and Port Stanley Ry., 24.00 miles. The L. E. and D. R. Ry. is owned by the Pere Marquette Rd.

(25) Lenora Mount Sicker Ry.—Not in operation.

(26) The Magnetawan River Ry. is operated by the G.T.R.

(27) The Massawippi Valley Ry. has running powers over the G.T.R. from Lennoxville to Sherbrooke, Que., 2.95 miles. It is leased to the Boston and Maine Rd.

(28) The Montreal and Atlantic Ry. mileage includes the Lake Champlain and St. Lawrence Jct., 60.50 miles. It has 6.65 miles of double track. It is operated by the C.P.R.

(29) The Montreal and Province Line (formerly the Montreal Province and Boston Ry.), the Montreal and Vermont Jct. Ry., and the Stanstead, Shefford and Chambly Ry. are leased to the Central Vermont Ry., which is controlled by the G.T.R.

(30) The Nelson and Fort Sheppard Ry. has running powers over the C.P.R. from Five Mile Point to Nelson, B.C., 4.76 miles. It is operated in the interests of the Great Northern Ry., U.S.

(31) The New Westminster Southern Ry., Red Mountain Ry., the Vancouver, Victoria and Eastern Ry., the Victoria Terminal Ry. and Ferry Co., the Vancouver, Westminster and Yukon Ry., and the Victoria and Sidney Ry., is operated by or in the interests of the Great Northern Ry., U.S.

(32) The Ottawa and New York Ry. has running powers in the city of Ottawa 1.90 miles. It is owned by the New York Central and Hudson River Ry.

(33) The Quebec Central Ry. has running powers over the Intercolonial Ry. from Harlaka Jct. to Levis, 5.00 miles.

(34) The Quebec Ry., Light and Power Co. was formerly the Quebec, Montmorency and Charlevoix Ry. The returns here given are for the operation of the line by steam. The figures as to the operation of the electric cars are given under the electric railway statistics.

(35) The Quebec Southern includes the United Counties, the East Richelieu Valley and the South Shore railways.

(36) The Rutland and Noyan Ry. is operated by the Rutland Rd., which is owned by the New York Central and Hudson River Rd.

(37) The earnings of the St. Clair Tunnel are from tolls on vehicles hauled through the tunnel.

(38) The St. Lawrence and Adirondack Ry. has running powers from Adirondack Jct. to Montreal, 8.70 miles. It is operated by the New York Central and Hudson River Rd.

(39) The Toronto, Hamilton and Buffalo Ry. has 4.69 miles of double track. It is owned by the New York Central and Hudson River Rd., and the C.P.R.

Orders by the Railway Commissioners.

The following orders have been issued by the Board of Railway Commissioners :—

2384. Feb. 26.—Authorizing Farmers' Mutual Telephone Co., Ltd., to carry wires across G.T.R. tracks near Stevensville, Ont.

2470. Dec. 19, 1906.—Directing G.T.R. to compensate E. S. Brennan, of Hamilton, Ont., for damages sustained to his lands.

2471. Nov. 22, 1906.—Authorizing City of Toronto to extend Lansdowne Ave. from south of C.P.R. tracks to north of G.T.R. tracks by a subway.

2472, 2473, 2474, 2475, 2476, 2477, 2479, 2480, 2481, 2482, 2483, 2484, 2485, Jan. 8 and 9.—Authorizing the Canada Southern Ry. to cross with its second track certain highways in Dereham, East Tilbury, Townsend, South Dorchester, Walpole, Howard, Crowland, Humberstone, Bertie, Windham, Raleigh, Harwich and South Norwich, Ont.

2478. Feb. 16.—Authorizing Toronto & Niagara Power Co.'s location from Cainesville to Brantford, Ont.

2486. Jan. 23.—Authorizing Canada Southern Ry. to open for the carriage of traffic its second track between Tillsonburg and Springfield, Ont.

2487. Dec. 7, 1906.—Authorizing G.T.R. to construct a siding to the Peterboro Fuel and Cartage Co.'s premises, Peterboro, Ont.

2488. Jan. 9.—Approving interlocking plant of M.C.Rd. established at crossing with G.T.R. at Hagersville, Ont.

2489. Jan. 23.—Authorizing James Bay Ry. to construct a bridge over log canal, Rama township, Ont.

2490. Dec. 13, 1906.—Directing G.T.R. to put in proper working order the gates at crossing on St. Clair Ave. between Keele St. and Weston Road, West Toronto Jct., Ont.

2491. Jan. 9.—Authorizing C.P.R. to construct bridge at Biscotasing Lake, Ont.

2492 to 2495. Jan. 24.—Bell Telephone crossings over various lines.

2496. Jan. 22.—Granting Windsor and Tecumseh Electric Ry. a further extension of 90 days from Oct 25, 1906, within which to transmit power with its wires over the G.T.R. at Walkerville, Ont.

2497 to 2505.—Authorizing Ottawa and New York Ry. to cross certain highways in Gloucester, Finch, Osnabruck, Russell, Cambridge and Cornwall townships, Ont.; Ann St. between Ottawa and Ottawa East, and a highway on the Indian reservation, Cornwall Island, Ont.

2506. Jan. 28.—Authorizing Canada Southern Ry. to open for carriage of traffic its second track between Tillsonburg and Waterford, Ont., 22 miles.

2507. Jan. 23.—Cancelling order 2362, of Dec. 26, 1906, approving location of G.T. Pacific Ry. between Portage la Prairie and High Bluff, Man.

2508. Oct. 13, 1904.—Approving crossing of London St. Ry. over London and Pt. Stanley Ry. at rail level, South St., London, Ont.

2509. Jan. 25.—Authorizing Bell Telephone crossing over K. and P. Ry. at Renfrew, Ont.

2510. Jan. 30.—Approving revised location Essex Terminal Ry. from Gravel Road to M.C.R.R. right of way, Sandwich West township, Ont.

2511. Feb. 2.—Granting Toronto and Niagara Power Co. extension of 90 days from Jan. 1, to cross T.H. and B. tracks at escarpment, Hamilton, and Vinemount, Ont., with its power wires.

2512. Jan. 18.—Authorizing G.T.R. to construct siding to A. Macpherson & Co.'s premises, Kilworthy, Ont.

2513. Feb. 1.—Authorizing C.P.R. to construct siding to Eastern Townships Brick Manufacturing Co.'s premises, Ascot township, Que.

2514. Jan. 30.—Approving location of Canadian Northern Ontario Ry. mileage 188 to 198, west from Ottawa, Ont.

2515. Jan 28.—Authorizing G.T.R. to construct branch line across Danforth Road, Lansdowne Ave. and Isabella St., East Toronto, Ont.

2516. Jan. 30.—Authorizing C.P.R. as lessee of Walkerton and Lucknow Ry. to cross certain highways in Brant township, Ont.

2517. Jan. 30.—Authorizing Montreal Terminal Ry. to construct a siding to Lakefield Portland Cement Co.'s premises, Pointe aux Trembles, Que.

2518. Feb. 4.—Authorizing and appointing H. A. K. Drury, Assistant Engineer of the Board, to inquire into and report whether the Canadian Northern Ry. has failed to supply necessary cars and equipment for receiving and transporting traffic and the cause therefor, also to learn whether the C.N.R. has all reasonable equipment necessary for keeping its railway in operation in the winter, and if not in what respects it is deficient.

2519 to 2521. Feb. 4.—Bell Telephone Co. crossings over various railways.

2522. Feb. 4.—North American Telegraph Co. crossing over B. of Q. Ry. at Jamieson St., Tweed, Ont.

2523. Jan. 28.—Granting Canadian Northern Ontario Ry. a temporary crossing in Hawkesbury, Ont., over G.T.R. tracks.

2524. Feb. 2.—Granting Toronto and Niagara Power Co. 90 days' extension from Jan. 1, for crossing G.T.R. tracks at four points with its power wires.

2525. Feb. 4.—Granting Toronto and Niagara Power Co. 90 days' extension from Jan. 1, for crossing C.P.R. tracks at Lambton Park and north of Toronto Jct. with its power wires.

2526. Feb. 5.—Authorizing G.T.R. to construct siding to A. McGibbon & Son's premises, Penetanguishene, Ont.

2527 to 2543. Jan. 23.—Authorizing Bell Telephone crossings over various railways.

2544. Feb. 8.—Appointing G. F. Shepley, K.C.; W. S. Buell, counsel assisting Board, and J. Richardson, accountant, to inspect offices, premises, business, books, etc., of Bell Telephone Co. in connection with obtaining for the Board information necessary to enable it to determine how far tariff of tolls shall be approved.

2545. Feb. 4.—Approving C.P.R. rate on party of mining students McGill University from Montreal to Vancouver, B.C.

2546. Feb. 4.—Approving C.P.R. standard freight tariff for Vancouver and Lulu Island Ry. local freight traffic.

2547. Feb. 7.—Authorizing C.P.R. to construct branch line to Parizeau Bros.' premises. Macaza, Que.

2548 to 2551. Feb. 6.—Bell Telephone Co. crossings over various railways.

2552. Feb. 9.—Authorizing Canada Southern Ry. to open for traffic its second track between Tillsonburg and Waterford, Ont.

2553. Feb. 8.—Authorizing Canadian Northern Quebec Ry. to use for construction purposes only a temporary crossing over C.P.R. at Lachevrotiere, Que.

2554. Feb. 4.—Granting North American Telegraph Co. a further extension of one month from Jan. 13, for filing of tariffs of tolls.

2555. Feb. 8.—Appointing G. F. Shepley, K.C.; W. S. Buell, and J. Richardson to act as regards the North American Telegraph Co. in the same manner as authorized to act in regard to the Bell Telephone Co. in order 2544.

2556. Feb. 25—Authorizing Welland County Telephone Co. to carry its wires over G.T.R. branches at Ridgeway, Ont.

2557. Feb. 12.—Authorizing the C.P.R. to construct and operate branch line from near Greene Ave., Westmount and Montreal.

2558. Feb. 14.—Authorizing Welland County Telephone Co. to place wires across lands and under M.C.R. tracks at the shipyards, Bertie tp., Ont.

2559 Jan. 30.—Authorizing Welland County Telephone Co. to place wires under M.C.R. tracks at second crossing north of Niagara Jct., Ont.

2560. Feb. 16.—Amending order of Feb. 4, granting extension of one month to North American Telegraph Co., for filing its tariffs of telephone tolls, by striking out the following words after the word "tolls" in operative part of order: "And permitting the applicant company....time authorized."

2561. Feb. 8.—Appointing G. F. Shepley, W. S. Buell, and J. Richardson to inspect offices, premises, etc., of the Express Traffic Association (Express Companies in Canada). All information obtained by them to be privileged and for use of Board only.

2562. Feb. 8.—Approving supplement 7 to local standard passenger tariff C.R.C. no. W 38, applying a rate of 4c. a mile on spur from Curzon Jct. to Kingsgate, B.C.

2563. Feb. 14.—Approving location of Montreal Park and Island Ry. from near Henderson station to the south bank of Riviere des Prairies, Que.

2564. Feb. 14.—Authorizing Canadian Northern Ont. Ry. to construct bridge on Hutton branch over west branch of Vermilion River, Ont.

2565. Feb. 14.—Authorizing C.P.R. to cross with tracks highway between lot 15, con. 15, Carrick tp., and lot 33, con. 3, Brant tp., Bruce, Ont.

2566. Feb. 14.—Authorizing Chatham Gas Co. to lay gas main under G.T.R. tracks at Lacroix St., Chatham, Ont.

2567 and 2568. Feb. 14.—Authorizing Canadian Niagara Power Co. to carry its wires over Pere Marquette Rd., and Michigan Central Rd. tracks, on lot 8, con. 4, Bertie tp., Welland, Ont.

2569. Feb. 8.—Amending the books of reference accompanying location plans of Teulon extension of C.P.R. Stonewall branch, Manitoba, approved by Board Sept. 19, 1906.

2570. Feb. 15.—Authorizing C.P.R. and G.T.R. to refund to exporters of cheese tolls collected from them during 1906.

2571. Feb. 15.—Authorizing Malahide & Bayham Telephone Co-operative Association, to carry a wire under G.T.R. tracks west of Glencolin, at highway crossing between con. 7 and 8, Malahide tp., and highway crossing at Corinth station, Ont.

2572. Feb. 20.—Authorizing Atlantic, Quebec and Western Ry. to open for traffic its line between junction with Atlantic and Lake Superior Ry. to the King's highway, Gaspe county, Que.

2573. Feb. 16.—Authorizing Pearl Mfg. Co. to carry an electric wire over G.T.R. tracks at Bromptonville, Que.

2574. Feb. 16.—Approving Grand Trunk Pacific Ry.'s location from station 1425+60 to station 2561+12, mile 27 west to mile 48.5, British Columbia.

2575. Feb. 16.—Authorizing location of St. Mary's and Western Ontario Ry. from south limit of St. Mary's to Embro, Ont.

2576. Feb. 16.—Granting leave to Brandon, Saskatchewan and Hudson Bay Ry. to take possession of portion of s.e. ¼ sec. 18, tp. 10, range 19, west 1st prin. mer., being a portion of the Canadian Northern Ry.'s right of way.

2577. Feb. 19.—Authorizing a further extension of 90 days from Feb. 16, to the Ontario Power Co. to erect its wires over G.T.R. tracks, as shown on plan filed under reference 17944, file 1889.

2578. Feb. 19.—Authorizing the City of Woodstock, Ont., to lay a gas main under G.T.R. tracks, at Henry St.

2579. Feb. 14.—Approving alterations in G.T.R. grade between Tiffin and Orillia, Ont.

2580. Feb. 19.—Authorizing C.P.R. to construct and operate branch line from the main line between Quebec and St. Martin's Jct., Que., to the Montreal Paper Co.'s property.

2581. Feb. 19.—Authorizing the C.P.R. to cross the highway between Brant and Bruce townships, also road allowance between lots 35 and 36, Brant tp., Ont.

2582. Feb. 19.—Authorizing the North American Telegraph Co. to place 20 telegraph and telephone wires across G.T.R. tracks at first highway road east of bridge, near Howard's station, Ont.

2583. Feb. 19.—Authorizing C.P.R. to construct and operate branch line on the Quebec section from the main line to the Canada Paint Co.'s premises, lot 466, Champlain county, Que.

2584. Feb. 19.—Approving of location of G.T. Pacific Ry. from the boundary line between Portage la Prairie and High Bluff parishes to Manitoba, the east line of section 14, tp. 11, range 4, west of 1st mer., mileage 106.44.

2585. Feb. 19.—Authorizing the Middleton and Victoria Beach Ry. to operate trains over the crossing of Dominion Atlantic Ry. main line, at Middleton, N.S.

2586. Feb. 19.—Authorizing Canadian Northern Ry. to cross its Hartney-Virden branch with its Brandon-Regina branch in the n.e. ¼ of sec. 9, tp. 9, range 26, west 1st prin. mer., Manitoba.

2587. Feb. 19.—Approving revised location of Canadian Northern Ontario Ry., through Russell county, Ont., between mileage 46 and 48.27, west from Hawkesbury.

2588. Feb. 16.—Authorizing the Bell Telephone Co. to place wires across the Brandon, Saskatchewan and Hudson Bay Ry. north of Minto, Man.

2589. Feb. 19.—Approving plans of drainage system submitted by the Canada Southern Ry. Co. in re J. A. Smith's lands, Yarmouth tp., Ont.

2590. Feb. 21.—Authorizing British Columbia Electric Ry. Co. to place wires across a C.P.R. siding in Vancouver, B.C.

2591. Feb. 14.—Amending order 1389, authorizing construction of a transfer track at Prince Albert, Sask., between the Canadian Northern and Qu'Appelle, Long Lake and Saskatchewan railways, by striking out the provisions relating to the installation and maintenance of interlocking and derailing plant at the junction.

2592. Feb. 14.—Approving location of 19 stations on C.P.R. Toronto-Sudbury line.

2593. Feb. 21.—Authorizing Ontario Power Co. of Niagara Falls to place its lines across Niagara, St. Catharines and Toronto Ry. in Thorold tp., Ont.

2594. Feb. 15.—Authorizing Canada Southern Ry. to provide farm crossing for J. Wright, across the railway on lot 29, con. 5, Enniskillen tp., Ont.

2595. Feb. 14.—Authorizing location of Canadian Northern Quebec Ry. through Quebec county, mileage 8 to 13.8 west from Quebec bridge.

2596. Feb. 26.—Granting G.T.R. extension of time to May 15, within which to instal interlocking appliance at crossing with C.P.R. at lot no. 8, 9th con., Yarmouth tp., Ont.

2597. Feb. 26.—Approving Dominion Atlantic Ry. plans for renewal of superstructure of bridge across Sissiboo River, Weymouth, N.S.

2598. Feb. 26.—Authorizing Michigan Central Rd. to operate derails and signals at its own expense at crossing with the Niagara Falls, Wesley Park and Clifton Tramway at Victoria Ave., Niagara Falls, Ont.

2599. Feb. 25.—Authorizing C.P.R. as lessees of Nicola, Kamloops and Simalkameen Ry. to open the line for traffic from Coutlee to Nicola Lake, B.C.

2600. Feb. 14.—Approving location of C.P.R. station at Buckskin, Ont., Toronto-Sudbury branch.

2601 to 2604. Feb. 25.—Bell Telephone Co. crossings over various railways.

2605. Feb. 28.—Authorizing G.T. Pacific Ry. to cross C.P.R., Miniota branch, tracks near Forrest, Man.

2606. Feb. 27.—Authorizing Welland County Telephone Co. to carry its wires under superstructure of International Bridge at Bridgeburg, Ont.

2607. Mar. 1.—Authorizing Canadian Northern Quebec Ry. to construct a bridge over Riviere des Envies, Que., on the Garneau-Quebec division.

2608. May 10, 1906.—Authorizing the C.P.R. to deviate a portion of its line near Bolton station, Ont., by constructing a new line (Bolton grade revision).

2609. Feb. 28.—Correcting order of May 1, 1906, which authorized G.T.R. to construct a branch line in Toronto to point opposite the lands occupied by Murray & Laidlaw, east of Scott St., by striking out the words "macadamized" and "macadamizing" and substituting the words "paved" and "paving," also the words "Don Esplanade for "Esplanade St."

2610. Mar. 1.—Authorizing City of Guelph, Ont., to carry electric light wires over G.T.R. tracks at Woolwich St.

2611. Feb. 28.—Approving interlocking plant installed by Michigan Central Rd. at crossing of G.T.R. tracks at Welland, Ont.

2612. Feb. 28.—Approving revised location of C.P.R. Crow's Nest branch to and through McLeod, Alta.

2613. Mar. 1.—Ordering Guelph & Goderich Ry. (C.P.R.) to erect and maintain retaining wall to support G.T.R. lands in Goderich, Ont., which the G. & G. Ry. were authorized to take by order of July 18, 1905.

2614 and 2615. Mar. 1.—Authorizing C.P.R. to construct bridges over south and north crossings of Naiscootying River, Ont., on its Toronto-Sudbury Branch.

2616. Mar. 1.—Authorizing Canadian Northern Quebec, Ry. to construct a bridge on its Garneau-Quebec Division, over the Charest River, Que.

Vertical Enclosed Engines

We are prepared to supply high speed Vertical Enclosed Engines of the English type, up to 750 horse power.

The oiling system of these Engines is under a pressure of 15 lbs. to the square inch, ensuring a copious supply of oil to all bearings.

They have Robb-Armstrong automatic governors and Sweet balanced valves giving the best regulation and highest economy.

N.J., U.S.A.

2617. Mar. 1.—Authorizing the G.T.R. to construct a siding to the Indestructible Brick Co.'s premises near Swansea, Ont.

2618. Mar. 1.—Authorizing C.P.R. to construct a siding to F. T. Cross's premises, near Cascades, Que.

2619. Mar. 1.—Authorizing Canadian Northern Quebec Ry. to construct a viaduct over a ravine at station 102 on its Garneau-Quebec division, Champlain county, Que.

2620. Mar. 1.—Authorizing Canadian Northern Ontario Ry. to construct a bridge on its northern division over Shawanaga River, Parry Sound district, Ont.

2621. Sept. 17.—Approving agreement between the city of Calgary and C.P.R. in respect to construction and maintenance of public highway, level and subway, and crossings of C.P.R. right of way and tracks in Calgary, Alta.

2622. Feb. 26.—Extending time for sanction and approval of Bell Telephone Co.'s tariffs of tolls to May 13.

2623. Mar. 5.—Authorizing C.P.R. to construct a spur to Clare & Brockest's premises, Winnipeg.

2624. Mar. 4.—Approving location of G.T. Pacific Ry. from mile 48.5 to 80.5, British Columbia.

2625. Mar. 5.—Approving location of G.T. Pacific Ry. from mile 80.5 to 115.5, British Columbia.

2626. Mar. 7.—Authorizing C.P.R. to construct spur to G. F. Stephens & Co.'s premises, Winnipeg.

2627. Mar. 7.—Authorizing C.P.R. to construct two spurs on its Sudbury-Kleinburg branch at mileage 54.7, Medonte tp., Ont., one 1,990 ft, the other about 800 ft.

2628. Mar. 9.—Authorizing G.T.R. to construct spur to J. Gow's premises, Fergus, Ont.

2629. Mar. 7.—Authorizing C.P.R. to construct spur to Alberta Portland Cement Co.'s premises.

2630. Mar. 7.—Authorizing C.P.R. to construct spur to Cushing Bros.' premises in Alberta.

2631. Mar. 8.—Authorizing C.P.R. to construct spur from its Revelstoke and Arrow Lake branch to Bowman Lumber Co.'s premises.

2632. Mar. 9.—Authorizing C.P.R. to construct and operate tracks along and across Union St., West St. John, N.B., also along new wharf between Sand Point slip and Rodney slip.

2633. Mar. 7.—Authorizing Midland Ry. of Manitoba to erect telegraph wires over C.P.R. at Morden, Man.

2634. Mar. 7.—Authorizing Niagara District Telephone Co. to carry wires across the G.T.R. tracks at Jordan, Ont., by underground conduits.

2635. Mar. 7.—Authorizing Essex Terminal Ry. to cross the Maisonville road, Tecumseh and gravel road, Sandwich East, Ont.

2636. Mar. 7.—Authorizing Essex Terminal Ry. to cross Benjamin St. and Tecumseh road, Windsor, Ont.

2637. Mar. 6.—Approving Canadian Express Co.'s by-law, authorizing J. Bryce, V.P. and Manager, or such other officers as he may designate, to prepare and issue tariffs of tolls.

2638. Feb. 14.—Approving Bedington and Nelson Ry. Co.'s standard passenger tariff, C.R.C. 179.

2639. Mar. 7.—Authorizing Delhi Light and Power Co. to carry power line and telephone wires across G.T.R. tracks at Main St., Delhi, Ont.

2640. Mar. 11.—Authorizing Town of Port Arthur, Ont., to lay sewer pipes under C.P.R. and Canadian Northern Ry. tracks on John St., and on the line of John St. extended out into Thunder Bay.

2641. Mar. 7.—Approving location of C.P.R. station at Bala, Ont.

2642. Mar. 11.—Amending order 2119, Nov. 28, 1906, which authorized the C.P.R. to cross G.T.R. tracks with a double track on Don Improvement, Toronto, by inserting the words "Toronto Belt Line Ry. Co., leased and operated by the," before the words "Grand Trunk," in original order.

2643. Mar. 9.—Authorizing Markham and Pickering Telephone Co. to erect wires across the C.P.R. tracks at points in Markham tp., Ont.

2644. Mar. 11.—Approving National Express Co. by-law authorizing its General Traffic Manager to prepare and issue tariffs.

2645. Mar. 11.—Approving American Express Co.'s by-law authorizing its General Traffic Manager to prepare and issue tariffs.

2646 to 2662. Mar. 9.—Authorizing Bell Telephone Company to carry its telephone wires across various railway tracks.

2663. Feb. 14.—Authorizing Ottawa Electric Ry. to carry its tracks by an overhead bridge on Bell St., Ottawa, over the Canada Atlantic Ry. tracks, and apportioning the cost of maintenance between the Ottawa Electric Ry. Co., the Canada Atlantic Ry. Co. and the City of Ottawa.

2664. Feb. 28.—Altering order of Oct. 13, 1904, par. 4, by substituting the following: "That the normal position of the derails be open and the semaphores be at safety."

2665. Mar. 12.—Varying order 1999, Nov. 8, 1906, respecting the Town of High River, Alta., to make it read so that it is Fourth St. (instead of Third) which is to be carried over the C.P.R. tracks.

2666. Mar. 12.—Extending time for approval of North American Telegraph Co.'s telephone tolls to May 13, 1907.

2667. Mar. 13.—Approving Michigan Central Rd. interlocking plant, installed at Niagara Jct., Ont.

2668. Mar. 13.—Granting temporary crossing to Windsor, Essex and Lake Shore Rapid Ry., with construction trains, over C.P.R. tracks.

2669, 2670, 2671. Mar. 13.—Authorizing Ingersoll Telephone Co. to carry its wires over the C.P.R. tracks on Hamilton St., Ingersoll, and in West Oxford tp., also over the Tillsonburg, Lake Erie and Pacific Ry. (C.P.R.) tracks at Charles St. W., Ingersoll Ont.

2672. Mar. 13.—Authorizing Canadian Northern Ontario Ry. to construct a bridge on its Hutton branch, over west branch of Vermilion River.

2673. Mar. 7.—Authorizing Harrietsville Telephone Association to carry its wires over Michigan Central Rd. tracks in Elgin Co., Ont.

2674. Mar. 13.—Directing G.T.R. to reduce its rate on logs, carloads, minimum weight 35,000 lbs. per car, between Brule Lake and Renfrew, Ont., for the purpose of manufacture and reshipment of the product thereof to 5c. per 100 lbs.

2675. Mar. 12.—Authorizing the G.T.R. to construct a spur to the Anthes Furniture Co.'s premises, Berlin, Ont.

2676. Mar. 16.—Authorizing Falls Power Co. to carry its electrical circuits and wires over the G.T.R. tracks in Welland, Ont.

The Montreal Terminal Warehouse and Cartage Co.'s officers and directors for the current year are: President, J. W. Pyke; Vice-President, R. W. MacDougall; Managing Director, D. E. Cameron; other directors: C. E. Archibald, H. M. Marier, D. Morrice, jr.; C. A. Smart, F. Bacon.

G.T.R. Station and Hotel for Ottawa.

C. M. Hays, Second Vice-President and General Manager, met the Ottawa City Council Feb. 11 and submitted plans, etc., for the proposed new central station with hotel adjoining. He said the station would cost about $250,000 and the hotel between $1,250,000 and $1,500,000. He asked for the widening of Little Sussex St., on which the new station would face, from 30 ft., which it now is, to 100 ft.; the stopping up of street ends and lanes on which the company's property abuts; and the fixing of an assessment valuation on the station of $150,000 for 20 years, and on the hotel of $200,000 for 20 years. It having been pointed out by an alderman that the assessment of the Russell House was much more than $200,000, Mr. Hays said he was willing for the assessment on the new hotel to be fixed at the same as that of the Russell, which is said to be $380,000, or not more than $400,000. In reply to a question, he said that if the city would not grant the concessions asked, the company would not build the hotel, but merely a station, though the latter would probably not be of the same design as if an hotel was also built. It was arranged that the company's proposal should be submitted in writing.

It is proposed to widen Little Sussex St. to the width of Sussex St. west of Rideau, so as to continue the street cars, which now pass over Sapper's Bridge and Rideau St., down to the central station plaza. The station proper is located on the axis line of Sussex St., as widened, at the head of a new plaza of sufficient area to afford ample accommodations for all passengers to and from the new station, either in carriages, or otherwise. This plaza will contain approximately over 32,000 sq. ft. The baggage and express wagons are provided with separate driveway, so as not to encroach upon this plaza. Passengers to and from the station can distribute across this plaza to the north, east and west. It is proposed also to cross the Rideau canal with a foot bridge, coming out on the canal reserve opposite Queen St., so that pedestrians can come down Elgin St. to and from the Parliament Buildings and grounds through Queen St. and reach the station by means of this foot bridge, thus avoiding the more crowded thoroughfares across Sapper's bridge. This arrangement will also logically distribute the incoming and outgoing tide of travel towards the southerly, easterly and westerly portions of the city. It is proposed, in addition, to provide egress and exit through the hotel to and from Rideau St. and from the restaurant, grill, cafe and lunch rooms located in the hotel, for the various classes of travellers utilizing the station. It has been suggested that the plaza referred to should be named after the premier, and that an "isle of safety" in the centre of the plaza might form a suitable spot for a memorial to Sir Wilfrid Laurier.

The passenger station itself has been planned to meet all possible passenger traffic conditions at Ottawa in a thorough, up-to-date and satisfactory manner, with room for future growth and development and ample provision at present for the Grand Trunk, Canadian Pacific, Canadian Northern and Ottawa and New York railways. The station proposed consists of a large circular central rotunda, or waiting room, 85 ft. in diameter, open to the roof, lighted by clerestory windows, without skylights. This rotunda will be used principally as a waiting room, and not crossed, as ordinarily, by passengers to and from the trains, which invariably renders such a room impracticable and uncomfortable as a waiting room. Around the outside of this rotunda are wide and generous passage ways for passengers who

may desire to reach the ticket office, baggage rooms, waiting rooms, lavatories, telephone, news stand, train shed, concourse, and exits and entrances, without passing through the rotunda or waiting room proper. Union ticket offices of ample dimensions, with mezzanine story for clerks and storage of tickets, are provided, together with sleeping car and telegraph office connected, all located at the most central and convenient points for passengers. The rotunda or waiting room and connecting corridors occupy approximately over 5,600 sq. ft. Separate waiting rooms for women, with retiring and resting rooms, also lavatories, are arranged for, covering, approximately, over 1,150 sq. ft. Also smoking rooms and lavatories for men, separate, opening off the concourse, covering, approximately, over 700 sq. ft. The two main entrance vestibules or lobbies are located directly opposite the cross walks at Sussex St. on the main façade and can be reached by passengers driving or walking, or from the street cars, or trains, or baggage rooms, without passing through the station or waiting room. The total length of the station will be approximately 250 by 125 ft. wide, exclusive of concourse, which is approximately 50 by 250 ft. in length additional. Various buildings for baggage, express, mail and power, will cover a length of approximately 350 ft. by a width of 35 ft. Ample provision is also made for union baggage room, customs, etc., for outgoing and incoming baggage, easily accessible for passengers driving to the trains, or baggage delivered by transfer, and covering approximately over 7,450 sq. ft. In addition, express and mail rooms are provided, separately, covering approximately over 3,460 sq. ft., also power and heating plant for the station, with separate track for coal and ashes, and driveway for teams reaching track provided for theatrical scenery, etc. All of this area is so arranged as to be increased in size as may be required. The second story of the station building, with separate entrances, stairway and elevator, is arranged for the accommodation of the various railway officials and clerks, who will occupy the Central Station, including the despatchers, etc., covering approximately over 14,000 sq. ft. for office room, to be sub-divided as desired, including separate lavatories, etc., and corridors opening into clere-story of the rotunda. The roofs overhead are so planned as to carry the snow and water away from the sidewalks and approaches. The construction of the station building will be fireproof throughout, with framework of steel and iron, including large elliptical trusses supporting the rotunda roof. The exterior walls will be of solid masonry, showing a front of granite and stone in light colors, with projecting cornices, pediments, columns, pilasters and massive openings. The entrance doorways will have glass marquise over head, while the baggage room doors will be protected by umbrella awnings. Adjoining the station, the carriage concourse will be connected by wide projecting canopies for the comfort and convenience of passengers. The entire design for the station building is classical throughout in keeping with its purpose. The lines, while simple, are so designed as to make this very simplicity an element of strength, dignity and effectiveness in the whole treatment of the façades, facing the plaza and the axis line. The dome over the rotunda covered with copper will form a striking feature from any of the approaches, and as seen from a distance, while the arrangements of the plan itself, with the wings set at right angles with the adjoining streets, and on the axis line of the train shed and plaza add to the utility and strength of the whole design.

Connected with and forming part of the station proper will be the passenger train shed of unique construction, 530 by 156 ft., covering approximately over 8,200 sq. ft., covering seven tracks and four platforms. The columns are so located for the overhead trusses as to allow the platforms to be free and clear from all encumbrances. The design and general construction consists of a series of arched trusses, about 17 ft. at the lowest point above the tracks, the entire construction being of steel and cement, fireproof throughout. Directly over the tracks, openings will be left for the escape of smoke and gas from the locomotives, and for the first time designed particularly for weather conditions prevailing in Canada, a series of automatic controlled trapdoors are arranged along the roof of the train shed, from which snow can be dropped on cars standing underneath, whenever desired. The passenger platforms will be lighted overhead with wire glass skylights, at the apex of the roof, where they cannot be covered by snow, and where condensation can be provided for. These platforms will be of cement, 20 ft. wide in the clear, and raised nearly to the height of the car steps, which should prove a great convenience to women and children. The main platforms for express trains are over 700 ft. long, with umbrella awnings extending over the same beyond the train shed proper. The platforms for local trains are 600 ft. long The space between the platforms will be drained toward the centre, so that any oil from the cars or engines, together with any rain or snow coming through the smoke openings, will be carried away from the platforms and to drains outside of the building. The general arrangement of the tracks entering and leaving the train shed is such that any platform can be reached from the present two main passenger tracks underneath Laurier bridge.

The entire area set aside for the station terminal proposed, covers approximately 266,000 sq. ft., or over six acres. In addition to the large train shed concourse for outgoing passengers, approximately 50 by 250 ft. long, arrangements are made whereby passengers from the trains can pass out to the passenger concourse and station exits, entirely independent of this outgoing concourse, and in case of large excursions or special traffic, this feature will be appreciated. All passenger trains to and from the station will back into the same, thus the smoke nuisance will be entirely eliminated and the convenience and comfort of passengers proportionately increased. Instead of the present type of through station, always undesirable where it can be avoided, the new station and train shed have been designed as what is known technically as a head on station, that is, the trains start and stop without passing through the station, all of the switching and transferring of cars and changing of locomotives being accomplished in the station yards, outside of the building proper, thus avoiding confusion, danger to passengers, and the usual and unpleasant smoke nuisance. All of the present railways entering Ottawa can reach this new terminal by running around a Y and backing into the station ready to start out to their destination, in the case of through trains at even less distance than they could pass through the city otherwise.

As the building of the hotel is dependent on the action of the Ottawa City Council, and may not be gone on with, we defer giving a description of the plans till the matter is settled.

The Canadian Transit Co. has been granted supplemental letters patent under the Ontario Companies' Act, authorizing the increase of its capital stock from $50,000 to $100,000.

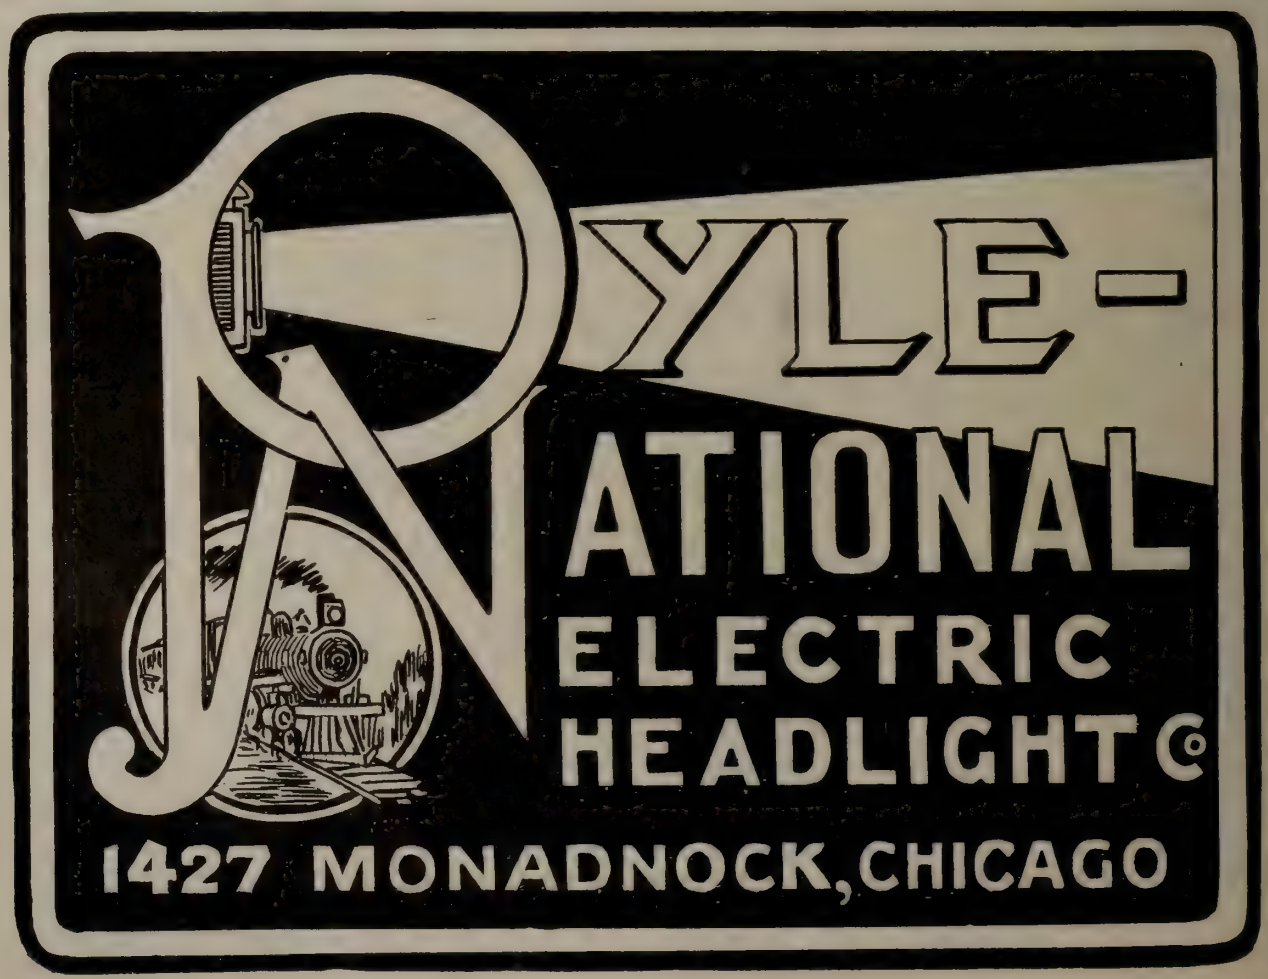
The extent of their use is evidence of their excellence. — WE MANUFACTURE IN CANADA.



Quebec and Lake St. John Ry.

This line, the control of which has been secured by Mackenzie, Mann & Co., was opened from Quebec to Gosford, 25.5 miles, in 1871, that section being laid with wooden rails. In 1880 it was reconstructed and extended to St. Raymond, 36 miles from Quebec. From 1884 to 1888 a further extension was built to Roberval, and in 1898 the eastern extension was completed to Chicoutimi. A branch is under construction from Jeannotte to La Tuque, about 40 miles, on which 16.75 miles of rails were laid in 1906. A branch of a mile to Roberval wharf and the Gosford branch of 1.50 miles were also built in 1906. The bonded debt on Dec. 31, 1905, was as follows: £350,000 prior lien 4% 20 year £100 coupon bonds due April 21, 1921; £442,000 1st mortgage 5% £50 and £100 bonds due Dec. 31, 1924, ranking after prior lien bonds; £640,000 6% £50 and £100 income bonds due Dec. 31, 1924, interest payable if earned. The interest on the 1st mortgage bonds, payable Jan. 1 and July 1, was at the rate of 4% a year till July, 1905.

The statistics of operation for the year ended June 30, 1906, show: Passenger earnings, $174,420.15; freight earnings, $340,711.41; mail and express, $19,097.78; other sources, $29,628.65; total, $563,857.99. Expenditure—Maintenance of way and buildings, $84,454.21; motive power, $153,167.37; cars, $17,801.91; general and operating expenses, $132,638.95; total, $388,062.44; net earnings, $175,795.55. Train mileage—passenger trains, 201,820 miles; freight trains, 129,495 miles; mixed trains, 36,624 miles; total, 367,939 miles; engine mileage, 582,363 miles. Passengers carried, 301,729; freight handled, 345,001 tons.

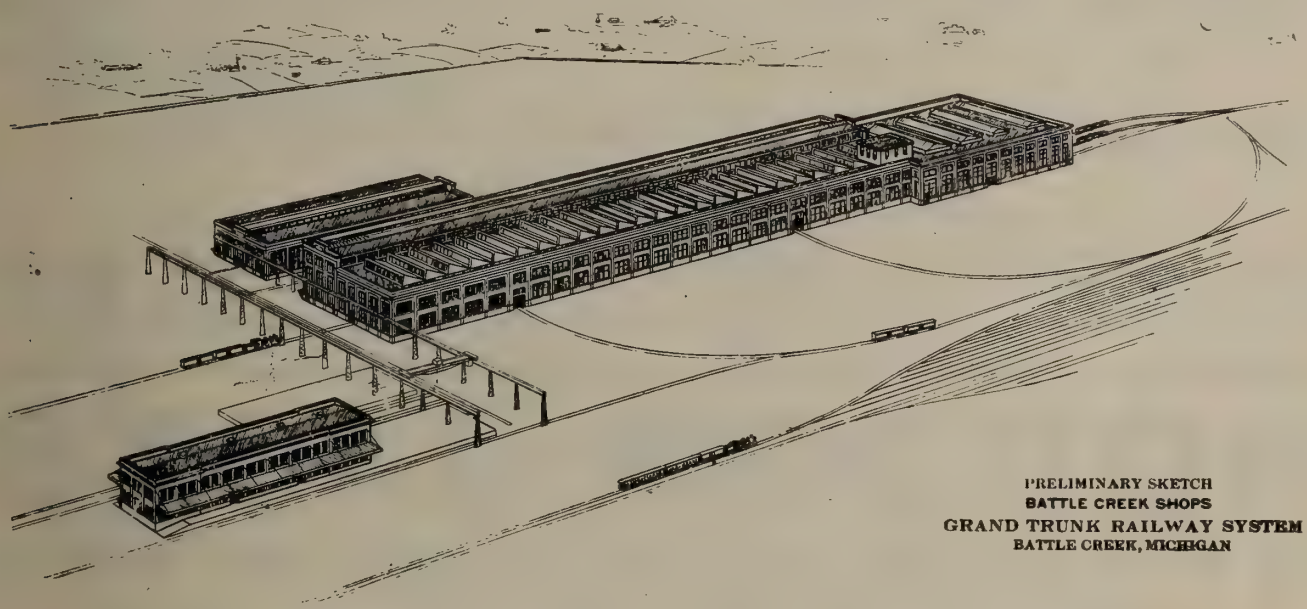
The company owns 23 locomotives, 5 sleeping cars, 1 official car, 9 first-class cars, 9 second-class and immigrant cars, 4 combination passenger and baggage cars, 3 baggage, mail and express cars, 361 cattle and box freight cars, 2 refrigerator cars, 237 platform cars, 69 coal cars, 8 conductors' vans, 2 tool cars, 4 snow plows, 1 flanger, 2 steam shovels, 15 dump cars.

Earnings for Jan. $35,844, against $29,330 for Jan., 1906.

The C.P.R. has issued tariff W. 902, supersideng W. 351, for the Vancouver and Lulu Island Ry., which is operated by the British Columbia Electric Ry., as agents for the C.P.R. The new tariff became effective Mar. 18.

G.T.R. Shops at Battle Creek, Mich.

The G.T.R. is building at Battle Creek general locomotive shops for the lines west of the St. Clair and Detroit rivers, which include about 1,000 miles of line and 300 locomotives, and as the present small shops are unable to handle the large power, improved facilities are imperative. The new shops are about two miles from the business district of the city, and half a mile from the present street railway terminus. They are placed on a tract of 188 acres adjacent to the present freight yard and main line tracks. The plans given herewith show only the locomotive department, but the requirements and relation of a future car department have been carefully considered, and the complete general shop layout is characterized by the following features: A midway crane of 70 ft. span, at right angles to the base line tracks, travelling through the centre of the group of buildings of both departments, will handle all the cross-yard traffic and be supplemented by a network of industrial tracks and turn-tables of standard gauge. A system of through tracks parallel to the main line will serve all departments and be connected to the main line at both ends of the shop yard. Provision has been made for 100% increase in all departments without in any way interfering with future yard traffic and without materially increasing the future travel between departments. The buildings are separated from each other by a minimum distance of 50 ft. for fire protection. There is ample yard space tributary to each building, yet the layout is not spread over an unreasonable area. An economical use has been made of the property, and a liberal provision left for the Maintenance of Way, and Bridge and Building Departments at the eastern end of the yard. The power house is centrally located, all large power consuming buildings being within 1,000 ft. It will be adjacent to the future planing mill, which, in addition to being a large power consumer, will produce a vast amount of shavings and refuse, which can easily be disposed of as fuel at a profit in the power house. A feature of the transportation facilities is the provision made for a system of mono-rail electric cranes, which will supplement the ordinary travelling crane service. In this system any or all of the regular cranes become transfer cranes, connecting with I-beam runways extending throughout the shops and yards. These runways will be installed as the plant develops, and as rapidly as the needs require.



PRELIMINARY SKETCH
BATTLE CREEK SHOPS
GRAND TRUNK RAILWAY SYSTEM
BATTLE CREEK, MICHIGAN

THE LOCOMOTIVE SHOP includes both the locomotive machine and erecting shop, as well as the boiler and tank shop, and the machine department of the latter. In order to prevent the length of the building from becoming excessive when the future extension is added, a departure from the usual proceeding has been made in placing the boiler and tank shop at right angles to the main part of the building. The building is a self-supporting steel frame structure, with brick walls and a concrete roof. The overall length is about 833 ft., and the maximum width about 185 ft. The boiler and tank shop is separated from the machine and erecting shop by a brick curtain wall, which will in a great measure prevent noises from the former shop reaching the main building. An opening is provided in this wall large enough to pass a boiler. The erecting bay is 70 ft. wide and contains 25 pits on 24 ft. centers. Locomotives will enter and leave the building from the west side and, until future extension is made, the use of turn-tables has been avoided. Each pit will be provided with compressed air, water, steam and electrical connections, while the entire shop will be served with a 120 ton crane and an auxiliary crane immediately beneath, of 10 tons capacity. Paralleling this shop is the locomotive department of the machine shop, in two aisles, one with crane service for the large machines and one without crane service containing small belt-driven tools. Above the latter is a gallery for heating fans, lavatories, locker-rooms, the tin shop and the air-brake department. Alternate columns in these two aisles will be provided with compressed air and water service connections, while on every few columns the water service connections will be extended to the roof.

THE BOILER SHOP is in the first aisle of the part of the building at right angles to the main shop. Stalls are located on 20 ft. centers, with 60 ft. of clear width between columns. Opening from this shop is the riveting tower, situated so as not to interfere with any other department, and, at the same time, conveniently located for direct service from the boiler shop crane. A 30 ton crane serves the boiler shop and a 20 ton crane the riveting tower. The boiler and tank machine shop extends throughout the next aisle and is served with a 10 ton crane, while beyond is the tank shop, of sufficient width to allow room for a tank and its frame on a single stall. A balcony for heating apparatus, lockers and toilet rooms will extend over a portion of this shop; a 20 ton and a 5 ton crane supplying

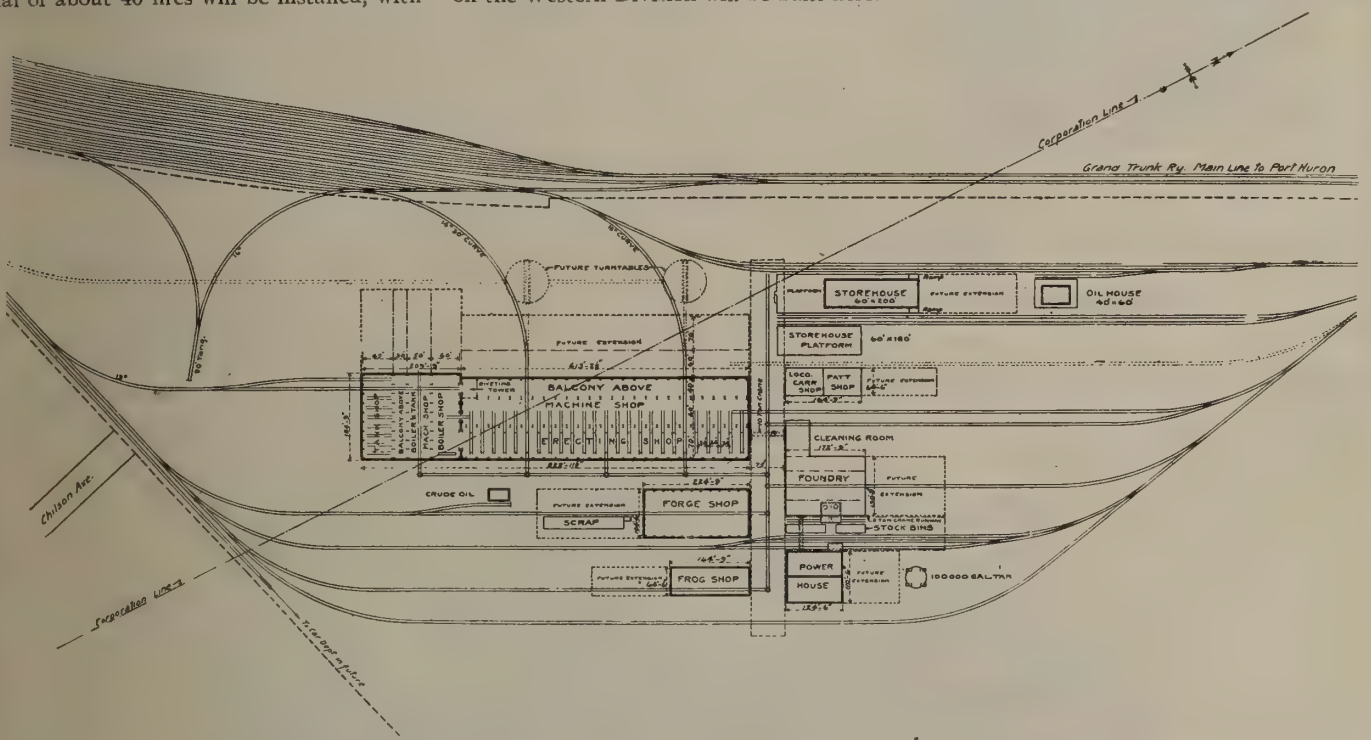
all the transportation facilities necessary. The entire building will be heated by indirect radiation, steam or hot water being used in the heaters. Fans and heaters will be located on the balconies, the hot air being distributed through a system of underground ducts with openings in the walls and locomotive pits, and through an auxiliary distributing system of galvanized iron ducts extending along the west wall of the building under the balcony. All tools throughout the building will be driven by individual motors when of sufficient size, while smaller tools will be grouped and driven by a single motor or connected with line shafting under the balcony. All wiring will be concealed, a main wiring tunnel extending throughout the building with cross ducts in each bay. Particularly good natural lighting is obtained from the large windows and from the skylights, and saw-toothed roofs.

THE BLACKSMITH SHOP is a self-supporting steel frame structure with brick walls, 105 by 225 ft. A jib crane will serve the large fires, furnaces, and the heavy tools. A total of about 40 fires will be installed, with slag can be transferred to the ash car near the power house. A system of narrow gauge tracks and turn-tables in and about the foundry will supplement the cranes. The brass foundry, 30 by 72 ft., will be located in one side of the foundry building. It will be equipped with one or more furnaces of the converter type and with other modern appliances. The cleaning room of the foundry is contained in a wing 48 by 81 ft., and this portion of the building will be served by a 5 ton crane, which will run into the main part, thus facilitating the transportation of castings to the cleaning room. The building will be a self-supporting steel structure with brick walls, a cement roof, and exceptionally good lighting. The floor will consist of a fill of molding sand on the natural soil. The equipment will be designed for an output of 20 tons a day.

THE FROG SHOP will also be of brick and steel design, of construction similar to that of the other buildings. It will be 65 by 165 ft. and will be supplied with crane service. All the frogs, switches and crossings required on the Western Division will be built here.

on the tracks at grade level. The upper floor will be surrounded by a concrete platform with inclines to grade. A fire wall will separate a room for waste from the oil service room. Oil will be handled by the most approved methods. Every precaution will be taken to have this building fireproof and its isolated position with regard to the remaining buildings gives additional protection from fire hazards.

THE POWER PLANT is designed with a view of supplying all the power necessary for operating the plant and for heating during winter, and to supply sufficient steam for all steam-driven tools, also for operating an auxiliary generating plant of 200 k.w. capacity, which will be used in emergency in the event of it being decided to purchase power, which question is now under consideration. Should the power be purchased, the necessary transforming apparatus will be installed in the power house, current being received at 5,000 volts and distributed for shop use at 440 and 110 volts alternating current and 220 volts direct current. Alternating current motors operated on the 440 volt circuit will be installed



GRAND TRUNK RAILWAY SHOPS, BATTLE CREEK, MICH.

a full equipment of steam hammers, punches and shears, bolt headers, upsetting machines, etc. The floor will be of cinders laid on tamped clay. Individual motor drive will be used on all tools that require it, while smaller tools will be grouped and driven by motors from line shafting. This building is designed to give good ventilation; a monitor equipped with swinging windows, extending the entire length of the roof. A small amount of heat will be supplied by direct radiation. This will only be used to keep the building warm over night, as the forge fires will give the required amount of heat during working hours.

THE IRON FOUNDRY has been located convenient both to the storehouse and the locomotive shop, the principal consumers of its output. A 20 ton crane reduces the manual handling of ores, ladles, castings and flasks to a minimum, while an outside crane of 5 tons capacity, running between it and the power house, will serve the charging floor. This crane will be of more utility than an elevator, as coke can be unloaded directly from cars either into bunkers or on to the charging platform; pig iron can be easily delivered to the platform and truck loads of

THE PATTERN AND LOCOMOTIVE CARPENTER SHOP will be similar to the others in design and of such construction that the pattern storage rooms will be absolutely fireproof. It will be approximately 65 by 165 ft.

THE STOREHOUSE.—In contrast with the average locomotive repair shop storehouse of semi-fireproof construction, in this case the storehouse will be absolutely fireproof throughout, of concrete construction, with brick walls, occupying 60 by 200 ft. All stores will be kept on the ground floor and the upper story reserved for the storekeeper and master mechanic's offices. The building will be liberally supplied with platform space and track facilities on each side, which will permit easy access for loading and unloading supplies while not impeding traffic between the shops and the store. The platform in front of the building extends under the yard crane, allowing materials to be easily transported.

THE OIL HOUSE will also be of reinforced concrete construction, of similar design to the storehouse, and will have one story and a basement, the latter containing the large tanks used for oil storage. These will be arranged for filling by gravity from tank cars

wherever possible, being used to drive line shafting and individual crane and machine tool motors that do not require excessive variations in speeds. Variable speed motors and a few crane motors will be run on the 220 volt direct current system, and all lights on the 110 volt line. Also if power is obtained from outside sources the capacity of the boiler plant will be governed by the amount of heat required in the various buildings in winter, and in order to heat the buildings during the coldest weather it will be necessary to install approximately 1,800 boiler horse-power. Steam will be taken from these boilers and used in connection with the blower system and distributing ducts in all the larger buildings, and then in the smaller buildings the heating will be obtained through direct radiation.

PIPING SYSTEMS.—Piping from the power house to the shops will, as far as possible, be carried on the supports of the midway crane. This obviates the necessity for a tunnel, in this case, hard to drain. Air compressors will be located in each building, furnishing the necessary air for that building, different buildings being connected through a small pipe line, which will prevent absolute

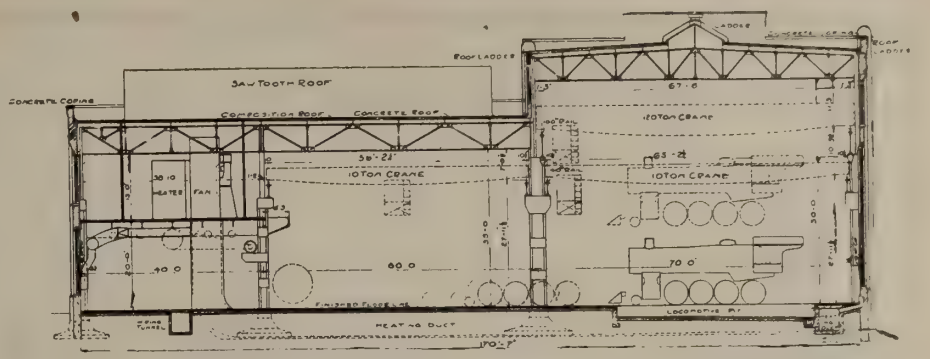
Most favorably located and best appointed hotel in the North for winter business.

shut-down in case the compressors in any particular building fail. Water for shop and boiler purposes will be taken from Battle Creek River, a pumping station with electrically driven pumps being located at the bank of the creek. This pump will force water into a 150,000 gallon tank located in the vicinity of the power house, the latter giving sufficient pressure to supply the various buildings. This tank will be divided into two portions, one of 50,000 and the other of 100,000 gallons capacity, the latter being kept in reserve in case of fire. The river pumps will be supplemented by fire pumps in the power house, which can be used on the line in case of necessity. As a supplementary water supply, connection will be made with Battle Creek city water service, it being the intention to use this supply for drinking water and for all purposes only in case the supply from Battle Creek River should fail for any reason. The water service lines will loop all the buildings, and from 40 to 50 hydrants will be placed in different parts of the yard, so that there will be no distance greater than 300 ft. between any two hydrants. Inside the buildings, hose connections will be placed every 200 ft., with a swinging hose reel and 75 ft. of hose. It is the intention at the present to discharge all sewage into Battle Creek River, with the understanding that should this sewage become objectionable at any time, it will either be treated or the system changed to discharge all the sanitary sewage into the city's sewer system.

E. H. Fitzhugh, Third Vice-President G.T.R., is in active charge of the arrangements for the entire installation, and W. D. Robb, Superintendent of Motive Power, is planning the operating features of the shops The shops will be operated under the supervision of J. F. McGrath, Master Mechanic, now in charge of Fort Gratiot shops, who is assisting Mr. Robb in selecting and arranging the tool equipment.



CROSS SECTION MACHINE AND ERECTING SHOP, G.T.R. SHOPS, BATTLE CREEK, MICH.

Railway Finance, Meetings, etc.

Alberta Ry. and Irrigation Co.—Railway earnings from July 1 to Feb. 28, $120,419; net earnings from all sources, exclusive of land sales for same period, $37,907.

Canada Atlantic Ry.—An action has been instituted in the Ontario courts by H. L. Sprague, of New York, against J. R. Booth, Ottawa, to recover $2,000,000 damages for alleged breach of contract on the sale of the Canada Atlantic Ry., and for the return of $259,000, a deposit on the contract. The action is entered by Sprague as assignee of W. Seward Webb and A. L. Meyer. In 1902-03 an ambitious scheme of railway amalgamation in Canada, with the Rutland Rd., of which W. S. Webb was President, as the U.S. connection, was one of the features of railway financing. An option was obtained on the Canada Atlantic Ry., but the project never materialized, and there has been a good deal of litigation as a result of the different operations of the parties to the contract.

Dominion Atlantic Ry.—Earnings for Jan. $68,800, against $63,400 for Jan., 1906. Earnings for Feb. $59,200, against $54,067 for Feb., 1906. Total for two months ended Feb. 28, $128,000, against $117,400 for same period 1906.

Grand Trunk Pacific Ry.—A recent London, Eng., cable states that only 70 per cent. of the last issue of 4% debenture stock was taken up.

Inverness Ry. and Coal Co.—The report for the year ended 1906 shows a decrease of 10,582 tons of coal shipped, but the net loss in money is not given. The railway for the year shows net earnings of $42,079.40.

New Brunswick Ry. and Coal Co.—The report of the Commissioners for the year 1906 as presented to the New Brunswick Legislature Mar. 3 showed: total earnings, $43,196, against $37,031 in 1905 and $25,387 in 1904. The net earnings were $2,345, against a deficit of about $6,000 in 1905, and $14,000 in 1904. The statistics showed: Freight carried, 38,731 tons, 31,336 tons being coal, against 25,917 tons, 18,318 tons being coal, in 1905; passengers carried, 13,940, against 10,836 in 1905. Additional rolling stock is required, the 46 cars which the line possesses being unable to carry the freight offering. The company had been offered contracts to supply 73,000 tons of coal during the current year.

Pere Marquette Rd.—The suits instituted by W. A. Bradford respecting the Chicago, Cincinnati and Louisville Rd., have been compromised, and the way partially cleared for the ending of the receivership of the Cincinnati, Dayton and Ohio Rd., and the P. M. Rd.

Quebec Central Ry.—The London Stock Exchange has granted an official quotation for a further issue of 1,000 shares of £25 fully paid.

Temiscouata Ry.—The net earnings for the year 1906 amounted to $40,165.

Toronto, Hamilton and Buffalo Ry.—Earnings for Feb. $55,358.02, against $54,025.13 for Feb., 1906.

White Pass and Yukon Ry.—Gross earnings for 1906, $1,629,952. Earnings for Jan., $13,800.

Misuse of the 24-Hour System.

H. W. D. Armstrong, M. Can. Soc. C.E., wrote from Saskatoon, Sask., Feb. 15: "Allow me to draw attention to what appears to me a misuse of the 24-hour system of time, as given in many railway time bills. It is not unusual to find something like the following:

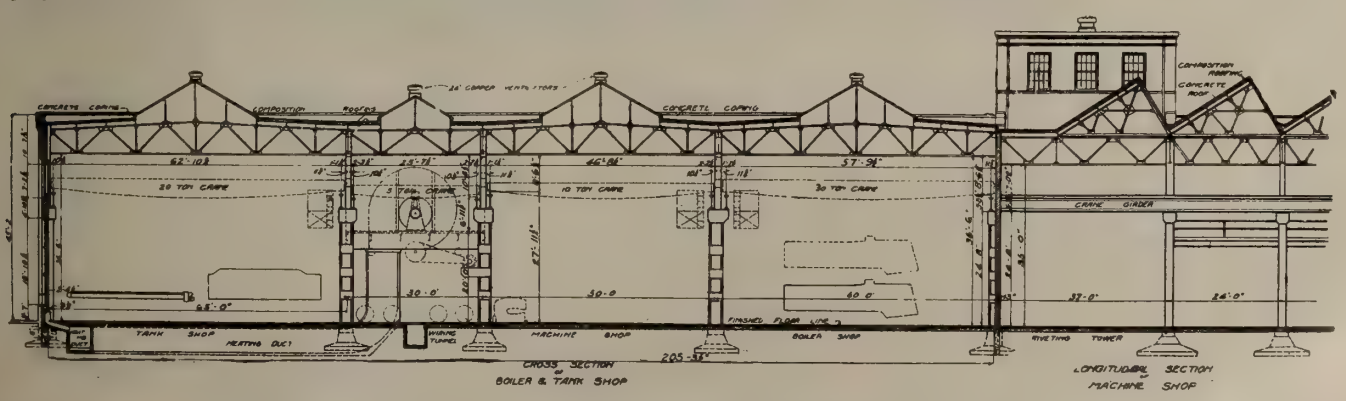
"'This time bill will take effect at 24.01 on Saturday, February 16.' When does that minute arrive? This being written at 15 o'clock on Friday, the 15th nine hours from now will be 24 o'clock on Friday, the 15th, and the day and date is ended.

"Now the notice of change in time bill given above is probably intended to take effect at one minute after midnight to-night. Certainly the one minute belongs to date 16th, but not the hour 24; because 24 o'clock on Saturday, the 16, does not arrive until to-morrow night, and we have the hour belonging to one date and minute belonging to another used together.

"It seems to me that when 24 o'clock arrives, the date and day terminate. Any time desired to be noted up to 1 o'clock following should be expressed as 0.01, 0.05, etc., and the notice first mentioned should read: 'This time bill will take effect at 0.01 on Saturday, Feb. 16.'

"I have spoken to different railway managers and superintendents on the subject, but so far have failed to find any to admit the error which I have endeavored to explain.

The Nova Scotia Government is taking power at the current session of the Legislature by an amendment of the Railway Act, to, reduce, alter, vary or change the tariffs of rates submitted to it for approval by the railway companies subject to provincial control.



GRAND TRUNK RAILWAY SHOPS, BATTLE CREEK, MICH.

HOW AMBITIOUS RAILROAD MEN GAIN ADVANCEMENT

Wm. Malthaner

There are hundreds of railroad men drudging along to-day in poorly paid positions who could better themselves by the mere stroke of a pencil if they would but muster up enough determination. An institution that has enabled thousands of men to secure promotion stands ready to qualify any ambitious railroader for a better position and better earnings in his spare time, and at his own home.

The case of William Malthaner, of Green Island, Troy, N.Y., shows the results we accomplish. Mr Malthaner was an apprentice when he started on the I.C.S. road to success. We enabled him to become division master mechanic of the Delaware and Hudson R.R., and to increase his earnings from 80 cents per day to more than $2,500 per year. Joseph Gasselin, 80 Fleurie St., Quebec, was enabled to advance from a locomotive firemen and become a locomotive engineer, and to increase his earnings from $50 and $75 per month to $100 and $125 per month. J. O. Montreuil, 22 Maple Ave., Quebec, through the I.C.S., rose from an assistant engineer to resident engineer for the Trans-Continental Railway, and increased his earnings from $43 to $160 per month. J. R. Trepanier, 136 Queen St., Quebec, formerly a wiper, is now instructor in train rules, and is earning $75 per month more than when he enrolled in the I. C. S.

Would **YOU** accept a better position and increased earnings if they were offered you? Are you willing to investigate the quickest, easiest, and surest way in the world to secure them. Then mark and mail the accompanying coupon. To do this much costs you nothing. Don't put it off until to-morrow. Do it now.

HOTEL TRAYMORE

ATLANTIC CITY, NEW JERSEY

OPEN ALL THE YEAR

To the original hotel has been added a ten-story fireproof addition, equipped throughout with the most improved sanitary plumbing, steam heating and electric lighting. The sleeping rooms are spacious, light and airy, private bath with hot and cold fresh and salt water connecting each. The building is modern in every respect, each room affording an unobstructed view of the ocean, and the furnishings will be unsurpassed in the point of richness and comfort. Capacity, 600.

D. S. WHITE
PRESIDENT

Traymore Hotel Company
CHAS. O. MARQUETTE - MANAGER

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

R. S. Rider has been appointed Secretary-Treasurer Canadian Steel and Wire Co., Hamilton, Ont., succeeding the late A. B. Manship.

H. A. Norton, who recently returned from a trip around the world in the interest of Norton jacks, has again sailed for Europe to be away three months.

The Dominion Bridge Co. is seeking for permission from the Toronto City Council to instal forges for breaking rivets and blacksmith work on Sorauren Ave.

The St. Thomas Brass Co., Ltd., has passed a by-law authorizing it to hold its meetings without the Province of Ontario, which has been confirmed by supplementary letters patent under the Ontario Companies' Act.

The Bowser Business Boomer is issued twice a month by S. F. Bowser and Co., 66 Fraser Avenue, Toronto, oil tank manufacturers, in the interest of their selling force. The Feb. 20 issue contains a primer for salesmen, which has lots of good points in it.

All Hart-convertible cars, the patents for the construction of which in Canada are owned by the Dominion Dump Car Co., Montreal, to be built during 1907, will be of the improved type, the hopper door opening being 26 in. Other improvements will also be made in the cars.

The Montreal Steel Works, Ltd., directorate for the current year is as follows: President, K. W. Blackwell; Vice-President, J. R. Wilson; Second Vice-President and Secretary-Treasurer, C. H. Godfrey; Assistant to the President, W. F. Angus; other director, C. Scott, Jr., Philadelphia, Pa.

The Rail Joint Co. of Canada, Ltd., has been organized and taken over the patents and business of the Continuous Rail Joint Co. of Canada Ltd. Headquarters, 216 Board of Trade Building, Montreal. It has commenced the manufacture of its products in Canada, and is prepared to make prompt deliveries.

The American Locomotive Co. has issued a pamphlet illustrating and describing light locomotives, both steam and compressed air, adapted for the use of contractors, mines, logging roads, plantations and industrial plants, and for a wide range of service on light rails and poor roadbed. It contains illustrations of different designs and types and tables of the principal dimensions of designs of progressive weights and hauling capacities of the types illustrated. Engineering data and a number of useful tables and formulæ are also given.

Wireless Telegraphy.—A. E. Kennelly, Professor of Electrical Engineering, Harvard University, Cambridge, Mass., has issued an elementary treatise on wireless telegraphy. In popular language he presents the known facts concerning the nature and operation of wireless telegraphy in general without special reference to the inventors of any particular system. The relation between wire and wireless telegraphy is the line of development adopted, and this comparison of conditions throws considerable light on both systems. The publishers are Moffatt, Yard & Co., New York.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Bangor and Aroostook Rd.—Plans have been filed with the Maine State authorities, showing the location of an extension from West Seebois to the junction of the Allagash and St. John Rivers, near the Canadian boundary. This point is near the terminus of the line for which the Northern Rd. is seeking authority to construct at the current session of the Maine Legislature. See Northern Rd.

Bellingham Bay and British Columbia Rd.—J. Howard, President Western Fuel Co., Nanaimo, B.C., has been elected Vice-President of the B.B. and B.C. Rd., The company proposes to expend $2,000,000 upon development work in order to increase the coal trade between Nanaimo and points in the U.S., reached over its railway.

Bracebridge and Trading Lake Ry.—Following are the officers for the current year President, W. W. Kinsey; Vice-President, P. Hutchison; Managing Director, W. H. Brown; Secretary-Treasurer, R. P. Perry; Solicitor, T. Johnson. F. C. Norris was present at the annual meeting which was held at Bracebridge, Ont., Mar. 11. It was again stated that work will be commenced upon construction on an early date, and that the line will be built this year.

Eastern Townships Ry.—P. Tourigny, Victoriaville, Que.; N. Rosseau, P. Desilets, Ste. Clothilde de Horton, Que.; E. Vigneau, St. Samuel de Horton, Que.; L. R. Levergne, Arthabaska, are the provisional directors named in the act incorporating a company with this title, which is being considered by the Dominion Parliament at its current session. Authority is being asked to construct a railway from St. Leonard, crossing the Nicolet River to the junction of the Quebec Central Ry. and the Maine Central Rd., in Wolfe county, and to enter into agreements for any purpose with the G.T.R., the Quebec Contral Ry., or the Maine Central Rd.

Edmonton, Dunvegan and British Columbia Ry.—J. B. MacDonald, Winnipeg; J. A. Sandgreen, Edmonton, Alta.; C. Pringle, Ottawa; D. McLeod, T. G. Gallagher, Spokane, Wash., are the provisional directors of a company for which an act of incorporation is being asked at the current session of the Dominion Parliament. Power is being asked to construct a railway from Edmonton, Alta., to Dunvegan, thence along the Peace River Valley to the Parsnip River, B.C., and along that river to Fort George, B.C.

Great Northern Ry. (U.S.) in Canada.—Jas. Fisher, K.C., stated at Winnipeg, Mar. 2, that there had been no change in the company's plans regarding that city. The line from the boundary into the city will for a considerable distance parallel the C.P.R. Press reports from Winnipeg state that survey parties are now in the field for a railway from Winnipeg to Dawson, Yukon, and a line also to Hudson Bay. One report states that the surveys are being made for the G.N. Ry., and another states that they are being made in the interests of the Northern Pacific Ry. Another report states that the Hudson Bay line is to be run on to Chicago, the main object being the carriage of fish. (Mar., pg. 159.)

Halifax and Northeastern Ry.—The Lieut.-Governor, in his speech at the opening of the Nova Scotia Legislature, expressed regret that the company had been found unwilling to enter into a contract on the terms of the present legislation. The survey parties have been disbanded and it is understood that the company has abandoned the project. The question of the construction of the line as a Government work is being discussed in the Legislature.

Huntsville and Lake of Bays Ry.—A clause has been inserted in the Ontario Railway Act, making the provisions of the same apply to the H. and L. of B. Ry.

Intercolonial Ry.—The Halifax, N.S., Board of Trade is petitioning the Government to extend the I.C.R. along the water front there to the foot of Morris St.

A contract has been let to Rhodes, Curry & Co., Amherst, N.S., for the erection of some buildings in connection with the new roundhouse at Halifax, at a cost of about $80,000. (Mar., pg. 161.)

International Ry. of New Brunswick.—A bill is under consideration at the current session of the N.B. Legislature authorizing the Government to guarantee the company's bonds to the extent of $8,000 a mile for the entire line. The line is projected from Campbellton across the province to St. Leonards, 110 miles, where connection would be made with U.S. railway lines. Under the provisions of a previous act, the Legislature authorized the guarantee of bonds at the rate of $5,000 a mile upon the first 50 miles of line. At present there has been constructed 33 miles and it is expected to have the 50 miles completed this summer. The cost of construction has been heavier than was anticipated, hence the application for the increased subsidy guarantee. The estimated cost of the line, as certified by the Chief Engineer of the Government Railways, is $27,339 a mile. T. Malcolm, the contractor, stated to the Legislature that arrangements were in progress which would enable work to be started at an early date at both ends of the line.

Kettle Valley Lines.—It is reported from Spokane, Wash., that the company has secured practically the whole of the right-of-way required for the extension of its line from Republic to Spokane. W. T. Beck, the President, is reported to have received instructions to start construction work as soon as weather conditions will permit. (Mar., pg. 161.)

Newfoundland-Canada Tunnel.—In connection with the proposal to operate a 20-knot steamship service between Newfoundland and the west coast of Ireland, it is proposed to construct a tunnel under the Strait of Belle Isle, and to establish railway connection between a proposed line through Labrador and the Newfoundland Ry. The promoters are given eight years in which to carry out the tunnel part of the project, but the steamship line is to take shape within two years.

Nipissing Central Ry.—J. W. Fitzpatrick, Ottawa; G. F. Duncan, Portland, Me.; B. F. Pearson, Halifax, N.S.; A. G. Browning, North Bay, Ont.; H. L. Dunn, Toronto; G. Taylor, New Liskeard; J. J. Whipple, Brocton, Mass., are the provisional directors named in the bill before the Dominion Parliament at its current session, incorporating a company with this title. It is desired to have authority to construct railways from Latchford on the Temiskaming and Northern Ontario Ry., through the Cobalt district, northerly to Wendigo Lake and the G.T. Pacific Ry.; from Latchford via the Montreal River to the G.T. Pacific Ry, with a branch from New Liskeard to Wendigo Lake; and other branches.

Northern Rd.—The Maine Legislature has been asked to pass an act incorporating a company with this title to construct a railway from the present terminus of the Bangor and Aroostook Rd. near Fort Kent, to the junction of the St. John and the St. Francis Rivers, and also from Fort Kent to Frenchville, Madawaska, Grand Isle and Van Buren. These projected lines will run along the St. John Valley between Van Buren and the junction with the St. Francis River, and will connect the two lines of the B. and A. Ry., now terminating at Van Buren and Fort Kent,

respectively. The portion of the line from Fort Kent to the St. Francis River will parallel the St. Francis branch of the Temiscouata Ry. The incorporators of the new company are: A. H. Lewis, Chicago, Ill.; E. E. Goodrich, Waterville, Me.; V. E. Therrault, Fort Kent, Me.; P. Therrault, Grand Isle, Me.; E. R. Michaud, Frenchville, Me. See also Bangor and Aroostook Rd.

Prince Edward Island Ry.—Tenders are under consideration for the construction of an extension of the wharf at Souris, P.E.I.

Prince Edward Island Tunnel.—The question of the construction of a tunnel connecting P.E.I. and the mainland was discussed in the House of Commons recently. The Island representatives desired to have all correspondence, reports, etc., on the subject brought down, and this was agreed to. Sir Wilfrid Laurier stated that the Government was now being called upon for so many other works of public importance that it could not go further at present.

Quebec and Lake St. John Ry.—A deputation representing various interests waited on the Quebec Government, Mar. 7, and asked that provincial aid be extended to the company to enable it to construct a railway from Roberval to the Chibougamon mining district, and on to James Bay. The delegation asked either a guarantee for 20 years of the interest at 4% on $15,000 a mile for the whole distance of 420 miles between Roberval and James Bay—400 miles of main line and 20 miles of branch—and the extension of the land grant of 4,000 acres a mile from the present 30 miles to the whole 420 miles, or, failing all this, a larger land grant for the whole 420 miles.

Quebec Central Ry.—The Dominion Government has entered into a contract with the Q.C. Ry., by which a subsidy on the usual statutory conditions as to amount, etc., will be paid for the construction of a line from St. Francis to St. George, Que., 52.80 miles. The company has purchased the Russell property at Levis, Que., upon which it will erect workshops and coal chutes. (Mar., pg. 161.)

Quebec, Montreal and Southern Ry.—The Quebec Government has promised favorable consideration to an application for a subsidy for an extension of the company's line to Levis. We have been advised that the estimates for the construction of the 40 miles of line from the end of the present contract to the Quebec bridge have not been completed, and it has not yet been decided when tenders for this distance will be asked. (Mar., pg. 161.)

Sydney and Louisbourg Ry.—The Dominion Coal Co., in its annual report for 1906, refers to the opening up of two new mines in the Luigan district, which will necessitate the construction of a branch line to connect them with the S. and L. Ry. The line has been located and its construction is expected to be started early in the spring.

Temiskaming and Northern Ontario Ry.—A survey party is engaged in looking for a route for a branch from the main line near Englehart to Larder Lake, Ont., about 20 miles.

A contract has been let to McRae, Chandler and McNeil, for the construction of about 40 miles of line from the end of the Macdonnell contract to a junction with the G.T. Pacific Ry. A contract for the station buildings on the extension has been given to O'Boyle Bros., Sault Ste. Marie, Ont. (Mar., pg. 163.)

Thurlow Ry.—Application is being made at the current session of the Ontario Legislature for an act incorporating a company with this title, for the purpose of constructing a railway from a junction with the G.T.R. in Thurlow tp., Hastings county, Ont., to the Bay of Quinte; with authority to connect with other railways, and to acquire and operate all railway tracks, sidings, wharves and other property belonging to the Lehigh Portland Cement Co. H. H. Macrae, Toronto, is solicitor for the applicants.

Toronto Elevated Ry.—The provisional directors named in the application for an act of incorporation to be granted by the Dominion Parliament were: M. J. Adams, J. H. L. Knight, S. R. Wickett and J. M. Sinclair, Toronto. The House of Commons has declined to grant the charter. (Mar., pg. 163.)

Toronto, Hamilton and Buffalo Ry.—A proposal for the construction of a switch 1½ miles long, at Brantford, Ont. to open up sites for industrial plants is under consideration. The T., H. and B. Ry. will construct the switch if the city will provide the right-of-way.

Toronto Eastern Entrance.—The Board of Control had before it, Mar. 19, plans showing routes for railways entering the city from the east, differing from those shown on the plans submitted to the Government by the Canadian Northern Ontario Ry., the C.P.R. and the G.T.R. The tracing submitted show several possible routes, two of which, however, do not escape cutting up the beaches and through the residential district, which was the principal ground of objection to the railway companies' plans. The gradient on these two routes is 5-10 of 1% rising southward. A route along the Don valley, with a ¾ of 1% gradient eastwards, and 6-10 of 1% gradient westwards, is shown as an alternative to the proposed route of the Canadian Northern Ontario Ry. from Ottawa. Other routes shown are short lines, necessary to connect up different sets of tracks, so as to secure a common entrance. The City Engineer has expressed an opinion that it is impossible to secure a route for a single entrance that would be suitable to all the companies.

Vancouver and Coast-Kootenay Ry.—The applicants have intimated their intention of not proceeding further with their petition for an extension of time for the construction of this projected railway, at the current session of the Dominion Parliament. The bill has, therefore, been withdrawn.

Vancouver, Victoria and Eastern Ry. and Navigation Co.—Grading is reported to have been completed from Midway to Keremeos, 96 miles, and track has been laid from Midway, B.C., to Oroville, Wash., 56 miles, and from Oroville to the crossing of the Similkameen River, eight miles. The line is being operated to Oroville. It is expected to let contracts for the construction of the line from Keremeos to Princeton during the summer.

Vancouver, Westminster and Yukon Ry.—The bridge which the V., W. and Y. Ry. will construct at the Second Narrows, Vancouver, B.C., will be 22 ft. above the C.P.R. tracks, and 50 ft. above the water level, and the swing span will allow a clear space of 150 ft. on either side.

Wolfe, Megantic and Lotbiniere Ry.—The right-of-way for this projected railway from Lime Ridge to the Quebec Bridge is reported to have been secured and negotiations are pending with the Lotbiniere and Megantic Ry. to construct the line. W. H. Lamby, Inverness, Que., is Secretary.

Yonge St. Bridge, Toronto.—The Railway Committee of the Senate having amended the Toronto City Council bill respecting the construction of the Yonge St. Bridge, by striking out the section respecting the contribution to the cost by the railway companies, the city withdrew the bill.

The Lord's Day Act, a summary of the provisions of which relating to transportation companies was given on pg. 477 of our Aug., 1906, issue, went into effect Mar. 1.

Railway Rolling Stock Notes.

The Temiskaming and Northern Ontario Ry. has received four first-class cars from the Crossen Car Manufacturing Co., Cobourg, Ont.

The C.P.R., between Feb. 14 and Mar. 14, placed orders for 10 passenger locomotives and six dining cars at its Angus, Montreal, shops.

The G.T.R. has completed its tests of a smoke consuming device at the Toronto yards, and is considering fitting it to all its shunting engines.

The Dominion Coal Co.'s balance sheet for the year ended Dec. 31, 1906, shows a liability of $265,413.46 Dominion Rolling Stock debentures, against $229,908.16 on Dec. 31, 1905.

The Central Ontario Ry. has increased its order for locomotives placed with the Canadian Locomotive Co., Kingston, Ont., from two to four. General specifications were given in our March issue, pg. 165.

The Canadian Northern Ry. has received 15 cabooses from the Crossen Car Manufacturing Co., Cobourg, Ont., and two 10-wheel freight locomotives and one switching locomotive from the Canada Foundry Co., Toronto.

The Intercolonial Ry. has turned out from its Moncton shops the parlor car Dufferin, which has been remodelled, a sleeping car, which has been refitted and provided with additional berthing accommodation, and several first-class cars which have been generally overhauled.

The J. D. McArthur Co., Ltd., contractors on the G.T. Pacific Ry., have ordered from the Dominion Dump Car Co. 20 Hart-Convertible ballast cars, 34 ft. long, 9 ft. wide, inside dimensions; 80,000 lbs. capacity, and similar to those previously sold to the G.T.P Ry. The cars are being built by the Canada Car Co., Montreal.

The Intercolonial Ry., between Feb. 18 and Mar. 15, placed orders for the following rolling stock: 100 box cars, 60,000 lbs. capacity; 70 dump cars, 130 hopper cars, 30,000 lbs. capacity, and five refrigerator cars, 60,000 lbs. capacity, with Rhodes, Curry & Co., Amherst, N.S.; one dining car and one sleeping car, in the United States.

The C.P.R., between Feb. 14 and Mar. 14, received 10 passenger and freight locomotives from the Locomotive and Machine Co. of Montreal; 20 steel coal cars and 29 steel ore cars from the Dominion Steel Car Co., Montreal; two switching locomotives, two freight locomotives, 11 first-class cars, 21 colonist cars, 422 box cars, 138 flat cars, from its Angus, Montreal, shops; and four vans from its Farnham, Que., shops.

The Intercolonial Ry., between Feb. 18 and Mar. 15, received the following rolling stock: Three snow plows, two box cars 60,000 lbs. capacity, and six dump cars, from Rhodes, Curry & Co., Amherst, N.S.; five consolidation freight locomotives from the Canadian Locomotive Co., Kingston, Ont. The dump cars are of the Dominion Dump Car Co.'s Hart-Convertible type, 34 ft. long and 9 ft. wide, inside measurement, and 40 tons capacity. Extra 2 ft. removable sides are provided to be used when the cars are placed into the coal service.

The Canadian Northern Ry. has built a business car, no. 18, in its Winnipeg shops for the use of Superintendent Cameron in district 1. Comfort and convenience are the principal objects rather than elegance and luxury. It is 36 ft. 10 ins. long over sills by 9 ft. 10½ ins. wide, with extension platforms at both ends. The width over all is 10 ft. 2¾ ins.; height of sill to plate, 6 ft. 8½ ins., and height—over all—bottom of sill to roof 10 ft. 7 ins. The interior is

arranged with kitchen, stateroom and combined dining room, observation room and office. The interior equipment consists of kitchen with all necessary cupboards, lockers, refrigerator, etc., hot and cold water range, also attendant's berth. It has a stateroom, and an observation and office end. A speed recorder and air pressure gauge is brought up through the floor along the rear wall. Light is furnished by oil bracket lamps, and heating by Baker heater located in passage. Observation room end has large plate glass windows, and door opens into extension observation platform. The exterior is finished in standard C.N.R. color. The car is equipped with Westinghouse air brakes and 4-wheel trucks. It is said that this is the first passenger car built in Western Canada.

The Temiskaming and Northern Ontario Ry. has placed an order with the Locomotive and Machine Co. of Montreal, for six 4-6-0 class locomotives for delivery in Nov. Following are the specifications:

CYLINDER.—Type, piston; diameter, 19 in.; stroke, 24 in.

TRACTIVE POWER.—Pounds, 25,800

WHEEL BASE.—Driving and rigid, 13 ft. 6 in.; total, 23 ft. 8 in.

WEIGHT.—In working order, on drivers, 112,000 lbs.; total, 144,000 lbs.

HEATING SURFACE.—Tubes, 1,693 sq. ft.; firebox, 139 sq. ft.; total, 1,832 sq. ft. Grate area, 30 sq. ft.

AXLES.—Driving journals, main and others, 8½ by 10 in.; engine truck journals, 5½ by 10 in.; tender truck journals, 5 by 9 in.

BOILER.—Extension wagon top; outside diameter first ring, 58¼ in.; working pressure, 200 lbs.

FIREBOX.—Type, narrow; length, 103 in.; width, 42 in.; thickness of crown, ⅜ in.; tube, ½ in.; sides and back, ⅜ in.; water space—front, 4 in.; sides and back, 3½ in.

CROWN STAYING.—Radial, 1 in. diameter.

TUBES.—Number, 239; diameter, 2 in.; length, 13 ft. 2 5-16 in.; gauge, 12, B.W.G.

ENGINE TRUCK.—Four-wheel swing bolster.

GRATES.—Style, cast iron rocking.

TENDER.—Frame, 10 in. steel channels; tank, U-shape with gravity slides; capacity 5,000 imp. galls. water, 10 tons coal.

VALVES.—Piston; travel, 5¾ in.; steam lap, 1 in.; setting, 1-16 lead in full gear.

WHEELS.—Drivers—diameter outside tire, 57 in.; centres, 50 in.; materials, cast steel. Others, cast steel. Engine truck wheels, 28 in. diameter, cast iron steel tire; tender wheels, 33 in.; cast iron steel tire.

BRAKE.—Driver, Westinghouse American; tender, Westinghouse; air signal, Westinghouse

The Toronto, Hamilton and Buffalo Ry. has ordered a 4-6-0 class locomotive from the Locomotive and Machine Co. of Montreal, the specifications for which include:

CYLINDER.—Type, simple slide; diameter, 20 in.; stroke, 26 in.

TRACTIVE POWER.—Pounds, 24,200.

WHEEL BASE.—Driving, 15 ft. 10 in.; rigid, 15 ft 10 in.; total engine, 26 ft. 10 in.; total engine and tender, 57 ft. 6 in.

WEIGHT.—In working order, 183,240 lbs.; on drivers, 139,675 lbs.; total engine and tender, 294,440 lbs.

HEATING SURFACE.—Tubes, 2,631.6 sq. ft.; firebox, 159.5 sq. ft.; total, 2,791.1 sq. ft.; grate area, 46 sq. ft.

AXLES.—Driving journals, main and others, 9 by 12 in.; engine truck journals, 6 by 10 in.; tender, 5 by 9 in.

BOILER.—Type, extension wagon top; outside diameter first ring, 66⅜ in.; working pressure, 200 lbs.

FIREBOX.—Type, wide; length, 101¾ in.; width, 65¼ in.; thickness of crown, ⅜ in.; tube, ½ in.; sides ⅜ in.; back, ⅜ in.; water space, 4 in.

CROWN STAYING.—Radial, 1⅛ in. diameter.

TUBES.—Material, steel; number, 336; diameter, 2 in.; length, 15 ft. 0½ in.

GRATE.—Rocking in four sections; material, cast iron.

ENGINE TRUCK.—Four-wheel centre bearing, with 3 point hanger and wrought iron swing frame.

TENDER.—Frame, 10 in. steel, channels and plates; tank, U-shaped, with gravity slides; capacity, 5,500 U.S. galls. water, 9 tons coal.

VALVES.—Type, Richardson balanced; travel, 5½ in.; steam lap, 1⅛ in.; setting, 3-16 in. lead constant.

WHEELS.—Drivers—outside tire, 73 in.; centres, 66 in.; materials, cast steel. Others, cast steel. Engine truck, 33 in. diameter, cast iron spokes, steel tire. Tender, 33 in. diameter, cast iron chilled, 70 lbs.

BRAKES.—Driver and truck, Westinghouse American Combination; tender, Westinghouse; air signal, Westinghouse.

MAINLY ABOUT PEOPLE.

F. W. Foster, C.P.R. passenger agent at Bristol, Eng., spent some time in Montreal recently.

G. Renton, travelling engineer G.T.R., London, Ont., was killed in a recent collision on the G.T.R. there.

R. Miller, C.P.R. station master, Windsor St. station, Montreal, has returned to duty after a trip to Europe.

G. Spencer, C.P.R. Superintendent North Bay, Ont., has recovered from a serious attack of pneumonia.

The engagement is announced of R. W. Robb, of the Robb Engineering Co., Amherst, N.S., to Miss M. Pugsley.

W. Harty, M.P., President Canadian Locomotive Co., Kingston, Ont., is mentioned as a likely appointee to the Senate.

Sir Wm. C. Van Horne returned to Montreal, Mar. 8, from Cuba, where he had been in his capacity as President of the Cuba Co.

B. R. Hepburn, shipowner, Picton, Ont., was slightly injured in an accident on the New York Central Rd., at Tivoli, N.Y., Mar. 5.

T. F. Griffin, who was at one time largely engaged in the car wheel trade in the U.S. and Canada, died at Chicago, Ill., recently, aged 80.

Miss E. Strevel, second daughter of G. Strevel, railway contractor, Winnipeg, was married to F. A. Connor, Portage la Prairie, Man., recently.

W. Jarman, who was for 40 years G.T.R. ticket agent in the old Union Station, Toronto, and Mrs. Jarman, celebrated their golden wedding recently.

Hon. J. S. Hendrie, Hamilton, Ont., has been elected President of the Canadian Artillery Association, at its annual meeting in Ottawa, Feb. 28.

F. A. Goss, heretofore city passenger and ticket agent, Delaware, Lackawanna and Western Rd., Buffalo, N.Y., has resigned to engage in private business.

N. J. Hopkins, who died at Owen Sound, Ont., Mar. 5, was the inventor of a car coupler which received high commendation at the Chicago Exposition.

John Macdonald, lumberman, who died at Lindsay, Ont., Mar. 1, carried out several contracts on the C.P.R., in British Columbia, between 1884 and 1887.

H. T. Jaeger, General Eastern Agent, Passenger Department, Erie Rd., Buffalo, N.Y., died there Mar. 20, aged 45, after an operation for appendecitus.

C. P. Sclater, Secretary-Treasurer Bell Telephone Co. of Canada, died in Montreal Mar. 24, of pneumonia. He was born in Dover, Eng., and was aged 57.

Hon. J. B. Snowball, Lieutenant-Governor of New Brunswick, who died suddenly in Fredericton, Feb. 27, constructed the Chatham branch of the Intercolonial Ry.

J. Merrin, who started engine driving on the East Lancashire Ry., England, in 1846, and entered the G.T.R. service in 1857, died at Kingston, Ont., Mar. 9, aged 76.

W. W. Jackson, G.T.R. roadmaster Sarnia branch, was presented with a gold watch and chain Feb. 26, on leaving the company's service to go to Medicine Hat, Alta.

G. N. Bowman, formerly mechanical accountant in the G.T.R. offices, St. Thomas, Ont., who has resided for the past six years at Vancouver, B.C., died there recently.

W. McNab, Assistant Engineer G.T.R., delivered a lecture before the Nomads Club of Montreal, Mar. 13, on the principles and practice of locating a great railway line.

J. H. Howden has been appointed Minister of Railways in the Manitoba Government. It is proposed to give him charge of the provincial telegraph and telephone lines later on.

J. G. Farmer, Hamilton, Ont., has been appointed solicitor to the Ontario Railway and Municipal Board, succeeding C. C. Robinson, who died at Toronto, Mar. 2, somewhat suddenly.

Capt. H. A. Rogers, Royal Engineers, son of Lieut.-Col. H. C. Rogers, Peterborough, Ont., has been appointed Inspector of Prisons in England and Wales by the Imperial Government.

C. J. Panser, C.P.R. roadmaster, was presented with an address by the road employes, on the occasion of his recent transfer from the Souris branch to the Winnipeg Beach and Teulon lines.

Mrs. Scott, who died at St. Thomas recently, aged 87, was the widow of Wm. Scott, Chief Engineer in charge of the construction of the old Great Western Ry. between London and Windsor, Ont.

J. D. Warde, who recently resigned his position in the Provincial Secretary's Department, Toronto, has been appointed Secretary-Treasurer of the Canada Railway News Co., Toronto.

G. M. Mullins, who has left the G.T.R. local freight office, Toronto, to join the Costa Rica Northern Ry. staff at San Jose, Costa Rica, was presented with a travelling bag by the G.T.R. staff, Mar. 1.

A. G. Peden, who died at Ottawa, Mar. 6, aged 68, was Superintendent of the old Ottawa and Prescott Ry., and subsequently auditor Canada Atlantic Ry. He retired from active work in 1900.

D. D. Mann, of Mackenzie, Mann & Co., Ltd., and A. W. Mackenzie, Treasurer Canadian Northern Ry., are provisional directors of the Toronto Hunt, Ltd., which has just been incorporated.

W. M. Kirkpatrick was entertained at dinner by representative freight men of Montreal and other places, Feb. 27, on leaving to take up his new duties as General Freight Agent, C.P.R., at St. John, N.B.

Sir C. Rivers Wilson, President G.T.R., has recovered from a severe attack of la grippe. He is expected to pay his annual visit to Canada, in company with Lady Wilson, during the current month.

R. Reid, one of the members of the National Transcontinental Ry. Commission, has served notices in an action for libel against the London, Ont., Free Press, arising out of some comments made upon a purchase of envelopes for the Commission.

N. S. Dunlop, Tax and Insurance Commissioner and Claims Adjuster, C.P.R., was among the injured in the accident near Mountain, Ont., Mar. 1. He was able to leave the hospital Mar. 6, and left Montreal Mar. 20, for Florida.

Jas. Gillespie, who died at Winnipeg recently, was a meat contractor during the C.P.R. construction and was interested in the construction of the line from Winnipeg to St. Laurent, Man., which was intended to be an outlet to Hudson Bay.

W. B. Leather, civil engineer and architect, died at St. Catharines, Ont., recently, aged 86. He was engaged on the Intercolonial Ry., and on the G.T.R. in Canada, and prior to retiring in 1896, was employed on the Atchison, Topeka and Santa Fe Rd.

J. D. Maclennan, C.E., of Cleveland, Ohio, who died in New York, Mar. 1, was a son of R. Maclennan, C.E., Toronto, and was engaged on the engineering staff of the C.P.R., and in contracts with Jas. Conmee on the C.P.R. during the construction period.

J. D. Beatty, for many years Secretary-Treasurer of the Northwestern Transportation Co., when it was known as the Beatty Line, and latterly President Sarnia Street Ry., was among those injured in the recent accident on the G.T.R. near Guelph, Ont.

CORISTINE BUILDING, - - - MONTREAL.

M. C. Roach, who resigned his position as Assistant General Passenger Agent, New York Central and Hudson River Rd. recently, had been engaged with that company since 1873, with the exception of three years, 1881-84, when he was Western Passenger Agent, C.P.R.

L. B. Archibald, Superintendent Dining and Pullman Cars, Intercolonial Ry, attended the recent convention of the Association of Superintendents of Railway Dining Car Service of America, held at Louisville, Ky. He acted as President of the Association during the past year.

Alex. Gibson, Marysville, N.B., the builder and owner of the Canada Eastern Ry., recently sold to the Intercolonial Ry., has recovered from a severe attack of pneumonia. Considerably anxiety was felt as to his condition early in March, owing to his having reached his 87th year.

H. Sutherland, Executive Agent, Canadian Northern Ry., Winnipeg, and his partner, have sold their third interest in the Columbia River Lumber Co. to a Duluth firm, the price paid, it is reported, being $1,000,000. The other two-thirds interest is held by W. Mackenzie, President Canadian Northern Ry.

J. A. L. Waddell, Kansas City, Mo., the Canadian who designed the Fraser River Bridge in British Columbia, has been appointed a member of an order established by the Grand Duchess Olga, sister of the Czar of Russia, in recognition of his services as Principal Engineer of the Trans-Alaska-Siberian Ry. This railway is still in the promotion stage.

W. W. Neeland, who has been appointed General Storekeeper, Alberta Ry. and Irrigation Co., Lethbridge, Alta., was born in North Gower, Carleton County, Ont., Feb. 4, 1855, and entered railway service in 1883, his record being: April, 1883, to 1885, in C.P.R. stores department at Winnipeg; 1885 to Jan., 1898, C.P.R. storekeeper, Moose Jaw, Sask.; Jan., 1898, to April, 1905, C.P.R. storekeeper, Fort William, Ont.; April, 1905, to Mar., 1907, storekeeper, Central Division, C.P.R., Winnipeg.

G. G. Mackay, who has been appointed C.P.R. city ticket agent, Detroit, Mich., was born in Hamilton, Ont., June 13, 1876, and entered railway service in 1893, his record being: Feb., 1893, to Feb., 1905, successively as assistant agent and operator, and ticket agent and operator G.T.R.; Feb., 1905, to June, 1906, assistant ticket agent, Pere Marquette Rd., and Cincinnati, Hamilton and Dayton Rd., Detroit; June, 1906, to Feb., 1907, chief clerk to C.P.R. city ticket agent., Detroit.

J. H. Joseph, who died at Montreal, Feb 28, aged 92, was one of the 30 merchants who organized the first telegraph company in Canada. He was also a member of the company which built the first telegraphic connection between Canada and the U.S.; and of the Newfoundland Telegraph Co. In railway matters he was associated with the Champlain Ry., one of the first lines in Canada; and with the line to Rouse's Point, now part of the G.T.R. He was for some years President of the Montreal Grain Elevating Co.

Thos. Foley, railway contractor, who died at St. Paul, Minn., Feb. 27, aged 68, was born in Lanark County, Ont., 1839, and moved to St. Cloud, Minn., in 1881, where he engaged in railway construction in partnership with his three brothers, Timothy, John and N. H. The firm of Foley Bros., and latterly Foley Bros. and Larson, has carried out some of the largest contracts in the U.S. and Canada, and at present has extensive contracts on the C.P.R. and the G.T. Pacific Ry. The firm also traded as Foley Bros. and Kelly, St. Paul, and Foley, Locke and Larson, Winnipeg, wholesale provision dealers, in connection with their contracting operations.

P. Mooney, who was recently appointed General Freight and Passenger Agent, Halifax and Southwestern Ry., was born at St. Catherines, Que., April 19, 1871, and entered railway service Nov., 1889, his record being: Nov., 1889, to Dec., 1897, stenographer and chief clerk to Superintendent Intercolonial Ry., Riviere du Loup, Que.; Mar., 1898, to Feb., 1901, clerk in General Freight and Passenger Department, Quebec and Lake St. John Ry., Quebec; Feb., 1901, to Mar., 1906, chief clerk, General Freight and Passenger office, Great Northern Ry., Quebec; Mar., 1906, to Jan., 1907, District Freight and Passenger Agent, Halifax and Southwestern Ry., Halifax, N.S

J. K. Savage, who has been appointed trainmaster C.P.R. at Brandon, Man., was born at Forreston, Ill., Oct. 5, 1876. He entered the C.P.R. service Mar. 1, 1890, as station agent at South Stukely, Que., since which he has been successively to May 1, 1894, station agent and operator at various stations in Quebec Province; May 1, 1894, to May 24 1897, train dispatcher, Farnham, Que.; Jan. to Sept., 1904, Night Chief Train Dispatcher, Toronto; Sept., 1904, to Sept., 1906, Inspector Train Dispatching Western Lines, Winnipeg; Sept., 1906, to Mar. 1, 1907, Chief Dispatcher, District 1, Central Division, Kenora, Ont.; Mar. 1, 1907, to date, Trainmaster District 3, Central Division, Brandon, Man.

C. S. Maharg, who has been appointed superintendent district 3, Central Division C.P.R., at Brandon, Man., was born in Dufferin County, Ont., Feb., 1867. He entered railway service with the C.P.R. in April, 1885, as freight brakeman; since which he has been successively: Feb., 1888, freight conductor; May, 1893, to Dec., 1901, passenger conductor; to June, 1902, rule instructor; to Aug., 1902, passenger conductor; Aug., 1902, to Dec., 1904, trainmaster, district 1, Ontario Division; Dec., 1904, to June, 1906, trainmaster, Kenora, Ont.; June to Aug., 1906, Assistant Superintendent Kenora, Ont.; Aug., 1906, to Feb. 28, 1907, Assistant Superintendent, Moose Jaw, Sask.; Feb. 28, 1907, to date, Superintendent district 3, Central Division, entire service with C.P.R.

It is reported that H. B. Jagoe, General Eastern Passenger Agent, West Shore Rd., New York, has resigned, and that he will not return to railway service. He was born at Hamilton, Ont., Mar. 29, 1857, and entered railway service 1872, since which he has been consecutively, to 1877, on Great Western Ry. as telegraph operator, ticket agent, freight clerk and train despatcher, Oct., 1877, to 1880, station agent, Hamilton and Northwestern Ry.; 1880 to Mar., 1882, ticket agent, Northern and Northwestern Ry.; Mar., 1882, to Mar., 1884, in charge passenger business same road at Toronto, and also agent New England Transportation Co.; Mar., 1884, to Mar., 1887, successively, freight agent and agent passenger department West Shore Rd.; since Mar. 1, 1887, General Eastern Passenger Agent same road at New York.

Col. R. R. McLellan, who died at Cornwall, Ont., Mar. 7, aged 65, was engaged most of his life in railway construction, beginning in Nova Scotia on the I.C.R.; and subsequently being engaged on the Annapolis Valley Ry., now a part of the Dominion Atlantic Ry. Going west he was engaged on the construction of the first railway in Manitoba, and was Superintendent when the first train was run into the province He built several sections of the C.P.R., the most important being on the north shore of Lake Superior. He retired from contracting in 1886, and took up his residence in his native county, which he represented in the House of Commons for 10 years from 1891. He was offered the office of Minister of Railways and Canals by Sir Mackenzie Bowell, but declined it. In his younger days he achieved distinction as an athlete, his records in hammer-throwing being quite remarkable.

H. W. Gays, whose portrait appears on the first page of this issue, was born at Brant, Erie county, N.Y., Mar. 21, 1848. Entered railway service Jan. 1, 1861, since which he has been consecutively to Dec. 31, 1862, messenger, and Jan. 31, 1863, to March 31, 1864, telegraph operator Erie Ry. at Dunkirk, N.Y.; April 1, 1864, to March 18, 1867, assistant cashier, and Oct. 1, 1867, to July 31, 1869, cashier Buffalo and Erie Ry, same place; Aug. 1, 1869, to June 30, 1874, cashier; and July 1, 1874, to May 30, 1877, general agent Louisville and Cincinnati Mail Line Steamers; June 1, 1877, to March 31, 1879, general agent, and April 1, 1879, to March 30, 1885, Assistant General Freight Agent, Cleveland, Columbus, Cincinnati and Indianapolis Ry., and Jan. 1, 1881 to April 30, 1885, also General Freight Agent, Indianapolis and St. Louis Ry.; July 1 to Oct. 31, 1885, in charge traffic; Nov. 1, 1885, to May 30, 1886, Superintendent; June 1, 1886, to Nov. 30, 1889, Manager Wiggins' Ferry Co., and East St. Louis Connecting Ry., and operated lines at St. Louis; Dec. 1, 1889, to Aug. 1, 1894, General Manager St. Louis Merchants' Bridge and Terminal Ry.; Aug. 1, 1894, to July, 1896, Traffic Manager St. Louis, Chicago and St. Paul Ry.; July, 1896, to Feb., 1899, General Manager same road, and hicago, Peoria and St. Louis Ry.; Feb., 1899, to April 25, 1900, General Manager New York and Ottawa Rd.; Nov., 1899, to April 25, 1900, also President, and April 25, 1900, was appointed Receiver same road; March 1, 1899, Manager Ottawa and New York Ry., and Nov., 1899, also President and Receiver same road. He retained these positions until the N.Y. and O. Rd., which owned the O. and N.Y. Ry., was sold by order of the New York courts in 1904, to the New York Central and Hudson River Rd., when he was appointed General Manager.

Pullman Co's Taxation.—The Treasurer of Ontario replying to a question in the Legislature recently stated that in 1906 the Pullman Co. paid to the province $1,748.33 as a tax under the Supplementary Revenue Act, sec. 13, being at the rate of ¼ of 1% upon the capital of the company invested in cars and rolling stock in use in Ontario during the previous year. The average number of cars in use in the province during 1906 was: Standard cars, 48.191, valued at $10,000 each, $481,910; parlor cars, 5.401, valued at $6,000 each; immigrant or tourist cars, 2.037, valued at $5,000 each, $10,185; total valuation, $524,501. The valuation of 1904 was standard cars, $7,250 each; parlor cars, $5,000 each; tourist cars, $3,500 each.

The Canadian Car Service Bureau, Western Lines, has been organized to take over the Canadian Freight Association, Western Lines, car rental department. The car service committee is composed of J. A. MacGregor, Assistant Superintendent Car Service, C.P.R.; A. Belbeck, Superintendent Winnipeg Terminals, C.P.R.; A. Wilcox, Superintendent Canadian Northern Ry., and J. P. Driscoll, Superintendent Car Service, Canadian Northern Ry. The manager is H. R. Patriarche, 101 Bon Accord Building, Winnipeg. Meetings are held the third Wednesday of each month. The Bureau's territory is C.P.R., Port Arthur to Laggan and Crow's Nest, and all intervening branches; Canadian Northern Ry.; Alberta Ry. and Irrigation Co.'s railway.

The Board of Railway Commissioners has approved of standard passenger tariff C.R.C. no. W 38 (supplement 5), for the C.P.R. line between Curzon Jct. and Kingsgate, Sask. on the basis of 4 cents a mile.

TRANSPORTATION APPOINTMENTS.

Alberta Ry. and Irrigation Co.—W. W. Neeland, heretofore storekeeper C.P.R., Winnipeg, has been appointed General Storekeeper A. Ry. and I. Co. Office, Lethbridge, Alta.

Board of Railway Commissioners.—Jas. Ogilvie, heretofore Master Mechanic G.T.R. at Ottawa, has been appointed Inspector of Rolling Stock and General Equipment of Railways for the Board.

Canadian Pacific Ry.—F. M. Rutter has been appointed Resident Engineer at Woodstock, N.B., vice G. G. Hare, who has been appointed engineer of the Kingston & Pembroke Ry.

R. W. Burnett has been appointed Assistant Master Car Builder, lines east of Port Arthur, succeeding S. King, resigned, to become Superintendent Canada Car Co.

E. Fitzgerald, heretofore Assistant to the General Purchasing Agent, has been appointed Assistant General Purchasing Agent.

We are advised that it is the intention to transfer C. Kyle, Master Mechanic of the Lake Superior Division at White River, Ont., back again to Montreal, to his previous position as Master Mechanic Eastern Division, and that C. A. Stark, now Assistant Master Mechanic at North Bay, will then be made Master Mechanic Lake Superior Division.

F. W. Nichols, formerly assistant roadmaster at London, Ont., has been appointed roadmaster at Orangeville, Ont., vice A. Cameron, transferred.

A. Cameron, heretofore roadmaster at Orangeville, Ont., has been appointed roadmaster at London, Ont., vice A. McAuley, resigned.

P. Coakey, heretofore track inspector Toronto-Sudbury branch, has been appointed assistant roadmaster at London, Ont., vice F. W. Nicholls, promoted.

J. H. Hughes, heretofore Trainmaster, district 1, Lake Superior Division, North Bay, Ont., has been appointed Assistant Superintendent there.

H. G. Reid has been appointed locomotive foreman at Chapleau, Ont., vice W. H. Fletcher, resigned.

R. Ferguson is reported to have been appointed roadmaster Fort William terminals.

The Central Division has been re-divided as follows:

Fort William Terminals, Port Arthur to Westfort, inclusive. J. G. Taylor, heretofore Assistant Superintendent at Fort William, has been appointed Superintendent.

First District, Fort William, Ignace and Kenora sections, Lac du Bonnet branch. J. J. Scully, Superintendent. Office, Kenora, Ont.

Second District, Brandon and Minnedosa sections, Varcoe branch. Winnipeg Beach, Teulon and Emerson branches. Souris section and Elm Creek branch. La Riviere section and Gretna branch. J. T. Arundle, Superintendent. Office, Winnipeg.

Winnipeg Terminals, Whittier Jct. to Rugby Jct. and St. Boniface, inclusive. A. Belbeck, Superintendent. Office, Winnipeg.

Third District, Broadview section, including Brandon and Broadview terminals, Pheasant Hills branch, Rapid City section, Lenore and Miniota branches, Yorkton section, including Minnedosa terminal, Russell and Sheho branches. C. S. Maharg, heretofore Assistant Superintendent at Moose Jaw, Sask., has been appointed Superintendent. Office, Brandon, Man.

Fourth District, Lyleton section, Napinka and Mowbray branches, Estevan section, Arcola section, including Arcola and Reston branch. G. E. Graham, heretofore Assistant Superintendent at Brandon, has been appointed Superintendent. Office, Brandon, Man.

Fifth District, Moose Jaw, Swift Current, Portal and Moose Mountain sections. J. Brownlee, Superintendent, Moose Jaw, Sask.

The offices of Assistant Superintendent at Fort William, Brandon and Moose Jaw have been abolished.

R. McGregor, heretofore Trainmaster Kenora, Ont., has been appointed Trainmaster over Fort William section between Ignace and Eagle. Office, Ignace, Ont.

H. J. Coffin, heretofore Trainmaster Brandon, Man., has been appointed Trainmaster over Kenora section, between Eagle and Kenora. Office, Kenora, Ont.

J. J. Horn, heretofore Night Chief Train Dispatcher, district 1, Central Division, has been appointed Chief Train Dispatcher, vice J. K. Savage, transferred. Office, Kenora, Ont.

R. C. Wilton, heretofore train dispatcher, district 1, Central Division, has been appointed Night Chief Train Dispatcher, vice J. J. Horn, promoted. Office, Kenora, Ont.

G. Thompson has been appointed Trainmaster District 2, Central Division. Office, Winnipeg.

F. T. Anderson has been appointed car distributor, Central Division, at Winnipeg.

D. McKay has been appointed Trainmaster district 2, Central Division. Office at Portage la Prairie, Man.

The territory of the following roadmasters on the Central Division, has been arranged as given: C. J. Panser, Rugby Jct. to Komarno, Rugby Jct. to Gimli. R. M. Binney, Whittier Jct. to Emerson, Rugby Jct. to Manitou, Rosenfeld Jct. to Gretna. P. Carlson, Manitou to Lyleton, Rudyard to Kaleida, Woodbay to Mowbray, Deloraine to Napinka. P. E. Barry, Rugby Jct. to Souris, Elm Creek to Carman.

J. K. Savage, heretofore Chief Train Dispatcher, Kenora, Ont., has been appointed Trainmaster, district 3, Central Division. Office at Brandon, Man.

S. Worth, heretofore Chief Train Dispatcher, Moose Jaw, has been appointed Trainmaster district 5, Central Division. Office, Moose Jaw, Sask.

R. F. Chapman, heretofore train dispatcher at Brandon, Man., has been appointed Chief Train Dispatcher, district 5, Central Division. Office, Moose Jaw, Sask.

J. M. McKay, heretofore Trainmaster, old district 2, Winnipeg, has been transferred to the Souris section.

Geo. Cooper has been appointed road foreman of engines, Middle and Southern Divisions, succeeding G. Renton, recently killed at London, Ont. Headquarters, Sarnia Tunnel, Ont.

The following agents have been appointed: Sutton, Ont., R. Dunn (Acting); Georgetown, Ont., N. A. McCallum; Grimsby, Ont., D. F. McGregor; Kerwood, Ont., G. J. Dowding; Harley, Ont., T. H. Sumner; Burgessville, Ont., W. R. Plant; Belgrave, Ont., C. R. Anderson.

Grand Trunk Pacific Ry.—O. O. Winter, heretofore Superintendent C.P.R. at Brandon, Man., and previously at Fort William, Ont., has been appointed to a position on the G.T.P.R. staff, but no official announcement has been made as to what it is. Unconfirmed press reports state that he will be placed in charge of the operating staff, which will be organized at Fort William, Ont.

G. A. McNicholl, heretofore private secretary to F. W. Morse, Vice-President and General Manager, has been appointed Pacific Coast Purchasing Agent. Headquarters, Vancouver, B.C.

Great Northern Ry., U.S.—F. S. Forest, heretofore Assistant General Superintendent, Central Division, Minot, N.D., has been appointed General Superintendent Western Division, Spokane, Wash., succeeding H. A. Kennedy, whose title was Assistant General Superintendent.

R. W. Bryan, heretofore General Superintendent of Transportation, St. Paul, Minn., has been appointed Assistant General Superintendent Central Division, Minot, N.D.

Kingston & Pembroke Ry.—G. G. Hare, heretofore Resident Engineer C.P.R. Woodstock, N.B., has been appointed engineer K. & P. R. Office, Kingston, Ont.

New York Central Lines.—M. C. Roach, heretofore Assistant General Passenger Agent New York Central and Hudson River Rd., has resigned to go into private business.

Pere Marquette Rd.—W. C. Groening, general foreman shops, St. Thomas, Ont., has been transferred to Grand Rapids, Mich.

National Transcontinental Railway.

The final surveys and location of the Eastern Division from Quebec to Winnipeg, it is stated, show a line of 1,349½ miles. The route through New Brunswick, it is reported, has been decided upon, but no official announcement had been made to Mar. 20. Press reports state that of the three routes surveyed, the engineers recommend the adoption of the back route between Chipman and Grand Falls. The adoption of the route, it is stated, will require the use of a pusher for westbound traffic for a distance of about 17 miles. The route will be 47 miles shorter than the route surveyed by the St. John River valley, and 18 miles shorter than the third route surveyed. The last mentioned route was laid out so as to provide the standard gradients, and its cost was consequently the heaviest of the three.

The Commissioners have authorized the construction of three buildings for the use of the engineering staff between Moncton and Chipman, N.B. The buildings will be of frame and will be located at Hemlock Ridge, near Canaan, a point 15 miles north of Havelock, and eight miles east of Chipman, respectively. H. Ryan, of the Commissioners' engineering staff, is superintending their erection.

Tenders have been received for the construction and erection of six steel bridges in District F., at the following points between Winnipeg and Lake Superior Junction: Wabigoon River, Winnipeg River, C.P.R. crossing, Whitemouth River, Brokenhead River, east branch; Brokenhead River, west branch. The class of load which the bridges are to carry is that designated as heavy in the general specifications for steel bridges of the Department of Railways.

GRAND TRUNK PACIFIC RY

Glyn, Mills, Currie & Co., London, Eng., have offered £1,000,000 4% G.T.P. Ry. debenture stock at par, the proceeds of which is to be devoted to the purchase of rolling stock for the equipment of the line. The stock, which is part of an authorized issue of £3,000,000, is redeemable at 105, Mar. 1,

1936, or thereafter on one year's notice. It ranks next after the first mortgage bonds and certain other securities, and is guaranteed by the G.T.R. out of the net earnings after deducting its own fixed charges. Press reports state that only 70% of the issue has been applied for.

Arrangements have been concluded between the G.T.P.R. and Port Arthur Town Council for an entrance into that town. The company's terminals are to be at Bare point, and it will use, jointly with the Canadian Northern Ry., the eastern tracks leading to the terminals. Mayor Clavet stated, Mar. 12, on his return from Montreal, where the agreement was signed, that the companies would probably use a joint station.

Maps of the route between Winnipeg and Portage la Prairie show that the line will cross the C.P.R. near Darwin, proceeding through the property purchased by the company outside the city, then going northerly, passing the city about three-quarters of a mile north of the C.P.R. shops, and continuing almost a straight line to Portage la Prairie. In connection with the construction westerly, it is stated that over 100 towns will be founded during the year between Winnipeg and Edmonton.

The Acting Chief Commissioner of Works for British Columbia has approved of the plans for the G.T.P.R. in that province. The plans show a line entering at the Yellowhead Pass, running north of Cowdun and Moose Lakes, and following the north bank of the south fork of the Fraser River, until it is joined by the north fork. The river is crossed near Fort George. The line leaves the fort on the south and runs almost due west of Fraser Lake; thence northwest along the northeast bank of the Endakow River and Burns and Duker lakes to the headwaters of the South Bulkley valley. It follows the Bulkley River on the east side and crosses the Skeena. At Hazelton the line turns to the southwest and follows the north bank of the Skeena to its mouth, then crosses to the Kaien Island terminus. The chief characteristic of the route is its avoidance of long bridges and the following of waterways the entire distance, except across the divide between the streams at the head of Decker Lake and the headquarters of the South Bulkley River.

The British Columbia Government, with a view of settling provincial rights as to Indian reserves, has decided to refuse registration to the grant of lands in the Tsimpsean reserve, made by the Dominion Government to the G.T.P.R. The ground taken on behalf of the Province is that the surrender of the lands by the Indians caused a reversion of title to the Province, and that the Dominion has no rights in the matter.

Tenders are under consideration for the construction of an hotel at Prince Rupert. It will be of frame, will have 60 bedrooms, with dining rooms, billiard room and other conveniences. It is expected to have the building finished during the summer. The building will be so arranged that the bedroom accommodation can be increased to 200 rooms.

In our last issue it was stated that contracts for building three sections of the National Transcontinental Ry. had been awarded to the Grand Trunk Pacific Construction Co. The contracts were given to the G.T. Pacific Railway Co.

The House of Commons Railway Committee has approved of the G.T.R. Co.'s bill authorizing it to acquire lands, wharves, buildings, etc., and to establish a pension fund for its employes with all necessary powers for the management of the same. The clause striking out the section in the original act of incorporation as to third-class trains, and penny a mile fares, was dropped.

Railway Commissioners' Rate Orders.

2674. Mar. 13.—In the matter of the application of the Cumming Manufacturing Co., Ltd., under the Railway Act, 1903, sections 252, 253, 254, 255, and 257, for an order directing the G.T.Ry. Co. to cease from charging excessive and discriminatory rates on logs and lumber shipped from points on its railway east of Rainy Lake, Ont., consigned to the applicant company at Renfrew, Ont. The Board orders that the G.T.R. is hereby directed to reduce its rate on logs, in carloads, of the minimum weight of 35,000 lbs. a car carried between Brule Lake and Renfrew, Ont., for the purpose of manufacture and reshipment of the products thereof, to 5c. per 100 lbs.

REDUCTION OF PASSENGER FARES

2690. Mar. 18.—In the matter of the application of the Associated Boards of Trade of Western Canada, under the Railway Act, for a reduction in the passenger rates of the railway companies operating in the Provinces of Alberta and Saskatchewan, and in the matter of the complaints of the Kingston Board of Trade, Kingston, Ont.; the corporations of the townships of Clarke, Darlington, Murray, East Whitby, and Pickering, and the corporations of the towns of Oshawa and Bowmanville, Ont., alleging that the passenger rates charged by the G.T.R. are excessive. Upon hearing the G.T.R. and the C.P.R. companies, the Board orders that the C.P.R. and the G.T.R. companies reduce their passenger rates on all the lines of the respective companies in Canada, east of and including the Calgary and Edmonton Ry., so that the same shall not exceed 3c. a mile. That the said reduction take effect within 60 days from the date of this order, within which time the passenger tariffs of the said companies are to be altered and made effective accordingly.

C.P.R. Betterments, Construction, Etc.

Atlantic Division Bridge Construction.—Tenders are being received for the construction of concrete abutments and piers at the following bridges: Two abutments at Russiagornis, N.B., Fredericton branch; two abutments each at two bridges, at Lieford, N.B., Tobique branch; two abutments at Fort Fairfield, Me., Aroostook branch; two abutments and one pier, at Grand River, N.B.; two abutments and three piers, Aroostook Jct., N.B.; two abutments and three piers, Grand Falls, N.B., Edmundston, branch.

Standard Explosives Limited Spur.—Plans have been deposited with the Board of Railway Commissioners for a spur line from mileage 18.3, Ste. Jeanne de L'Ile Perrot, Que., to the premises of the Standard Explosives Limited.

Westmount Improvements.—We were advised, Mar. 16, that the plans for the station at Westmount, Que., had not been completed. The new building is estimated to cost $10,000. No further extension of the Glen yards is at present contemplated.

Tillsonburg, Lake Erie and Pacific Ry.—A subsidy contract has been entered into by the Dominion Government for the construction of a railway from Woodstock, or from Ingersoll to Stratford, Ont., not exceeding 35 miles.

Guelph and Goderich Ry.—It is expected that work will be sufficiently advanced to permit trains being run to Wellington St., Goderich, Ont., by the end of May.

Toronto-Sudbury Line.—The divisional point on this line will be at Muskoka, Ont., at which place a roundhouse and other buildings will be constructed. The line is not yet opened to this point, but it is expected that the track will be laid and a train service in operation early in June.

Port Arthur Station.—A new station building is to be constructed at Port Arthur, Ont. The plans provide for a handsome building with central clock tower at the street elevation, the waiting rooms and public offices opening directly on to the track. The baggage and express offices are at one end of the platform, being connected with the main building by a covered platform; and there is a lengthy covered platform at the other end of the main building.

Kenora Locomotive House.—A contract is reported let to Kelly Bros. & Co., for the erection of a locomotive house in the east yards, Kenora, Ont., at a cost of about $100,000. The site of the new roundhouse will be near the old brick yard.

Dock at Winnipeg Beach.—The dock which the C.P.R. constructed during the winter at Winnipeg Beach, Man., is a T-shaped structure, the head being 150 by 12 ft., and the shore connection 100 ft. long. It is a trestle work on pile foundations.

Teulon to Icelandie River.—It is proposed to extend the line now terminating at Teulon, northerly to Icelandie River, Man., about 37 miles.

Winnipeg Car Shops, etc.—The extension of the car shops at Winnipeg was one of the works which it was proposed to undertake during the current year, but we have not been advised that the present appropriations provide for the work. Daily press reports say the work will cost approximately $550,000, and that the buildings will include passenger car shops, 100 by 241 ft.; freight car shops, 103 by 313 ft.; planing mill, 102 by 217 ft.; blacksmith shop, 102 by 217 ft.; locomotive shop, 794 by 165 ft.; foundry, 122 by 92 ft.; general stores and offices, 86 by 254 ft.; dry kiln, 86 by 42 ft.; and power house, 126 by 100 ft.

Western Lines.—In addition to the betterments and improvements mentioned under the separate divisions, a large amount of other work, most of which is already in hand, will be pushed forward towards completion. These works include the second track construction between Fort William and Winnipeg, the greater part of which it is expected to have completed by the end of the season; the grade reduction work between Medicine Hat and Calgary, Alta.; and the diversion of the line between Lethbridge and Macleod, Alta. Apart from the buildings to be put up, repairs will be made at a great many stations, new platforms will be built, new freight sheds put up, and existing freight sheds enlarged. A number of water softening plants will be installed on the Central and Western Divisions between Rennie and Laggan. Stock yard accommodation will be increased at a number of points, new water supplies will be provided and existing supplies improved; many new sidings will be put in, and existing ones lengthened. A number of tunnels in the mountains on the Pacific Division will be lined with concrete. Considerable bridge filling will be undertaken on all three divisions, also permanent work on the bridges, bringing them up to standard. The roads and trails in the vicinity of the company's hotels in the mountains will be improved; repairs will be made to all the old and new docks and wharves on the Kootenay Lakes A considerable amount will be expended on clearing right-of-way, trimming track, and widening banks and cuts. Additional machinery and tools will also be provided for all shops on the Western Lines.

Central Division Betterments, etc.—Following are some details showing the work of betterment and improvement to be undertaken during the current year:

OR GENERAL PASSENGER DEPARTMENT
Moncton, N.B.

BALLASTING AND TRACK-WIDENING.—Brandon section, 17 miles; Souris section, 65 miles; Winnipeg Beach branch, 10 miles; Emerson branch, 28 miles; Portal section, 50 miles; total, 170 miles.

NEW 80-LB. STEEL.—Emerson section, 63.6 miles; Winnipeg and Fort William, 50 miles; Souris section, 65 miles; Winnipeg Beach branch, 47 miles; second track between Winnipeg and Fort William, 170 miles; total, 395.6 miles.

NEW STEEL BRIDGES.—Lyleton branch, one 100 ft. deck plate girder; Broadview section, three 40 ft. through plate girders; Swift Current section, ten 15 ft., one 18 ft. and two 20 ft. deck plate girders.

FENCING.—Brandon section, 30 miles; Broadview section, 40 miles; Minnedosa section, 20 miles; Yorkton section, 20 miles; Russell branch, 5 miles; Rapid City branch, 10 miles; Miniota branch, 10 miles; Arcola section, 20 miles; Moose Jaw section, 20 miles; Swift Current section, 25 miles; Portal section, 25 miles; total, 230 miles.

BUILDINGS.—Eight new stations, 25 section houses, 19 tool houses and 28 portable depots.

TERMINAL IMPROVEMENTS.—New station at Port Arthur, Ont. New double-deck freight sheds, alterations and additions to yards, and improvements to coaling plant at Fort William, Ont. Lodging and recreation building for employes at Ignace, Ont. Extension to pavilion, Winnipeg Beach. Double main track between Higgin Ave. and Red River Bridge, Winnipeg; fencing, lighting and other improvements to courtyard of station and hotel, Winnipeg. Machine shop at Brandon, Man. Addition to engine house at Souris, Man. New 12-stall locomotive house at Moose Jaw, Sask., and addition to locomotive house at Estevan, Sask.

TIES.—Number of ties required for renewals on the division, 894,101.

Winnipeg to Edmonton.—A number of stretches of line have been under construction during the past two or three seasons, which it is proposed to connect up during the present season so as to afford a shorter and more direct route between Winnipeg and Strathcona than the C.P.R. has at present, via Calgary. The Manitoba and Northwestern Ry., which at present extends to Sheho, will be extended to Saskatoon, and about midway between these two points will be joined by the Pheasant Hills branch, now being operated from Kirkella, Man., to Strassburg, Sask. At Saskatoon the line will connect with a line already under construction westerly to meet the branch of the Calgary and Edmonton Ry., now in operation from Wetaskiwin easterly to Daysland, Alta. The bridge which will be erected over the Saskatchewan River at Saskatoon, to connect the two sections of the line, will be of steel on a concrete substructure. This substructure will consist of two abutments and nine piers. The piers will be 40 by 20 ft. at the base, and will rise to a height of 56 ft. above the level of the ice in the river. The contract for the substructure has been let to the J. McDiarmid Co., Winnipeg, the estimated cost being $150,000.

Reston-Wolseley Branch.—This branch is in operation from Reston, Man., on the Souris-Arcola-Regina line, to Kaiser, 99 miles, and it is expected to have it completed to Wolseley on the main transcontinental line, mileage 122, during the current year.

Lauder Westerly.—A line is under construction from Lauder, Man., westerly, and it is hoped to complete it to mileage 33 during the current year.

Weyburn to Stoughton.—The line under construction from Weyburn to Stoughton, Sask., to connect the Portal section with the Arcola-Regina line, will be completed during the current year.

THE C.P.R. CO'S EMPRESS HOTEL, VICTORIA, B.C.

Moose Jaw Northwesterly.—Construction on this branch will be continued during the current year, and it is expected to have it completed to the 50th mile by the end of the season.

Improvements at Dunmore Jct.—Tenders have been asked for the construction of a 4-stall locomotive house at Coleridge, Alta., the point on the C.P.R. better known as Dunmore Jct., Alta. Local reports state that the increasing traffic on the Crow's Nest Pass line, necessitates a change in the conditions of operations, and that the company has under contemplation the development of a divisional point there and the closing up of the present shops, etc., at Medicine Hat, Alta.

Lethbridge Joint Freight Shed.—The new freight shed erected at Lethbridge, Alta., for the joint use of the C.P.R., and the Alberta Ry. and Irrigation Co., at a cost of $15,000, has been completed. The building is of galvanized iron on a concrete foundation.

Western Division Betterments, etc.—The betterments, etc., which it is proposed to carry out on the Western Division during the current year include the following:

BALLASTING AND BANK WIDENING.—Medicine Hat section, 15 miles; Calgary section, 35 miles; Laggan section, 10 miles; Edmonton section, 55 miles; Macleod branch, 53 miles; total, 168 miles.

NEW 80-LB. STEEL.—Bredenbury to Esterhazy, 21 miles; Crow's Nest line, 118.5 miles; total, 139.5 miles.

NEW STEEL BRIDGES.—Medicine Hat section, four 30 ft. h. deck-plate girders, and one 100 ft. through lattice girder. Edmonton branch, two 175 ft. through truss spans. Macleod branch, two 150 through lattice girders. Cranbrook section, three 30 ft. h. deck-plate girders. Sirdar section, one 40 ft. h. deck-plate girder.

FENCING.—Calgary section, 10 miles; Laggan section, 68 miles; Lethbridge section, 68 miles; Cranbrook section, 16 miles; Sirdar branch, 11 miles; total 173 miles.

BUILDINGS.—Eight new stations, five section houses, 11 tool houses.

TERMINAL IMPROVEMENTS.—Six-stall addition to locomotive house at Swift Current, Sask.; six-stall addition to engine house, extension to boiler house and a new ice house, at Medicine Hat, Alta.; extension to ice house, extension to blacksmith shop, extension to freight shed, and the completion of an extension to engine house at Calgary, Alta.; new station at Strathcona, Alta.; new ice house and six-stall addition to roundhouse at Lethbridge, Alta; new ice house and completion terminal facilities at Macleod, Alta.; six-stall addition to engine house, new coaling plant, and additional yard accommodation at Cranbrook, B.C.; additional coaling facilities, Sirdar, B.C.; completion of terminals at Crow's Nest, B.C.

TIES.—Number of ties required for renewals on Western Division, 401,481.

Nicola, Kamloops and Similkameen Ry.—The section of the line from Spence's Bridge to Nicola, B.C., it was expected, would be taken over Mar. 1, but owing to the change in General Superintendents, the transfer from the contractors was postponed. F. F. Busteed, the new General Superintendent, was expected to make his inspection and take over the line by Mar. 30.

Pacific Division Betterments, etc.—The betterments and improvements to be undertaken on the Division during the current year include:

BALLASTING AND BANK WIDENING.—Mountain section, 71 miles; Shuswap section, 45 miles; Thompson section, 3 miles; Cascade section, 15 miles; Boundary section, 7 miles; total, 141 miles.

NEW 80-LB. STEEL.—The main line is fully laid with 80-lb. steel from Laggan to Vancouver, B.C., and no further 80-lb. steel will be laid on the division during the year.

NEW STEEL BRIDGES.—Mountain section, one 150 ft. through truss span and one 50 ft. deck-plate girder. Nakusp and Slocan Ry., one 80 ft. deck-plate girder. Rossland branch one 100 ft. through plate girder. Shuswap section, two 40 ft. and two 100 ft. deck-plate girders, three 150 ft. deck trusses; one 150 ft. through truss and one 150 ft. deck truss. Cascade section, four 75 ft. through girders.

FENCING.—Mountain section, 3 miles; Thompson section, 10 miles; Cascade section, 25 miles; Boundary section, 7 miles; total, 45 miles.

BUILDINGS.—Three new stations, 11 section houses, 5 tool houses, and 16 bunk houses for Chinese.

TERMINAL IMPROVEMENTS.—Four-stall addition to locomotive house at Field, B.C. New station and freight shed at Kamloops, B.C. Repairs to station, new platform, shop extension and new tank at Nelson, B.C. Additional yard accommodation at Golden, B.C. Electric plant at Revelstoke, B.C. New sea wall on water front, new transfer slip, new express building, extensive yard and shop improvements at Vancouver, B.C. Wharf improvements and completion of hotel at Victoria, B.C.

TIES.—Number of ties required for renewals on the division during the current year, 476,908.

Esquimalt and Nanaimo Ry.—It is proposed during the current year to put up 35 miles of wire fencing, to replace 48 miles of light rails with heavier steel, to bring the bridges up to the C.P.R. standard; to provide additional yard accommodation at various points, to provide shelters for passengers, and to have explorations and surveys made throughout Vancouver Island with a view of the construction of additional lines.

HEAD OFFICE AND WORKS: **SYDNEY, CAPE BRETON, CANADA**

MUSKOKA

THE CANADIAN NORTHERN ONTARIO WAY

THIS SUMMER

C. E. Cartwright, Division Engineer, Vancouver, stated in an interview recently, that a great deal of topographical information as to the interior of the island had been received but the reports from the survey parties were incomplete. It was hoped to have the preliminary operations completed by the early summer, but the actual work of construction of any extensions would not be undertaken before 1908. A survey party was working between Wellington and Alberni, and another along the east coast. The company had decided upon the construction of a line to the west coast of the island, but the question was as to the best route. One route under consideration was from Duncan to Sarita Bay, which would develop an entirely new country, and necessitate carrying the line to an altitude of 600 ft. above sea level. The other route being considered was from Wellington to Alberni, thence to Comox. This route would be more expensive to construct, as it would be necessary to surmount an elevation of 1,250 ft., according to present surveys. R. Marpole, Vice-President E. and N. Ry., and General Executive Assistant, C.P.R., subsequently stated that Mr. Cartwright had outlined the situation correctly, and added that nothing had been decided upon as to construction, or any other developments on the island.

A press report is current that the B.C. Electric Ry. is making surveys with a view of securing a water power sufficient for the operation of the E. and N. Ry., as well as its own lines in Victoria. The officials of the E. and N. Ry state that there is nothing in the report, but the B.C.E. Ry.'s local manager said the matter had been considered but that no advances had been made to the C.P.R., and would not be until it was ascertained if the plan was at all practicable.

Minneapolis, St. Paul & Sault Ste. Marie Ry.—U.S. press reports state that a contract has been let for construction of a line to Duluth, Minn., and Superior, Wis., from Brooten, Minn., a distance of about 200 miles. It is said that the line will cross the Northern Pacific at Moose Lake and Royalton. This will make practically a direct line from Brooten to Superior.

Canadian Northern Railway Construction.

New Brunswick.—In the New Brunswick Legislature Mar. 21, Premier Pugsley said the Provincial Government was considering a proposal from Mackenzie, Mann & Co. to build a railway down the St. John River valley to Westfield, and expressed the hope that such a line would form part of a transcontinental system with St. John as its terminus.

Running Rights over I.C.R.—Ottawa despatches credit Mackenzie, Mann & Co. with being interested in negotiations now going on with the Dominion Government to secure running rights over the Intercolonial Ry., from the southern end of Quebec Bridge to Halifax, N.S. The Canadian Northern Quebec Ry. will connect with the Quebec Bridge, and its Quebec-New Brunswick and Nova Scotia Ry. charter gives it authority to construct a line to the Atlantic Coast near Guysboro, N.S. The C.P.R. is negotiating for running rights over the Intercolonial Ry., and in connection with its proposal to the Government the Moncton Board of Trade passed a resolution Mar. 5, suggesting that the consideration of the same be postponed until such time as the Canadian Northern Ry. interests were in a position to ask for running rights.

Canadian Northern Ontario Ry.—A deputation representing property owners in the east end waited on the Toronto Board of Control, Mar. 1, and objected to the grant of land in the Don Valley in exchange for an 80 ft. roadway. It was explained that the land which the city proposed to grant was a strip 1,800 ft. long, varying from 40 to 300 ft. in width, and that if the company expropriated a strip 100 ft. wide right through the city property at this point, as it might do, the result would be most objectionable. The Board decided to give further consideration to the matter. The city has been notified that the coal yards, roundhouse, repair shops, etc., will be located at the extreme north end of the Don flats, and that the strip which it is desired to obtain from the city will be utilized for straightening the Don, and for tracks.

The House of Commons Railway Committee has approved of the company's act authorizing it to construct a large number of additional lines in Ontario. A clause in the act as to the time within which construction might be gone on with was dropped, as it was objected to by the Minister of Railways on the ground that it would have extended the time for the construction of other lines in Ontario, for which the company holds parliamentary authority. The lines authorized to be constructed by the act are: from Washago to Lake Huron, at or near Kincardine; from near Arnprior to the St. Lawrence River, near Gananoque; from near Pembroke southwesterly to Lake Ontario, at or near Cobourg or Port Hope; from the Toronto-Ottawa line northwesterly to Georgian Bay, at or near Collingwood or Owen Sound; from east of Toronto, passing through Toronto, Hamilton, and London, to Windsor, with branches to St. Thomas and Sarnia, and a branch or loop passing north of Toronto; from the Niagara River passing through Hamilton to Lake Huron near Goderich; from Lake Erie west of Port Colborne, passing through Brantford or Berlin to Georgian Bay; from Washago to Georgian Bay east of Collingwood; from north of Montreal to Leeds or Lanark county; from Parry Sound northwesterly to North Bay.

Nepigon Ry.—The Ontario Legislature has approved of an extension of time for the construction of the line, and for its amalgamation with the Canadian Northern Ry. A provision was inserted in the bill to the effect that the agreement of amalgamation must be sanctioned by the Ontario Railway and Municipal Board. The company has power to construct a railway from Nepigon Bay on Lake Superior northerly, and subsidies were voted in 1902 for the construction of the first 14 miles.

Canadian Northern Ry.—The project for the construction of a line to connect Port Arthur, Ont., and Duluth, Minn., has been revived and it is reported that C.N.R. interests have begun negotiations with U.S. railway interests for the construction of the line. The C.N.R. system includes the old Port Arthur, Duluth and Western Ry., which is operated to Gunflint Narrows, at the International boundary. Surveys were made in 1902 for the extension from this point towards Duluth, but the project was dropped.

Railroad Pocket Book. A handy sized book has been published by the Derry-Collard Co., New York, with this title, at $1, or with note book leaves at $1.50. It is described as a quick reference cyclopedia of railway information. F. H. Colvin is the author, and he has collected and arranged in a most compact and convenient form a large amount of useful and practical information, not only for those actually engaged in railway work, but also for the general reader who is often at a loss to find an explanation of the technical terms which are being more often used in the non-professional press than formerly. The line illustrations and charts are valuable aids to the text.

G.T.R. Betterments, Construction, Etc.

St. Lambert-Ste. Rosalie Second Track. Tenders were invited recently for the construction of a second track between St. Lambert and Ste. Rosalie, Que., about 31 miles. This work will also include the improvement in several places of the gradients on the existing line, together with a short diversion of the track in the vicinity of St. Hilaire. The contract will only include the earthwork; the ballasting, tracklaying and masonry work will be done by the G.T.R. staff.

Montreal Terminal Facilities.—The rearrangement of the freight handling facilities at Montreal has brought about an improvement of the conditions there, and the opening of the new yards at Turcot will add 75% to the storing and handling capacity of the Montreal terminals. The company has purchased several parcels of land at St. Lambert, and it is reported that it is intended to erect a car building plant there. It is also reported that the existing locomotive works and car repair shops at Point St. Charles are to be enlarged

Track Elevation at Montreal.—The City Council has approved of the proposal to assist the G.T.R. to abolish level crossings, and to elevate its tracks in the city, by a grant of $2,000,000. A report upon the matter had not been presented by the Level Crossings Committee, which has the matter in hand, as the plans are at present incomplete, but it was desired to affirm the principle that the tracks must be raised. As the tracks were in existence before the crossings, and therefore, if the city did not assist the company, the crossings would remain. The Level Crossings Committee proposes to visit Philadelphia to inspect elevated tracks and railway crossings in that city.

Ottawa Station and Hotel.—The Ontario Legislature is being asked at its current session for an act authorizing the Ottawa City Council to respectively grant fixed assessments of $150,000 and $500,000 upon a central union passenger station and a hotel to be constructed by the G.T.R., at a cost of $250,000 for the station, and $1,000,000 for the hotel; and to provide for the cost of widening Little Sussex St. for the purpose of the erection of the station and hotel, by the issue of debentures.

Toronto-Hamilton Line.—A start has been made near Hamilton, in relaying the 38 miles between that city and Toronto, with 100 lb. rails in place of the present 80-lb. steel.

London Track Elevation.—This question has been again under consideration by the railway committee of the City Council, but nothing has been decided, and the G.T.R. management has not been approached on the matter. F. H. McGuigan, Fourth Vice-President, said the G.T.R. management was ready to discuss the whole question whenever the city was ready.

We are advised that the G.T. Pacific Ry. Co. will probably sub-let before April 10, the three sections of the National Trans-Continental Ry. for which its tenders were accepted by the Commissioners recently.

The National Association of Car Service Managers has issued a statement showing the number of cars reported, and the average detention in days by railways and consignees for the quarter ended Dec. 31, 1906. The Canadian Association reports: 283,450 cars, .41 average detention by railways; 1.66 average detention by consignees, against 111,845 cars for the quarter ended Dec., 1905. The average detention of the cars is not reported for 1905.

The Chilled Cast-Iron Wheel.

By W. E. Fowler, Master Car Builder, Canadian Pacific Railway.

The chilled cast-iron car wheel would appear to be a product peculiar to this continent. I believe its birthplace was here, and certainly its home is with the American, and particularly the North American railways. I do not think it would be untrue to say, that without it, the immense mileage attained by railways on this continent would not have been possible. It certainly is true that it has been a great factor in the economical operation of our railways, and a primary feature which, in the evolution of the modern railway, has not been crowded out of existence, because it cannot be dispensed with. There is not another essential part of the freight car equipment which costs the railway companies so little money, compared with the service rendered, as does the cast-iron car wheel. The 600-pound wheel costs about $10.80 new, and after giving a mileage of 40 to 70 thousand, it is turned back to the foundry at a scrap value of about $7.80, giving a cost per 1,000 miles of about 5c. Can it be possible that this showing can ever be beaten with any other kind of wheel? I very seriously doubt it. An English railway official, a short time ago, asked in all seriousness, "Is it possible that you are still using cast-iron car wheels? We would be afraid to use them under any of our cars, light as they are." And my answer was, "I do not see how we can do without them."

The origin of the chilled wheel I am unable to state, but that it originated in the U.S. there is no reason to doubt. I remember, however, 25 years ago, that there was quite a variety of cast-iron car wheels. There were the single plate wheels, some with and some without raised ribs or spokes, some corrugated and some plain. Double plate wheels there were of many sections, and both single and double plate wheels were made in all sizes from 30 to 42 ins. in diameter, with long hubs and short hubs, some having their greatest projection beyond the outside, and some beyond the inside, with width of tread and thickness of flange varying also (but not so widely) until the M.C.B. Association succeeded in getting adopted a standard wheel diameter, a standard section of tread and flange, a standard length of hub, and a standard diameter of wheel seat for each size of axle. We are in full possession of all the benefits derived from these standards, beyond computation as they are, and it is hard to believe that there are railway officials to-day who do not appreciate what the M.C.B. Association has achieved in this and other matters, and what may yet be done with proper support and recognition.

The factory or foundry where the wheels are made is a never-failing attraction, and its lay-out and equipment intensely important. Until a few years ago the wheel foundry was usually laid out in circular floors or moulding sections, each floor being served by a jib crane set in its centre for handling the chills and moulds while being rammed up and prepared for the hot metal, for handling the hot metal in the ladles while filling the moulds, and for handling the hot wheels while being taken from the moulds and started towards the annealing pits. The circular floor, however, was not economical of space nor labor, and it is rapidly giving way to the electrically-operated foundry, laid out in rectangles, the Angus foundry of the C.P.R. being one of the latest and most improved of this type. This foundry is laid out with the core rooms, with their ovens, the elevator cupolas, and charging floors, along one side of the building. The floors or moulding equipments are laid out in parallel lines with 9 ft. centres, each with a capacity of 20 wheels. The hot metal is supplied by buggy ladles along one end of these floors, and the finished hot wheels removed by buggies or lorries along the opposite end, one end of the building being devoted to the pits for annealing the wheels, the stacking floor to receive them after being removed from the pits, and the foreman's office.

The manufacture of the wheels commences at the breaker where old car wheels (to the extent of from 40% to 60% of the weight of new wheels turned out) are broken by the big drop weight, the foreman carefully inspecting the broken pieces, so that he may determine what proportion and variety of new pig shall be used with each charge. The hot wheels are placed in the annealing pits as soon as practicable, that is, when cool enough to handle with no danger of warping or bleeding, after being placed in the pits. The wheels remain in the pits about 4 days, cooling slowly and uniformly, but are generally as hot as can be comfortably handled when taken out. After being taken out they are cleaned, inspected, taped, and tested, representative wheels being taken for the latter purpose. The thermal is the only test now in force at Angus, the severity of it being sufficient, it is considered, to permit dispensing with the drop test, which was the old stand-by. Cracked plates, cracked brackets, shelled out spots, worn flat spots, and treads worn hollow, are defects of manufacture, and should not be considered as evidence of general unreliability of the cast-iron wheel, as they can be avoided by putting better material and more careful work into the wheel. Worn flanges are generally traceable to one of the following causes: Trucks which do not curve easily, couplers without sufficient lateral clearance, cutting by brake shoes, and inaccurate mating of wheels. I believe that proper care is very rarely given to the last named operation, and in consequence, wheels one or more tape sizes apart are sometimes mounted on the same axle, to begin, as soon as put in service, destructive flange wear, and increased load on the engine Until quite recently, the part the brake shoe plays in flange wear has been given very little attention, but the air brake men, in their deliberations, have called attention to the poor service given by brake shoes set too wide apart, which in consequence of this form flanges on the shoes over the wheel rims, frequently leaving less than half the area of the brake shoe in contact with the wheel tread, with the resultant loss of frictional contact, and a waste of brake shoe metal. But the wheel flange also suffers by this improper arrangement.

Too little attention is given to the proper hanging of brake beams, to the centering of the brake heads, with relation to the tread of the wheels, as also to the necessity of uniformity in the length of the brake hangers. Any of these defective practices will result in poor braking service and injury to the wheel. A brake shoe when first applied may overlap the rim of the wheel ever so little, but with each reduction of its thickness in service the lap will increase, and the brake shoe on the other end of the brake beam will be forced more and more against the flange of the wheel, gradually bringing about the condition described as worn flange. I have described this condition particularly, because it is one which is not generally given the consideration it deserves, and I am sure that if brake heads are set at 60 in. centres, instead of 60½ ins., that a considerable reduction of flange wear will be noted, and we will wear out our brake shoes evenly and uniformly, and get the work out of them for which they are made.

The importance and value of the cast-iron wheel in railway service lies unquestionably in the wearing qualities of its tread or tire, the more than steely hardness of which gives more mileage for the same amount of wear (or metal removed) than any other wheel in existence. And not only does it stand up well under its present service conditions—that of carrying heavy loads over steel rails made as hard as they can be without danger of breaking, it also withstands with comparative freedom from failure the tremendous friction of the brake shoes when making stops from a high speed, or when descending long, heavy grades. It is not uncommon in mountain districts to see the grease on the face of the wheels smoking from this cause, the wheels themselves being too hot to touch and the brake shoes red hot, and it will be, I think, very difficult to produce materials of any other kind which will give us wheels so serviceable, so economically manufactured and so valuable when worn out, as the chilled cast-iron wheel.

The design of the present wheel is a matter of evolution, or survival of the fittest. The amount of iron in the hub is that which has been found necessary in service to stand not only the pressure at which the wheel is forced on the axle without fracture, but the tremendous force exerted by the brakes when a stop is being made, which tends to loosening of the wheel on the axle seat, unless forced on at the proper pressure, which pressure cannot safely be applied without the proper amount of metal in the hub. The length of the hub has also of course much to do with the question of thickness of it, and the pressure at which the wheels are mounted, but both have been decided by that safest of teachers, experience, and there is practically no dissent from the M.C.B. Association's standard practice of to-day. The size and form of the ring core, as it is called, which gives the inner surfaces of the double plates their proper thickness and outline, is also the result of long experience and test, many slight variations have now given away, the last design of ring core submitted by the M.C.B. Association being in general use.

The number and form of the brackets is to some extent not uniform, the M.C.B.'s form and number not yet being accepted by some as the most desirable, but it will require more experience and longer service to determine whether the increased number of brackets, and consequent increase of weight, will do all that is claimed for them. With the experience had on the C.P.R., I believe they will, for reasons to be given later.

The outline of the tread was recently subjected to some change by the M.C.B. Association, the slight increase in the coning making it 1 in 20, instead of 1 in 25 as formerly, and the making of the coning simple instead of duplex, being done to cause the wheel to run more nearly upon the centre of the tread and away from the flange, which is the weak part of the cast-iron wheel of to-day. But is this weakness surprising? The flange of the wheel of 1905 was originally designed for cars of 20,000 and 30,000 lbs. capacity, the length of these cars was from 20 to 28 ft., and they were run at speeds of from 10 to 20 miles an hour, and yet under cars of 80,000 to 100,000 lbs. capacity, run at speeds of 30 to 45 miles an hour, the same flange has done fairly well, but there have been many failures.

The flange, amply strong under the light cars, developed a tendency to break off at the throat, there not being enough metal there to withstand the brake shoe and rail friction, the latter being aggravated by the heavy car, and by the heavy lateral thrust against the rail of the wheel going at high speeds, evidence of the trouble developing first in the form of fine cracks, fine as a hair, which appear at or near the throat of the flange, and which, in continued service, extend around the wheel and into the tread, until sometimes it can be seen under the tread, having continued through the body of it, and extended across one or two of the brackets, and unless removed at once the wheel is ripe for serious trouble. The number of wheel flanges broken during the past few years

PROFESSIONAL CARDS.

THE RAILWAY AND MARINE WORLD is especially adapted for the publication of professional cards of engineers, inspectors, analysts, electrical experts, naval, grain elevator and other architects, solicitors, etc., who desire to bring themselves under the notice of the managements and officials of the various steam and electric railway, steamship, grain elevator, telegraph, telephone and power companies throughout Canada, as well as the locomotive, car and shipbuilders, contractors and promoters of railway enterprises. THE RAILWAY AND MARINE WORLD is the only one medium through which all these important classes can be reached.

Rates will be quoted on application.

The Chilled Cast-Iron Wheel.

(*Continued from page 259*)

has been the cause of serious concern to the mechanical departments of the railways, and the M.C.B. Association, after becoming convinced that flange failures of this kind were not confined to the wheels made in any particular foundry, and accordingly not due to any special mixture, placed the matter in the care of a committee who recommended at the last convention that the thickness of the flange be increased by 1/8 in. when measured at the gauge line, this increased thickness tapering to nothing near the apex of the flange. In doing this they have the sanction of the Maintenance of Way and the American Railway Associations, which were satisfied, after close investigation, that this increased thickness would necessitate no change in frog or guard rail clearance, and the thicker flange has since been adopted by M.C.B. Association letter ballot, so that the benefits of this improvement should soon be apparent.

It is probable, however, that this will not entirely remove the trouble, and it may be necessary at some future time to further strengthen the flange. In an endeavor to supplement this strengthening of the flange we have, on the C.P.R., changed the section of the wheel, making no change however in the tread and flange outer outline. The change consists in making the brackets to a smaller radius, and so extending them under the throat of the flange as to make them practically continuous, and thereby add materially to the thickness of metal at this point. This practice, while not in service long enough to demonstrate the full value of it, has been of such value as to extend its application to C.P.R. wheels for cars of all capacities, having been first proven valuable under heavy service.

Let it not be forgotten, however, that first-class service cannot be expected from wheels made with poor materials. The finest quality of charcoal iron is none too good for the cast-iron wheel, and in as large proportion as conditions will permit. Some of the largest wheel manufacturers on this continent state that wheels can be made from new charcoal iron that will meet the requirements of any railway service, whether passenger or freight, which would indicate that the price paid is to some extent responsible for wheel failures. Do not forget also that the best wheels made can be so misused during the assembling operations as to cut short their life. Bore them out of true, or locate them at different distances from the centre of the axle, or mate wheels of different tapes on the same axle, and long before the guarantee limit is reached one wheel will have a worn flange. There are other causes for worn flanges, as has been said, but those just referred to are within the province of the men who mount the wheels on the axles to prevent, and they must do so.

I know of no reason why so essential a part of the freight car cannot be so modified and improved as to be perfectly safe and economical under cars of the highest capacity, and if its friends will only stand by it, will successfully meet and overcome competition of any kind, and from any source whatever.

The foregoing paper was read before the Canadian Ry. Club recently.

The Treasurer of Ontario intimated in the Legislature recently, that there would not be any increase in the taxation on railways this session.

W. H. Jenkins, B.A., formerly Registrar of the Ontario Education Department and Secretary of the Education Council, who died at Madoc, Ont., Mar. 25, was a brother of B. S. Jenkins, General Superintendent C.P.R. Telegraphs, Winnipeg.

F. H. McGuigan Leaves the G.T.R.

F. H. McGuigan, Fourth Vice-President G.T.R., severed his connection with that company Mar. 30, to enter the service of the Great Northern Ry. (U.S.A.). Up to the time of writing, his title had not been definitely announced, but a press report credited the President, J. J. Hill, with stating that Mr. McGuigan would be appointed 1st Vice-President. It is said that L. W. Hill, now Vice-President, will be appointed Assistant to the President. Mr. McGuigan was entertained at a farewell dinner at the Canada Club, Montreal, Mar. 30, by a number of transportation officials and others.

Mr. McGuigan was born at Cleveland, Ohio, in 1850. He entered railway service in 1883, as water boy, Erie and Pittsburg Division, Pennsylvania Rd., after which he held to 1874 various minor positions same road, his subsequent record being: 1874 to 1880, roadmaster same road; April 19 to July 1, 1880, foreman construction train, St. Louis and Omaha division, Wabash Rd.; July 1, 1880, to Jan. 1, 1885, division roadmaster, same road; Jan. 1, 1885, to 1888, general roadmaster, lines west of Mississippi River; 1888 to Dec. 31, 1895, Superintendent Western Division, same road, at Kansas City, Mo.; Feb. 15, 1896, to Mar. 1, 1902, General Superintendent; G.T.R.; Mar. 1, 1902, to Jan. 1, 1905, Manager G.T.R.; Jan. 1, 1905, to Mar. 30, 1907, Fourth Vice-President G.T.R.

Up to Mar. 30, no announcement had been made as to Mr. McGuigan's successor on the G.T.R. Press reports mention G. C. Jones, General Manager Central Vermont Ry., and W. G. Brownlee, Superintendent Middle Division G.T.R. Other reports say the Fourth Vice-Presidency is likely to be abolished and that a General Superintendent will probably be appointed.

The G.T.R. and Two Cent Fares.

The Ontario Court of Appeal delivered judgment, Mar. 14, in the case in which C. M. Hays, Second Vice-President and General Manager G.T.R., was charged with failing to run third-class trains and to carry passengers at a penny a mile as provided by the charter. The judgment was on a stated case as agreed, a summary of which was given in our March issue, pg. 153. The court quashed the conviction.

Justice Osler's judgment, which was endorsed by Chief Justice Moss, said: "This conviction is open to a great many objections, most of which, I should say, are fatal to it, but only one or two of the most obvious must be noticed. The defendant has been summarily tried under the act incorporating the G.T.R. Co., and under a section of the Criminal Code, that enacts that every one is guilty of an indictable offence and liable to two years' imprisonment, who, without lawful excuse, disobeys any act of Parliament, unless some penalty or other mode of punishment is expressly provided by law. The section of the Act incorporating the company relied on by the prosecution, enacts that the 'fare for each third-class passenger by any train on the said railway shall not exceed one penny currency for each mile, and that at least one train having in it third-class passengers shall run every day throughout the length of line. The complaint is that the defendant—not the company—has disobeyed this section of omitting to do that which the section required to be done. The magistrate found that the company had not during 1906 permitted a third-class passenger to travel by any train on said railway at the fare of one penny currency for each mile and, further, that the said company had not during that time provided that at least one train having in it third-class carriages should run each day between Kingston and Toronto. Upon these findings the magistrate proceeded to convict the defendant, C. M. Hays, though no formal conviction seems to have been drawn up, of the offence charged against the company. Upon the mere statement of the case the answer must be that the conviction is wrong. The charge is that Hays committed the offence, while the findings are that the company did so. In the absence of any clear statutory enactment, the defendant cannot be punished for the default of his company. There is no authority to prosecute the defendant. The obligation, if there be one, is the company's, and the company, and not its official, however important and commanding the position which he occupies, is the one to be prosecuted."

Regarding the act of 1852, Justice Osler said that the question whether it was unofficially repealed by the act of 1903, was one for the Railway Commission, whose decision was subject to reversal by the Supreme Court. Written judgments by Justices McLaren and Meredith concurring in the conclusion, were also handed out.

Unconfirmed Press Reports.

That H. G. Elliot, Assistant General Passenger Agent, G.T.R., Montreal, is to be transferred to the Central Vermont Ry.

That J. D. McDonald, District Passenger Agent, G.T.R., Toronto, is to be transferred to Montreal, and that W. Duperow, travelling agent, Toronto, will succeed him.

That G. J. Bury, Assistant General Manager C.P.R. Western Lines, has been offered the General Managership of the Chicago, Rock Island and Pacific Rd

That E. A. James, Manager Canadian Northern Ry., will retire at an early date and that he will not re-enter railway service. Mr. James has denied this report.

The Necessity of Technical Education For Mechanics.

By R. Paterson, Master Mechanic G.T.R., Stratford, Ont.

Being much interested in the training of apprentices for the mechanical trade, also in the education of the younger mechanics, any papers read or discussions on the subject have always been of great interest to me, and when asked to prepare a paper on some subject, I selected this one, not perhaps so much with the idea of imparting new information, as with a view to bringing up a subject that is of great importance, requiring careful study and attention by the industrial community of Canada, and those responsible for the proper education of Canadians to-day. A glance at the title of this paper might give the impression that I favored the university educated mechanic, or mechanical engineer. I only partially approve of same, and believe that a system of combined practical and technical education should precede any such course.

In papers without number and discussions without end, it has been endeavored to try and settle the question as to whether the university educated man or the practically educated man has been the most successful in giving the best results to his employers and the mechanical world at large. Although there have been numerous university graduates who have shown great brilliancy and accomplished much, yet the practical man has not by any means been outclassed, and is probably holding more positions of high responsibility and trust to-day than his university graduate competitor. However, it is not this phase of the subject I wish to deal with, but the technical education of the average mechanic,

and the system of education by which it can be most successfully accomplished as to thoroughness and economy of time.

In this young and growing country of ours, the rapid development of steam and electric railways, and the vast increase in manufacturing industries, have created a demand for increased and rapid facilities for doing work, and for producing mechanics able to keep pace with the development. From all appearances the future will create a still more urgent demand. To meet present and future requirements a quick and thorough system of education will be necessary to provide adequately trained men. The men at the head of our public educational system to-day have already realized this, and as a result the boys in our public schools are taught manual training. The system should be in force in every centre in the country. It would help parents and guardians by enabling them to judge of the fitness of the boy for his future profession, mechanical or otherwise. It is a great assistance to the boy who intends to enter the mechanical profession, and best of all it is teaching him to appreciate, respect, honor and have a desire for honest manual labor, an attitude of mind which will be of incalculable benefit to the individual, and will produce a beneficial effect on the country at large.

To begin with, the boy or young man who intends becoming a mechanic, or mechanical engineer, should have a partial high school education. This would insure a good ground work for his further development during his progress through the shop, and while learning his trade, in addition to his practical everyday instruction, which ought to be under the supervision of a thoroughly trained and competent instructor, his technical training should go on at the same time, and it should be just as much a part of his duties as to turn bolts, fit up a motion, etc.; in other words, the boy or young man's practical and technical training should be combined and go hand in hand until he develops into a full-fledged mechanic or mechanical engineer. To accomplish this it will be necessary that employers establish a system of technical education in connection with their works. I would urge the wisdom of our Government making liberal grants for technical education, and the necessity of making our technical schools really technical, and not so in name only. Boards of Trade, etc., might interest themselves in this matter with good effect, and we might have a splendid system of technical education which would at least approach that of the United States or Germany.

A number of corporations in the U.S. have schools in connection with their shops, and on the G.T.R. we also have a system of technical training for our apprentices, which takes them through a five years' course in mathematics, applied mechanics, mechanical drawing, and machine design, but I would add to this (what I think would make the system complete), a one year's course at the university. That is, the university should have a special one year's course for young men who are capable, after learning their trade, of passing an entrance examination, and on payment of a small fee be able to take this course. In this course they would have the privilege of making experiments, tests, etc. A young man who wished to succeed and obtain a more advanced education could do so, and could pay his way, which would be preferable. A young man who could see this opportunity before him would thus be stimulated throughout his apprenticeship and would be more diligent, attentive and ambitious. In addition to the actual information in connection with his work which he would get at the university, and which he would be able to take in more readily on account of his five years' practical and technical training, he would receive general improvement by coming in contact with men of learning and culture for a year. This would not take him so long from the practical work as would a four years' course, for after a four years' course he would find so many changes that he would require to go over a great deal of ground again.

This system should also extend to the younger journeymen mechanics, and where technical schools are not provided in the locality, or even if they are, corporations and manufacturers should provide tuition for these employes who, if capable of passing necessary entrance university examinations, could avail themselves of the one year's special course. This would be of great benefit to employer and employe as well. There would always be a number of well-educated practical men available for responsible positions, and with this course we would have our mechanic well educated, but contented with his position and work, and not feel disappointed because he had the education, and not always the position, but could be satisfied to get what was coming to him on his merits.

If we combine the practical and technical training of our boys and young men, we would have the best average mechanic who would meet all requirements of these times of rapid progress and development, and we would, I believe, solve labor problems to a great extent.

The foregoing was read at a recent meeting of the Railway and Engineering Club of Canada.

Inverness Railway and Coal Co.

Following is the report for the year ended June 30, 1906: "Your directors regret that the Company's affairs are not in a more prosperous condition. The total tonnage mined during the year was 181,959 tons, which, compared with the output of the previous year shows a decrease of 10,852 tons. Your directors in the last annual report made reference to the fact that the Intercolonial Ry. had withdrawn their patronage from the Company in the matter of a coal contract, but that negotiations were then pending looking to the renewal of the previous year's contract. After considerable delay a contract was ultimately arranged, but inasmuch as shipments under it were comparatively small until the opening of St. Lawrence navigation in May, 1906 (practically six weeks before the close of the fiscal year), the value of this contract does not to any appreciable extent appear in this report. During the progress of the negotiations with the Intercolonial Ry. the output of the colliery was limited, your directors feeling that a contract with the Government would ultimately be made and they considered it best in the interests of the Company not to enter into contracts for the disposal of the output of the mines elsewhere. Since the close of the fiscal year the returns for the five months ended Nov. 30, 1906, have been received, which show, compared with the same period of last year, an increase in net earnings of $39,035.41. This result is to some extent due to the very satisfactory increase in the sale of coal for bunker purposes and to the continued growth of sales in connection with the coasting trade. With the object of improving the coal some changes have been made in the system of mining and the method of preparing the coal for the market, and your directors are pleased to report that the result of these changes is shown in the higher regard in which the coal is held by consumers generally. Recent changes in the Nova Scotia Mines Act have made it necessary to re-survey certain of the Company's mining leases at Inverness and take out the same areas under amended descriptions. As a consequence it has been necessary to surrender the leases previously held, and a supplementary mortgage trust deed to the National Trust Co., Ltd., trustees for the bondholders, has been executed covering the same areas. Your directors ask your approval of their action in this matter. The underground workings of your mines have, as usual, been regularly inspected by the Provincial Government Inspector and are in good condition. Development work has been continued well in advance of actual mining operations. The physical condition of your railway has been fully maintained."

Quebec Taxation of Transportation Companies.

The resolutions passed at the recent session of the Quebec Legislature relating to the taxation of corporations provide for the following: Sleeping or parlor car companies, ¼ of 1% on the capital invested in cars used in the Province and an additional tax of $50 on every office or place of business in Montreal and Quebec, and $20 for offices or places of business in any other place. On hotels in the Province operated by railway companies on the paid-up capital employed, the tax (a) of division 1, article 1,145 of the Revised Statutes and the additional tax (b) mentioned therein. Telephone companies, upon the paid-up capital if it exceeds $300,000, $1,200; if it exceeds $500,000, $1,500; if it exceeds $1,000,000, and does not exceed $2,000,000, $2,000, and ½ of 1% on the gross earnings, but not less than $3,000 nor more than $5,000 if the capital exceeds $2,000,000. Express companies foreign to Quebec, ½ of 1% upon the gross earnings in the Province the previous calendar year, provided the tax be not less than $800. Foreign to Canada, an additional tax of ½ of 1% upon the gross earnings in the Province for the preceding year, provided the tax be not less than $400. Railway companies, for each mile of track of steam or electric railway, $30 a mile for one track, and $15 a mile for each additional track operated; $20 a mile for single track branch lines, and $10 a mile for each additional track. The company owning the line as well as the operating company will be liable for the tax, but the measurement for the mileage shall not include switches, spurs or sidings.

Specially designed cars are not necessary. We can equip any standard car. Send for Bulletin 18.

S. F. BOWSER & CO., Inc.

66-68 FRAZER AVENUE
TORONTO, CANADA

To the Holders of Great Northern Railway of Canada 4% Guaranteed Bonds.

NOTICE IS HEREBY GIVEN that The Canadian Northern Quebec Railway Company, successor by amalgamation of Great Northern Railway of Canada, will, on surrender, as below mentioned, not later than April 14th, 1907, of Great Northern Railway of Canada Four Per Cent. Guaranteed Bonds, issue in exchange therefor Four Per Cent. Canadian Northern Quebec Railway Company Perpetual Debenture Stock (guaranteed both as to principal and interest by The Canadian Northern Railway Company) at the rate of £95 sterling of such Debenture Stock for each $500 of Great Northern bonds, interest to be adjusted both on stock and bonds, the said Debenture Stock to be issued in London, England.

The holders of Great Northern bonds who wish to make the exchange on the terms above mentioned may send their bonds to National Trust Company, Limited, Toronto, Canada, one of the Trustees of the Mortgage securing the said Debenture Stock, specifying in whose name or names the Debenture Stock is to be issued. Interest on the Debenture Stock is payable half-yearly on the 30th June and 31st December, and the adjustment of interest will have to be made with the National Trust Company. Upon this adjustment being made, the National Trust Company will arrange with its Co-Trustee in London, England, for the issuance of Debenture Stock in accordance with the instructions given by the holders of the Great Northern bonds. Further particulars can be obtained from the Canadian Northern Quebec Railway Company, 1 Toronto Street, Toronto, Canada.

W. H. MOORE, Secretary,
The Canadian Northern Quebec Ry. Co.

Toronto, March 14th, 1907.

Percy R. Todd, a Canadian by birth, has been elected Vice-President Bangor and Aroostook Rd.

A. W. Mackenzie, Treasurer Canadian Northern Ry., Mrs. Mackenzie and children, left Toronto Mar. 12 for Biltmore, North Carolina, and are expected to return about the middle of April.

The G.T.R. added the following rolling stock between Dec. 22, 1906, and Mar. 9: 3 parlor cars, 3 first-class cars, 5 baggage and express cars, 8 cabooses, 623 box cars, 166 flat cars, 53 ballast cars, 3 snow plows.

E. A. Williams, formerly Superintendent of Motive Power, C.P.R., who resigned his position as General Mechanical Superintendent of the Erie Rd. recently, is going to take a good long rest after 43 years' continuous railway service.

J. Leslie, who resigned his position as roadmaster G.T.R. at Ottawa, recently, has been appointed General Roadmaster Quebec, Montreal and Southern Ry. Office, Sorel, Que. He will have charge of betterments and construction works as well as maintenance of way

A. McAuley, who recently resigned his position as C.P.R. roadmaster at London, Ont., owing to a bronchial affection which rendered him unable to stand the exposure which roadmasters are subject to, is living in Toronto Junction and will probably establish himself in the grocery trade there.

J. H. Jagoe, heretofore General Southern Passenger Agent Rutland Rd., New York, has been appointed General Eastern Passenger Agent West Shore Rd., New York, succeeding his brother, H. B. Jagoe, resigned. Both brothers were born in Hamilton, Ont.

F. R. Nelson has been appointed Travelling Freight Agent for the Southern portion of the G.T.R. Middle Division, with headquarters at Hamilton. He was for a number of years chief clerk in the local freight agent's office at Hamilton, having practically started there as a junior. The local office staff gave him a gold watch and locket on his promotion.

A G.T.R. circular issued Mar. 30 over the signature of C. M. Hays, Second Vice-President and General Manager, reads: "F. H. McGuigan, Fourth Vice-President, having resigned to enter the service of another company, all officials heretofore reporting to the Fourth Vice-President, will, until further notice, report to E. H. Fitzhugh, Third Vice-President, Montreal."

Peterson & Co., Limited, was registered in England Mar. 7 with a capital of £50,000 in 2,000 preference shares of £10 each, and 30,000 ordinary shares of £1 each, for the purpose of carrying on the business of shipowners, etc. There is to be no initial public issue. The first directors are W. Peterson (permanent Managing Director), and others are to be appointed by the signatories, while the qualification is £50, and the remuneration of the Managing Director is to be £1,000 a year, and 5 per cent. of the net profits before providing for reserve or depreciation.

ELECTRIC RAILWAYS.

The Hamilton Street Railway Case

The Ontario Railway and Municipal Board has rendered its decision in the case of the complaint against the Hamilton St. Ry. Co. It is of such great importance to electric railway companies generally, that we give it fully as follows:

This application first came before the Board in the form of a petition signed by 47 of the residents of James and Herkimer streets, dated July 21, 1906, which was afterwards adopted by the Hamilton City Council, and forms part of the city's application to the Board, which was filed Sept. 1, 1906. The petition from the citizens alleges that owing to the noise and vibration caused by the dilapidated condition of the cars, roadbed and general equipment used by the street railway company, those of the public residing on the streets in proximity to the company's lines of railway are subject to constant and serious annoyance and are thereby prejudiced in the enjoyment of their homes. The city's application charges that the tracks are in a bad and worn-out condition over practically the whole system; that the rails are flattened and worn at the joints; that the pressure of the car wheels upon the rails is uneven and the lip of the rails is in many places worn off; that the tracks and roadbed are badly constructed and ballasted, allowing the rails to spread and causing such vibration of the rails as to render it practically impossible to maintain the adjacent pavement. That the cars operated by the company are in many instances dilapidated and in bad repair, and the general upkeep of the cars is unsatisfactory. That many of the cars are entirely unfit for the service, the fastenings, bolts and loose parts of the cars being in such a condition as to cause a maximum amount of noise. That the working parts of the cars are badly worn. That the car wheels are wider than the rails. That the system of brakes is inadequate to the service.

The application was made under section 63 of the Ontario Railway and Municipal Board Act, 1906, which provides that where it is alleged by a municipal corporation having jurisdiction over a highway along which a railway is operated in whole or in part, under an agreement between such municipalities and the company operating the railway, that the company has violated or committed a breach of such agreement, the Board shall hear all matters relating to such alleged violation or breach of agreement, and shall make such order as to the same as to the Board may seem reasonable and expedient, and in such order the Board may in its discretion direct the company or the municipality to do such things as are necessary for the proper fulfilment of such agreement or to refrain from doing such acts as constitute a violation or breach thereof.

Section 164 of the Ontario Railway Act has not been invoked by the applicants, nor could it be successfully, for the reason that it has not been established that the railway is dangerous to the public using the same. The rights of the parties, therefore, depend upon the agreement between the city and the company. The agreement is contained in by-law 624 of the city of Hamilton, passed Mar. 26, 1892, which was accepted by the company by an agreement under seal bearing the same date, and in a by-law of the city passed April 30, 1906, which was not assented to by the company.

Nothing is said in by-law 624 as to the repair of rails, curves and switches; no standard of maintenance of tracks has been fixed by the by-law. The horse car idea seems to have been prevalent and uppermost in the mind of the draftsman of the by-law, because great care is taken to provide for the repair and maintenance of the street surface, but nothing is specifically said as to the repair of the rails, switches, curves or special work of the railway. The only reference to repairs is contained in sec. 21 of by-law 624, which is as follows: "It is hereby reserved for the said city council to make such further rules, regulations, orders and by-laws in relation to the construction, repairs and operation of the said railway as from time to time may be deemed necessary to protect the interests of the said city, or to provide for the safety, welfare, or accommodation of the public; but that no alteration in these rules shall be made which shall have the effect of impairing the substantial rights of said company."

In pursuance of this section the city council on April 30, 1906, passed a by-law enacting as follows: "The Hamilton Street Railway is hereby required to put into good repair without delay all the tracks of this railway in the city of Hamilton, and repair and make good all the pavement and roadways which have been injured by the company's cars upon the defective tracks of the railway within the city."

Section 21 of by-law 624, and the by-law passed in pursuance thereof on April 30, 1906, constitute the only agreement before the Board under which the Board is asked to compel the company to repair the tracks, switches, curves or special work of the railway. The agreement as to the cars is contained in section 14 of by-law 624, which reads as follows: "The said company shall place and continue on said railway good cars with all modern improvements for the convenience and comfort of passengers, including lighting and heating, and it shall run cars thereon as the public convenience may require, under such directions as the city council may from time to time prescribe, and no permanent business signs shall be carried on the outside of the cars for advertising purposes."

The by-law passed by the city on April 30, 1906, does not touch the question of the repair of cars. No other by-law providing for the repair of the cars has been brought to the attention of the Board. The cars now being operated by the company, the repair of which is complained of, in al-

most every instance are the same cars that were placed on the railway when it was originally equipped, in pursuance of sec. 14 of by-law 624. No doubt they were good cars when put on the railway, and had all modern improvements for the convenience and comfort of the passengers, including lighting and heating, otherwise the city would not have permitted them to have been put in commission. They are the same cars, but they want repairs. They are old fashioned, but they will be good with repair for a number of years.

It is clear to the Board that upon the evidence that not only the tracks, switches, curves and special work of the railway, but the cars are in need of repairs. The question as to whether or not the city has the right to compel the company to repair the cars is somewhat troublesome. The Board, however, is more concerned with conditions and with the convenience and the comfort of the people than with technicalities and fine-spun questions of law, and therefore holds as a matter of law that sec. 14 and 21 of by-law 624, and the by-law of April 30, 1906, constitute an agreement not only for the repair of the tracks of the railway which includes the switches, curves and special work, but also the cars. If the Board is wrong in this view, the Court of Appeal will have to put it right. Standard of repair not having been expressly specified in the agreement, the repair must be reasonable under all circumstances. Repair is a relative term. The Board thinks it is right, when fixing the character of repairs of this railway and its cars, in keeping in view the cases which have arisen under the Municipal Act for non-repair of highways, and that the same principle which has been acted upon in these cases are applicable in this case. A great deal of evidence has been given as to the state of the non-repair of the tracks and cars. The electric plant of the company from which it gets its motive power is stated by all the witnesses to be first class. The overhead work is good. The difficulty is with the railway tracks and cars.

The Board, in pursuance of the request contained in the first petition, authorized Wyse & Middlemist, consulting electrical and railway engineers, to make a careful examination of the whole system. The results of their labors are embodied in their report to the Board, copies of which have been furnished to the applicants and respondents. No attack has been made by either party on the substantial accuracy of Wyse & Middlemist's report, which has been of great assistance to the Board in directing their attention to the sworn testimony as to non-repairs and to what was necessary to put the system in good and sufficient repair. The Board have in the former formal judgment set forth the repairs and the character of the same which, according to the evidence, they considered necessary, reasonable and expedient to the tracks and cars.

The Board regret to say that after the repairs ordered by the Board to the system have been made, the system will not be what the city of Hamilton really requires. The fact is, the city has outgrown the system. After all the repairs which are ordered have been made, the cars will still be antiquated and the system inadequate for the requirements of the city. What the interests of the city demands, and what the people want and should have, is a new, modern, up-to-date street railway system, with additional track extensions. No contract or law exists which would enable the Board to order and direct the company to provide a modern system with the necessary additional track.

Neither in the application or the evidence at the trial was any question raised as to the sufficiency of the fenders. These can be made the subject of a special order if necessary.

The city in laying pipe on the street where the company had double tracks cut off the ends of the ties, so that one side of the tracks tilted down to such an extent that the cars could not pass. This was spoken of by some of the witnesses as an act of vandalism, and perfectly unnecessary in order to enable the city to lay pipe. The Board cannot find any warrant in the agreement for thus destroying the company's property. The formal order of the Board provides that the city shall make good the damage that has been done.

It appearing from the evidence that the Radial Railway Co., in pursuance of an arrangement with the city, is in the early spring to relay King St. east from Catharine St. to Sanford ave. with new rails and special work, the Board have made no order for the repair of that portion of King St., but reserves further order in case such should be necessary.

In reference to the costs the Board has concluded to make no order except as to Wyse & Middlemist's fees, charges and expenses for the examination of and report upon the system, which amount to $759.06, and which the Board thinks it reasonable, should be borne in equal shares by both parties. The services of these engineers were asked for by the petitioners, whose petition was assumed by the corporation. In any event their report was rendered necessary by the want of particularity in the application. It was not set out in detail what portion of the tracks and cars were out of repair, nor what repairs were necessary and reasonable. Their report enabled both parties, as well as the Board, to direct the evidence to the parts of the tracks and cars out of repair and to the remedy. Under these circumstances the Board does not consider it fair that the company should be made liable for more than one-half of Wyse & Middlemist's charges. The Board directs the company to provide $40 for law stamps for the formal order.

The Board being of the opinion that they had no power either under the agreement with the city, or as a matter of law, to order the company to provide a new, modern, first-class, up-to-date railway system, with the track extensions necessary for the requirement of a city of Hamilton's size and importance, the Board thought it well to delay handing out their formal order, and the reasons for the same, until it had an opportunity of meeting the council of the city of Hamilton for the purpose of arranging a conference between the city and the company, with a view of securing by negotiations, a new street railway system with additional tracks. Having received a communication from the city clerk advising the Board that the council does not deem it expedient to confer with the company, the Board now hands out its formal order and the reason therefor.

The order dated Jan. 28 directs as follows: "The respondents to take up and replace all worn or split rails mentioned and set forth in Wyse & Middlemist's report and replace the same by new rails. All loose joints shall be tightened and all low joints in the rails mentioned in Wyse & Middlemist's report shall be repaired with a suitable fish-plate, which will not depend on the shear of the bolts, but which will act as a girder to support the joint and be made to pass under the foot of the rail on each side, and be joggled sufficiently to raise the lowest worn portion of the railhead to grade level or top of the high rail, the whole top to be ground even. All parts of the track mentioned in Wyse & Middlemist's report as not being to gauge, shall be made true to gauge, and all curves with angular joints shall be made true arcs and circles, or if transition curves, true spirals to the same. The track work on the bridge over the G.T.R. on Barton Street shall be repaired and proper vertical curves made. All the above named track repairs not already made shall be made and completed within six months from April 1, 1907, unless otherwise ordered.

All car wheels, known as flat wheels, or wheels which have got out of ground, shall be forthwith removed and replaced by good and sufficient wheels. The trucks, motors and brakes of the cars shall be put in good and sufficient state of repair and trucks shall be repainted. The bodies of the cars mentioned in Wyse & Middlemist's report, not already repaired in manner herein set forth, shall be properly overhauled, repaired, upholstered (where upholstering has formerly been used), repainted and varnished, and the same shall hereafter be kept clean inside and out. The repairs for the trucks, motors, brakes and for the bodies of the cars shall be made within three months from the date hereof, unless otherwise ordered. All cars not now all heated by electricity shall be provided with good and sufficient electric heaters, not later than Oct. 1, 1907. The rope side guards on cars when being repaired shall be replaced by wooden side strips one inch by three.

All special work described in Wyse & Middlemist's report as worn and in need of repair, which has not been replaced since the date of their report, shall be replaced within one year from the date hereof. All street crossings, and all toothings, which are now above the level of the top of the rails, shall be made level with the rail top, and all streets where tracks are laid, but crowns of which are low, shall be crowned up and repaired by the city and the company, in accordance with the provisions of by-law 624 of the city of Hamilton. All ties cut off by the servants or workmen of the city corporation, or by their contractors, in laying pipe on that portion of the streets occupied by the company's tracks, shall be replaced by the corporation, and the tracks raised up where they have sunk from insufficient refilling of the earth, the whole to be made by the corporation as good as it was previous to the disturbance of the company's tracks.

The corporation of the city of Hamilton shall forthwith pay to Wyse & Middlemist $379.53, being one-half of their account for services, and the Hamilton St. Ry. Co. shall forthwith pay to Wyse & Middlemist the other half of their account, and to the Board $40 for law stamps for this order, and otherwise the Board make no order as to costs, and the Board reserve further order and directions herein.

Immigrant Rates to Vancouver.—The C.P.R. has arranged for a rate of 1 1-5c. a mile from Liverpool, Eng., to Vancouver, B.C., for the purpose of promoting settlement in that province. Reference was made to this matter in the Lieutenant-Governor's speech at the opening of the Legislature. G. W. Bosworth, Fourth Vice-President C.P.R., said: "We did not reduce our rates with the slightest idea of running foul of U.S. roads. British Columbia wanted immigrants, and we decided to give a rate which would offer every inducement for settlers to go there. We informed the other railways interested just what we proposed to do, and they fully understand the situation. It is a big reduction, of course, in the immigrant rate, and it will mean that U.S. lines must reduce rates to Puget Sound ports, but they have known that long ago, and there should be no misunderstanding or rate war." The old rates were $80.75 by the Empress steamers and $79.50 by the company's other steamers, the new rates being $68 and $66.75 respectively.

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

LET US PROVE IT TO YOU

Galt, Preston and Hespeler Street Ry.

This company, which also owns and operates the Preston and Berlin Railway, is double-tracking its line between Galt and Preston, Ont., installing a 750 h.p. addition to its power plant at Preston, and adding to its rolling stock a 35-ton electric locomotive and four suburban cars to replace the rolling stock destroyed by fire Dec. 3 last. The cars will be 55 ft. long with a smoking room compartment 10 ft. 7 ins. The passenger and smoking compartments will be furnished with 24 reversible and 8 stationary automatic seats with tilting cushions. The foot rests underneath the seats are moveable, so that when the seat back is moved it allows the foot rest at the back to drop to accommodate the passenger sitting immediately in the rear. Polished bronze grab handles are on the aisle-end top corner of each seat back. The interior finish will be polished mahogany inlaid with white holly and ebony. The design is of the most modern character, presenting a smooth surface, highly polished and having none of the unsanitary features so frequently found in cars of this description, all raised mouldings and projections being eliminated as far as possible, commensurate with appearance. There will be a basket rack over each seat. The door between the passenger and smoking compartments will have spring hinges and patent door checks. The ceiling will be "Semi-Empire," painted a delicate green. The deck sash will be glazed with green opalescent glass; the transom, which extends over the length of the two lower sashes, will be glazed with blue opalescent glass, particular attention being paid to the harmonization of colors and shades. The waist panel, or that part of the wall from the window sill to the floor, will be covered with painted burlap. In the upholstering of the seats in bronze green, special attention is being made to have them sanitary and yet attractive in appearance. The ventilator sashes are equipped with a sash opener, by which the conductor can ventilate the car in a few minutes without any draft on the passengers, giving a free circulation of pure air in the upper part, thus eliminating all danger of drafts. The lower sashes are designed so that the more vibration there is, the tighter they become, being fitted in the top with O. M. Edwards Co.'s spring compression rollers, and at the bottom with special bevelled locks, which force the sash frame against the framework of the car, making it practically air-tight and effectually preventing all rattling. The vestibules at each end are 5 ft. long, and equipped with automatic folding doors. As it is now against the Ontario Railway Act to allow any passenger to ride with a motorman, the cars are equipped with a motorman's cab, the door of which is so arranged that it can be folded back against the end of the car, effectually shutting in the controller and brake equipment. The motorman's seat in the tail end of the car can be used for a passenger when necessary. In one end will be located a tastefully designed incased cabinet, in which all the switches will be located. The exterior will be painted Pullman color, trimmed with gold. Possibly the greatest attention of all has been paid to the underframing work. The side sills are composed of ⅜ x 18 in. steel plate reinforced with wood, and extending the full length of the car body. This is also over-trussed and under-trussed with a combination of angle steel and wrought iron, eliminating all danger of deflection of the car body. The centre sills are also composed of continuous steel plates, extending from end to end of vestibules, blocked with wood. The intermediate sills are further strengthened by 6 x 4 in. steel angle, extending backwards a sufficient distance under the car to prevent any drooping at the points of the vestibules. Immediately under the bulkhead at each end of the car is placed a 6 x 4 in. steel angle, extending from side to side of the body. This angle iron is intended to transmit the strain borne by the over-truss, and prevents any sagging in the centre of the car. The needle beams are made of 6 in. I beams, fitted on the ends with malleable iron struts, conveying the weight to the under-truss rods. From the belt rail to the top of the sill, the car is blocked solidly with white-wood blocking, this making the side in one solid frame. The system of bracing used in the side framing is what is technically termed W bracing. Each car is equipped with a pilot at each end and radiating drawbars. At diagonal corners, steps are provided, having three risers, bringing the lower step quite close to the ground. All the glass, with the exception of the opalescent, is to be polished British plate, ¼ in. thick. The trimmings are to be solid bronze, highly polished. The curtains or window shades will be morocco embossed back, mounted on O. M. Edwards Co.'s tin spring shade rollers, and fitted with roller tip, pinch handle curtain fixtures. An electric signal bell system is to be provided with a push button at each seat. Instead of having the usual incandescent lamps with their continual alternating dimming and brilliancy, so hard on passengers' eyes, four interior arc lamps will be used. In heating every provision is made to keep passengers comfortable. An electric heater is provided under each seat and one in the motorman's cab. Fire extinguishers will be placed in each vestibule, and each car will be equipped with an arc headlight. Storm sashes will also be a feature. They will be put on in such a way in the winter that they will not in the least detract from the appearance of the car. The Westinghouse automatic air brakes will be installed on each car, as well as an auxiliary hand brake. The electrical equipment consists of 4 Westinghouse 93-A-60 h.p. motors, speeded at 45 miles an hour. These cars are also having a complete multiple unit switch control equipment.

Projects, Construction and Betterments.

British Columbia Electric Ry.—Location surveys have been completed from Eburne, on the Vancouver and Lulu Island Ry., to New Westminster, B.C., and it is intended to have the line constructed this season. The V. and L.I. Ry. is owned by the C.P.R., which will construct this branch of 9.5 miles. The branch will be electrified and operated by the B.C.E. Ry., as is the V. and L.I. Ry.

Surveys are being made in the vicinity of Victoria by a party under W. Meredith and H. Burwell. T. T. Goward, local manager at Victoria, stated that a general survey of the district was being made. Local reports state that the object of the survey is to secure additional water powers. (Feb., pg. 111.)

Fort William, Ont.—The clause in the bill before the Ontario Legislature authorizing the Town Council to construct and operate a street railway, was rejected by the private bills committee Feb. 27. An endeavor is being made to secure a reconsideration. At a meeting held in Fort William Feb. 28, a resolution was passed recommending the council to use every reasonable effort to acquire its portion of the street railway, and that meanwhile the council enter into negotiations with the Mount McKay and Kakabeka Falls Ry. The resolution also sets out that there be embodied in the agreement certain terms "that will protect the town in the control of its streets, and also embodying terms that will withdraw the agreement with the company if, prior to the beginning of the work, Port Arthur finally consents to grant Fort William its end of the railway, and that C. W. Jarvis and J. T. Horne be appointed to act with the council."

The by-law which the taxpayers had passed prior to the application to Parliament for power to construct an electric railway, set out that the projected line was to be seven miles long. It would traverse the principal streets of the town, and power was to be purchased from the Kaministikwia Power Co. The estimated cost of construction was $82,000, which it was proposed to raise by the issue of debentures. (Mar., pg. 189, and Jan., pg. 45.)

Galt, Preston and Hespeler Ry.—Preston and Berlin Ry.—The betterments projected on these lines during the current year include the double-tracking of the line between Preston and Galt, Ont., and the installation of additional machinery in the power building.

Hamilton Street Ry.—It is reported that the line will practically be reconstructed, new cars put on and other improvements made. W. C. Hawkins, General Manager, told a committee of the City Council, Mar. 12, that the company did not intend to buy new cars, nor to lay new tracks all over the city at present. It is asking the city for permission to make the strip of roadway between its tracks 5 ft. wide instead of 4 ft. as it is at present.

Innisfail to Mayton.—Negotiations are in progress for the construction of an electric railway from Innisfail easterly to Mayton, and the Ghost Pine coal mines, Alta.

London Street Ry.—An addition to the power plant on Thames St., London, Ont., is to be constructed early in the spring. The cost of the addition and its equipment is estimated at $50,000. (Jan., pg. 45.)

Moncton, N.B.—An electric railway engineer from Boston, Mass., and some U.S. capitalists visited Moncton, N.B., Mar. 14, and looked over the ground. It is understood that a proposal will shortly be submitted to the local authorities for a franchise. G. B. Willett, Moncton, is looking after the interests of the promoters locally. (Feb., pg. 113.)

Quebec Ry., Light and Power Co.—Application is being made to the Board of Railway Commissioners for approval of plans of a branch line to the projected pulp mill on the Ste. Anne River, St. Joachim, Que. (Jan., pg. 45.)

St. Joseph and Stratford Radial Ry.—The application of the company for power to

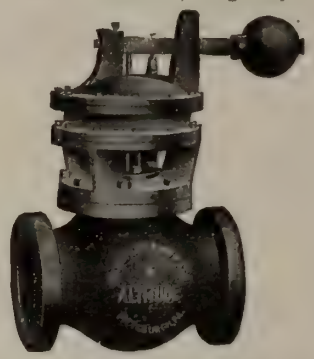
THE ANDERSON AUTOMATIC VALVES AND WATER COLUMNS FOR RAILROADS

Anderson Patent Altitude Valve
Connected to Tank Service
No Waste of Water
No Freezing of Floats

This valve maintains a uniform stage of water in tank or reservoir, doing away with the annoyance of floats or fixtures in the tanks.

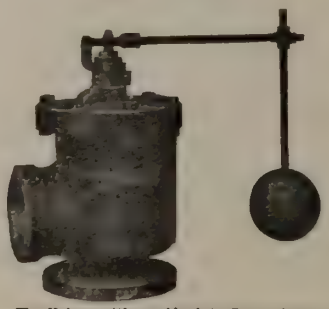


Accessible and protected from frost. Adapted for Buildings regardless of height.

Anderson Patent Float Valve
"Simply Has No Equal."

Cushioned in opening and closing. Float swivels to any angle desired

"Angle or St. Way."



The Valves with an Absolute Guarantee.

For high and low pressure. Absolutely controls the water level in tanks or reservoirs. Instantly adjusted to operate quick or slow, as desired. "No waste of water." The upper portion of body being lined with bronze, also the valve or piston being solid bronze, makes the valve indestructible. Railroad men that use them say, "Their equal is not made."

"Angle or St. Way"

The Anderson Cushioned Non-Return Valves

"Life and Property Insurance Valves"

Why! endanger your power plant by using the regular angle, globe or gate valves at the boilers when you can get the Anderson Cushioned Non-Return Valve, which is an AUTOMATIC STOP VALVE, also a HAND-STOP VALVE, all in one?

The Heaviest Line OF AUTOMATIC VALVES AND TRAPS

For High-Pressure Steam and Water Service ever Presented to Users.

WARING-WHITE BUILDING CO., London, England

construct various lines connecting St. Joseph and Stratford, Ont., as well as various other points, has been refused at the current session of the Dominion Parliament. The bill was opposed by the Ontario Government, on the ground that it was entirely a local line, and was not such as necessitated a Dominion charter.

Application is being made at the current session of the Ontario Legislature, in consequence of the rejection of the company's application by the Senate at Ottawa, for an act incorporating a company with power to construct the lines previously mentioned. The notice is signed by J. U. Vincent, J. M. Lavoie, A. A. Taillon, Ottawa. (Feb., pg. 113.)

Strathcona Radial Tramway Co.—The North-West Territories Assembly in 1901 passed an ordinance authorizing the construction of a tramway system in Strathcona, Alta. Application is being made at the current session of the Alberta Legislature granting an extension of time for the construction of the line, and otherwise amending the powers of the company. Jno. Walter is one of the promoters.

Toronto and York Radial Ry.—The extension from Newmarket to Jackson's Point, Ont., is being completed and the regular passenger and freight service is expected to be started May 1. The extension is 24 miles long, the whole line from Toronto to Jackson's Point being 54 miles long. Surveys are being made for a branch from Mulock's Corners to Bradford, via Holland Landing, about five miles. (Mar., pg. 191.)

Toronto Suburban Ry.—It is said that surveys are being made from Lambton Mills to Brantford, Ont., and that the proposed extension to Brampton may be built from Lambton Mills, instead of from Weston.

Windsor and Tecumseh Electric Ry.—The taxpayers of Walkerville, Ont., by a vote of 113 to 60, have extended for a year the time within which the projected line is to be constructed. The line is being constructed by the Sandwich, Windsor and Amherstburg Ry. Co., which recently acquired the charter. (Feb., pg. 113.)

Windsor and Tecumseh Ry.—It is expected to have 10 miles of track completed by July 1.

Electric Ry. Finance, Meetings, Etc.

Berlin and Waterloo Street Ry.—The railway committee of the Ontario Legislature has approved of the bill authorizing the Berlin Town Council to pay $75,200 into court, and assume the property and franchise of the company. W. D. McPherson, on behalf of the company, stated that it cost $90,000 to change the equipment on the adoption of electricity as a motive power in 1896, and since then the line had not paid 3% a year. The question whether the amount of the award, $75,200, is a fair price for the line is before the courts, upon an appeal by the company.

British Columbia Electric Ry.—Subscriptions have been received in London for £300,000 4¼% perpetual consolidated debenture stock at 98. The stock is irredeemable, and is entitled to the benefits of a trust deed dated Feb. 23, 1907, in favor of the British Empire Trust Co., whereby the whole of the company's assets and undertaking, including its uncalled capital, are charged by way of first floating charge, subject to the existing mortgages and charges created to secure £238,000 first mortgage debentures and £220,000 Vancouver Power debentures now outstanding. The trust provides that the total amount of debenture stock shall be limited to the amount of share capital of the company for the time being issued and paid up; that no mortgage or charge shall be created ranking in priority to or pari passu with it; that so long as any of the first mortgage debentures or the Vancouver power debentures remain outstanding, an amount of debenture stock exceeding the amount of all the first mortgage debentures and Vancouver power debentures for the time being outstanding, shall be retained unissued. When the debentures at present outstanding have been redeemed, the stock will form one consolidated first floating charge on the whole assets of the company. The interest is payable half-yearly—Mar. 31 and Sept. 30—a full half-year's interest is to be paid Sept. 30 next. The proceeds of the issue are required for the general purposes of the company to meet the necessities of the constantly increasing business, and more particularly in connection with increasing the capacity of the hydraulic plant at Lake Buntzen, and with the construction and equipment of further railways radiating from and supplementing the company's existing systems.

Cape Breton Electric Co.—Arrangements are being made for the listing of the company's stock at Halifax, N.S. A dividend of 6% has been declared on the preference stock and a statement has been made that the earnings will warrant a dividend of 4% on the common stock.

Dominion Power and Transmission Co.—Following are the officers and directors elected at the organization meeting: President, Lieut.-Col. J. M. Gibson; Vice-Presidents, J. Dixon, J. Knox; Secretary and General Manager, W. C. Hawkins; Treasurer, J. R. Moodie; other directors, J. W. Sutherland, S. O. Greening; A. Cooke, Chicago, Ill.; W. Coffin, Boston, Mass. With the exception of the two last named, all the officers and directors reside in Hamilton. The company has been licensed under the Ontario Act respecting extra-provincial companies.

Halifax Electric Tramway Co.—Railway earnings for Feb., $10,912.08, against $10,232.94 for Feb., 1906.

London Street Ry.—Representatives of the finance committee of the London, Ont., City Council met H. A. Everett, President L.S. Ry., Mar. 22, for the purpose of discussing the purchase by the city of the street railway lines and franchises.

Montreal Street Ry.—Passenger earnings for Feb., $238,250.89; total earnings, $243,467.94, against $211,827.83 passenger and $213,416.28 gross for Feb., 1906. Operating expenses, $182,275.08; rent leased lines, $339.96; city percentage on earnings, $12,600.14; interest on bonds and loans, $11,379,92; contingent for renewals, $12,173.40, against no rent leased lines; $11,198.92 city percentage on earnings; $14,254.43 interest on bonds and loans; and $10,670.81 contingent for renewals for Feb., 1906. Surplus for Feb., $24,699.44, against $21,252.69 for Feb., 1906. Gross earnings for four months ended Feb. 28, $1,300,801.47; net earnings, $439,264.70; surplus, $243,597.92, against $1,158,056.59 gross earnings; $398,842.62 net earnings and $259,880.61 surplus for same period, 1905-06.

Montreal Terminal Ry.—Following are the officers and directors for the current year: President, P. Galibert; Vice-President, F. L. Wanklyn; other directors: R. Forget, J. G. Ross, C. H. Catelli, C. S. Campbell, C. Archer.

Toronto Ry.—Car earnings for Mar., $233,860.52, against $210,531.55 for Mar., 1906.

The Sandwich, Windsor and Amherstburg Ry. Co.'s annual meeting was held at Windsor, Ont., Mar. 20. Following are the officers and directors for the current year: President, J. C. Hutchins, Detroit, Mich.; Vice-President, F. W. Brooks, Detroit; Secretary, A. E. Peters, Detroit; Treasurer, J. Bampton, Detroit; other directors, H. A. Everett, E. W. Moore, Cleveland, Ohio; A. Pack, Pontiac, Mich.; H. B. Van Courtland, New York; General Manager, J. Anderson, Windsor. This company is a part of the Detroit United Ry. System.

The Windsor and Tecumseh Ry. Co.'s annual meeting was held at Windsor, Ont., Mar. 20. Following are the officers and directors for the current year: President, F. W. Brooks; Vice-President and Manager, J. Anderson; Secretary, A. E. Peters; Treasurer, J. Bampton; other directors, J. C. Hutchins. All are residents of Detroit, Mich., except J. Anderson, who is at Windsor. The company is a portion of the Detroit United Ry. System.

Electric Railway Notes.

The Toronto Ry. has completed six cars for an electric railway in Mexico.

The London Street Ry. has received two car bodies and is adding the trucks and electric equipment.

C. M. Wilson, heretofore Traffic Manager Toronto and York Radial Ry., has been appointed Assistant Manager, and is succeeded as Traffic Manager by F. Livingstone.

The York Township Council has passed a resolution asking the Ontario Railway and Municipal Board to direct the Toronto Suburban Ry. to equip and maintain its line in accordance with its agreement with the township.

J. S. Clark, of Galt, Ont., ex-President Grand Valley Ry., was awarded $100 dammages at the Brantford Assizes, Mar. 15, in his action against a Mr. Gollidge, of Paris, Ont., for malicious and false arrest in connection with some financial transactions.

W. Newman, formerly city engineer, Windsor, Ont., and A. J. Nelles, are suing the Windsor, Essex and Lake Shore Rapid Ry. Co., for specific performance of an agreement. It is claimed that the company agreed to turn over $100,000 of its stock for the transfer of the franchise and charter held by Newman and Nelles.

The railway committee of the Ontario Legislature has struck out of the Port Arthur bill a section authorizing the operation of its street railway on Sundays. The question, however, will be further discussed in the Legislature, as the Town Council has been operating the railway on Sundays for the past two years.

W. K. McNaught, Toronto, has been appointed a member of the Ontario Government Hydro-Electric Commission, succeeding C. B. Smith, resigned. The other members of the commission are: Hon. A. Beck, London, and Hon. J. S. Hendrie, Hamilton.

The Ellison Mill and Elevator Co. is asking for tenders for a $75,000 elevator at Lethbridge, Alta.

The bill which W. F. Maclean brought before the House of Commons for the purpose of authorizing the sale of unused portions of railway tickets was defeated in the Railway Committee, Mar. 5, by a vote of 36 to 6.

The general principles of the Railway Act, which is under consideration at the current session of the Alberta Legislature, follow the Railway Act of Canada, 1903. An important feature of the Act is the provision made for the acquisition of any road under provincial jurisdiction by the province, the valuation to be by arbitration. The third arbitrator is to be appointed by the Chief Justice, in case the parties fail to agree. The time limit for construction is two years for the first 30 miles, one year for each succeeding 30 miles, the whole to be completed within five years.

BOSTON, MASS.

ELECTRIC RAILWAY STATISTICS FOR YEAR ENDED JUNE 30, 1906.

The following abbreviations are used in the names of railways:—E., electric, E. R., electric railway; E. S. R., electric street railway Ry., railway; S. R., street railway. The minus mark(—) in the column for net earnings shows that there was a deficit in the operations of the line to the extent of the figures given. The numbers in brackets—thus (1)—after the name of a railway refers to notes below.

Name of Railway	Mil'ge	Gross Earnings	Net Earnings	Proportion of earnings to working expenses	Earnings per train mile	Operating per car mile	Freight Mileage	Car Mileage	Loco-motive Mileage	Passengers Carried	Freight Carried
				p.c.	cts.	cts.					Tons
Berlin and Waterloo S. R. (1)	5.52	$ 30,370.78	$ 5,340.86	121	0.28	0.23	.....	109,200	.....	691,106	.....

Laurie Jarvis Limited

Notes to Electric Railway Statistics.

(1) The Berlin and Waterloo S. R. mileage includes the leased line, Berlin and Bridgeport Ry., 2.40 miles.

(2) The British Columbia Electric Ry. operates lines in Victoria, Vancouver and New Westminster, and operates the Vancouver and Lulu Island Ry., under an agreement with the C.P.R. It has eight miles of double track lines.

(3) The Galt, Preston and Hespeler Ry. operates under lease the Preston and Berlin E.R., 7.25 miles.

(4) The Grand Valley Ry. leases its power from the Brantford Street Ry.

(5) The Halifax Tramway Co. has 1.58 miles of double track.

(6) The Hamilton and Dundas Ry. receives its power from the Hamilton Cataract Light, Power and Traction Co.

(7) The Hamilton Street Ry. purchases its power from the Hamilton Cataract Light, Power and Traction Co. It has 10.50 miles of double track lines.

(8) The Hull Electric Ry. has 10.00 miles of double track lines.

(9) The London Street Ry. has 6.90 miles of double track line.

(10) The Montreal Park and Island Ry. has 12.75 miles of double track.

(11) The Montreal Street Ry. has 52.81 miles of double track line.

(12) The Montreal Terminal Ry. has 4.00 miles of double track.

(13) The Nelson Tramway Co. purchases its power.

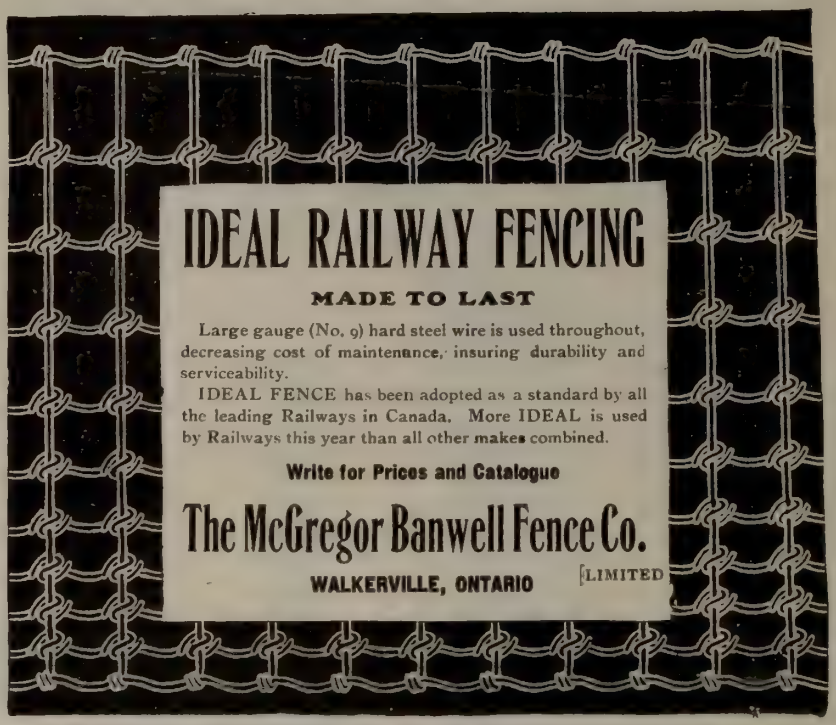
(14) The Niagara Falls, Wesley Park and Clifton Ry. hires its power. It has 11.42 miles of double track.

(15) The Ottawa Electric Ry. has 17.95 miles of double track

(16) The Peterborough Radial Ry. purchases its power.

(17) The Port Arthur Street Ry. is owned and operated by the Town Council.

(18) The Quebec Ry., Light and Power Co. has 5 miles of double track on its Citadel



IDEAL RAILWAY FENCING

MADE TO LAST

Large gauge (No. 9) hard steel wire is used throughout, decreasing cost of maintenance, insuring durability and serviceability.

IDEAL FENCE has been adopted as a standard by all the leading Railways in Canada. More IDEAL is used by Railways this year than all other makes combined.

BOOK NEWS SERVICE
THE DERRY-COLLARD COMPANY

A New Kind of a Book on Railroad Matters

Built on a new plan; is self-indexing, cross referenced and practically a cyclopedia of railroad matters boiled down into pocket form.

It is chuck full of information such as appears below and covers every phase of railroading from A to Z.

Coal—Bituminous—Average bituminous coal contains about 80 per cent. of carbon, 5 per cent. of hydrogen, 15 per cent. of other substance generally considered as foreign matter or impurities; ignites at about 1,800 degrees and weighs about 52 pounds per cubic foot. One ton of 2,000 pounds occupies 39 to 40 cubic feet. A bushel of 2,500 cubic inches weighs 75 pounds. Specific gravity 1.40.

Coal	B.T.U. per lb. combustible	Ash per cent.	Moisture per cent.
Anthracite	14,700	10 to 20	1 to 5
Semi-anthracite	14,900	10 to 20	1 to 5
Semi-bituminous	15,800	5 to 10	1 to 6
Bituminous—Eastern	15,000	5 to 20	2 to 6
" Western	14,200	8 to 25	6 to 15
Lignitæ	12,200	5 to 20	10 to 30

Coal—Consumption—Varies greatly with different conditions of trains, roads, locomotives, etc. Exact comparisons are impossible unless we know all conditions, which is seldom the case. Tests on several roads running into New York in 1897 give these results: Hard Coal: Average per train mile, 17.3 freight cars, 122 lbs.; average per train mile, 7 passenger cars, 112 lbs.; average per freight car mile, 7.05 lbs.; average per passenger car mile, 16 lbs. Soft Coal—Average per train mile, 18.15 freight cars, 120 lbs.; average per train mile, 7 passenger cars, 110 lbs.; average per freight car mile, 6.06 lbs.; average per passenger car mile, 15.07 lbs.

This is a book for the President, Manager, S. M. P., M.M., Traveling Engineer, Air Brakeman, Foreman of Shop or Roundhouse, Engineer, Fireman or Machinist: And the Price

109 LIBERTY ST., NEW YORK

Division and 6.00 miles on its Montmorency Division.

(19) The Sarnia Street Ry. purchases its power.

(20) The South-Western Traction Co.'s line only commenced operation in the latter part of June, 1906.

(21) The Toronto Ry. has 47.67 miles of double track.

(22) The Toronto and York Radial Ry. includes the Metropolitan Ry., the Toronto and Mimico Ry., and the Toronto and Scarboro E.R. Freight is handled on the Metropolitan Division. The T. and Y.R.R. is owned by the Toronto Ry.

Grain Elevator Notes.

The stock of grain in the elevators at Port Arthur and Fort William, Ont., Mar. 1, was reported to be over 4,000,000 bush.

The Oxbow Farmers' Elevator and Trading Co., with offices at Oxbow, Sask., has been incorporated under the Northwest Territories' Ordinance relating to companies.

The Canadian Consolidated Flour Mills Co. is an amalgamation of 17 milling firms in Manitoba and Saskatchewan. It has a capital of $2,000,000; its mills have a combined capacity of 3,000 barrels a day, and its elevators a combined capacity of 1,500,000 bush. It is proposed to construct a large warehouse at Winnipeg.

The Saskatchewan Grain Growers' Convention passed a resolution Feb. 22, expressing an opinion that the problem of marketing the wheat crop of Western Canada can best be solved by Government control of all terminal elevators, and the establishment of a system of internal elevators, the whole to be operated by a commission to be appointed by the Government, the Railway Commission and the grain growers of the Province, the whole cost to be borne by the grain trade.

Montreal-Fort William Freight Service.

The Montreal and Lake Superior Line, which heretofore operated six steamers, viz.: Ames, Plummer and Pellatt, of the Canadian Lake and Ocean Navigation Co.; Wacondah and Neepawah, owned by the R. O. and A. B. Mackay interests, Hamilton, and the Fairgrieve str. Arabian, under the joint management of F. Plummer, A. B. Mackay and J. B. Fairgrieve, has been dissolved.

The Canadian Lake Line has been formed to commence operations on the opening of navigation. The fleet will be composed of the Canadian Lake and Ocean Navigation Co.'s steamers Ames, Pellatt and Plummer; Capt. J. B. Fairgrieve's steamship Arabian, and three steel package freight steamships, the Morena, Corunna and Nevada, which have been purchased in Great Britain by C. H. F. Plummer. These recently acquired vessels, which were built in 1890, are each 1,249 tons gross, 768 net register, classed 100 A1; length, 232 ft.; breadth, 34 ft.; depth, 18¾ ft. moulded, cubic capacity, 84,950 cubic ft., carrying 1,378 tons dead weight, inclusive of 150 tons in bunkers, on 13 ft. draft, steaming 10 knots on a consumption of 11 tons of coal a day. They are lofty between decks, have three hatchways, fitted with triple engines, h.p. nominal 99, cylinders 17½, 26½, 44 ins. diameter; 30 in. stroke, one tubular boiler, working pressure 160 lbs.; water ballast in double bottom, and peaks; three steam winches, steam steering gear, one deck steel, and complete awning deck. The Canadian Lake Line, with its seven steamships, will give a regular semi-weekly service between Montreal, Prescott, Kingston, Toronto, Hamilton, Cleveland, Windsor, Walkerville, Sarnia, Courtright, Sault Ste. Marie, Port Arthur and Fort William. It will be under the general management of F. Plummer, Toronto, with the following staff: Traffic Manager, H. Young, Toronto; general agent, J. Brown, Montreal; soliciting freight agent, Montreal, J. Nelligan; agent, Toronto, W. H. Hickey; agent, Hamilton, Ont., E. Jordan; agent, Cleveland, Ohio, C. C. Phillpott; agent, Sault Ste. Marie, Ont., G. A. Boyd; general agent, Port Arthur and Fort William, J. J. O'Connor; with sub-agents at each of the twin ports; general agent, Winnipeg, J. McLerie. The Michigan Central Rd. agent will represent the line at Courtright, Ont.; the Wabash Rd. agent at Windsor, Ont., and the Pere Marquette Rd. agent, at Sarnia, Ont.

Another line will also give a semi-weekly service between Montreal and Fort William, the fleet comprising the Mackay steamships Wacondah and Neepawah, the Montreal and Great Lakes S.S. Co.'s S.S. Bickerdike, the Montreal Transportation Co.'s S.S. Advance, the Matthews S.S. Co.'s S.S. Haddington and Edmonton, and the S.S. Rosedale, which has been bought from the St. Lawrence and Chicago Steam Navigation Co. by a syndicate of Montreal, Toronto and Hamilton people, including R. O. and A. B. Mackay. These vessels will be operated as the Merchants and Montreal-Lake Superior Line, the intermediate ports of call being Toronto, Hamilton, Cleveland, Windsor, Walkerville, Courtright, Sarnia, Sault Ste. Marie and Port Arthur. G. E. Jaques & Co., Montreal, have been appointed general eastern agents, and will have charge of Montreal and Toronto traffic, G. Sommerville being General Agent at Toronto, and T. Burke, Soliciting Freight Agent. R. O. and A. B. Mackay, Hamilton, Ont., will be General Western Agents in charge of Hamilton district, southern Ontario, lines of Wabash, Michigan Central and Pere Marquette Railways, and Detroit and St. Clair River ports. H. W. Cowan, formerly with the old Montreal and Lake Superior Line, will be engaged with R. O. and A. B. Mackay.

Capt. C. E. Kingsmill, son of the late Judge Kingsmill, Toronto, has been severely reprimanded for negligence in connection with the stranding of H.M.S. Dominion in Chaleur Bay, Aug. 18, 1906, while on a visit to Canada.

The Minister of Marine, replying to a question in the House of Commons recently, stated that vessels belonging to Italy, Germany, Sweden, Norway, Austria-Hungary, Denmark, Belgium and the Argentine Republic, were entitled to be admitted to coasting privileges in Canada, under Imperial treaties.

The Royal Marine Insurance Co.'s report for 1906, presented at the annual meeting in Montreal, Feb. 27, showed a very satisfactory year's business. Dividends of 8% have been paid annually since the company was organized, and a large reserve fund has been built up. The retiring directors were re-elected.

The Collingwood Dry Dock.

The Public Accounts Committee of the House of Commons is investigating the cost of the construction of the Collingwood dry dock, toward which the Dominion is contributing a subsidy at the rate of 3% a year on $500,000 for 20 years. The dry dock was taken over from the town, which gave a bonus of $50,000 towards its enlargement. The enlarged dock was valued at $550,000, but this was subsequently reduced to $350,000. Thos. Long said that up to the time of the valuation by the Public Works officials there had been expended upon the dock $350,000 in actual cash, but this included the value of the old dock and the land. The ledger showed that in 1904 the total expenditure on the new dock had been $704,000, and during the 18 months following an additional $100,000 had been expended. L. Coste, who made the valuation in 1904 for the Public Works Department, valued the property at $540,000, and had no hesitation in recommending the payment of a subsidy on $500,000. He admitted making the plans for the dock whilst he was in the Government employ, and held 20 shares in the company, paying therefor $2,000 out of the $2,500 due him for the preparation of the plans. H. S. Osler, K.C., made a statement of the stock affairs of the dry dock from the time that the old company was merged into the new one, which went to show that when the capital was increased to $1,000,000, the stock interests of the old shareholders amounting to $100,000 while their property, etc., was written up to $550,000, but subsequently reduced by agreement to $350,000. In addition to this $300,000 cash went into the new enterprise. The committee directed the production of various accounts, vouchers, etc.

Atlantic and Pacific Ocean Marine.

E. Hartnell, formerly connected with the Allan Line at Montreal, died recently at Bootle, Eng., where he had lived for some years.

The New Zealand Government has decided to use the Suez Canal route for its regular mail services, and to send supplemental mails via Vancouver, B.C.

The Thomson Line S.S. Fremona, while on the run from the Tyne, Eng., to Spezzia, to load fruit for Montreal, was badly damaged in a collision in the North Sea, Mar. 1.

The Imperial Parliament has now before it the first of the bills asking for authority to construct railways in Ireland in connection with the projected fast line of steamers between Blacksod Bay, Ireland, and Halifax, N.S.

The C.P.R. S.S. Empress of Ireland arrived in Liverpool, Eng., from Halifax, N.S., Mar. 2, having made the trip in 6d. 1h. 45m., or 3h. 15m. less than the Empress of Britain had previously done, thus establishing a new record.

Some surprise is felt that Canada has not been invited to send a representative to a conference called by the Colonial Secretary in London, Eng., during April, to consider the international aspect of recent or projected legislation relating to merchant shipping.

C. McLean, of McLean, Kennedy & Co., shipbrokers and agents, Montreal, died there Mar. 2. He represented the Head Line, of Belfast, Ireland, and other steamship interests, and was a member of the executive council of the Shipping Federation of Canada.

Giving evidence before the Royal Commission on shipping rings, A. Soper, a South African trader, said that a system of deferred rebates was now operating on all steam lines trading from the United Kingdom, Germany and Scandinavia, but not on the lines from Canada and the U.S.

F. Daniells, Assistant Superintendent Dominion Line, fell into the hold of the S.S. Southwark, at Portland, Me., Mar. 15, and died in a few minutes from the injuries received. He was a resident of Montreal, but went to Portland during the winter season of navigation.

The Quebec Transport Co.'s directors have held several meetings at Quebec recently, to discuss the business done and the prospects for the future. No official statement has been made, but it is stated in Quebec that the Canadian Northern Ry. interests are likely to take over the entire concern.

The Allan Line S.S. Victorian, sailing April 27, will be the last mail steamer to sail for Liverpool from Halifax this season. It is expected that when the St. Lawrence River is opened in May, the mail steamers will be enabled to call at Father Point and not at Rimouski, Que., as in previous seasons.

The Elder-Dempster Co. propose to replace the S.S. Dahomey on the run to Mexican ports with the S.S. Bornu, a sister ship to the Sokoto. The Sokoto got ashore at Louisbourg, N.S., Mar. 8, during a gale, but was towed off without damage, and reached Halifax Mar. 11, to complete loading for Mexico.

Sir Daniel Dixon, Bart., M.P. for North Belfast, died at his residence, Holywood, near Belfast, Ireland, Mar. 9, aged 63 He was head of the firm of Thomas Dixon & Sons, managing owners of the Lord Line of steamers, some of which trade to Canada, and owners of a number of vessels engaged in the lumber trade sailing between Miramichi, N.B., and Belfast.

A general change round of the commanders of the steamers of the Furness Line, trading to the Maritime Provinces, is reported, caused by the transfer of Capt. Healy, of the Evangeline, to the company's service at Newport, Eng. The other officers reported to be changed include Capt Scott, of the Sicily; Capt. Fearneaux, of the London City; and Chief Officer Hector, of the Ulunda.

A press despatch from Great Britain states that an order has been placed by the Canadian Pacific Steam Navigation Co., with John Brown & Co., Clydebank, Glasgow, Scotland, for two 5,000 ton steamers for its service between Glasgow, Liverpool, Havre and North American ports. It has been reported that the C.P.R. was desirous of putting on a line of steamers to Glasgow, and that the Donaldson Line might be acquired. We are not aware of any such concern as the Canadian Pacific Steam Navigation Co., and the C.P.R. Steamship Department advised us Mar. 23 that it knew nothing about the order said to have been given to Jno. Brown & Co.

The Canadian-Mexican Pacific Steamship Co. will operate the Georgia and the Lonsdale in the regular service under the subsidy contract with the Canadian and Mexican Governments. The first sailings were made in March, and a considerable business done. Owing to the cargo offering at and for other ports outside those mentioned in the contract, the company is arranging to put on a third steamer which is expected from England during the summer. Capt. Worsnop is General Manager of the company, and J. H. Greer is General Agent at Victoria, B.C. A company is being organized in Victoria to build a wharf for the exclusive use of the steamers of this line.

The Newfoundland Legislature is being asked to approve of a contract to establish a fast line of steamers between a port on the island and a port on the west coast of Ireland. The Newfoundland port is Green Bay, and the Irish port is Killery, a port which will have to be developed. It is also proposed to run 20 knot steamers between Port Aux Basques, Nfld., and Gaspe, Que., during the summer, and Sydney in the winter. The project is to take definite shape within two years or the liability of the colony will cease. The proposal is to pay a subsidy of $75,000 a year for 25 years. Messrs. Ochs, London, Eng., and Paris, France, are the proposed contractors. The Liverpool Daily Post speaking of the proposal says: "It is another of the wild-cat schemes to which we have been treated of late."

The Imperial Privy Council, London, Eng., gave judgment, Feb. 28, in the appeal in the Parisian-Albano collision, off Halifax, N.S., in Mar., 1905. The Allan Line S.S. Parisian and the German freight S.S. Albano collided, and the Parisian received such injuries that she sank at her wharf. Suit was brought by the Allan line and tried by the local judge in Admiralty, assisted by the late Capt. Tinling, R.N., as nautical assessor. The nautical assessor was favorable to the Albano on essential points; the judge in Admiralty did not agree with him, and gave judgment in the Parisian's favor without assigning particular reasons. Appeal was taken to the Supreme Court of Canada. Judgment was given, the majority of the court sustaining the decision of the judge in Admiralty. The judgment of the Privy Council sets aside both judgments and decrees of the Supreme Court and of the local judge in Admiralty, there being cross-suits in the case, declares in both suits that the Parisian alone was to blame for the collision, and dismisses the action against the Albano with costs in the courts below, and pronounces in favor of the Albano's claim in the cross-action against the Parisian and her freight and bail therefor in an amount to be found due in the usual way by reference. The Parisian is also directed to pay the costs.

Press despatches state that soon after Sir Thos. G. Shaughnessy, President C.P.R., reaches England, an official announcement will be made respecting the company's plans for ocean steamship construction. The despatches state that two of the present Empress liners on the Pacific will be transferred to the Australia-New Zealand run; that the Empress of Britain and Empress of Ireland will be transferred from the Atlantic to the Pacific Ocean, and will run between Vancouver and Hong Kong; and that orders will be placed for two larger steamers of the Empress type for the trans-Atlantic service. In this connection it may be mentioned that the Oceanic Steamship Co., operating steamers from San Francisco to Australia, has withdrawn from the service and has arranged to send its passengers via Vancouver, B.C., on steamers of the Union Steamship line, operated in connection with the C.P.R. The publication Mar. 14 of the extension contract between the Imperial Government and the C.P.R., for the conveyance of the mails to and from Hong Kong, is another point of interest in this connection. The contract provides for the completion of the journey from port to port during the summer in 708 hours, and in winter in 732 hours. Except between Vancouver and Hong Kong three-quarters of the crew must be British. The Treasury in a memorandum state that they assent with some hesitation to the use of the route, for the postal traffic has hitherto been comparatively small, and they do not regard with favor the granting of subsidies on commercial grounds. However, in view of certain important modifications, they approve of the arrangement as a purely temporary measure.

N. CURRY, President. N. A. RHODES, Vice-President. J. M. CURRY, Sec.-Treas

Maritime Provinces and Newfoundland.

J. T. Jean, Arichat, N.S., has been appointed receiver of wrecks for Richmond County, N.S.

The hailing port of the schooner Robert Ewing has been changed from Parrsboro, N.S., to Barbados, West Indies.

C. R. Northup, for many years a shipbuilder and shipowner at Falmouth, N.S., died at Canning, N.S., Feb. 22, aged 86.

Capt. W. Dickson, J. W. Townsend and M. Pope, jr., have been appointed members of the pilotage authority for Louisburg, N.S.

The Avon Marine Insurance Co., at a meeting of shareholders held at Windsor, N.S., Mar. 12, decided to go out of business.

An act incorporating the Margaretville Steamship Co. has been passed by the New Brunswick Legislature at its current session.

Capt. A. B. Barbeaux, formerly a well-known Bay of Fundy shipowner, and latterly a shipbrokerin New York, died there, Feb. 24, aged 79.

The Red Cross Line str. Rosalind, trading between Halifax, N.S., and New York, is being given a general overhaul at Newcastle-on-Tyne, Eng.

The Inverness Ry. and Coal Co. is reported to have purchased the steam tug Minto, formerly in service at the Imperial dock yard, Halifax, N.S. An official of the company advised us Mar. 22 that he was not aware of such a purchase.

The United Fruit Co. is reported to be completing arrangements to extend the run of one of its lines of steamers so as to include a call at Halifax, N.S.

Capt. F. S. Mabee has been appointed to the command of the People's Line Steamship Co.'s str. Crystal Stream, on the Washademoak route for the season of 1907.

The Halifax and Canso Steamship Co. has chartered the str. Bridgewater to replace the burned str. Strathcona on the Halifax-Guysboro route until a new steamer is built.

Capt. H. R. Robertson, who died recently at Portland, Ore., was a native of Pictou county, N.S. He became famous as the builder of seagoing log rafts, the first being built at Joggins, N.S.

The Nova Scotian Supreme Court has refused to grant a consent order to the Attorney-General of the Province to prefer an indictment against D. McLean, of North Sydney, N.S., on a charge of stealing $4,700 from the pilot funds.

A company is being organised at Rothesay, N.B., for the purpose of purchasing a ferry steamer to operate on the Kennebecasis River at Gondola Point. E. S. Carter, O. and A. Webmore, Gondola Point, are the principal men interested.

The following appointments have been made: C. Dixon, harbormaster at Marie Joseph, N.S.; J. Matheson, harbormaster Summerside, P.E.I.; S. M. Griffin, wharfinger Drumhead, N.S.; B. Doucette, wharfinger St. Mary's, N.S.

The Nova Scotia three-masted schooner Beaver left Walton, N.S., Jan. 3 for Boston, Mass., but did not reach her destination until Feb. 16, owing to bad weather. The schooner was towed into Boston from Gloucester in a leaking condition.

The underwriters received tenders to Mar. 30 for the floating and delivery in dry dock at Halifax, N.S., of the str. Turret Bell, stranded at Cable Head, P.E.I. The Turret Bell was engaged in the coal carrying trade for the Inverness Ry. and Coal Co.

A meeting of the Deer Lake Steamship Co. was held at St. Johns, Nfld., recently, when A. J. Harvey, liquidator, laid before the shareholders an account of the manner in which the winding up of the company had been conducted, and the property of the company had been disposed of.

A delegation from St. John, N.B., had a lengthened interview with the Minister of Railways and Canals, Feb. 22, respecting the proposal that the harbor should be nationalized. On the Minister's suggestion a committee of five has been appointed to put the proposals in a concrete form for submission to the Government.

C. W. Anderson, Sherbrooke, N.S., and James Hemlow, Jr., Liscomb, have been appointed members of the pilotage authority for the district of St. Mary's, and Liscomb, N.S.; D. Champoux, Campbellton, N.B., member of the pilotage authority for Restigouche, N.B. Capt. R. Keay, a member of the pilotage authority for Charlotte County, N.B.

A press despatch states that G. Spence, a New Brunswick man, is having a steamer built for the winter trade between P.E.I. and the mainland. The steamer, it is proposed, will run from Bedeque Bay, P.E.I., to Salt Grass or Amos Point on the mainland. W. Ramsay, Bedeque, P.E.I., is understood to be acting as agent for Mr. Spence in the matter.

The Shepody Navigation Co.'s officers and directors for the current year are: President, Senator McSweeney; Vice-President, Hon. C. W. Robinson; other directors: Hon. H. R. McLellan, J. H. Harris, F. W. Sumner, J. W. Y. Smith, W. H. Edgett. The question of the purchase of an additional steamer was left over for further consideration, but it was decided to have the str. Wilfrid C. given a thorough overhaul before the opening of navigation. This was decided at a meeting held at Moncton, N.B., recently

The Halifax and Sheet Harbor Steamship Co. has placed the new str. Margaret on a route between Halifax and Sheet Harbor, N.S., calling at Jeddore, Owl's Head, Ship Harbor, Tangier and Spry Bay. The steamer started on her first trip Mar. 6, and will give a weekly service. The Margaret is a wooden steamer, the hull being sheathed with galvanized iron, and her engines are capable of making 11 knots an hour. There is sleeping accommodation for 30 passengers, and also capacity for a cargo of 1,500 barrels. J. S. Chisholm, Halifax, N.S., is managing director.

The str. Stanley arrived in Georgetown, P.E.I., Mar. 4, having been a week out from Pictou, N.S. She had over 100 passengers on board, and had received considerable damage owing to the ice. The Minto had also been stuck in the ice off Caribou since Feb. 26, and was still there Mar. 11. The Stanley left Georgetown, Mar. 11, and got stuck in the ice outside the harbor. It was intended, Sir Wilfrid Laurier said, in the House of Commons, Feb. 26, to provide larger and more powerful steamers than the Stanley and Minto to carry on the winter service between Prince Edward Island and the mainland.

Province of Quebec Marine.

E. H. Duval, shipbroker, Quebec, died in Levis, Que., recently, aged 75.

B. Langlois has been appointed harbormaster, and F. X. Gagnon, wharfinger, at Port Daniel, Que.

Jas. Forbes, a retired pilot, who had seen many years' service on the Lower St. Lawrence, died at Matane, Que., Mar. 7, aged 89.

N. A. Perrault, one of the oldest of the St. Lawrence pilots, and latterly President of the Association of Pilots, Montreal, has retired from active serivce.

Capt. E. Doran, for many years engaged in the shipping and towing business at Quebec, and latterly master of the schooner Rutherford for the Department of Public Works, died at Quebec, Mar. 10.

Capt. St. Onge, who retired from the Richelieu and Ontario Navigation Co.'s service, about 10 years ago, after 37 years' service, died at Montreal, Mar. 10, aged 69.

Capt. J. Temple, formerly commanding vessels trading between Quebec and South America, and latterly engaged as a nautical assessor, died in Quebec, Feb. 28, aged 65.

G. W. Stephens, chairman of the Montreal Harbor Commissioners, has announced that he will resign his seat in the Quebec Legislature at an early date, in order to devote the whole of his time to the duties of the Commission.

The Dominion Coal Co. has installed coal discharging plants at Three Rivers, Que., and St. John, N.B., which it is expected will result in effecting a substantial reduction in the cost of unloading coal from the company's steamers at these points.

The proposal to construct a dry dock at Montreal, which the Harbor Commissioners have under consideration, is generally approved. An opinion has been expressed that the dock should be 1,000 ft. long, and divided into two sections, so that it may be utilized for large or small vessels.

The Richelieu and Ontario Navigation Co., we have been advised, has not placed an order for the steamer to be named Rapids Queen, and the new steamer to be operated between Hamilton and Montreal. It is hoped, however, to have both steamers ready for the opening of navigation of 1908.

The Ogdensburg Coal and Towing Co., and the owners of the str. Nicaragua, are being sued in the Quebec Admiralty Court by the Canada Atlantic Ry., for damages caused by the steamer running into the railway company's bridge across the Soulanges canal at Coteau Landing, Que., Sept. 12, 1905, causing a suspension of traffic over the bridge for two days.

The Minister of Marine, replying to a question in the House of Commons, Mar. 11, said 48 pilots performed ocean steamship service between Montreal and Quebec, and there was no intention of reducing the number. The age limit was 65 years, but on passing an examination for eyesight and hearing at regular intervals, men might be kept on until they were 70.

The Magdalen Islands Development Co., Ltd., is having 17 motor boats built to replace the oldtime fishing smacks operated from the islands. Steamers will run from the islands to Pictou, N.S., and other points, to market the catch, and to do a general trading business. It is proposed to make three round trips weekly. The company also owns the str. Amherst.

Following are the officers and directors of the North Shore Transportation and Wreckage Co., Ltd., elected Mar. 13: President, T. Gagnon; Vice-President, P. Galibert; other directors: U. H. Dandurand, A. Gagnon, P. Desforges, A. Fafard, O. Bernier, N. Sauriol; Secretary-Treasurer, Jos. Cote; Superintendent, J. B. D. Legare; Auditor, A. Cinq-Mars.

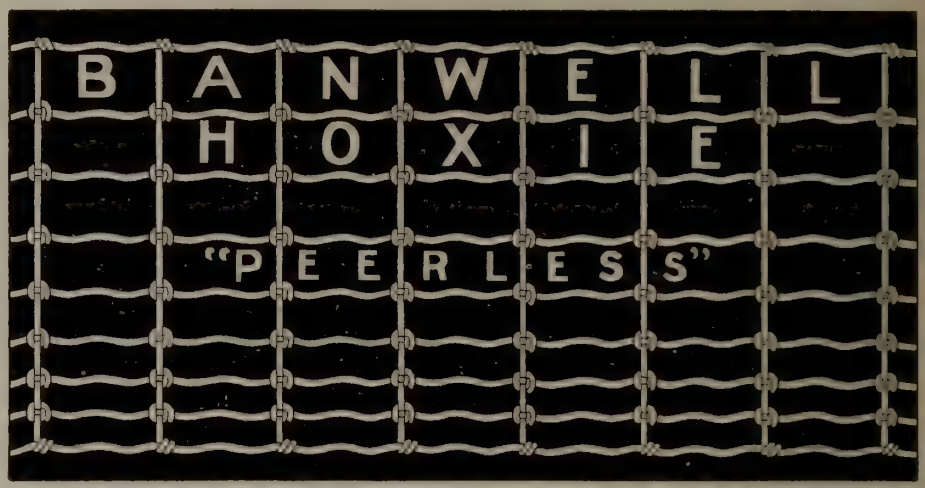
The str. Montcalm arrived at Quebec, Feb. 20, on her return trip from Seven Islands, having made the round trip in six days. The river was practically free of ice on the return journey at English Bay and Godbout, so that she was able to call there. Capt. Belanger says that there never was so much ice in the river, and in places it was very thick.

The Kaine & Bird Transportation Co. has been incorporated under the Dominion Companies' Act, with a capital of $100,000 and offices in Quebec, to carry on a general navigation business, and to maintain and operate wrecking plants, docks, dry docks, etc. The provisional directors are: J. C. Kaine, M. P. Connolly, M. H. Kaine, C. E Taschereau, Quebec, Que., and J. Bird, Canton, N.Y.

The Quebec Navigation Co. has been incorporated under the Quebec Companies' Act, with a capital of $20,000 and offices at Quebec, for the purpose of carrying on the business of navigation in the Province, the conveyance of passengers and freight, towing vessels and other purposes relating thereto. The provisional directors are: L. Roy, D. Talbot, L. J. A. Rosa; J. A. Massicotte, J. Beaudry, Quebec.

The Bonaventure and Gloucester Interprovincial Ferry Co. has been incorporated under the Dominion Companies' Act, with $15,000 capital and offices at Bonaventure, Que., to operate ferry steamers for conveying passengers and freight between ports in Quebec and New Brunswick and various incidental purposes. The provisional directors are: A. Noel, J. Henry, A. Desbiens, J. F. Begeaud, Bonaventure, Que.; L. Noel, Levis, Que.

The Ontario and Quebec Railway and Ferry Co., in its application to the Dominion Parliament at the current session for a charter of incorporation, desired power to operate ferries on the St. Lawrence at any point between Kingston, Ont., and Quebec. As amended in committee the ferry operations of the company are limited to any point in the parish of Montreal, or the town of Hochelaga, to the parish of Chambly, Que. The provisional directors are C. Laurendeau, J. F. R. Beaudry, L. Garneau, E. and V. Cusson.



PEERLESS WOVEN WIRE FENCING

Made from uniformly heavy hard steel wire, well galvanized.
Made in large rolls ready to stretch up.
Requires but few posts; costs very little to erect.
Conforms perfectly to any surface, no matter how rough.
Reduces the cost of fence maintenance to a minimum.

BANWELL HOXIE WIRE FENCE COMPANY LIMITED
HAMILTON, ONTARIO

Underwood

The Underwood is a good typewriter. It is the best typewriter. Its advent marked a new era in the conduct of business.

For mutual protection against the instant success of the Underwood a half dozen of the other leading typewriter companies combined; they are known as "the trust."

Their united efforts had no effect in impeding the marvelous development of the Underwood business—the largest typewriter business in Canada.

The Underwood is a good typewriter. It is the best typewriter—and that is the full explanation of its success and popularity.

Ontario and the Great Lakes.

A. M. Wiley, of Wiley and Marks, Port Arthur, Ont., died at Buffalo, N.Y., of pneumonia, Mar. 8.

The Cornwall canal will be unwatered between April 1 and 15 for the annual examination and repair.

A. A. Schantz has been appointed General Manager Detroit and Cleveland Navigation Co., succeeding the late W. C. McMillan.

H. Henderson has been appointed wharfinger of the Government wharf, Pelee Island, Ont., and A. Collins, wharfinger at Burk's Falls, Ont.

The contract for the construction of the new dock at the Provincial Government park, Rondeau, Ont., has been let to Blight and Fielder, Chatham, Ont.

The Peninsula Tug and Towing Co. has been granted a license under the Ontario Act respecting extra-Provincial Companies, F. Wood, Wiarton, Ont., being appointed its attorney.

The Calvin Co. is arranging to purchase a steel steamer in Great Britain for the pulpwood carrying trade. H. A. Calvin and Capt. A. Malone are in Great Britain looking for a suitable steamer.

The Dominion Dredging Co., a Dominion corporation, has been registered under the Ontario act respecting the licensing of extra-provincial corporations. E. A. Larmouth, Ottawa, has been named its attorney.

The two new Upper Lake steamers which the C.P.R. is having built at Glasgow will be cut in two after they reach Canada. The sections will be towed through the Welland Canal and re-riveted on reaching Lake Erie.

The Canadian Northern Ry. has chartered the str. Sequin, which has been remodelled and fitted up for the passenger as well as the freight trade, and will operate her between Owen Sound, Collingwood, Parry Sound and other points.

The Dominion Government is being asked to construct a dam in French River, for the purpose of maintaining the water of Lake Nipissing, Ont., at a minimum level, and thereby improve the navigation. The cost is estimated at $16,000.

The acting Minister of Public Works informed a Toronto deputation recently that the Government engineers favored the cutting of a new channel some distance south of the present western entrance, rather than the deepening of the present channel.

The tug Lutz, employed in keeping the car ferry channel between Sarnia, Ont., and Port Huron, Mich., free of ice, had a large hole knocked in her side by an ice floe, Feb. 20. This is the second occasion this winter that the Lutz has been damaged in a similar manner.

The Government has decided to have a survey made to ascertain the practicability of the construction of the Trent Valley canal from Lake Simcoe to Georgian Bay, by a route to Nottawassaga Bay, instead of by the Severn River valley as at present proposed.

The charge of manslaughter preferred against Capt. Boult as a result of the wrecking of the str. Golspie in Dec., 1906, has been heard at Sault Ste. Marie. A verdict of acquittal was entered, and the judge said that Capt. Boult was absolutely free from all blame in the matter.

The Shipmasters' Association in the U.S. has petitioned the Department of Railways and Canals to retain J. Boyd in his position as Superintendent of the Sault Ste. Marie canal. The resolution passed by the Detroit branch of the association speaks highly of his efficiency and courtesy.

The str. Winona, now lying at Collingwood, Ont., has been sold by the underwriters to a syndicate, which will have her repaired at the opening of navigation. The names of the members of the syndicate have not been made public, but it is understood that R. O. and A. B. Mackay, Hamilton, Ont., the managers for the original owners, are interested.

The Montreal Transportation Co.'s two steamships which are being built in Scotland will have a capacity of 3,000 tons each. The steamers have been renamed Glenmount and Stormount, and are expected to arrive in Montreal May 1 and May 15 respectively. They will be placed on a route between Sydney, N.S., and Fort William, Ont., carrying steel rails westbound.

The Ojibwa Carp Co. has been incorporated under the Ontario Companies' Act, with a capital of $40,000 and offices at Windsor, Ont., to engage in fishing and in connection therewith to own steam and other vessels. The provisional directors are: E. A. Davis, Detroit, Mich.; A. Chappus, A. Gignac, Sandwich, Ont.; F. D. Davis, A. F. Healy, Windsor, Ont.

The U.S. War Department on the request of the Lake Carriers' Association has drawn up a set of rules for the navigation of the narrow channels of the Detroit River, known as the Limekiln Crossings, opposite Amherstburg, Ont., and will station a patrol boat in the river to enforce them. Passenger steamers will have privileges not accorded to freight steamers.

Arrangements are being made to run a number of freight steamers between Port Stanley and Fort William, Ont. Millers at St. Thomas and other points desire to have their grain delivered at Port Stanley instead of at Goderich or Point Edward, and local reports state that N. C. Sinclair, St. Thomas, is making arrangements with a Montreal firm for placing four steamers on the route.

A deputation from the Rainy River district waited on the Dominion Government Mar. 3, and asked that an appropriation be provided during the current year for the construction of a lock at the Long Sault rapids. This lock in conjunction with that under construction at Fort Frances would add a considerable mileage to this inland waterway. The cost of the lock is estimated at $250,000.

The Dominion Government is being asked to widen and deepen the harbor at Port Burwell, Ont., so as to accommodate an increasing railway car ferry trade. The C.P.R. is the Canadian connection of a car ferry running from Ashtabula, Ohio, but J. H. Teall is arranging for the construction of a short line of railway which will receive its coal freight by car ferry from Conneaut, Ohio, and the present accommodation at the harbor is not sufficient for the additional trade.

The sandbars at the mouth of Rainy River, Ont., have been an increasing source of difficulty in the navigation of the river by the larger steamers, and in 1906, the Kenora was compelled to discontinue her trips on this account. Representations have been made to the Dominion Government, but so far nothing has been done in the way of clearing away the obstruction. Unless something is done at once it is feared that navigation, except for the smallest steamers, will have to be entirely suspended.

The St. Clair and Erie Ship Canal Co., which was incorporated by the Dominion Parliament in 1879 to construct a canal from Lake St. Clair to Lake Erie, thereby shortening the route between Lake Huron and Lake Erie by 150 miles, has been refused a further extension of time. Another company, the St. Joseph Transportation Co., which proposed to shorten the distance between the same two lakes by 300 miles by the construction of a canal from St. Joseph to Port Stanley, has been refused a charter by the Dominion Parliament at its current session.

The steamer for which the Hamilton and Montreal Navigation Co. has placed an order, will be built on Lake Erie, and will have the following general dimensions: length, over all, 460 ft.; breadth, 53 ft.; moulded depth, 29 ft. She will be equipped with quadruple expansion engines, cylinders 17½, 26, 37 and 54 in. diameter by 42 in. stroke, to which steam will be supplied by two Scotch boilers 13 ft. 2 in. diameter by 12 ft. long, fitted for forced draught. The vessel will have a capacity of 8,000 tons of ore, and will be fitted with every modern device for the quick handling of cargo.

The limits of the port of Sarnia, Ont., have been extended so as to include all the waters of the St. Clair River, and its several outlets into Lake St. Clair, including any dredged channels east of the International boundary. The following has been added to the general regulations for the government of ports to which the Canada Shipping Act applies: "43. All through-bound vessels in passing through the St. Clair River in the vicinity of Stag Island, Sarnia harbor, shall keep to the right, that is to say, all up-bound boats shall pass through the eastern channel and all down-bound boats shall pass through the western channel. This rule shall apply to through-bound vessels only, and not to vessels running between local points on the river, which vessels may take either channel, conforming to the ordinary rules of the road at sea."

The reports and other papers relating to the Trent Valley Canal were laid before the House of Commons Feb. 27. These include the report of E. J. Walsh, advising the adoption of the Trenton outlet for the southern end of the canal. The surveys made for this outlet covered three routes from Rice Lake, viz.: Port Hope, Cobourg and Trenton, and the estimates prepared were for a 6 ft. and an 8 ft. navigation. These were:

	6 ft.	8 ft.
Port Hope	$3,541,917	$3,958,051
Cobourg	7,906,401	8,236,040
Trenton	3,118,811	3,997,482

The Minister of Railways and Canals approved of this recommendation, and the Government has concurred. One of the principal reasons for the recommendation of the Trenton route is that a large number of wate powers will be developed.

Detroit, Mich., despatches state that a U.S. shipbuilding company is considering the advisability of establishing a shipyard and dry dock at a Canadian Upper Lake port. In this connection it was stated in Toronto Mar. 8, that a contract had been let to Whalen and Bowman, for the construction of a dry dock at Port Arthur, Ont., and that New York interests were financing the construction. F. Bowman subsequently stated that there was nothing in the report. At the Fort William, Ont., Town Council meeting, Mar. 13, a proposal was submitted for the establishment of a steel shipbuilding plant there. The company propose to expend $1,000,000 in the laying out of the yards and the equipment of the plant, and to provide $500,000 as working capital, and to employ 350 men for two years and 500 men thereafter. In return it is asked that the town give a guarantee of interest on $1,000,000 for 20 years at the rate of 2%, contribute $15,000 towards the purchase of a site, or 50% of the total cost if one-half of the total cost exceeds $15,000; and grant an exemption from taxation, except for school and local improvement purposes for ten years. The council passed a resolution approving of the proposal, and a by-law will be submitted to the taxpayers at an early date.

"PAGE FENCES WEAR BEST"

PAGE WIRE FENCES stretch tighter—posts can be set farther apart. That saves money—fewer posts, less labor digging post-holes, quicker erecting. PAGE FENCES last longer—made of No. 9 wire. PAGE FENCES are heavily galvanized, and for a small extra charge are supplied coated WITH PERMANENT PAINT. PAGE FENCES stand wear better, give longer service, keep your maintenance account down. The PAGE KNOT LOCK cannot slip and positively does not injure the wire. PAGE FENCES do not sag.

50 THOUSAND MILES OF RAILWAYS USE PAGE FENCES

There must be a dollars-and-cents reason for the standing PAGE FENCES have with railway men the world over. It will pay your road to hear that reason before you spend another cent on fences.

D. A. Keizer, civil engineer, has completed a survey of the Red River, and has prepared plans showing the location of all obstructions to navigation in the vicinity of Winnipeg. The report and plans have been sent to Ottawa for the consideration of the Government.

Corpl. Sellers, of the Royal North-West Mounted Police, who arrived at Ottawa Mar. 4 from Fort Churchill, Hudson Bay, with despatches from Major Moodie, states that Oct. was the finest month of last year, and that the bay was open for navigation until nearly the end of Nov.

The question of the extension of the boundary of Manitoba to Hudson Bay, was discussed at length during the recent provincial elections. The Manitoba Government's claim is for so much of the territory of the present district of Keewatin as would give Manitoba a seaboard extending from near Moose Factory to Fort Churchill. The Liberal opposition expressed its willingness to be satisfied with an extension of boundaries which would give the province a port at the outlet of Churchill River.

B.C. and Pacific Coast Marine.

Capt. H. A. Mellon, of Bureau Veritas, Vancouver, B.C., has been appointed surveyor of Norwegian vessels entering that port.

The British Columbia General Contract Co. has commenced work on the erection of the new wharf at Victoria, B.C., for the Alaska Steamship Co.

An effort is being made to raise the tug Stranger, which sank in the Fraser River off Westham Island, Feb. 6, owing to a collision with an ice floe.

The customs outport of Port Simpson, B.C., has been detached from the port of Victoria, B.C., and placed under the survey of the port of Prince Rupert, B.C.

The Victoria and Sidney Ry. management has under consideration plans for a tug and two car barges for a ferry service between Sidney, B.C., and Blaine, Wash.

The Union Steamship Co. is negotiating for the purchase of the wooden str. Morning Star, formerly engaged as a missionary steamer in the Southern Pacific Ocean. She was built at Essex, Mass., 1900.

The C.P.R. str. Princess Victoria resumed her place on the Vancouver-Victoria run, Feb. 21, after undergoing repairs. The Charmer has been running in her place since the Princess Victoria ran on Lewis rock in Dec.

The Graham Island Milling, Coal and Transportation Co., operating on Graham Island, the most northerly of the Queen Charlotte group of islands, is enquiring for a tug and a couple of schooners or barges for towing.

The str. President, which is being built at Camden, N.J., for the Pacific Coast Steamship Co., was launched recently. She is expected at Seattle, Wash., in June, and will engage in the excursion trade on Puget Sound.

The British Columbia Tie and Lumber Co. has placed an order for the construction of a steam tug for its business at Port Simpson. The tug will be 87 ft. long, 18 ft. wide, and 10.7½ ft. moulded depth; and her engines will be 220 i.h.p.

McKenzie Bros. have chartered the str. Halvard to run between Vancouver and Skagway, Alaska, during the current season in conjunction with the Haldis and Henrietta. The Halvard is expected at Vancouver early in April.

The Alaska Steamship Co.'s str. Portland ran on Gabriola Island during a fog Feb. 16, while on her regular run from Valdez, Alaska, to Seattle, Wash., and was successfully floated by the Salvor. She proceeded under her own steam to Seattle for repairs.

The Governor-General-in-Council has approved of a set of by-laws for the pilotage district of Vancouver, B.C. The district within which the by-laws are operative extends to all parts of the mainland coast of B.C., north of New Westminster pilotage district.

The Boscowitz Steamship Co. is looking for an additional steamer for the northern B.C. trade, and Capt. Johnson is visiting Great Britain to purchase a suitable vessel. Capt. Stratford has succeeded Capt. Johnson in command of the company's str. Venture.

The Western Fuel Co. has chartered a steamer now being built at Stockton-on-Tees, Eng., for its trade between Nanaimo, B.C., and San Francisco, Cal. Capt. Egeness, heretofore master of the Titania, in the same trade, has gone to England to superintend the construction of the steamer and to bring her out.

The steam whaler St. Lawrence arrived in Victoria, B.C., Feb. 11, from St. Johns, Nfld., after a voyage of 111 days. It was stated subsequently that Capt. Balcom has sold the St. Lawrence to the Pacific Whaling Co., which operates the steam whaler Orion. The Pacific Whaling Co. is establishing a whaling station at Esperanza Inlet, and will place the St. Lawrence there.

The C.P.R. Pacific Coast str. Princess Royal, under construction at Vancouver, B.C., is not yet ready, the work of construction having been delayed owing to strikes and other local causes. With regard to the report that a vessel similar in size and speed to the Princess Victoria is to be constructed, we are advised that the plans have not been settled, and that no contract has been let.

The British Columbia Marine Railway Co. has deposited with the Dominion Minister of Public Works a plan of a marine railway which it proposes to construct at New Westminster. The railway will be 600 ft. long, capable of docking vessels 250 ft. long, and with a cradle 35 ft. wide. The company is considering plans for the construction of a dry dock at Victoria, capable of accommodating large ocean-going vessels.

The B.C. Salvage Co., Esquimalt, B.C., has purchased the tug William Jolliffe, of Liverpool, Eng., as an addition to its fleet. The tug left Liverpool Feb. 7, and is expected at Esquimalt early in May. The William Jolliffe is a large ocean-going screw tug, and is capable of remaining at sea for 35 days at a stretch. Her dimensions are: length, 149 ft.; breadth, 26.2 ft.; depth, 14 ft.; and her sea speed is 15 knots an hour.

The Dominion Government is being asked to improve the harbor at Victoria, B.C., at a cost of about $1,000,000, the amount to be expended over a period of five years. The suggestions made include the dredging of the harbor from the outer channel to Point Ellice, ensuring a general depth of 20 ft., and also part of the upper harbor so as to maintain a depth of 25 ft. at low water; to cut away Songhees point and the outlying Tuze and Pinnock rocks; to build a retaining wall reaching 6 ft. above high watermark at the face of the cut at Songhees point, along a line to the vicinity of Point Ellice bridge and along the low lying areas of the Indian reserve.

The Superintendents of Canadian Canals met in Ottawa recently, to consider a revision of the rules and regulations governing the canals.

Notices to Mariners.

The following notices have been issued by the Department of Marine:

No. 5. Feb. 7—Nova Scotia—13. South coast, Lahave bell buoy replaced by gas and bell buoy. 14. South coast, Egg Island, whistling buoy replaced by gas and whistling buoy.

No. 6. Feb. 8—Quebec—16. River St. Lawrence, Saguenay River entrance, Lark Islet, fog horn discontinued. 17. River St. Lawrence, Les Eboulements, Cap St. Joseph, light improved. 18. River St. Lawrence, Lake St. Peter, Riviere du Loup (en haut), Louisville range light established.

No. 7. Feb. 11.—British Columbia—19. Strait of Georgia, Sandheads of Fraser River, gas buoy established. 20. Chatham Sound, Lucy Island, lighthouse established.

No. 8. Feb. 14.—Quebec—21. Gulf of St. Lawrence, Magdalen Islands, Bird rocks light, correction. 22. River St. Lawrence below Quebec, elevations of lights. 23. River St. Lawrence, Beaujeu bank, east end gas buoy replaced by gas and bell buoy. 24. River St. Lawrence, St. Thomas bank, gas buoy changed. 25. River St. Lawrence, Grosse Isle, gas buoy changed. 26. River St. Lawrence below Quebec, Madame reef, gas buoy changed. 27. River St. Lawrence above Quebec, Point St. Antoine, gas buoy changed.

No. 9. Feb. 15.—Newfoundland—28. Southeast coast, Cape Race, change in fog alarm.

No. 10. Feb. 25.—Nova Scotia—29. Bay of Fundy, Cape d'Or fog alarm, change in interval between blasts.

No. 11. Feb. 28.—Quebec—31. River St. Lawrence, ship channel between Quebec and Montreal, Ile du Moine lower range, Ile des Barques, light established. 32. River St. Lawrence, ship channel between Quebec and Montreal, Ile a la Pierre, Gallia bay range lights established.

No. 14. Mar. 7.—British Columbia—37. West coast of Vancouver Island, Tsusiat and Seven Mile Creek, lookouts and shelter stations established. 38. Vancouver Island, west coast, Barkley Sound, Sechart steamer available for life-saving service. 39. U.S.A., Washington, Juan de Fuca Strait, New Dungeness light station, change in fog signal.

The following have been issued by the U.S. Hydrographic Department:

No. 7. Feb. 16.—Detroit River—294 Michigan, buoys established.

Department of Marine Report.—The report for the year ended June 30, 1906, gives details of the work done during the year. Chief among the improvements noted is the deepening and widening of the St. Lawrence river channel from Quebec to Montreal. Before the close of navigation last fall a 30 ft. channel was completed from Montreal to Batiscan, and by taking advantage of the high tide from Quebec to Bastican a 30 ft. channel is now available from Quebec right up to Montreal. There are now 13 wireless telegraph stations on the St. Lawrence route and the Atlantic coast for commercial purposes, and two more are in course of construction. Several serious delays and probably accidents to ocean liners have been avoided by the use of this system. The report of the board of steamboat inspectors shows a total of 1,805 registered steamers, with a gross tonnage of 325,982. Of this number 316 belong to Toronto division, with a total gross tonnage of 72,390.

The United States Ship Subsidy Bill was talked out in the Senate, Mar. 4, after a sitting continuing over the Sunday.

Carter-Halls-Aldinger Co., Limited, has been incorporated under the Manitoba Companies' Act, with offices at Winnipeg, and a capital of $50,000, to carry on the business of contractors, including the construction of canals, piers, wharves, bridges, telegraph and telephone lines, railways and tramways; to act as wholesale and retail dealers in railway and general contractors' supplies; to construct and operate bridges and tramways on the company's property, and to operate steam and other vessels. The provisional directors are: W. H. Carter, contractor; P. C. Locke, J. E. Robertson, Winnipeg; F. E. Halls and A. H. Aldinger, Chicago, Ill.

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 10,000 000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10 W., 4th Meridian(generally)	8.00 " "
Map No. 5—Calgary District	8.00 to 10.00 per acre.
Map No. 6—Part of Alberta—Edmonton, Battle and Saskatchewan Rivers Districts—Range 11 West, 4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan and Eastern Alberta, 3rd Meridian to Range 10 West, 4th Meridian	10.00 to 25.00 per acre

Maps showing these lands in detail will be sent free on application.
All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160 Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$65.28	and nine instalments of	$160.00
"	"	9.00	"	"	215.70	"	"	"	73.46	"	"	180.00
"	"	10.00	"	"	239.70	"	"	"	81.62	"	"	200.00
"	"	11.00	"	"	263.60	"	"	"	89.78	"	"	220.00
"	"	12.00	"	"	287.60	"	"	"	97.96	"	"	240.00
"	"	13.00	"	"	311.55	"	"	"	106 10	"	"	260.00
"	"	14.00	"	"	335.60	"	"	"	114.32	"	"	280.00
"	"	15.00	"	"	359.50	"	"	"	122.44	"	"	300.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of six per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 550,000 acres of selected lands in Manitoba and Assiniboia which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

Fort William to Montreal.

A number of questions affecting the development of the marine interests of Canada, by the improvement of the inland waterways, and the provision of adequate and modern facilities for handling cargoes at Montreal, have been under discussion recently. On Feb. 27 a deputation introduced by W. Harty, M.P. for Kingston, Ont., and representing business men and vessel owners from Montreal, Kingston, Toronto, Winnipeg and other points, waited on the Premier and other members of the Dominion Government, to urge the necessity of deepening the Welland canal so as to provide for the passage of vessels of 20 ft. draught. The delegation presented a petition asking for the enlargement, which was endorsed by 24 Boards of Trade, the Dominion Marine Association, the Winnipeg Grain Exchange and other public bodies. The speakers were A. McFee, Montreal, who said the pressing need of the moment was the enlargement of the Welland canal so as to admit vessels of the same capacity as passed through the Sault Ste. Marie canals; H. W. Richardson, Kingston, who pointed out the benefits that would accrue to Canadian trade if the 20 ft. draught grain steamers of the Upper Lakes could be discharged at Kingston or Prescott; D. W. Bole, Winnipeg; E. Rogers, Toronto. The Premier in reply said it was the policy of the Government to make adequate provision for bringing out the produce of the west by all available routes. If there was money enough ahead the Government would be disposed to go on with the work suggested at once, but there were many costly works of national importance demanding immediate attention. While the Government was a progressive one, it had to be economical. The whole question, however, would receive very careful attention, and if funds could be found the work would be done.

The Minister of Marine speaking at a luncheon given by the Montreal Harbor Commissioners Mar. 2, said the plans which had been outlined by the Commission for the development of the port called for the expenditure of a vast amount of money, but the credit of the Commission was good with the Government. He would be pleased to do all he could to further the Commission's plans because the interests of the port of Montreal belonged to the nation and not to the city alone. It was not enough to properly equip the harbor; the Government must see that the transportation ways were so improved that all the western trade of the continent would be brought to Montreal instead of being carried to U.S. ports To-day one-third of Canada's western trade is going via Montreal and two-thirds via Buffalo and other U.S. ports. This must not be. The railways and other transportation interests must work to see that this Canadian trade reaches the ocean through Canadian channels. Why should not Canada make the necessary improvements all along the line to ensure that the whole of this trade should in future go down the St. Lawrence channel and through the port of Montreal? Why not carry this work up as far as Fort William and make such improvements there, and so equip it with ice-breakers that it can keep open as long and handle traffic as well as Duluth? The elevator which was being built at Port Colborne should prove of material assistance in bringing grain to Montreal. The Government intended to carry on the work of improving the St. Lawrence channel with as much vigor as the improvement of Montreal, not only to afford the necessary accommodation for the big vessels, but to secure a reduction of the insurance discrimination. The Government will not spare any money to make the St. Lawrence shipping route the finest and safest channel possible. G. W. Stephens, Chairman of the Harbor Commission, said the plans which were under consideration for the improvement of the harbor included the equipment and completion of the present facilities as soon as possible; to bring together the eastern and the western divisions of the harbor by an elevated track system; the addition of six new berths for ocean-going steamers; and the making arrangements for classifying freight so as to bring about a reduction in the charges at the port. The Commissioners were completing their plans and proposed at the earliest possible moment to lay them before the Government and obtain the necessary sanction to borrow the money required to carry out the permanent works for the next ten years.

In the House of Commons Mar. 4, the discussion was resumed upon a resolution calling upon the Government to act on the report of the Transportation Commission, which recommended the carrying out of many works for the improvement of the inland waterways, and the equipment of the harbors, from the head of the lakes to Halifax. After considerable discussion, in which reference was made to the Georgian Bay Canal surveys, the harbor improvements at Port Arthur and Fort William, the Trent Valley Canal project, the works in progress at Port Colborne, and the St. Lawrence channel improvement, an amendment was adopted to the effect that the Government, having regard to the public service generally, was making reasonable progress in acting upon the report of the Commission.

The Steamboat Cayuga's Trial Trip.

As the Niagara Navigation Co.'s new steamboat Cayuga will be in service next summer, the following report by Capt. C. Moller, of her trip from Toronto to Charlotte, N.Y., and return, on Aug. 15, 1906, will be of interest:

9 a.m., took in moorings and left dock; 9.30 a.m., passed through the Western Gap, course S.W. ¼ W. by comp. towards Port Credit.

10.10 a.m., turned ship, steering E. by S. by comp. Port Credit bore by comp. W. by N.

10.32½ a.m., Gibraltar Pt. bore by comp. N. by E. dist. 5.6 miles. Log 9′, wind easterly, moderate breeze.

0.25 p.m., Olcott Lt. bore by comp. S. by W. dist. 8 miles. Log 38.5.

1.1½ p.m., 30 Mile Pt., bore by comp. S. by W. dist. 7 miles. Log 48.

2.53 p.m., Braddock Pt. bore by comp. S. by W. dist. 6 miles. Log 77.5.

Average speed 19.3 miles for trip across. Wind easterly, light, sea smooth.

6.14 p.m., Braddock Pt. bore by comp. S. by W. dist. 6 miles. Log 86.

8.03 p.m., 30 Mile Pt. Lt. bore by comp. S. by W. dist. 7 miles. Log 117.

10.12 p.m., Gibraltar Pt. Lt. bore by comp. N. by E. dist. 6 miles. Log 154¼.

Turned ship round and steered for Eastern Gap.

11.30 p.m., moored alongside dock, Toronto.

Average speed 21.2 miles for return trip.

On the return journey to Toronto, after leaving 30 Mile Pt. at 8.03 p.m., the boat arrived at Gibraltar Pt., a distance of 47 miles, at 10.12 p.m., being an average speed for this part of the run of 22.4 miles per hour.

C. G. Chisholm, lecturing on inland waterways before the Royal Geographical Society, London, Eng., Feb. 27, said the result of the survey of Canada was, that on the long hauls, the railways would be able to enter into very effective competition with the inland waterway system.

The Lake Freight Situation.

Our Winnipeg correspondent writes: The freight conditions for the opening have improved greatly since my last report, as the stocks of grain at the head of the Lakes have shown a very decided increase over what was expected from the severe winter, and the indications now are that considerable more wheat should be in store on the opening than a year ago. By the middle of March practically all the Canadian tonnage had been chartered for first trips at 2c. to Georgian Bay ports, 5⅛c. to Kingston, and 7c. to Montreal; with later trips a fraction higher. Practically all the business so far has been confined to Canadian channels, and with the increased stocks, and the demand for tonnage there will undoubtedly be considerable movement by U.S. boats to Buffalo. A duty of 10c. a bushel has been placed on flax entering Canada from the U.S., which will have the effect of confining the flax business from Fort William directly to Canadian bottoms, as in the past, when this commodity was free, U.S. boats could handle it from Fort William to Port Huron, and the flax could again enter Canada for crushing, duty free. The Canadian Lake and Ocean Navigation Co. has placed orders for three new lower lake freighters similar to the Ames, Pellatt and Plummer, to be delivered at Montreal by the opening of navigation. These boats will trade in connection with its line between Montreal and Fort William.

The opening will be delayed considerably this season owing to ice conditions, the fields on Lakes Superior and Huron being very solid and very extensive, and the ice in the Sault Ste. Marie River being solid from end to end, averaging 21 ins. thick. In Fort William the ice is 36 ins. thick, and in Duluth 16 to 34 ins., from which it is figured that navigation will not open on the Upper Lakes before May 1.

The Whitney-Monguagon Collision.

The Supreme Court of Canada has given judgment in the action brought by the St. Clair Navigation Co. and the Southern Coal and Transportation Co. against the vessel D. C. Whitney, of Cleveland, Ohio, reversing the judgment of Judge Hodgins, of Toronto, delivered some months ago, finding the ship liable for the damages sustained by the plaintiff by reason of a collision with the plaintiff's ship Monguagon in Sandusky harbor, Ohio, in Nov., 1904. On behalf of the Whitney all liability was denied, and among other interesting questions contested was that of the jurisdiction of the Canadian Court of Admiralty to take cognizance of the case owing to the fact that the collision was in U.S. waters, and both ships were of U.S. register, and that no Canadian interests were involved. The Whitney was seized at Amherstburg under process of the Canadian Court in the course of a voyage between U.S. ports, but while she was in the Canadian channel between the Island of Bois Blanc and the Canadian mainland. The seizure was made by the Sheriff of Essex county, who boarded the Whitney with a tug and brought her into Amherstburg, where she was detained until bail was given. The judgment of the Supreme Court finds that the arrest of the ship was illegal, and that under the circumstances, while the U.S. ship was pursuing her voyage between U.S. ports, she was not amenable to legal process at the instance of a Canadian Court. The appeal on behalf of the owners of the Whitney was, therefore, allowed, and the plaintiffs were ordered to pay all costs. W. D. McPherson, K.C., Toronto, was counsel for the Gilchrist Transportation Co. of Cleveland, owners of the Whitney, and M. J. W. Hanna, K.C., of Windsor, for the plaintiffs.

PROVINCIAL GOVERNMENT INFORMATION BUREAU

617 Main Street, WINNIPEG

Among the Express Companies.

The Canadian Ex. Co. has leased the Pentagon block, Granville St., Halifax, N.S., for an office building.

During the season of 1906 the Dominion Ex. Co. shipped out of Ontario 1,192 deer, 104 moose and three wolves.

J. H. Hetherman, Route Agent Canadian Ex. Co., Stratford, Ont., received two scalp wounds in an accident on the G.T.R. near Guelph, Ont., Feb. 26. His injuries were not very serious.

W. Hutchins, Toronto, and J. J. Nicholson, Montreal, Dominion Ex. Co.'s messengers, were killed in a collision on the C.P.R. at Mountain, Ont., Mar. 1. The express car and its contents were burned.

The Dominion Ex. Co. ceased operating over the Qu'Appelle, Long Lake and Saskatchewan Ry., Regina to Prince Albert, Sask., Mar. 18, and the Canadian Northern Ex. Co. placed its service on the line on the same date.

The Postmaster-General in reply to a question in the House of Commons recently stated that it had been decided to drop the proposal that the Post Office Department should carry parcels c.o.d., owing to the strong opposition evoked.

The Dominion Ex. Co. has notified its agents that classification and tables of graduated charges 17, revised to Nov. 15, 1906, should be used in assessing the through charge on International business to or from points in the U.S., and in Canada only between common points of this company with American, National, Great Northern, Pacific, or United States express companies. Between other points in Canada not included above, classification and tables of graduated charges 16. revised to Aug. 1, 1905, and amendments are to be used until further notice.

The Express Traffic Association of Canada has been formed for consultation and mutual advice in regard to tariffs and classification, and the publicity of the same; promotion of business without discrimination as to individuals or localities, and to aid in the proper observation of the laws relating to and regulating commerce. So far the work of the Association has consisted mainly in arranging for a uniform system of filing of tariffs required by the Board of Railway Commissioners. Sub-section 5 of the regulations relating to the filing of tariffs provides that "all provisions of the Railway Act relating to freight tolls and freight tariffs, in so far as such provisions are applicable to and not inconsistent with the provisions of this section, shall apply on express tolls and tariffs." As freight tariffs and freight tolls are made up in an entirely different manner from express tolls and express tariffs, a rather difficult problem was placed before the Railway Commission and the express companies. After a number of conferences and a good deal of correspondence a plan for filing tariffs satisfactory to both sides was determined upon, and the work was considerably facilitated by the Board being able to communicate with the Association as representing all the companies. All the tariffs required by the Board to be filed by Mar. 1, have been filed. W. H. Burr, Auditor Dominion Ex. Co., Toronto, is Chairman of the Association.

F. E. Hodgins, K.C., Toronto, speaking at the Canadian Club, Ottawa, Mar. 10, advocated the establishment of a Canadian cruiser fleet to keep trade routes open in time of war, so as to furnish food supplies to Great Britain. He suggested eight 17 knot cruisers to cost $5,000,000 each, to be built in the next 16 years.

Telegraph and Cable Matters.

The G.N.W. Telegraph Co. has opened an office at Cardinal station, Ont.

The Dominion Government telegraph line has been opened from Castle Bay to North Sydney, N.S.

The C.P.R. Telegraph Department has opened a day and night branch office in the Chronicle Building, Quebec.

The Brantford, Ont., City Council is calling upon the G.N.W. Telegraph Co. to remove its poles from Colborne St. in that city.

The Halifax and Bermuda Cable Co. has completed the repairs to its cable line and land connections, necessitated by the recent earthquake at Kingston, Jamaica.

The Western Union Telegraph Co. has notified the operators at its principal offices in Canada, as well as in the U.S. and elsewhere, that a 10% increase would be given to date from Mar. 1.

The Edmonton, Alta., Board of Trade has asked the Dominion Government for an extension of the Government telegraph system to the Peace River district. There is an increasing population at Fort Vermilion, Dunvegan, Grand Prairie, at points along the Lesser Slave Lake, and at Peace River Landing.

Telegraphic communication with Prince Edward Island has been established by means of the Marconi wireless system from Pictou, N.S. The Dominion Government station at Cape Bear is the receiving point in P.E.I., and the messages are despatched from thence over the land telegraph lines in the island. It is not expected that the Anglo-American Telegraph Co. will be able to repair its cable before May, when the wireless telegraph service will be given up. C. Dantor, Superintendent Government Wireless stations, has charge of the installation.

Senator Davis asked the Senate Mar. 8 to pass a resolution for the appointment of an expert to control telegraph and telephone companies under the Board of Railway Commissioners. He claimed that the telegraph system, particularly in Western Canada, was inefficient, and the charges exorbitant. It was pointed out that the Board of Railway Commissioners had full powers over these companies, and could obtain whatever expert assistance was necessary for their purpose. The resolution, if adopted, would place the telegraph and telephone lines under the control of one man, and the Government could not accept it. Senator Davis withdrew the motion.

The Mackay Companies.

Following is the trustees' annual report: The Mackay Companies owns the whole or part of the capital stock of 102 prosperous cable, telephone and telegraph companies in the U.S., Canada and Europe, including the entire capital stock of the Commercial Cable Co. and the various companies constituting the land line system, known as the Postal Telegraph. It is the policy of the trustees to make the basis of the Mackay Companies so broad and diversified as to render impossible any fundamental impairment of the value of the preferred or common shares. Accordingly, the investments include stocks in submarine cable companies in the Atlantic and Pacific oceans, and in the Postal Telegraph land line system, and in dividend-paying stocks in the best telephone companies. The Mackay Companies is by far the largest stockholder in the American Telephone and Telegraph Co., commonly known as the Bell Telephone Co., its holdings being more than four times those of any other stockholder in that company. The trustees believe that the present friendly relations with that company should be cemented in the interest of the shareholders of both companies and also of the public at large.

Notwithstanding these days of money borrowing and mortgage giving, the trustees are again able to announce that the Mackay Companies has no debts. Its authorized capital is $50,000,000 preferred shares and $50,000,000 common shares, of which there are outstanding $50,000,000 preferred shares and $41,380,400 common shares. During the past year $9,354,400 preferred shares have been issued in exchange for stocks of corporations, which, in addition to strengthening the position of the Mackay Companies, pay as much or more dividends than the corresponding dividends paid on the Mackay Companies' preferred shares. The entire authorized preferred shares of the Mackay Companies have now been issued, and no further preferred shares may be issued, excepting on a vote of the shareholders. The outstanding common shares have not been increased during the past two years. The Mackay Companies, in its investments, confines itself to first-class cable, telephone and telegraph stocks. The shares of the Mackay Companies were listed on the New York Stock Exchange on Jan. 23, 1907.

Dividends have been regularly paid on the preferred shares since April, 1904, at the rate of 4% per annum, payable quarterly. Dividends have been regularly paid on the common shares since Jan., 1905, such dividends having been increased to 4% per annum, payable quarterly, Commencing July, 1906. The income of the subordinate companies of the Mackay Companies is largely in excess of the amount required to pay these dividends, but its policy is to obtain from its subordinate companies only enough money to meet the dividends on the Mackay Companies' shares. If the entire profits of the Commercial Cable Co. and its land line system for 1906 were paid to the Mackay Companies, as might legally be done, and if the Mackay Companies used all these profits, together with its income from other investments, for the payment of dividends, the amount would be sufficient to increase very largely the present dividend on the common shares, after paying the full dividend on the preferred shares. All surplus earnings are left in the treasuries of the subordinate companies for extensions and the development of the business and the increase of reserves.

During 1906 the earnings of the Commercial Cable Co. (which has paid regular quarterly dividends for over 17 years) have shown substantial gains in gross receipts and net profits, on both the ocean and land systems. After paying the dividend on its stock, a large amount remaining was carried to reserve, in accordance with its long established policy. The Commercial Pacific Cable Co. during 1906 laid submarine cables to China and Japan, and those cables are now in complete working order. The land line system, the Postal Telegraph, is being constantly extended, and also shows substantial increased gross receipts and net profits over the previous year. On Dec. 6, 1906, the 40 year monopoly of all telegraphic and cable business between Cuba and the U.S., granted by the Spanish Government in 1866 to the International Ocean Telegraph Co., and later acquired by the Western Union Telegraph Co., came to an end by the expiration of the 40 years. The trustees, deeming it important that that part of the world should also be reached by their cable and telegraph system, applied to the U.S. Governor in charge of the provisional government of Cuba for the usual permit for the landing and operation of a submarine cable between the two countries and such permit has just been granted. The first plan of the

trustees was to pursue the same route as that of the Western Union Telegraph Co., viz., a land line system from New York city to Florida and a submarine cable system from Florida to Havana. In order, however, to make this Cuban service equal to the Commercial Cable Co.'s service in the Atlantic Ocean, and the Commercial Pacific Cable Co. in the Pacific Ocean, and the Postal Telegraph Co. throughout the U.S., the trustees have decided to lay a submarine cable direct from New York City to Havana, thereby giving a three minute service as against an average 30-minute service. The entire cost of this important extension to Cuba will be paid out of current profits.

The trustees for the current year are: C. H. Mackay, W. W. Cook, G. C. Ward, D. Clarke, E. C. Platt, P. Fisk, and R. A. Smith, of Toronto. The two latter are new trustees.

Among the corporations in which the Mackay Companies own stock are the Commercial Cable Co., Commercial Pacific Cable Co., Anglo-American Telegraph Co., Bell Telephone Co. of Canada, Dominion Telegraph Co., Halifax and Bermuda Cable Co., Montreal Telegraph Co., North American Telegraph Co.

General Telephone Matters.

The New Brunswick Telephone Co.'s exchange at Woodstock was burned out Mar. 1.

The Bell Telephone Co. is stringing two additional copper wires between Toronto and Montreal.

The Nova Scotia Telephone Co. has completed the purchase of the Valley Telephone Co.'s system.

The Nova Scotia Telephone Co.'s offices at Pictou, N.S., were considerably damaged by fire Feb. 21.

The Bell Telephone Co. has announced a substantial reduction in its long distance rates in Manitoba.

The Bell Telephone Co. has completed an extension of its lines from Papineauville to Plaisance, Que.

The Bell Telephone Co. has opened an office at Riding Mountain, Man., on its Neepawa-Grand View line.

The Bell Telephone Co. has completed the extension of its lines to Stroud, Ont., where an office has been opened.

The Bell Telephone Co. has given notice to the Edmonton, Alta., City Council of its intention to construct lines in that city.

The Saskatchewan Legislature is discussing a proposal for a government owned and operated telephone system in that province.

The Byron Telephone Association has arranged to extend its lines to Komoka, Lambeth, and other adjoining villages in Ontario.

The Bell Telephone Co. proposes to construct a long distance line from Goderich to Kincardine and Dungannon, Ont., during the summer

The Nova Scotia Telephone Co. has installed a private branch exchange service at the Halifax dockyard for the Dominion Government.

The Bell Telephone Co.'s officials have completed an inspection of its lines in Brandon, Man., with a view of a general improvement being made.

The Nipissing Telephone Co. has passed a by-law increasing its capital from $5,000 to $50,000, which has been confirmed by supplemental letters patent under the Ontario Companies' Act.

The Rainy River International Telephone Co. is arranging to string a long distance wire between Rainy River and Fort Frances, Ont., and will overhaul and improve its lines in Emo village, Ont.

J. H. Kelly, New Carlisle, Que., is one of the principal promoters of the Bonaventure and Gaspe Telephone Co., the incorporation of which has been applied for at the current session of the Dominion Parliament.

It is understood that the difficulty between Fort Saskatchewan and Edmonton, Alta., respecting telephones, is being settled by the Provincial Government taking over the telephone lines in Fort Saskatchewan.

The B.C. Telephone Co. is negotiating with the New Westminster City Council, for the purpose of having the electric light wires removed from the poles carrying the telephone wires, with a view of improving the service.

Estimates have been submitted showing that the cost of installing a 300 line telephone central energy system in Strathcona, Alta, would be $18,000, and for a magneto-call-drop-signal system $10,000, exclusive of buildings.

Wallace municipality, Man., has decided to proceed at once with the installation of a municipal telephone system. It is estimated that to provide telephone facilities for the 455 houses in the municipality would necessitate the building of 345 miles of pole line.

The Dunsford Telephone, Light and Power Co.-Operative Association has been formed at Dunsford, Ont., with the object of constructing telephone lines in Emily, Ops, Verulam and Harvey townships. Arrangements have been made for connection with the Bell Telephone Co.'s system.

The Premier of Manitoba stated, Mar. 16, that work would be commenced within 60 days upon the provincial telephone system, and that 1,000 miles would be put under contract. This was for the long distance lines. The wishes of the municipalities in towns and cities would be consulted as to the construction of local systems.

The Bell Telephone Co. is issuing $2,500,000 of new stock at par to shareholders of record Mar. 23, in the proportion of one share of new stock for every four shares now held. The right to subscribe expires April 17, and the payments over to be made in instalments of $25 per share, on May 1, July 2, Oct. 1, 1907 and Jan. 2, 1908.

The committee which proposes to acquire the Bell homestead at Tutela Heights, Brantford, Ont., as a memorial to the inventor of the telephone, desires to raise $40,000. About $10,000 has already been promised, over $6,000 having been raised in Brantford. The Ontario Government has been asked to vote $10,000 towards the project.

The Bell Telephone Co. offered, Mar. 13, to enter into a contract with the City of Toronto for an exclusive franchise, including the payment of $20,000 a year to the city, and such other conditions as may be equitable to the city and the company. The Board of Control authorizing the Mayor to obtain full details of the proposed contract.

The Yorkton, Sask., taxpayers have voted by 68 to 18 in favor of a by-law authorizing the Town Council to raise $10,000 on debentures, in order to secure a controlling interest in the Yorkton Northwest Electric Co. This company owns the telephone system in Yorkton, has 105 subscribers, and lines extending in different directions within a radius of 20 miles.

The Union of British Columbia Municipalities is asking the B.C. Legislature to pass an act to amend the powers of the B.C. Telephone Co. It is claimed that the company's privileges are too sweeping, especially with regard to its rights of entering upon any highway in the province, and sinking holes and utilizing the roads and streets at will.

The Bracebridge and Muskoka Lakes Telephone Co. has been incorporated under the Ontario Companies' Act, for the purpose of carrying on a general telephone business within the districts of Muskoka and Parry Sound. The provisional directors are: P. A. Smith, P. Hutchison and J. Thomson, Bracebridge, Ont., where the offices are situated. The capital is fixed at $10,000.

The Union of New Brunswick Municipalities has asked the Government to secure trol of the telephone lines in the province and carry on the business as a Government-owned utility. The Premier informed a delegation that at present the public interests would be sufficiently guarded by the Government measure placing the control of rates in the hands of the Lieutenant-Governor-in-Council.

The Vandorf Telephone Co. has been incorporated under the Ontario Companies' Act, with a capital of $10,000 and offices at Vandorf, Ont., for the purpose of carrying on a general telephone business in the county of York, exclusive of Toronto. The provisional directors are: G. J. Van Nostrand, A. J. Van Nostrand, H. Powell, Toronto; G. H. Powell, J. A. M. Van Nostrand, Whitchurch tp., Ont.

The Bell Telephone Co. has secured a five years' exclusive franchise in Ottawa, Ont., on the payment of $7,500 for the first year, and $5,000 a year subsequently, the city fire alarm wires to be carried on the company's poles, and the city to have 20 free telephones. The rates are to be Business—wall, $45; desk, $47; extension wall phones, $10 extra; and extension desk phones, $12 extra; residence phones, $25.

The New Brunswick Legislature has under consideration a government measure dealing with telephone companies operating in that province. It proposes to give the Lieutenant-Governor-in-Council power to regulate tolls and to compel companies to give connection with other telephone systems; and to extend their lines to localities where telephone service is needed and where there is a reasonable prospect of a line being remunerative.

The Dunnville Consolidated Telephone Co. pas been incorporated under the Ontario Comoanies' Act with a capital of $60,000 and hffices at Dunnville, to carry on a general telephone business in the county of Haldimand, Tuscarora and Onondaga tps., Brant county; Glanford, Binbrook tps., Wentworth county; Caister and Gainsborough tps., Lincoln county; and Wainfleet tp., Welland county. The provisional directors are: R. A. Harrison, T. Marshall, A.

Richard Southam Manager

W. Haun, M. L. Parry, E. E. Anderson, W. J. Aikens, Dunnville, Ont.

The Bell Telephone Co. has published a chart showing about 300 miles of rural telephone lines in the London, Ont., district, which are connected with its system. These rural lines include the St. Mary's Medina Telephone Co., with 28 subscribers; the Nissouri Telephone Association, which is adding lines for another 20 instruments, making 69 in all; the Thorndale lines with 44 instruments; and the Byron Telephone Co., which is extending its lines to take in 34 subscribers in addition to the present 24.

The Montreal City Council obtained extensive powers respecting the construction of conduits, and the compulsory use of the same by the telephone and other companies having pole lines in the streets, at the recent session of the Quebec Legislature. The Bell Telephone Co. has offered to place all the city's electric wires in its own conduits free of charge; maintain them without expense, remove all its own poles, and relieve the city of all expense save that of carrying the wires from the conduit manholes to the fire alarm boxes; on condition that it be specifically exempted from the operations of clause 1 of the bill, which empowers the city to tax all persons, firms, etc., producing or distributing, for public use in the city, motive power, light, heat, water or electricity, up to 5% of the gross earnings of the operating party.

The differences between the Bell Telephone Co. and its Toronto operators have been settled by the operators accepting a new working system. The new arrangement provides that operators work steadily for two hours, then have half an hour relief; one hour and a half more work; an hour for lunch, and the same hours in the afternoon. By this system no girl will work longer than two hours continuously. Though the hours to be spent at the switch board will number seven, the girls will be required to spend nine hours each day at their work. The company and the long distance operators will make some special agreements among themselves. The inquiry before the Government commissioners came to an unexpected ending in consequence. A report of the matter will, however, be presented to the Government.

The New Brunswick Telephone Co. is applying at the current session of the local legislature for an act authorizing it to increase its capital from $600,000 to $2,000,000; giving the directors power to fix the head office elsewhere than at Fredericton; fixing the number of directors at not more than 15 or less than nine; providing for the appointment of an executive committee; ratifying the amalgamation with the Central Telephone Co. (with protection of the New Cumberland Telephone Co.'s rights over the lines); and ratifying the purchase of the lines of the Madawaska Telephone Co., the Chatham Electric Light Co., the Miramichi Telephone Co., and of the lines owned by F. L. Pedolin. The bill is being opposed by the Union of Municipalities on the ground that it creates a trust or monopoly. The Municipalities Committee of the New Brunswick Legislature has approved of the New Brunswick Telephone Co.'s bill, authorizing an increase of the capital to $2,000,000. It was, however, decided to recommend the Legislature to insert a provision to ensure the use of the increased capital for the purpose of acquiring the Central Telephone Co. or other telephone companies.

The Minister of Public Works for Alberta in a recent speech outlined the Government telephone policy. He stated that the Government was not only going into the long distance business, but was going to supply all cities, towns, rural municipalities and local improvement districts that desired it with telephones at the lowest cost, the province undertaking the installation, operation and maintenance of the whole system. The rate for the service has not been made public, but members of the Legislature in conversation stated that it is expected that it will be about $12 a year, with something like postage stamp prices for long distance connections. The Minister of Public Works asked the Legislature on Mar. 11 to approve of a bill providing for the construction of municipal telephone exchanges when desired by the municipality, and the construction of rural telephone lines by the provincial government. The estimates for the year, brought down Mar. 11, provided for the expenditure of $200,000, the estimated surplus upon telephone construction.

Bell Telephone Co. of Canada.

Following is the report for 1906 submitted at the recent annual meeting 16,950 subscribers were added during the year, the total number of sets of instruments now earning rental being 95,145. The company owns and operates 571 exchanges and 1,160 agencies. 6,318 miles of wire were added to the long distance system in 1906. The long distance lines owned and operated by the company comprise 43,400 miles of wire on 9,391 miles of poles. $1,038,000 of 5% bonds were sold during the year, the net premium on which, $51,900, has been carried to contingent account. 10,000 shares of new stock were offered to shareholders at 25% premium, and are included in the statement, bringing the paid-up capital to $9,980,800. The premium on these shares and on the last two instalments of the previous issue, amounting to $344,015.00, has also been carried to contingent account.

Westinghouse

No. 101=B2 Railway Motor

In Selecting Motors

for modern cars every point must be considered; weight of cars, schedule, speed, frequency of stops, construction of track, grades, etc.

No. 101-B2 railway motor is the leader in all the modifications and improvements embodied in the latest electric-railway motor developments. It has under normal conditions a continuous capacity of 35 amperes at 300 volts, or 33 amperes at 400 volts, or a nominal railway rating of 40 h. p.

Reciprocal Demurrage.

By H. R. Patriarche, Manager Canadian Car Service Bureau, Western Lines.

The craze for railway legislation, so evident in the United States to-day, takes many peculiar forms. Among the most popular slogans is what is known as "reciprocal demurrage." The author of this phrase was intentionally or unintentionally a humorist, for the prominent feature of such bills has been their absolute lack of the faintest approach to reciprocity. Theory apparently says: "If a railway cannot perform that which its own interests demand, the proper procedure is to hamper its movements by legal persecutions and continuous financial drain." Any railway which fails to move traffic expeditiously suffers loss, for the life of a railway is constant motion. Where motion is retarded revenues decrease, where it stops they end.

The inability of railways to promptly provide empties for loading, under normal conditions, can nearly always be traced back to the failure of the public to unload or load promptly. In order to induce its patrons to release cars within a reasonable time, the railways charge a nominal toll of $1 a car per day, but this is only assessed after the car has been in the hands of the consignee or shipper 48 or 72 hours, many hours longer than necessary to accomplish actual loading or unloading. Various commodities, of course, take different lengths of time to handle; a car of sack flour can be unloaded in 45 minutes by six men trucking from car to warehouse, while a car of plain matched flooring would have to be handled much more carefully, and would require possibly eight working hours for unloading by team and storing in warehouse, a short haul. In addition to the 48 hours or 72 hours allowed for loading or unloading, the rules provide for extra time where cars have been bunched in transit, through wrecks, stress of weather, washouts, or for any reason not chargeable to the consignee or shipper, and during this free unloading or loading period the cars must be in position, accessible, and the weather suitable for outside work, otherwise an additional allowance must be made.

It is therefore evident to the unprejudiced mind that no business firm or institution need ever pay a dollar of car rental provided its facilities for loading or unloading cars are equal to the business it handles. As this, however, is not generally the case, car rental is collected daily, and to offset such collections the prejudiced members of the business communities are endeavoring to inflict a fine upon the railway companies under the above caption. Some two or three years ago the earnings of all the box cars in the United States were lumped, divided by 365, and again by the number of cars in commission. The result was an average earning of $2.09 a car per day, and this, it must be remembered, was the average per car regardless of the number of days said car was held for repairs or travelled light, without cargo. At certain seasons of the year a car will earn from $4 to $10 a day, and therefore it is readily seen that the toll of $1 a day represents a loss to the owners of the car of from $1 to $9 a day. From this it is evident that the enforcement of car rental is not a revenue proposition but an attempt to get proper movement of rolling stock. Anything which produces this result not only benefits the railways, but also every business interest shipping or receiving freight in car load lots.

P157

F. W. PETERS.

Assistant Freight Traffic Manager, Canadian Pacific Railway, Western Lines.

Let us consider the work of the Madden bill at present before the U.S. Senate, taking our viewpoint from Winnipeg, the metropolis of the last west. A fine of $1 a day is imposed for failure to provide cars within three days after ordering, and in addition to this the carrier must "pay all actual damages that such applicant may sustain, including the cost of the suit and a reasonable attorney's fee." The bulk of the grain movement in this country is from the west east to the lake gateways, Fort William and Port Arthur, 400 miles from the outskirts of the grain producing territory, and many millions of bushels are never placed under a warehouse roof until they reach the elevators at these points, the farmer loading direct from the fields to cars. It is easy to see the results of these long hauls when every man is attempting to get his grain to market before the close of navigation. Hundreds of thousands of cars must be hauled empty from Fort William and Port Arthur to distant loading stations in the west, as the eastbound movement of grain is far greater than the westbound movement of other freight. Grain is shipped from points north, west and south of Medicine Hat, which is 1,086 miles from Fort William. It is therefore evident that an order placed at Medicine Hat might have to be filled with cars from Fort William and to comply with the regulations of the Madden bill, these cars if immediately set in motion by wire would have to travel 362 miles for each 24 hours in order to reach Medicine Hat within the period allowed the railways to fill such order. And yet, after specifiying that cars must be provided in 72 hours, the Madden bill goes on to say that 60 miles a day is an acceptable average distance.

As an example, let us say that Brown & Co., grain dealers, Medicine Hat, Alta., place an order for 24 cars to load with wheat, the market price falling rapidly. The railway agent immediately wires his car service superintendent, who finds every empty in transit, or prospective empties at nearby points, booked for reloading at points intermediate between Fort William and Medicine Hat. The car service superintendent immediately wires Fort William to hurry forward 24 cars. These are started, though by no possible chance can they get to Medicine Hat in three days. They arrive in say 10 days, and the railway is charged $7 a car because the box cars had no wings and could not fly, total $168. But during the seven days wheat has dropped 5c. a bushel, and this also the railway must make good, total $1,200, and the cost of the court, say, $100; grand total $1,468. Brown & Co. collect this money and cars go forward, now the property of Smith & Co., who say they want them for a vessel sailing 19 days later. Through an unavoidable chain of circumstances it takes these cars 20 days to make the 1,086 miles to Fort William, and as the vessel has sailed the grain is put in the terminal elevator by Smith & Co. A suit is then started against the railway company and an additional 5c. per bushel is demanded on account of falling market, $1,220; cost of

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY.

GALENA RAILWAY SAFETY OIL

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT.

storage to spring, say, $180; interest on investment at 6%, $1,008; costs of court $100, demurrage $24; grand total $2,512. Thus because the railway company did not accomplish the impossible and avoid the unavoidable, it must pay the owners of the grain $3,980, and this risk for the privilege of attempting to earn net freight of say $600.

Following the possibilities further, we will say that in the spring the market rises, and Smith & Co. find their grain is worth 10c. more per bushel than they paid for it. They are then ahead the railway's loss, $2,552, and the increase in value, $2,440, a total of $4,992. Does the railway get a share of this profit? Not according to reciprocal demurrage, for the reciprocating feature automatically retires at this juncture, and Smith & Co. pocket the full amount. Now, suppose during the seven days overtime it takes to get Brown's cars from Fort William, grain advanced 5c. a bushel. Will Brown come forward with a happy smile and pay the railway company the $1,200 he is ahead by such unavoidable delay? The reciprocal demurrage bill does not say so. Instead of dividing up his profits or giving the entire amount to the railway, Brown demands $7 a day per car, or $168 demurrage. Again, suppose that Brown & Co. know or have reason to suspect that 24 empties cannot be furnished in the specified time, and booked their order with the intention of cancelling it when filled. Does reciprocal demurrage reimburse the railway company for hauling 24 cars 1,086 miles? Of course not. Brown demands $168 for failure to place the cars within the specified time, cancels his order and pays the railway company $24 for the one day the cars stand on his siding, in addition to "a reasonable switching charge." The loss to the railway company in this event would be $144 reciprocal demurrage, the difference between a "reasonable switching charge" and the actual cost of hauling the cars this vast distance, say, $10 a car, or $240. Also the value of 24 cars for 10 days at, say, $4 a day, $960; total $1,344, and the railway must also haul these 24 cars to another point and suffer additional delay in arranging for loading by other parties. And this action of Brown & Co. may inflict an additional fine on the railway company for failure to supply cars at another point.

Does the Madden bill provide that only well-known firms, honest and reliable like Brown & Co., can inflict this great loss on the railways? It does not, but states that the carrier must accept orders from "any and all persons or corporations who apply therefor." Not only can Tom, Dick, and Harry place orders for empty cars, refuse them after arrival, and collect the difference in penalties and damages, but these cars must also be placed for loading," at any point that cars are desired." We presume this means on a spur in the wilderness, a flag station, or even the main track if the shipper elects. And the reciprocal feature of this bill is so broad that while the railway company must pay for every day over and above the free time allowed to provide empties, the consignee is exempted from Sundays, national and state holidays, stress of weather, bunching in transit, etc. With reciprocal demurrage in force this western country would prove a bonanza to any shrewd shyster with capital sufficient to buy a few thousand bushels of grain, and brain enough to keep track of railway conditions, ordering and refusing cars at will and pocketing the penalties.

The fourth paragraph in this bill also provides that unless a loaded car makes an average distance of 60 miles a day from point of origin to destination, the road which issued the bill of lading or shipping bill must pay a penalty of $1 a day, and "all actual damages that the owner or consignee or party whose interests may appear, may sustain, including the cost of the court and a reasonable attorney's fee." There are many railways whose earnings on a carload of freight would be less than $10, representing their proportion of the through rate, and yet because they issued the receipt and accepted the freight (compulsorily) and moved the car say 10 miles, they may be compelled to defend themselves before the courts, pay out a large sum as damages and costs of court; their only redress being in turn to sue their connecting line or lines for reimbursement. A truly liberal manner of settlement, compelling the innocent to pay for the crimes of the guilty, and look to the offender for the return of their outlay.

It has been the effort of the people of the United States in years past to prevent rebates and discriminations of this nature, and yet the Madden bill carries with it possibilities of discrimination beyond computation. Fictitious damages could be paid as an inducement for continued business, during slack seasons cars could be loaded and delayed in transit purposely in order to give the semblance of justice to such settlement; empty cars could be ordered with the understanding that they would not be placed for a certain length of time, and the reciprocal demurrage which would then be claimed would represent the difference between the correct tariff toll and the toll agreed upon. Again, the railway companies could not live unless they were prepared to defend themselves against all fictitious claims for damages, etc., under such a bill, and with the hundreds of thousands of shippers and consignees along any trunk line a legal department so greatly in excess of the present requirements would have to be maintained, that the cost of such protection would naturally increase the total cost of operation. This total cost of operation can only be offset in one way, by freight and passenger earnings, and anything which tends to increase operating expenses must result in increased freight and passenger tolls. From the viewpoint of the advocates of this bill, reciprocal demurrage is a case of "Heads I win, tails you lose."

May Birthdays.

Many happy returns of the day to—

W. R. Baker, Assistant to President C.P.R., Montreal, born at York, Eng., May 25, 1852.

S. Barker, M.P., ex-General Manager Northern Ry., Hamilton, Ont., born at Kingston, Ont., May 25, 1839.

C. W. Burpee, Superintendent C.P.R., Brownville Jct., Me., born at Keswick, N.B., May 15, 1861.

J. A. Yorick, Canadian Passenger Agent Chicago, Burlington and Quincy Rd., at Toronto, born at London, Ont., May 7, 1872.

Reduction of Passenger Rates.

The following circular was sent Mar. 21 by the Secretary of the Board of Railway Commissioners to the various railway companies operating in Canada east of the Rocky Mountains: "I am directed by the Board to inform you that on Mar. 18, an order was issued by it directing the Grand Trunk and Canadian Pacific Railway Companies to reduce their passenger rates over their lines in Canada east of and including the Calgary and Edmonton Ry. to the basis of 3c. per mile. I am requested to ask whether your company is willing that its standard passenger tariffs should be similarly reduced, and, if not, on what grounds you object to this being done—such reduction to take effect within 60 days from Mar. 18. in order that the passenger tariffs of the companies might be altered and made effective accordingly. The Board desires that you furnish a reply to this communication within ten days after its receipt."

The annual report of J. E. Quick, General Baggage Agent, G.T.R., shows that during 1906, there were forwarded and received on the system, 6,278,914 pieces of baggage, against 5,514,328 in 1905. During the year 11,070 corpses were carried on the company's trains against 10,281 in 1905.

Railway Advertising.

By H. R. Charlton, Advertising Agent, G.T.R.

It has been truly said by one of the most eminent men of the age that "Advertising is to business what steam is to machinery—the great propelling power." In the railway world, to meet with success from the results of advertising, four things are essentially necessary: A thorough knowledge of the field of mediums that will best reach the people, money to spend for the purpose, the nerve to spend it, and the good judgment exercised in the investment.

Railway advertising is totally different to any other class of publicity, and it cannot be compared to the advertising of, say, ordinary trade and commerce. It is a specialty. There is a certain dignity which must be pre-eminent in the preparation of copy, the composition of the type matter, the artistic lay-out of the magazine advertisement, of the compilation and general get-up of a booklet, with the one main object of reaching and hitting the mark, not only among one class of the community, but to influence the minds of people in all spheres of life. In other ways it is not unlike ordinary commercial publicity, in that the copy must be truthful, concise and to the point, and that what is being exploited is something that the author or promoter is thoroughly conversant with and knows is a good thing, and, further, that the goods can be delivered when called for and just as they have been made known.

In explaining more clearly, the mail order feature of a large departmental store may be used as a simile. In this, the business is secured very largely through catalogue advertising, and the customers are numbered in all parts of the country. Unless the goods purchased in this way were absolutely up to the standard advertised, and the purchasers were satisfied with the merchandise when received, it would be a poor policy indeed to expend any amount of money in their advertising. Though the business no doubt would be large for a certain length of time, people would not be fooled more than once, and the reaction would be disastrous to the strongest concern. So is it with the railway whose desire it is to make known its attractions. It must be done accurately, and without getting away from facts and conditions that are actually to be found when the traffic is secured. If a railway is advertising magnificent equipment, velvet running roadbed, exquisite scenery, unexcelled fishing and hunting, or any other attractions that may be found contiguous to its line, and cannot substantiate its statements, the money expended in such advertising would be worse than utter waste, for it would reveal a fallacy of the worst kind, and would prove a greater detriment to the road than if the matter had been left entirely alone. It is therefore obvious that unless a railway is up-to-date in every department of its management, and can offer the public exactly what it announces, the advertising department would be the fifth wheel to the coach, and a hindrance instead of the great help it is to the company in bringing grist to the mill, and thereby increasing the revenue through the passenger department.

Take, for instance, our Canadian railways, which have the vastness of the north and west to exploit, and whose areas cover thousands of square miles of virgin territory that offer homes to the settler, and whose forests and streams are a veritable paradise for sportsmen. Although our country is rich in its endowment of all such attractions, only a small percentage of its resources has as yet been brought formally to notice. Proper information can only be obtained by special trips into the unexplored parts, and the securing of the necessary data which experience dictates will aid the advertising department in putting it into such shape as will appeal to the general public, and explaining to those who are desirous of getting away from the beaten path and visiting the trackless areas how they should divorce the strenuous life and glut of business activities for the pleasures awaiting them in God's-out-of-doors among Nature's unadorned solitudes.

This feature of railway advertising, the bringing of our country into such prominent notice, is one of great importance, and during the past few years it has been developed to a large extent by one at least of our great Canadian railway systems whose lines reach the finest summer resort districts and fishing and hunting confines in America, viz., the Highlands of Ontario. As an object lesson in this class of advertising, I might cite an instance of what has been accomplished by this railway company during a period of ten years of systematic and progressive advertising. Ten years ago very little was known and very little had been done in making known this wonderful territory of the Province of Ontario; in fact, scarcely anything was known of the inexhaustible resources which were awaiting the opening up of this wonderful region. It was then decided that a vigorous policy of advertising should be inaugurated, and the thousands who were looking for just such information made aware of the attractions that were within easy reach. This campaign was well thought out and systematically executed, with the result that during this period of ten years the traffic increased each year in leaps and bounds. Largely through the means of judicious advertising, there was an increase of over 330% in the year 1906, when compared with 1896, in the passengers carried to the Highlands of Ontario. A special feature which will demonstrate the value of such traffic to the community resident in this vast territory, and the Province itself, may be cited here. Estimating conservatively the amount of money left by each tourist or sportsman in this particular district, and with the present reasonable assumption that the number of summer visitors from across the International border amounts to 75% of the total, the amount of money left in this portion of Ontario through this traffic in 1896 was over $600,000, while in 1906 it would amount to nearly $2,000,000. This refers to but one section of the Province, and is given simply as an instance of the value of railway advertising, not merely to the railway itself but to the community generally. Each successive year sees this great army of travellers increasing, helped on without doubt by the distribution throughout this continent of the many publications of the railway, and now greatly assisted by the dissemination of personal information, and experience of the thousands of satisfied visitors who return to their homes and tell of the delights and pleasures that may be found in these parts.

This feature of advertising, that of friend to friend, is probably the most convincing one. It is generally of a quality which causes others to accept a statement without question, and it is largely furthered when art, optimism, and accuracy are combined in the railway company's printed prospectuses. The living voice that can inspire with legitimate enthusiasm, the living man who can be catechised face to face in order to correct exaggerated enthusiasm, will best so read the story of the advantages which the railway company first seeks to faithfully exploit through its printed pages.

This general statement regarding the financial value of tourist travel induced by judicious advertising is demonstrated in other countries also. Take, for example, Switzerland, a country whose physical features preclude general agricultural development, but whose natural attractions appeal to the globe-trotter or tourist. Each year some 30,000,000 francs are left within the confines of Switzerland's borders by travellers, and the bulk of the entire population is practically dependent on this revenue for their sustenance. An example nearer home may be cited in the revenue derived by the people of the State of Maine, our near neighbors. It is estimated that each year $20,000,000 are spent in the State by the floating population of sportsmen and tourists who annually visit that domain.

The principal mediums used by the railways for bringing the excellence of their service and equipment into notice, as well as for exploiting their resources, are the daily and weekly press and the magazines, supplemented by many publications issued by themselves, which are necessary in order to give more detailed information. The newspapers and magazines create the demand for information, and bring the prospective traveller into touch with the railway which, through the advertising department, or its passenger representative, sends the enquiring one such of the publications as may be desired, or provides him with supplementary information that will help him to decide certain details of his prospective trip.

The railway publications to-day are an intellectual revelation when compared with those which were issued in the earlier part of the last decade. Some of the railways very properly recognize that if a thing is worth doing at all it is worth doing well, and the cheaply printed booklet for first-class passenger business is a thing of the past. The production of such stuff is practically a waste of money, for it is simply a creature of the moment. To-day we find the railway literature, by reason of its authenticity, in demand for educational purposes in many of the schools, and, instead of copies being simply glanced at and scrapheaped, the recipients preserve them in the study, on the library shelves, or in the home generally, and peruse them at their leisure. The reason for this is their attractiveness. Instead of the old style custom of wood-cut illustrations or reproductions from pen and ink sketches or wash drawings, the booklets and folders are now embellished with reproductions from direct photographs, beautifully printed on high-grade papers, and so gotten up that they cannot fail to appeal to the artistic taste.

Some there are who think that art in its general sense is beyond the comprehension of the masses, and that to understand its treasures one must be of high birth, wealthy or of specially cultured training. The gift of æsthetic emotion may be denied to some, but not because they belong to humble ranks, or have not enjoyed a liberal education. A prominent litterateur once said that, "The aims of art are accuracy of knowledge, delicacy of feeling, and the world's emancipation of vulgarity. Art may possibly be—is very likely to be—above us; it can never be beneath us." The majority of people can therefore be delightfully impressed with a beautifully printed booklet. It is one of the essential features of the preparation of any printed matter not to lose sight of the democracy of art, and to ever keep the artistic sense in view when designing and laying out one's printed matter. Illustrations are probably the most attractive portion of a railway booklet, and the larger they can be reproduced to conform to the space at disposal the more valuable the advertising piece becomes. The text matter is subordinate to these illus-

trations, but embodies, however, all the essential features and facts of the subject dealt with, and which should be conveyed to the reader in a concise and intelligent manner.

Photography occupies a very prominent part in the successful advertising of a railway, and a great deal depends upon "the man behind the camera." That is where the photographer's skill as an artist comes in. It requires something more than pressing the button and leaving some one else to do the work. It requires an intuitive knowledge of what is really artistic in nature and of after effect in his selection of beauty spots and other natural charms, and their value to the prospective traveller. Large sums of money are expended in this branch of advertising, and with good results, especially with the travelling picture exhibits that one Canadian railway has toured the country with, from the Gulf of Mexico to the Great Lakes, and from the Mississippi Valley to the Atlantic Ocean. This feature of advertising was inaugurated some eight or nine years ago. The special car in which this particular exhibit was installed last year was a very handsome one, the interior being fitted with bromide enlargements from direct negatives of scenes in the various summer resorts and fishing and hunting districts reached by the railway. The car was in charge of a competent representative, well versed in all the attractions that are found in the several territories advertised, and he was consequently in a position to give any detail of information that might be requested. This car visited 80 of the principal cities and towns in the States of Louisiana, Mississippi, Alabama, Tennessee, Kentucky, Illinois, Indiana, Ohio, Pennsylvania, New York, and Michigan, and through the Province of Ontario. The number of visitors who viewed this exhibit of pictures and received copies of the illustrated publications totalled nearly 100,000. Advertising of this class is bound to bring good results, perhaps not in a great degree immediately, but it is sure to come. It is an object lesson that leaves a lasting impression on the mind, one that will develop when the question of travel is under consideration. Many advertisers who do not get immediate results become disheartened after a brief campaign, and lose all faith in advertising. They do not take into consideration the cumulative effect of publicity. To demonstrate the theory of cumulative advertising, an instance might be cited in the development of the business of a commercial firm, which took several years of a vigorous advertising campaign before anticipated results were shown by increased sales. The record of sales is as follows: 1899, $20,000; 1900, $20,000; 1901, $20,000; 1905, $1,200,000. Increase of sales in seven years, 6,000%. With railway advertising it is almost impossible to estimate just how much revenue one particular advertisement has brought. But, from the passenger traffic returns for the year, it can be estimated how effective a year's advertising has been in stimulating business.

The main point in preparing advertising copy for magazines is to make it convincing, then to get it into the most artistic shape with the space at one's command, say, half or full page. When once an advertising agent is thoroughly satisfied with the finished proof, then the definition as given of the word iteration should be followed, and the advertisement repeated as often as can be done and in as many magazines or other publications as the appropriation will cover, being careful of course in choosing the mediums. This applies to the announcements of special features which will run for several months. The principle of iteration, of regular repetition, is of more importance than space.

In railway advertising there is one circumstance that seems somewhat unique, viz., that in spite of all the publicity given to the passenger department, the freight service is left to take care of itself. Would it not pay as well in that department as in the passenger department? This question does not seem to have been given much consideration by freight traffic men, probably due to the fact that in the past the freight service has benefited by the advertising done by the passenger department, but it is only reasonable to believe that proper advertising in regard to freight matters may, in the near future, be a substantial factor in the railway's whole general scheme of publicity. Advertising agents tell about palatial limiteds, about low rates on tourist business, and about everything calculated to induce people to travel. They have not as yet, however, told about fast through freight trains, about the railway's facilities for handling business, or about the number of trains offered each day to the shipper. These points, unfortunately perhaps, have been left for the shippers to find out in their own way. A railway may reduce a freight rate, but the general public never hears about it in the newspapers, only those immediately concerned know about it. It may, however, discover or create a new tourist resort on its line, and the black type is at once pressed into service. The pages of the newspapers metaphorically shout loud and strong the wonders and attractiveness of National Parks, the Great Lakes, and Southern winter resorts. Folders, posters, and booklets supplement the newspaper advertising, but whoever saw a folder advertising the freight service of a railroad?

The foregoing paper was read before the Canadian Railway Club recently.

Victoria Rolling Stock Co. of Ontario.

The annual report for the year ended Feb. 15, 1907, states that during the year the company did not issue any new debentures, and outstanding debentures against leases were reduced by $445,000. All payments on leases which matured during the year were promptly met. The final payment under lease of May 15, 1896, to the C.P.R. Co. matured during the year, and conveyance of the rolling stock included in the lease was executed. The directors wrote off discount and commission account $20,000, leaving $36,000 still to be dealt with. The profit on the year's business, after charging up directors' fees, expense account, and $20,000.00 for discount and commission on debentures sold, was $20,874.42; out of which a dividend of 12% per annum on the paid-up capital stock, amounting to $14,400, was paid. W. Hendrie, President, and T. G. Brough, a director, died during the year. Hon. John S. Hendrie was elected a director to fill the vacancy on the board caused by W. Hendrie's death, and the directors submitted a by-law reducing the number of directors from eight to seven.

ASSETS.

Obligations on leases	$2,395,545.84

	$265,677.50
Original cost of rolling stock held under existing leases	$5,846,718.03
Amount paid in on account by railway companies in addition to interest	3,414,305.70
	$2,432,412.33
Total amount of company's debentures outstanding	$2,433,000.00

The directors for the current year are: President, E. B. Osler; Vice-President, W. D. Matthews; Managing Director, H. C. Hammond; other directors: D. Coulson, Hon. J. S. Hendrie, H. Pellatt, D. R. Wilkie.

Free Scholarships Offered by G.T.R.

Two free scholarships covering four years' tuition in the Faculty of Applied Science of McGill University, Montreal, are offered by the G.T.R. Co., subject to competitive examinations, to apprentices and other employes of the company under 21 years of age, and to minor sons of employes on lines east of Detroit and St. Clair rivers. The competitive examinations, which will be the regular entrance matriculation examination provided for in the annual calendar of the University, will be held at the university and at other centres, beginning June 12. The two candidates making the highest average and complying with the requirements of admission will be awarded the scholarships and have the option of taking a course in any department of the Faculty of Applied Science. Scholarships will be renewed from year to year only upon the holders thereof passing satisfactorily the sessional and other examinations prescribed by the faculty. In consideration of the free scholarships, students will be required to enter the company's service as student apprentices, and serve during vacation periods while in attendance at the university, and at the option of the company, for two years after completing the college course. Successful candidates will, before entering the university, be required to execute the company's regular form of student apprentice contract, copies of which can be obtained upon application to R. S. Logan, Assistant to Second Vice-President, Montreal, to whom, also, applications for certificates entitling eligible persons to enter the competition should be addressed. Copies of the Annual Calendar containing the conditions of admission and announcement of courses may be obtained upon application to J. A. Nicholson, Registrar, McGill University, Montreal. The college will re-open for the session of 1907-1908 on Sept. 18.

J. H. McKnight Construction Co. has been incorporated under the Ontario Companies' Act, with a capital of $40,000 and offices at Toronto, to carry on a general contracting business, including the construction of railways, bridges, etc.; to buy and sell material required in the carrying out of such contracts, and to have all necessary incidental powers. The provisional directors are: J. H. McKnight, contractor; Jas. Shields, foreman; W. E. Douglas, civil engineer; Mrs. L. E. McKnight, of Toronto; and L. Carabone, foreman, Sault Ste. Marie, Ont.

"HART" CONVERTIBLE CARS

Our Cars are not an Experiment. **Over 25,000 in actual service.**

Hart Convertible Cars have been in successful operation for the last four years on many of the leading railroads and during that time have been working under exceptionally hard conditions. This year we offer a car stronger in every way than heretofore produced, and guaranteed to stand up under the hardest steam shovel work and general road service.

Locomotive Tests at St. Louis Exposition.

By H. H. Vaughan, Assistant to Vice-President C.P.R.

The tests carried out by the Pennsylvania Rd. at the St. Louis Exposition have been so thoroughly described in the technical press that it would be superfluous now to go into a description of them in detail, and it will be sufficient to briefly state the general arrangement of the apparatus employed and the scope of the experiments. The testing plant, which is a development of that in use for several years at Purdue University, comprises a series of supporting wheels, on which the driving wheels of the locomotive are placed, each pair being equipped with a set of Alden brakes. These brakes consist of discs, which rotate with the driving shaft, and diaphragms of copper, which are attached to a stationary casing, and which can be pressed against the discs when water is admitted under pressure to the casing. The discs, where pressed against the diaphragms, are well lubricated and the retardation is furnished by the viscosity of the oil under the pressure caused by the water, which also serves to carry away the heat that is generated. As the water pressure in the casings depends on the rate at which water is admitted, this type of brake allows the resistance to be easily and accurately regulated by adjusting the valves controlling the supply of water, and in carrying out a test this is done by hand to obtain a practically constant speed. As the supporting wheels are thus braked to control the driving wheels at a given speed, the power transmitted to them tends to move the engine forward on them exactly as it would do on a rail, and this movement is prevented by the attachment of the engine draw-bar to a stationary dynamometer, which thus measures the pull or tractive power developed. This dynamometer is a very highly-developed type of weighing machine, and is arranged to allow the engine to be adjusted so that the driving wheels are exactly over the supporting wheels, and the force developed by the engine is thus measured with considerable accuracy. The apparatus thus briefly described is actually exceedingly complicated and beautifully designed, but a detailed description of it would occupy a large amount of time, and those interested must be referred to the volume published by the Pennsylvania Rd., in which it is fully described and illustrated, and in which complete reports of the elaborate methods employed in carrying out the tests, the data obtained, and a general discussion of the results are given in full. It will be sufficient for the present to say that the greatest care was taken to obtain complete experimental results, and every known precaution was taken to ensure their accuracy.

In obtaining the locomotives to be tested, the original idea was to select those that would allow comparisons to be drawn on several features of locomotive design, as, for instance, to test one engine with piston valves and another with flat valves, one with wide fire-box and one with narrow, one simple and one compound, one with long flues and one with short, but partly on account of difficulties experienced in getting the plant into satisfactory running order, and partly on account of the large amount of interest aroused by the balanced compound passenger locomotive, this programme was not entirely carried out. A statement of the locomotives actually tested shows, however, that it was adhered to sufficiently to enable several interesting comparisons to be drawn: (See table in columns 2 and 3).

The object of the tests was, however, not primarily to determine the effect of various elements in the designs, since, while perhaps such experiments might be of greater actual value than those carried out, they would not have permitted the testing plant to perform its part as a coherent portion of a great exposition. For instance, to test the relative merits of piston and slide valves, the ideal method would be to test two engines identical in all respects with the exception of the valves. Such a test would, however, have nothing to do with the merits of the engines as a whole, whereas tests of the engines as a whole, while only testing constructive variations, incidentally accomplished the purpose of a criticism on the locomotives exhibited, ascertaining their capacity, their economy, and in general the degree of perfection with which they fulfilled their constructors' aim, and the function of the testing plant as a portion of an exposition was thus attained by its serving as an accurate and impartial judge. There have been at least two excellent reviews published of the general results obtained; the first in P.R.R. report, chap. 21, and the second by Prof. W. F. M. Goss, in a pamphlet issued by the American Locomotive Co. The P.R.R. report also contains a summary of the conclusions, which will be given in this paper, as they are of the greatest value to all interested in locomotive operation; these conclusions are as follows:

Road	Eng. No.	Type	Simple or Compound	Valves	Fire Box	Service	Grate Area	Heating Surface

BOILER PERFORMANCE.—Contrary to a common assumption, the results show that when forced to a maximum power, the large boilers delivered as much steam per unit area of heating surface as the small ones.

At maximum power, a majority of the boilers tested delivered 12 or more pounds of steam per sq. ft. of heating surface per hour; two delivered more than 14 lbs.; and one, the second in point of size, delivered 16.3 lbs. These values, expressed in terms of boiler-house power per sq. ft. of heating surface, are 0.34, 0.40, and 0.47 respectively.

The two boilers holding the first and second place with respect to weight of steam delivered per sq. ft. of heating surface are those of passenger locomotives.

The quality of steam delivered by the boilers of locomotives under constant conditions of operation is high, varying somewhat with different locomotives and with changes in the amount of power developed, between the limits of 98.3 and 99.0%.

The evaporative efficiency is generally maximum when the power delivered is least. Under conditions of maximum efficiency, most of the boilers tested evaporated between 10 and 12 lbs. of water per pound of dry coal. The efficiency falls as the rate of evaporation increases. When the power developed is greatest, its value commonly lies between limits of 6 and 8 lbs. of water per pound of dry coal.

The observed temperature of the fire-box under low rates of combustion lies between the limits of 1,400 and 2,000 degrees F., depending apparently upon characteristics of the locomotive. As the rate of combustion is increased, the temperature slowly increases, maximum values generally lying between the limits of 2,100 and 2,300 degrees F.

The smoke-box temperature for all boilers, when worked at light power, is not far from 500 degrees F. As the power is increased, the temperature rises, the maximum value depending upon the extent to which the boiler is forced. For the locomotives tested it lies in most cases between 600 and 700 degrees.

With reference to grate area, the results prove beyond question that the furnace losses due to excess air are not increased by increasing the area. In general, it appears that the boilers for which the ratio of grate surface to heating surface is largest are those of greatest capacity.

A brick arch in the fire-box results in some increase in furnace temperature and improves the combustion of the gases.

The loss of heat through imperfect combustion is in most cases small, except as represented by the discharge from the stack of solid particles of fuel.

Relatively large fire-box heating surface appears to give no advantage either with reference to capacity or efficiency. The fact seems to be that the tube heating surface is capable of absorbing such heat as may not be taken up by the fire-box.

The value of the Serve tube over the plain tube of the same outside diameter, either as a means for increasing capacity or efficiency, was not definitely determined.

The draft in the front end for any given rate of combustion, as measured in inches of water, depends upon the proportions of the locomotive and the thickness and the condition of the fire. Under light power, its value may not exceed an inch, but it increases rapidly as the power is increased. Representative maximum values derived from the tests lie between the limits of 5 and 8.8 inches.

Insufficient openings in the ash-pan and the mechanism of the front-end, especially the diaphragm, are shown by the tests to lead to the dissipation of considerable portions of the draft force.

THE ENGINE.—The indicated horse power of the modern simple freight locomotive tested may be as great at 1,000 or 1,100; that of a modern compound passenger locomotive may exceed 1,600 h.p.

The maximum indicated horse power per sq. ft. of grate surface lies, for the freight locomotives, between the limits of 31.2 and 21.1; for the passenger locomotives, between the limits of 33.5 and 28.1.

The steam consumption per indicated horse power hour necessarily depends upon the conditions of speed and cut-off. For the simple freight locomotives tested, the average minimum is 23.7. The consumption when developing maximum power is 23.8, and when under those conditions which proved to be the least efficient, 29.0.

The compound locomotives tested, using saturated steam, consumed from 18.6 to 27 lbs. of steam per indicated horse power hour. Aided by a superheater, the minimum consumption is reduced to 16.6 lbs. of superheated steam per hour.

In general, the steam consumption of simple locomotives decreases with increase of speed, while that of the compound locomotive increases. From this statement it

appears that the relative advantages to be derived from the use of the compound diminish as the speed is increased.

Tests under a partially opened throttle show when the degree of throttling is slight the effect is not appreciable. When the degree of throttling is more pronounced the performance is less satisfactory than when carrying the same load with a full throttle and a shorter cut-off.

THE LOCOMOTIVE AS A WHOLE.—The percentage of the cylinder power which appears as a stress in the draw-bar diminishes with increase of speed. At 40 revolutions a minute, the maximum is 94 and the minimum 77; at 280 revolutions a minute, the maximum is 87 and the minimum 62.

The loss of power between the cylinder and draw-bar is greatly affected by the character of the lubricant. It appears from the tests that the substitution of grease for oil upon axles and crank pins increases the machine friction from 75 to 100%.

The coal consumption per dynamometer horse power hour, for the simple freight locomotives tested, is at low speeds not less than 3.5 lbs., nor more than 4.5 lbs., the value varying with running conditions. At the highest speeds covered by the tests the coal consumption for the simple locomotives increased to more than 5 lbs.

The coal consumption per dynamometer horse power hour, for the compound freight locomotives tested, is, for low speeds, between 2.0 and 3.7 lbs. Results at higher speeds were obtained only from a two-cylinder compound, the efficiency of which, under all conditions, is shown to be very high. The coal consumption per dynamometer horse power hour for this locomotive at the higher speeds increases from 3.2 to 3.6 lbs.

The coal consumption per dynamometer horse power hour for the four compound passenger locomotives tested varies from 2.2 to more than 5 lbs. per hour, depending upon the running conditions. In the case of all these locomotives, the consumption ncreases rapidly as the speed is increased.

A comparison of the performance of the compound freight locomotives with that of the simple freight locomotives is very favorable to the compounds. For a given amount of power at the draw-bar, the poorest compound shows a saving in coal over the best simple, which will average above 10%, while the best compound shows a saving over the poorest simple, which is not far from 40%. It should be remembered, however, that the conditions of the tests, which provide for the continuous operation of the locomotives at constant speed and load throughout the period covered by the observations, are all favorable to the compound.

It is a fact of more than ordinary significance that a steam locomotive is capable of delivering a horse power at the drawbar upon the consumption of but a trifle more than 2 lbs. of coal per hour. This fact gives the locomotive high rank as a steam power plant.

It is worthy of mention that the coal consumption per horse power hour developed at the draw-bar by the different locomotives tested presents marked differences. Some of these are easily explained from a consideration of the characteristics of the locomotives involved. Where the data is not sufficient to permit the assignment of a definite cause, there can be no doubt but that an extension of the study already made will serve to reveal it.

The above conclusions are evidently quite extensive in themselves, and I have neither the knowledge nor the time to discuss them in detail. They form an immensely valuable statement of results of locomotive tests, and have only been obtained at a very great cost, both of money and time. Certain of them have, however, had a peculiar interest to me, and will probably also appeal to other students of the locomotive on account of their application to problems which have occurred in our daily work. These and some results of individual tests I will now refer to in detail. The results on European and American locomotives are interesting on account of the general impression that our engines are not as economical, either on account of their use of copper fire-boxes, or for other seasons. While there were only two foreign engines tested, both were of modern types. Of these, one, no. 628, was the only locomotive tested equipped with a superheater, and its engine gave, as might be expected, the most economical results, but the performance, as a whole was not superior to that of either 535 or 3,000, the American balanced compounds, except at 80 RPM, at which speed both it and 2512, the De Glehn compound, showed the best results. At higher speeds the American engines were fully equal to their competitors, and their maximum capacity was almost double, dependent of course, on the fact that they were of much larger size. As both these engines were balanced compounds, no comparison could, of course, be drawn between the performance of European and American simple engines, but one thing was definitely shown that the copper fire-box has no evaporative advantage over the steel, and this of itself is important.

In comparing simple and compound locomotives, which was only done directly on the freight engines, the results are not entirely satisfactory. The two simple engines showed the interesting result that they required 39% more steam per 1 h.p. hour at 40 revolutions, 26% at 80 revolutions, and 6½% at 160 revolutions, these speeds on a 57-in. wheel equalling 7½, 15, and 30 miles per hour respectively, thus confirming the experience that with steady work and low speeds the compound shows an advantage that is lost when a considerable proportion of the time the speed is high. On the other hand, the passenger four cylinder compounds showed a good

performance at the highest speed tested, no. 535 only taking 20½ lbs. of water per 1 h.p. hour at 240 revolutions when indicating 1,550 h.p. It is possible, therefore, that the loss of economy on the compound freight locomotive with increase of speed is to a certain extent a matter of design, but the locomotives as tested certainly exhibited the same characteristics as our own.

None of the tests made involved any comparison between slide and piston valves as, contrary to the intentions of the committee, both simple freight engines were equipped with D slide valves. The comparison of these results is, however, interesting, as 1499 was slightly but uniformly superior on the basis of the steam consumption per indicated h.p. hour, the average results being:

Engine	734	1499	Gain
40-20-F	29.56	28.33	4.35 per cent.
40-30-F	27.78	27.20	1.8 per cent.
80-20-F	25.89	25.51	1.5 per cent.
80-30-F	24.55	23.92	2.6 per cent.
160-30-F	25.11	24.78	1.3 per cent.
160-30 F	25.53	24.0	6.4 per cent.

In investigating the reason for this difference it will be found that in 1499 the clearance is 11.4%, in 734 9.26%, in 1499 the valve is of the plain balanced type, in 734 the double ported balance, and that the motion of 734 is considerably superior in its setting to that of 1499, the points of cut-off, release, and compression all being far better equalized in the former, and yet with all these points in its favor the performance is inferior. The explanation lies in the back pressure, which is 1 to 2 lbs. greater on 734, and looking into this further the cause is found to lie in the type of self-cleaning front-end with which 734 is equipped. In 734, to obtain 1-in. draft between the fire-box and ash-pan, the total draft required was 5.8 in., of which 3 ins. was required to pass the gases below the diaphragm, while in 1499, 5.3 in. was needed, and this would have been reduced to 3.3 had it not been for the openings in the ash-pan on this engine, which were considerably too small. This example is interesting on two accounts, it shows the difficulty that is frequently experienced in intelligently explaining the many results obtained, and it is a useful object-lesson as to the necessity of following all and not only a few of the many factors that together make for economy or waste on a locomotive.

Our knowledge of the efficiency with which coal is burned in a locomotive fire-box was added to, but, unfortunately, the results are to a great extent involved, and on one account unsatisfactory. The apparatus designed to catch the sparks issuing from the stack did not work properly. The cinders retained in the front-ends of the locomotives tested and caught by the deflector in the stack weighed 53,500 lbs., while those which escaped and fell on the roof were estimated to weigh 97,000 lbs., a total of 75 tons. During the entire series about 750 tons of coal were burnt, so that the cinders and sparks amounted to about 10%. Of this 750 tons, however, only 290 were burnt during complete and recorded tests, and while the average rate at which coal was burnt on these tests was 61 lbs. per sq. ft. of grate per hour, it would be guesswork to assume that 10% represented the spark loss at this rate of combustion, and as a matter of fact it is really impossible to draw any conclusions on this important source of loss from the experiments.

Apart from the spark loss, which is itself dependent on the coal burnt per sq. ft. per hour, and is, therefore, one of the losses most affected by uneven and poor firing, other losses in a fire-box are those arising from excess air, imperfect combustion, and shaking of good coal into the ash-pan; the loss that also occurs in road service from poor firing, that due to heavily banked fires at the end of a run, is not a factor in tests of this nature. The loss in the ash-pan was not measured, as the coal was very carefully analyzed, and it was thought to be unnecessary, but I now regret that this was not done as a measure of the efficiency of the grates.

The other losses, excess air, and incomplete combustion, were thoroughly ascertained, but the data relating to the former have not, I believe, been thoroughly studied as yet. The loss from imperfect combustion, which practically means the formation of CO in place of CO_2, has been carefully gone into, with the result that it is found to increase with the amount of coal burnt, but varies considerably with different engines. For instance, at 80 lbs. per sq. ft. the loss was 16% in 1499, 8% in 628, 1% in 2512 and 535, and ½% in 734 and 3000. The cause of this difference is not so clear, but is ascribed in the P.R.R. conclusions largely to the pressure or absence of a brick arch, the former probably causing a higher fire-box temperature, which should decrease the percentage of CO. This conclusion is questionable. At 80 lbs. per sq. ft., 628 and 3000, the best and the worst but one, showed practically the same fire-box temperatures, while 1499, the worst, is also high, and 2512, which showed very little CO, is low in temperature. It must be remembered, however, that the fire-box temperature is only taken at one point, and does not in all probability represent the average of the entire box, and I believe the explanation of the difference to be that local low temperatures of combustion, caused by variations in the thickness of the fire, especially near the tube sheet, cause the formation of CO, and that the use of a brick arch or of a deep fire-box mixes up the gases sufficiently to ensure its further combination. The boilers showing the worst results are those having the least distance from grates to flues and vice versa, and it is also possible that the interlocking finger grate gives poorer results than the bar rocker in this respect. A point worth recollecting is that the fireman's work in these tests was about as good as it is possible to get, and that with poorer firing the results might

not be nearly as good. The fact remains that with a deep fire-box and a brick arch the loss from this cause is negligible, while with shallow boxes and no arch it may amount to about 15%, and probably more, if the fire were too thick at the tube sheet.

The tests give a large amount of data as to the efficiency of the evaporating surface, but it does not seem possible to separate this entirely from the efficiency of the furnace. By this I mean that, knowing the composition of the flue gases, their fire-box and smoke-box temperatures, it should be possible to calculate the exact amount of heat transmitted to the flues, but although I have spent a large amount of time on this subject the results were of practically no value. Probably a thorough study would afford some results, but the work is very tedious and the results were not sufficiently encouraging to induce me to devote the time required. Taking the results of boiler and furnace together there are, however, some interesting results, justifying as a whole the use of a large boiler. Neglecting 2512, which was fitted with Serve tubes, the total heating surface (based on fire side of tubes), and grate area was as follows, arranged in order of heating surface:

Engine No.	Heating Surface	Grate Area
628	1,753 square feet	29.1 square feet
1499	2,482 square feet	49.2 square feet
734	2,541 square feet	33.8 square feet
585	2,812 square feet	49.4 square feet
535	2,902 square feet	48.4 square feet
3000	3,000 square feet	49.9 square feet
929	4,306 square feet	58.4 square feet

Excepting, therefore, 628 and 929, there was not a great deal of difference in the amount of heating surface in the engines tested, but 1499 and 734, with about 2,500, should show differences as compared to 535 and 3000, with about 2,950, or say an increase of 20% in the heating surfaces.

The relative value of heating surface should be demonstrated in one of two ways. If heating surface is of the same value, however disposed and of whatever extent, then the evaporation per pound of coal should be the same when equal amounts of coal are burnt per square foot of heating surface per hour. As a test of this I have prepared fig. 1, showing the equivalent evaporation per pound of dry coal plotted with reference to the dry coal fired per square foot of heating surface per hour. This diagram differs only from that shown in the P.R.R. report by showing the individual values for each test in place of curves drawn through those values. The heavy dotted line is the curve $E\ (1+\frac{R}{2}) = 14$, where E is the equivalent evaporation per pound of dry coal, and R the pounds of dry coal burnt per sq. ft. of heating surface per hour, and it will be seen to be an excellent average of the various results. From this diagram it would appear that the heating surface question was settled, and it would naturally follow that for any given amount of coal burnt a boiler having large heating surface should evaporate considerably more water than one with less. To exhibit this I have plotted fig. 2, which shows the total evaporation per hour plotted with reference to the pounds of dry coal burnt per hour, from which it will be seen that the results are almost contradictory, as the 50% increased heating surface of 929 shows no greater evaporation than 585, 535, or 3000.

An inspection of fig. 1 will show the reason of this apparent discrepancy, for instance, a curve drawn through 929 would intersect the 10.5 B evaporation line at about 0.45, while that for 3000 is about 0.67, and for 585 about 0.75. In other words, while the various results are at first sight well grouped, there is sufficient variation between them to entirely correspond with fig. 2. The question then arises whether fig. 1 is to be trusted, and the writer between that further investigation shows that it is, and that factors other than heating surface are responsible for its peculiarities, for the following reasons: The points for 3000, which had the largest heating surface of any engine but 929, mostly lie well above the curve, while those for 535 are almost exactly on it—those for 1499 and 734 generally below it, although several of the former agree almost exactly with it—those for 628 are in general below it—and 585 are above it. These facts show that, with the exception of 929, the engines with the largest heating surface show at least the same and generally greater efficiency than those with the smaller, and if this be so the diagram is justified. The variations must in all probability be looked for in the fire-box, and this, I think, explains the specially good results obtained from 3000 at high rates. The firing, while uniformly excellent, was undoubtedly governed somewhat by the demands on it. When the boiler was not so much pressed, the thickness of the fire was not always the best, leading to excess of air or the opposite fault, formation of CO, and this in turn exercised an influence on the results that is almost impossible to accurately measure. The low results of 734 can, of course, be explained by its being a narrow fire-box engine, and as for 929 it must be remembered that this engine was never worked to anything like the capacity of its boiler, and it showed a very high percentage of CO, considering the coal burnt per sq. ft. of grate. It does not seem justifiable from the results obtained from this engine to dispute the general agreement of the other tests, and it therefore appears safe to consider that the curve drawn represents very closely the evaporation results that will be obtained from a boiler with first-class firing and average conditions otherwise.

It will, perhaps, be as well to take this opportunity to refer to a paper which I prepared some three years ago on the question of heating surface, and in which I now believe I drew some entirely erroneous conclusions. The value of heating surface was shown to be proportional to the square root of the length of the tubes, in place of their length. In one sense this is true. For in-

stance, if with 1,000 ft of heating surface coal was burnt at the rate of 2,000 lbs. per hour, the evaporation would, by fig. 1, be 7 lbs. If the heating surface were doubled the evaporation would be 9.3 lbs. or 1.33 times as great. Now, as the square roots of 1,000 and 2,000 are in the proportion of 1.41 to 1.00, there was sufficient truth this to lead to an attractive fallacy, and in fact, this was really shown in the discussion. Where the mistake was made was in trying to extend this idea to cover the form of the heating surface, whether in a number of short tubes or a lesser number of long ones, and trying to show that the latter were less efficient. This, I am now convinced, was wrong, as the fact was overlooked that if the number of tubes is decreased the amount of gas and, consequently, of heat through each tube, is correspondingly increased. On the assumption that the heat transferred per sq. ft. is proportional to the difference in temperature between the flue gases and the water, this may be shortly demonstrated as follows:

Take two boilers, one with n flues a feet long, the other m flues b feet long, and let na = mb or the heating surfaces be equal.

Let C = circumference of tube in feet = heating surface per foot of length.

Let T = initial temperature of gases, and t, temperature at any point l feet from the end, above the temperature of the water.

Then in general $\frac{dt}{dl} = -Kct$ or $\log t = -Kcl + C$.

When $l = o$, $t = T$, and $C = \log T$.

Then $\log \frac{T}{t} = -Kcl$, and when $l = a$ and $t =$ final temperature $\log \frac{T}{t} = -Kca$, and if

$$na = mb = \log \frac{T}{t} = -Kmbc.$$

Therefore, for equal areas, t is equal.

The results from 929, which had the longest flues tested, might be taken as an indication that long tubes are less efficient than short ones, but this is an isolated case, and the results from the other engines do not support it in the least. Arranging the engines in the order of the length of the tubes, they are 929, 535, 3000, 585, 734, 628, 1499, and an inspection of fig. 1 shows that there is not the least evidence for supposing that the length has anything whatever to do with it This is confirmed by plotting the smoke-box temperatures with reference to the coal burnt per hour, which is shown in fig. 3. In place of drawing straight lines through the points, curves are shown of the form $C = K\left\{\frac{t^\circ 100}{100}\right\}9/2$ which fits the case almost exactly and passes through zero coal at 100° Fahr. From these curves it will be seen that the temperature of the gases passing into the front end of 929 at 4,500 lbs. per hour was less than for the other engines at 3,000 lbs. per hour, so that it is evident that the heating surface did its part, and that the cause for the discrepancy must be looked for elsewhere. The conclusion would, therefore, be that the curve shown on fig. 1 represents with reasonable accuracy the average result to be obtained under good conditions.

There are a number of other interesting facts to be learned from these tests, but they require, as a rule, considerable study to extract them, and in many cases they are extremely difficult to trace out. As an example, why should the boiler of 585, which shows the lowest fire-box temperatures, form usually no CO and be so efficient? And in the one case when its efficiency drops off the fire-box temperature is higher, but the draft is for some reason lower than usual in proportion to the steam used. Such an occurrence might be accidental, or it might be due to some cause that a careful examination would detect. Broader questions are open for study, the frictional loss, the effect of counterbalancing, the value of Serve tubes, the reason for the decreased economy of the two-cylinder compound at high speed as compared with the four-cylinder, the effect of excess of air in the fire-box, and numerous others that will suggest themselves to you, but these I am not in a position to discuss, and probably would not be even did time permit. One thing more there is to say, that we should all realize the debt we have incurred to the Pennsylvania Rd. management for their broad-mindedness and generosity in carrying out such a series of tests, and the light they have thrown on that most complicated and contradictory of man's inventions, the steam locomotive.

The foregoing paper was read before the Canadian Railway Club recently.

West Fort William Crossing Case.

The following order was issued by the Board of Railway Commissioners Mar. 12:

Order No. 2695. The Board of Railway Commissioners for Canada, meeting at Ottawa, Tuesday the 12th day of March, A.D. 1907. Present—A. C. Killam, Chief Commissioner; Hon. M. E. Bernier, Deputy Chief Commissioner; James Mills, Commissioner.

In the matter of the application of the C.P.R. Co. for reconsideration of the Board's order dated Aug. 6, 1906, granting the applicant company authority, under the Railway Act, 1903, sec. 177, to cross with its second main line track the Canadian Northern Ry. Co.'s track at West Fort William, Ont., and prohibiting the applicant company from using its main line track across the Canadian Northern Ry. Co.'s line for shunting or switching cars out of its yard. Upon the hearing of counsel for the applicant Company, the Grand Trunk Pacific Ry. Co., and the Canadian Northern Ry. Co., the evidence adduced, and what was alleged, and upon the report of its Chief Engineer, the Board orders that the application for reconsideration of the order of Aug. 6, 1906, be dismissed; but leave is granted the applicant company to place the derail on the east of the diamond on the south track at the said crossing 200 ft. from the diamond, instead of 500 ft. as at present required.

Canadian Westinghouse Co., Limited.

The directors' report for the year 1906 shows a profit of $346,961.05 from the year's operations, and a surplus of $279,452.40, after payment of a dividend of 6% on the capital stock employed during the year and the creation of a reserve of $100,000 for depreciation of property and plant, and $20,000 for future adjustments of inventory of materials and products as occasion may require. The plant and equipment have only recently been completed at costs less than present values; nevertheless, the directors have considered it a conservative measure to create a reserve fund for future depreciation. The directors have also thought best to create a reserve for possible reduction of values of material and products on hand at close of the year although the amount of these items as shown on the statement correctly represents their actual costs according to a careful inventory. During the year the capital stock of the company was increased from $2,500,000 to $5,000,000, and $1,000,000 of this increase was sold at par to the shareholders. The gross shipments during the year increased approximately 40% compared with 1905, and about 100% compared with 1904. Continued prosperity and business activity still prevail throughout the Dominion and the prospects for 1907 are favorable for a further extension of the business. Unfilled orders on Jan. 1, 1907, aggregated $1,637,658.00.

Following are the officers and directors for the current year: President, G. Westinghouse; Vice-Presidents, H. H. Westinghouse, L. A. Osborne; Vice-President and General Manager, P. J. Myler; other directors: T. Ahearn, J. M. Gibson, G. C. Smith, W. Y. Soper, C. F. Sise, C. A. Ferry.

The regulations relating to the preservation of health on public works have been amended by the addition of a sub-section to section 5, requiring the Government or the company to keep displayed in a prominent place in every camp one or more copies of extracts from the regulations as prepared and issued in card form by the Dominion Department of Agriculture.

T. Lessard & Co., Ltd., has been incorporated under the Dominion Companies' Act, with a capital of $95,000 and offices at Montreal, to carry on a general contracting business, and in connection therewith to erect and operate mills, elevators and warehouses; to build, acquire and navigate steam and other vessels, and to construct wharves. The provisional directors are: T., A. and R. Lessard, O. Parent, and A. Charbonneau, of Montreal.

The New Brunswick Legislature has unanimously adopted a resolution to the effect that branch railways in the province be taken over by the Intercolonial Ry. It was argued that this would be in the interests of the I.C.R. as well as of the branch lines. The general complaint is that the branch lines are not run for the convenience of the public, or in such manner as to be paying propositions. The Premier suggested that it might be advisable for the Legislature to appoint three commissioners to decide on a fair price to be paid for the various branch lines

Orders by the Railway Commissioners.

2677. Mar. 15.—Authorizing City of Toronto to lay water pipe on Esplanade between Sherbourne and Princess Sts., under G.T.R. and C.P.R. tracks.

2678. Mar. 15.—Authorizing Dunnville Gas Development Co. to lay a gas pipe under G.T.R. tracks at first public road west of Moulton station, Ont.

2679. Mar. 15.—Authorizing C.P.R. to construct branch line in Moose Jaw, Sask., from near First Ave., for 2,983 ft.

2680. Mar. 16.—Authorizing C.P.R. to construct branch line to Waterous Engine Co.'s premises, Winnipeg.

2681. Mar. 15.—Authorizing Ontario Telephone Co. to cross Michigan Central Rd. with its telephone wires at West Lorne and Rodney, Ont.

2682. Mar. 15. — Authorizing Brandon, Saskatchewan and Hudson Bay Ry. to open for freight traffic its line from Webster to Brandon, Man.

2683. Mar. 11.—Approving location Canadian Northern Ontario Ry. through Ontario county, mileage 207 to 227, west from Ottawa.

2684. Mar. 11.—Authorizing and confirming crossing under C.P.R. line, Don viaduct, Toronto, by G.T.R. siding.

2685. Mar. 14.—Authorizing C.P.R. to construct branch line to Ontario Wind Engine and Pump Co.'s premises, Toronto.

2686. Mar. 14.—Authorizing C.P.R. to construct branch line to Dominion Carriage Co.'s premises, Toronto Jct., Ont.

2687. Mar. 14.—Approving revised location of Canadian Northern Quebec Ry. at Cap Rouge, Que.

2688. Mar. 14.—Authorizing Quebec, Montreal and Southern Ry. to reconstruct bridge over Nicolet River, Que.

2689. Mar. 14.—Authorizing Southwold and Dunwich Telephone Co. to cross G.T.R. tracks with telephone wires at North branch, Talbot Road, Ont.

2690. Mar. 18.—Directing C.P.R. and G.T.R. to reduce their first-class passenger fare on all lines of their respective companies in Canada east of and including Calgary and Edmonton Railway so as not to exceed 3c. per mile, 60 days being given in which to revise tariffs and make effective accordingly. (See April, pg. 253).

2691. Mar. 18.—Authorizing Ingersoll Telephone Co. to cross G.T.R. tracks with telephone wires at Wonham St., Ingersoll, Ont.

2692 and 2693. Mar. 16.—Authorizing Bell Telephone Co. to cross C.P.R. and G.T.R. tracks underground at Front and Cypress Sts., and Eastern Ave., Toronto.

2694. Mar. 12. — Authorizing Pere Marquette Rd. to construct branch line through Dufferin Park, over St. Clair Tunnel, and into Imperial Oil Co.'s premises, Sarnia, Ont.

2695. Mar. 12.—Dismissing application of C.P.R. for reconsideration of order of Aug. 6, 1906, granting C.P.R. authority to cross with its second main line track over Canadian Northern Ry. at West Fort William and using the main line tracks for shunting or switching purposes.

2696. Mar. 18.—Authorizing Preston and Berlin St. Ry. to operate crossings over G.T.R. spur line at Joseph and Wilmot Sts., Berlin, Ont.

2697 to 2712. Mar. 12.—Authorizing Bell Telephone Co.'s crossings over various railways.

2713. Mar. 22.—Authorizing Bell Telephone Co. crossing under Niagara, St. Catharines and Toronto Ry. at Bridge St. and Victoria Ave., Niagara Falls, Ont.

2714. Mar. 22.—Authorizing Bell Telephone Co. crossing over C.P.R. at North Parkdale, Ont.

2715. Mar. 22.—Authorizing Ontario Telephone Co. to cross G.T.R. tracks with telephone wires at Main, Glencoe and Haggerty Sts., Newbury, Ont.

2716. Mar. 22.—Authorizing Southwold and Dunwich Telephone Co. to carry telephone wires over G.T.R. tracks on lot 27, Southwold Tp., Ont.

2717. Mar. 22.—Authorizing Ingersoll Telephone Co. to cross G.T.R. tracks with telephone wires at Mutual St., Ingersoll, Ont.

2718. Apl. 10. — Authorizing Canadian Northern Ontario Ry. to temporarily use for construction trains only, for 90 days from April 1, the crossing of the C.P.R. near Wahnapitae, Ont.

2719. Mar. 22.—Approving location of Windsor, Essex and Lake Shore Rapid Ry., between Windsor and Leamington, Ont.

2720. Mar. 22.—Authorizing G.T.R. to construct spur line to Canada Furniture Co.'s premises, Wiarton, Ont.

2721. Mar. 22.—Approving location of portion of Cheadle Branch, C.P.R. from main line to Alix, Alta.

2722. Mar. 19.—Authorizing G.T.R. to take lots 474 and 475, cadastral plan, St. Joseph's Ward, Montreal, to provide additional station yard room and terminal facilities.

2723. Mar. 15.—Authorizing the Town of Indian Head, Sask., to cross C.P.R. tracks with its electric light wires.

2724. Mar. 25.—Authorizing the Michigan Central Rd. to open its second track between Welland and Niagara Junction, Ont., for the carriage of traffic.

2725. Mar. 27.—Rescinding orders dated Mar. 23 and Aug. 1, 1906, which required the C.P.R. to construct a suitable crossing under its railway at R. J. Cockerline's property, Morris Tp., Huron county, Ont.

2726. Mar. 23.—Authorizing Brandon, Saskatchewan and Hudson Bay Ry. to open its line between International Boundary and Brandon, Man., for carriage of passenger traffic.

2727. Mar. 25.—Approving location of Canadian Northern Ontario Ry. line, mile 10 to 37.9, through Carleton County, west from Ottawa.

2728. Mar. 22.—Authorizing Ingersoll Telephone Co. to cross C.P.R. tracks with its telephone wires at Wonham St., Ingersoll, Ont.

2729. Mar. 7.—Authorizing the G.T.R. to construct spur lines at South River, Ont., to Standard Chemical Co.'s premises.

2730 to 2733. Mar. 22.—Bell Telephone Co. crossings over various railways.

2734. Mar. 26.—Approving revised location of G.T.R. at Logan Ave., Toronto.

2735. Mar. 26.—Authorizing C.P.R. to construct a branch line in Strathcona, Alta., from South Ave. to Mill Ave.

2736. Mar. 26. — Granting temporary crossing order to Windsor and Tecumseh Electric Ry. over G.T.R. branch lines near Ford Automobile Works and Ontario Asphalt Block Co.'s premises at Sandwich St., Sandwich East, Ont.

2737. Mar. 26.—Directing Guelph and Goderich Ry. to provide a farm crossing at grade at J. Barr's farm, Blyth, Ont.

2738 to 2753. Mar. 27.—Orders authorize corrections in location plans previously filed with the Board and approved by them, (such corrections being of a trivial character, merely correcting the fraction mileages, etc., and so on.)

2754. Mar. 28.—Recommending to the Governor-in-Council the approval of agreement of lease between the Detroit River Tunnel Co. and the Michigan Central Rd. Co.

2755. Mar. 28. — Approving Canadian Northern Ontario Ry. location, mileage 37.9 to 59.5, west from Ottawa, Ont.

2756. Mar. 26.—Approving Great Northern Express Co.'s by-law authorizing D. S. Elliott, General Manager, to prepare and issue tariffs of express tolls.

2757. Mar. 27.—Authorizing G.T.R. to construct branch line near Wyevale, Ont.

2758. Mar. 27.—Authorizing G.T.R. to construct branch line in Midland through the townships of Tay and Tiny, and the Town of Penetang, Ont.

2759. Mar. 27.—Authorizing G.T.R. to construct branch line at or near Tiffin, Ont., through townships of Tiny and Tay.

2760. Mar. 27.—Authorizing G.T.R. to construct spur to Toronto Savings & Loan Co., and Brinton Carpet Co.'s premises, Peterboro, Ont.

2761. Mar. 27.—Authorizing G.T.R. to construct spur to J. Gardhouse's premises, Weston, Ont

2763. Mar. 27. — Authorizing Montreal Terminal Ry. to construct branch line in Pointe aux Trembles parish, Que.

2764. Apl. 3.— Authorizing Canadian Northern Ontario Ry. to construct a bridge over South Nation River, North Plantagenet, Ont.

2765-2767. Apl. 3.—Approving location of Moose Jaw Branch, C.P.R., mileage 78.5 to 270.9, Saskatchewan.

2768. Mar. 26.—Authorizing C.P.R. to construct branch in Calgary, Alta., from 4th St. to western side of 1st St. West.

2769. Apl. 4.—Authorizing Southwold & Dunwich Telephone Co. to carry its telephone wires over G.T.R. tracks at three points in Southwold township, Ont

2770. Apl. 4.—Approving location of Canadian Northern Ontario Ry. through Haldimand tp., mileage 158.4 to 167.5, and its revised location through Hamilton tp., mileage 167.5 to 170.8 west from Ottawa

2771. Apl. 5.—Approving location of Vancouver & Lulu Island Ry. from 20th to 14th streets, New Westminster, B.C.

2772. Apl. 5.—Correcting error in order 2664, Feb. 28, re London St. Ry. crossing in London, Ont., over London & Port Stanley Ry., and not the Pere Marquette Rd.

2773. Apl. 5.—Authorizing G.T. Pacific Ry. to temporarily use crossing at grade with C.P.R., at sec. 1, tp. 12, r. 11, w. of 1st mer., Manitoba.

2774. Apl. 5.—Authorizing Bell Telephone Co. to cross the G.T.R. with its telephone wires at Concession St., Galt, Ont.

2775. Apl. 5. — Authorizing Canadian Northern Ontario Ry. to amend its location plan at mileage 14.4 from Toronto north, by providing additional widths on lot 24, con. 2, east of Yonge St., York tp., Ont.

2776. Apl. 5.—Authorizing Montreal Water & Power Co. to lay water mains under G.T.R. tracks at Lachine Canal reserve, St. Henri, Que.

2777. Apl. 4.—Authorizing C.P.R. to construct spur line to Manitoba Canning Co.'s premises, St. Norbert, Man.

2778. Apl. 4.—Authorizing Bell Telephone Co. to carry its wires across G.T.R. at Wilson St. and Ferguson Ave., Hamilton, Ont.

2779 to 2794. Apl. 4.—Authorizing Vancouver, Victoria & Eastern Ry. to build its tracks across various highways in New Westminster district, B.C.; to deviate its located

Salary-Raising Training For Railroad Men

There is no profession in which promotion depends in any higher degree upon a man's real ability and technical knowledge than in railroading. Quick promotion then for the railroader is the result of quick and also thorough acquirement of that technical training which will qualify him to hold a higher position. In no way can the ambitious railroad employe secure this technical knowledge so quickly and yet so simply as through the I. C. S. Courses of home training. These Courses have been written by the best railroad experts on this Continent and are taught after a manner that 15 years' experience in training hundreds of thousands of ambitious men for promotion and better earnings has proved to be the most practical and efficient. These Courses include instruction in LOCOMOTIVE MANAGEMENT, LOCOMOTIVE BOILERS, STEAM CYLINDERS, and VALVE GEARS, BREAKDOWNS, COMPOUND LOCOMOTIVES, TRAIN RULES, WESTINGHOUSE and NEW YORK AIR BRAKES, CAR LIGHTING and HEATING, and ELECTRIC HEADLIGHTS.

If **YOU** wish to secure the training in your own home, in your spare time, and at an insignificant cost, that will qualify you for promotion to the highest positions in your profession, simply mark and mail this coupon and we will tell you how you can do so. The fact that we have enabled hundreds of other railroad men to secure promotion in itself warrants your careful investigation of our plan if you really wish to better yourself. Don't let a postage stamp stand between you and a better position. **Mark and mail this coupon NOW.**

line from Cloverdale to Abbotsford, and to build a bridge over the Similkameen River at Princeton.

2795. Apl. 5.—Authorizing St. John Ry. to place its cables in conduits across the St. John Bridge & Extension Ry. in St. John N.B.

2796. Apl. 10.—Authorizing C.P.R. to deviate its located line near Mountain, Ont.

2797. Apl. 11.—Approving local freight mileage tariff no. 1, C.R.C. 1, of St. Maurice Valley Ry. Co.

2798. Mar. 27.—Approving of St. Maurice Valley Ry. Co. by-laws authorizing W. R. MacInnes and R. Kerr, Freight and Passenger Traffic Managers, C.P.R., to prepare and issue tariffs of freight and passenger tolls.

2799. Apl. 11.—Authorizing Vancouver, Victoria & Eastern Ry. to deviate its located line over lots 1969, 1970 and 1971, Group 1, Similkameen section. B.C.

2800. Apl. 11.—Approving supplement 8 to classification 12 of Canadian Freight Classification. (See Mar., pg. 157.)

2801 to 2842 inclusive. Apl 9.—Approving Bell Telephone Co.'s crossing of various railways.

2843, 2844, 2845. Apl. 12.—Appointing A. F. Dillinger to inquire into complaints of alleged failure of C.P.R., Canadian Northern Ry. and Qu'Appelle, Long Lake & Saskatchewan Ry. & Steamboat Co. to supply adequate and suitable accommodation for the handling of traffic. These orders are given fully on another page of this issue.

Grand Trunk Pacific Railway Gradients.

The G.T. Pacific Ry. management has supplied the following information to the press: "After three years of exhaustive explorations by a large staff of engineers for the most feasible and economical route through the Rocky Mountains, which comprised the Peace River Pass, the Pine River Pass, the Wapiti Pass and a number of intermediate passes, the G.T.P. Ry. Co. selected the Yellowhead Pass from Edmonton to Prince Rupert, B.C., which was approved by the Government in Nov., 1906. The great importance of the selection of the Yellowhead route can be estimated in considering the exceptionally low and favorable gradients which have been obtained, the maximum gradient through the mountains against eastbound traffic being as low as four-tenths of 1%, or a total rise of 21 ft. to the mile for the entire distance from Prince Rupert to Edmonton, which is no greater than the extremely low gradients obtained on the prairie section of the line from Edmonton to Winnipeg. The maximum gradient against westbound traffic for the entire distance from Edmonton to Prince Rupert is almost equally favorable to that against eastbound traffic, being no greater than five-tenths of 1%, or a total rise of 26 ft. to the mile, and in crossing the mountains but one summit is encountered, the maximum altitude of which is only 3,712 ft. These remarkable conditions exist in this northerly locality on account of the fact that the ranges of mountains along the western portion of the American continent, which have their origin in Mexico, reach their maximum altitude in the region of the fortieth parallel of latitude, from which they gradually recede to the north. No better illustration of these physical conditions could perhaps be given than a comparison of the summits and gradients of the five existing American transcontinental railways with the G.T.P., which is shown on this page. From this comparison it will be observed, as already stated, that in the case of the G.T.P. but one summit is encountered having an altitude of 3,712 ft., with no greater gradient in either direction than five tenths of 1%, or a rise of 26 ft. to the mile west of Winnipeg, which is increased to six-tenths of 1% east of Winnipeg, while in the case of the C.P.R. two summits are surmounted with a maximum altitude of 5,299 ft. and a maximum gradient of 4½%, or 237 ft. to the mile; the Great Northern has three summits of a maximum altitude of 5,202 ft. and a maximum gradient of two and two-tenths per cent., or 116 ft. to the mile; the Northern Pacific three summits, having a maximum altitude of 5,569 ft. and a maximum gradient of two and two-tenths per cent., or 116 ft. to the mile; the Union Pacific three summits, having a maximum altitude of 8,247 ft. and a maximum gradient of two and two-tenths per cent. in reaching San Francisco, and in reaching Portland, Ore., five summits are encountered with a maximum altitude of 8,247 ft. and a maximum gradient of two and two-tenths per cent.; the Atchison, Topeka and Santa Fe Railway six summits, having a maximum altitude of 7,150 ft. and a maximum gradient of three and three-tenths per cent., or 185 ft. to the mile."

In connection with the foregoing we are advised that the C.P.R.'s maximum eastbound gradient of 237 ft. to the mile is being reduced this year to 116 ft. to the mile.

Recent Dominion Legislation.

The following acts respecting transportation interests have been passed by the Dominion Parliament:

Alsek and Yukon Ry.—Act of incorporation.

Athabaska Northern Ry.—Respecting the powers of the company.

Athabaska Ry.—Extending the time for construction.

Brockville, Westport and North-Western Ry.—Extending the time for construction.

British Columbia Electric Ry.—Confirming agreements between the B.C.E.R., the C.P.R., Lord Strathcona and Mount Royal, and R. B. Angus; and between the C.P.R., the B.C.E.R., the Vancouver and Lulu Island Ry., Lord Strathcona and Mount Royal, and R. B. Angus.

Calgary and Edmonton Ry.—Amending the act of incorporation and subsequent acts.

Canada and British Columbia.—Ratifying an agreement between the Dominion Government and the Government of British Columbia respecting the western boundary of the railway belt.

Canada Central Ry.—Amending the act of incorporation and acts amending the same.

Canadian Pacific Ry.—Amending the acts respecting its construction, etc.

Central Counties Ry.—Respecting the powers of the company.

Dominion Central Ry.—Amending the act of incorporation.

Eastern Townships Ry.—Act of incorporation.

Edmonton, Dunvegan and British Columbia Ry.—Act of incorporation.

Georgian Bay and Seaboard Ry.—Extending the time for construction.

Grand Trunk Ry.—Amending the act confirming an agreement with the G.T.R. for the purpose of securing the extension of the Intercolonial Ry. into Montreal.

Great West Ry.—Extending the time for construction.

Huron and Ontario Ry.—Extending the time for construction, and granting additional powers.

Indian River Ry.—Extending the time for construction.

Intercolonial and Prince Edward Island Railways.—Establishing the I.C.R. and the P.E.I.R. Employes' Provident Fund.

Joliette and Brandon Ry.—Declaring the line to be for the general advantage of Canada and confirming an agreement with the C.P.R.

London and St. Clair Ry.—Respecting the powers of the company.

Malone and Hopkins Point Ry.—Act of incorporation.

Manitoba and Northwestern Ry.—Extending the time for construction.

National Transcontinental Ry.—Amending the acts respecting the construction of the N.T. Ry.

Northern Colonization Ry.—Amending the act of incorporation and granting additional powers.

Orford Mountain Ry.—Extending the time for construction.

Qu'Appelle, Long Lake and Saskatchewan Ry. and Steamboat Co.—Confirming an agreement with the Canadian Northern Ry.

Quinze and Blanche River Ry.—Act of incorporation.

St. Mary's and Western Ry.—Extending the time for construction.

Saskatchewan Valley and Hudson's Bay Ry.—Act of incorporation.

Temiscouata Ry.—Respecting the powers of the company

HOTEL TRAYMORE

ATLANTIC CITY, NEW JERSEY

OPEN ALL THE YEAR

To the original hotel has been added a ten-story fireproof building, equipped throughout with the most improved sanitary plumbing, steam heating and electric lighting. The sleeping rooms are spacious, light and airy, private bath with hot and cold fresh and salt water connecting each. The building is modern in every respect, each room affording an unobstructed view of the ocean, and the furnishings will be unsurpassed in the point of richness and comfort. Capacity, 600.

Penny Fares on the Grand Trunk Ry.

W. N. Robertson applied recently in Toronto for a prerogative writ of mandamus directing the G.T.R. Co. "to run every day throughout the length of its line at least one train having in it third-class carriages on payment of a fare not exceeding one penny for each mile travelled," as provided for in the act incorporating the company. In refusing the application Mr. Justice Teetzel based his findings on the usual procedure which has been observed in our jurisprudence, in which he states in effect that a mandamus is not granted as a right, but by prerogative, and amongst other things it is the absence or want of specific legal remedy which gives the court jurisdiction to dispense it. This, Judge Teetzel declares. does not apply to the case of Robertson and the G.T.R. Co., as the Board of Railway Commissioners is vested with full powers to deal with such a complaint or omission as set out in the case stated and that the board has "all such rights and privileges as are vested in a superior court," and against the decision of which an appeal to the Supreme Court is provided for.

"Unless," says Judge Teetzel, "the section of the incorporating act in question has been superseded or repealed by the subsequent general legislation respecting railways, which was supported by the argument of counsel for respondents, I should assume that, according to the practice of the courts and upon the authorities cited by counsel for the applicant, he has the right to compel the performance by the company of the provisions of the section above referred to, and would be entitled to a writ of mandamus unless it is clear that he has another efficient remedy, either at common law or by statute; and this involves the consideration of the second question. As to this I am clearly of the opinion that under the provisions of the Railway Act, 1903, the applicant is furnished a specific and adequate remedy for the grievances complained of. Not only do I think that adequate remedy is provided for the applicant under the provisions of the Railway Act, 1903, but that such remedy could be more conveniently applied and executed under the direction and supervision of the Railway Commission than by the court, and, therefore, in accordance with the practice, I must refuse the application with costs."

St. Paul, Minn., to Portland, Ore.—We have been advised that arrangements have been completed for the putting in operation, within the next two months, of a freight and passenger service between St. Paul, Minn., and Spokane, Wash., over portions of the C.P.R. The service will be operated over the Minneapolis, St. Paul and Sault Ste. Marie Ry., from St. Paul to Portal; by the C.P.R. to Yahk, B.C., on the Crow's Nest Pass line, thence by the Spokane International Ry., to Spokane, Wash. The Oregon Ry. and Navigation Co.'s line will be used to give a connection between Spokane and Portland. It is not the C.P.R.'s intention to run its trains from Rossland to Spokane, the service being entirely from the east westerly. Through sleeping cars will be run from St. Paul, Minn., to Portland, Wash., on the route.

The C.P.R. on April 10 advanced the wages of its section men on the Western Lines 8%, which is said to represent an increased expenditure of over $500,000 a year.

The Senate Railway Committee by a vote of 11 to 9 recently again rejected the bill designed to limit the speed of trains through the thickly settled portions of cities, towns, and villages, where the road crossings are not guarded by gates and watchmen.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Abitibi and Hudson's Bay Ry.—T. G. Brigham, J. Riopelle, C. Murphy, H. Fisher, Ottawa; M. J. Aylen, North Bay, Ont., have been declared by the Dominion Parliament to be the provisional directors of a company bearing the above title with power to construct a railway from between Frederick House River and Abitibi Lake, on the Eastern Division of the G.T. Pacific Ry., to James Bay. (Feb., pg. 87.)

Atlantic, Quebec and Western Ry.—By amendments to the act passed last session of the Dominion Parliament it is provided that $50,000 is to be appropriated to be expended by a Government commissioner in liquidating the debts incurred by the company or its predecessors; and the company is bound to maintain a bridge at Cascapedia relieving the municipalities of the bonus. The company is authorized to take over the Baie des Chaleur Ry., the only portion of the Atlantic and Lake Superior Ry. being operated; and to construct a branch from Metapedia to the G.T. Pacific Ry. either at Grand Falls or Edmundston, N.B. It is also given five years within which to complete its lines. (Feb., pg. 87).

Bangor and Aroostook Ry.—A contract has been let to A. E. Trites, Salisbury, N.B., to lay a second track on the division between Northern Maine Junction, where the line connects with the Maine Central Rd., and Legrange, where connection is made with the company's main line, about 30 miles. He has also been given a contract to construct a cut-off between Legrange and a point four miles south of West Sebois station on the main line to avoid heavy grades. The cut-off will have a length of about 28 miles. (April, pg. 243.)

Bracebridge and Trading Lake Ry.—A deputation waited on the Ontario Government Mar. 29, and asked that the time for completing the line be extended for five years, and that the subsidy previously voted be continued during the extended period. (April, pg. 243.)

Canada Atlantic Terminal Ry.—An act was considered last session of the New Brunswick Legislature for the incorporation of a company with this title for the purpose of constructing a railway from the harbor of L'Etang, to some point on the St. Croix River, N.B., with power to construct such branches as may be necessary. The capital of the company is fixed at $100,000, and the offices are to be located at St. George, N.B. The provisional directors are: J. S. Clark, J. D. Chipman, G. W. Ganong, H. I. Taylor, H. F. White, G. W. and W. L. E. Marsh. The act provided for the granting of running powers to other companies over the line; to acquire wharves, piers and docks; to construct elevators, storehouses and warehouses thereon; and to acquire and operate steam and other vessels, tugs, barges, lighters, etc.

Cape Breton Coal, Iron and Ry. Co.—The Provincial Engineer for Nova Scotia reports that the company has ceased work on surveys and plans for its projected railway, and has also ceased to operate its mining and other work at Broughton, N.S. (Feb., pg. 87.)

Cariboo and Bella Coolla Ry.—E. Bloomfield is a provisional director of a company which is applying to the British Columbia Legislature at its current session for an act incorporating a company with this title to construct a railway.

Colchester Coal and Ry. Co.—The Provincial Engineer of Nova Scotia, in his report for 1906, states that the company applied for a subsidy for its line from Debert station on the Intercolonial Ry., to the mine. Location surveys have been completed, and the line is now under construction. (Jan., pg. 1.)

East Kootenay Logging Ry.—Application is being made at the current session of the British Columbia Legislature for an act incorporating a company with this title to construct a railway for the purpose of hauling lumber in from the east Kootenay lumber camps to the place of shipment. A. Leitch is principally interested.

Great Northern Ry. (U.S.)—L. W. Hill, President G.N Ry., was credited with saying April 9 that the company was endeavoring to secure extensive terminals in Winnipeg, Minneapolis and Chicago, and had secured all the land required for its business for years to come in Portland and Seattle. If the company's plans for Canada did not miscarry, he expected that within the next 10 years the company would have a railway system there which would be almost an equivalent of the G.N. Ry. system as it at present existed in the U.S. In Canada the company's lines would touch Winnipeg, Brandon, Regina, Calgary, Edmonton and probably Prince Albert. It was very likely that the company's lines would traverse the Peace River country. The line to that country would be some hundreds of miles further north than any existing lines. He could not state just when construction would actually begin, but the company's representatives were in Canada looking over the ground, and everything would depend upon their reports. Winnipeg will be made the general Canadian terminus, and an office to conduct Canadian business will be established there.

It came out before the Railway Committee of the Saskatchewan Legislature recently that the company's lines in that province were being arranged for under the title of the Saskatchewan Central Ry. T. C. Norris, a member of the Manitoba Legislature, who appeared in support of the bill at Regina, stated that the lines proposed to be constructed under it were in continuation of the lines to be constructed by the Great Northern Ry. interests in Manitoba. The maps of the survey laid before the committee showed a route which runs through the southern part of the Cannington district, crosses the C.P.R. Portal-Pasqua branch, and proceeds through Willow Bunch to Alberta boundary. It was stated that connection will be made with Moose Jaw, Regina, Indian Head, Wolseley and other places. (April, pg. 243.)

Great West Ry.—It was announced at Cowley, Alta, April 2, that this projected railway will run easterly out of Cowley, along the highway south of Massacre Butte to a point over the south fork, thence curving northward to the Old Man River, crossing it on the bottom lands toward the mouth of the north fork, thence up the east side of the Wild Rose branch, where the river turns westward, following close to the north bank to the Gap in the Livingstone range. It is proposed to complete the surveys during the summer, and to make all preparations for beginning construction early in the following year.

Halifax and North-Eastern Ry.—Reports from Nova Scotia state that the company formed in 1905 with this title to construct lines from Halifax to Guysboro, and in the Musquodoboit River Valley, has decided to abandon the project. The report of the Provincial Engineer of Nova Scotia for 1906, contains a summary of the results accomplished by the survey parties during the year. Early in the spring, it is stated, an arrangement was made between the Government and the company for a joint survey of the proposed route. Three parties were placed in the field under the charge

of W. A. Hendry. J. J. Taylor and L. Whitman respectively. The work of locating the line was carried on during the whole season, the following routes being surveyed: Sunny Brae to Country Harbor, via East River, St. Mary's, 50.8 miles; Cross Roads, Country Harbor to Guysboro, via Gunn's Brook and Salmon River, 28.8 miles; Dartmouth to junction with line from Sunny Brae to Country Harbor at Cameron Lake, via Coast to Musquodoboit Harbor, Crawford's Falls, Balone Lake, Caledonia, East River and St. Mary's, 128 miles; Crawford's Falls to Sloan Lake, via North Side, Musquodoboit River, 42.9 miles, south side to north side Musquodoboit River, connecting line at Upper Musquodoboit, 0.75 miles; junction with first mentioned line at Lowmoor to Dartmouth-Country Harbor line at Barron Brook mouth, via Barron Brook, 11.1 miles; New Glasgow to Sunny Brae via McLellan and Glencoe Brook, 19.3 miles; Stellarton to Sunny Brae, via I.C.R., Ferrona Jct., and Nova Scotia Steel Co.'s railway, 15.7 miles; Stellarton to Island Bridge, via east side East River and Nova Scotia Steel Co.'s railway, 6 2 miles; New Glasgow to Meiklefield, via Vale Railway, Thorburn, and McPherson's Mills, 12 miles; Cross Roads, Country Harbor to Country Harbor mouth, via Westside harbor, 15 miles. The field work was completed by the end of Nov., and the parties called into the office to complete plans and estimates. In the meantime the Provincial Engineer's Department placed a party in the field with the object of obtaining some additional information, and to roughly check some of the routes. The company completed its estimates at the end of the year and submitted the same to the Government. (April, pg. 243.)

Halifax and South-Western Ry.—The report of the Provincial Engineer of Nova Scotia for 1906 records the completion of the line between Halifax and Yarmouth, Dec. 14, 1906, on which day the last rail was laid near Barrington passage, connecting with the old Halifax and Yarmouth Ry. The first passenger train passed over the whole line Dec. 19, and the line was opened for traffic Dec. 22, a tri-weekly service being put in operation. Owing to the extreme depth of water and the difficulty of getting good foundations for the piers it was found impossible to complete the Mersey River bridge, and a temporary bridge was constructed, which will be used until the permanent bridge is completed. It is expected that this will be done by the end of June. About seven miles of track remain unballasted, and a few other matters require attention, but it is expected that the line will be completed in accordance with the terms of the contract by the end of June. With a few small exceptions, such as some additional ballasting and the works specially mentioned the whole line is in good shape. The bridges, many of which, such as those at the Mersey, Jordan, Sable and Clyde rivers, were extremely difficult to construct, are particularly fine, being of steel superstructure on concrete or granite piers resting on rock foundation, the excavation being carried in all cases to the solid rock. The ballasting between Bridgewater and the Clyde river has been particularly well done. The curves on this portion are fairly short, and the tangents long, so that trains should make fast time with perfect safety. While the completion of the line took somewhat longer than was anticipated, almost every place along the south shore has been brought into railway communication with Halifax.

The Middleton and Victoria Beach branch, 40 miles long, was opened for traffic Sept. 17, and a tri-weekly train service is being operated over it. The line, while not equal to the H. and S.W. Ry. main line, is in fairly good shape, and when ballasting is completed should have a good roadbed. While a much lighter line to construct than the main line, the soil is of such a nature as to give a poor roadbed, and one which will be more difficult to maintain. Like all parts of the province along the Bay of Fundy, foundations for masonry structures could not be obtained at reasonable cost, and so wood had to be used. (Feb., pg. 87.)

Hudson Bay Railway.—Speaking in the House of Commons recently upon the Dominion Land Bill, the Minister of the Interior said the Government was fully convinced of the propriety of giving the Northwest an additional railway outlet by way of Hudson Bay at the earliest possible date. With the increase in the production of the West, such an additional outlet will be urgently needed as soon as a railway can be built, even if it were commenced at once. At the same time the Government realized that public opinion throughout Canada could scarcely be expected at the moment, in view of the great obligations incurred in connection with railway enterprises, to sanction the additional obligation that would be incurred by providing immediately for the construction of a railway to Hudson Bay, unless special provision were made to meet that obligation. It believed, however, there would be no objection from any quarter if the funds accruing from the disposal of pre-emptions in the three prairie provinces, under the terms of the proposed land bill, should be considered as a provision in place of the land grant stated in the act, to meet the burden upon the credit of the Dominion as a whole, that must be assumed at an early date—if not immediately—if a railway is to be in operation to Hudson Bay in time to meet the urgent need that is now in plain sight for an additional and shorter railway route from the prairies to tidewater. The land grant in the act referred to is contained in sec. 76 of the bill to amend the acts respecting public lands, which authorizes the Governor-in-Council to make a free grant of land, not exceeding 6,400 acres for each mile of railway within Manitoba, and not exceeding 12,800 acres for each mile outside Manitoba, in aid of the construction of a railway from some point on the C.P.R. to Hudson Bay.

Intercolonial Ry.—Tenders are under consideration for the erection of a new station at Amherst, N.S.

We are advised that the question of laying a second track between Moncton and Pamsee Jct., N.B., about nine miles, is being considered by the Government. (April, pg. 243.)

The Dominion Parliament at the recent session passed votes for capital expenditure as follows:

Original construction	$ 300
To strengthen bridges	61,800
Double tracking parts of line	40,000
Increased facilities and accommodation along the line	12,400
New turntables	4,800
Additional sidings	3,840
Telegraph line	4,900
To increase water service	6,400
Extension to Sydney Mines	10,240
Improvements, Mulgrave	12,200
" N. Sydney Jct.	900
" Sackville	6,000
" Amherst	6,800
" Newcastle	6,400
" Drummondville	5,000
" Campbellton	3,140
" Ste. Rosalie	2,600
Increased accommodation at Pictou	6,800
" " Stellarton	1,800
" " Sydney	1,100
" " Antigonish	2,050
" " Truro	22,000
" " Halifax	60,000
" " St. Flavie	4,300
" " St. John	2,800
Glengarry water tank, etc	1,700
Pirate Harbor water service	2,000
Halifax—Dredging, etc., at deep water terminus	1,000
Moncton—Locomotive and car shops and land purchase	104,000
Chaudiere Jct.—Engine house	13,360
Riviere du Loup—Engine house and machine shop	13,000

International Ry. of New Brunswick.—The act providing for the guarantee of the bonds of the company at the rate of $8,000 a mile for the 160 miles from Campbellton to St. Leonards, N.B., has been passed by the New Brunswick Legislature. It was stated that the line would be completed by the fall of 1908. (April, pg. 243.)

Kettle Valley Lines.—There is under contract an extension from Grand Forks, B.C., up the north fork of Kettle River, to Lynch creek, 19 miles. It was expected to have this completed by May 1. Nothing definite has been arranged as to any further extension.

Kootenay Southern Ry.—The British Columbia Legislature is being asked at the current session to incorporate a company with this title to construct a railway through the Kootenay country. D. C. Corbin is the principal promoter.

London and Port Stanley Ry.—Notice was received April 7 from the Pere Marquette Rd., owning the Lake Erie and Detroit River Ry., which operates the L. and P.S. Ry. under lease, that it proposed to rebuild the bridges over the Thames at London, and over Kettle Creek, St. Thomas, and that it would look to the city for reimbursement. The estimated cost of the bridges is $50,000. The city of London, which practically owns the line, denies its liability to provide new bridges to carry extra heavy traffic whenever the lessee demands them. (Feb., pg. 85.)

Margaree Coal and Ry. Co.—Plans of the railway proposed to be constructed by this company between Whycocomagh, and a junction with the Intercolonial Ry. at Orangedale, N.S., have been filed with the Provincial Engineer of Nova Scotia. Nothing further has been done, and no information has been given to the Government when construction is likely to be commenced.

Minudie Ry.—The Provincial Engineer of Nova Scotia states that work on the construction of this railway was prosecuted vigorously during 1906. When he made an official inspection the line was well advanced to completion. The grading, tracklaying and part of the ballasting had been completed, bridges and culverts were all in, and the fencing being put up. Owing to the great difficulty of obtaining suitable ballast the company had to delay the completion of ballasting for a short time. No subsidy had been paid, but the company having applied for permission to open the line, a recommendation will be made for a partial payment, sufficient being retained to complete the line in accordance with the contract. (Mar., pg. 161.)

New Brunswick Coal and Ry. Co.—Replying to a series of questions in the New Brunswick Legislature, recently, the Premier stated that Brown Bros. abandoned their contract for the repair of the line Oct. 28, at which date work to the value of $49,692.95 had been performed. The commissioners retained 15% of the monthly estimates of work done as security. Since the abandonment of the work by the contractors the repair work has been continued by the commissioners on the contractors' account, and up to Jan. 31, $56,894.09 had been paid on account of the work done. The work has been done on the same specifications and under the charge of the Provincial Engineer. It was estimated that a further expenditure of $25,171.18 will be required to put the roadbed in a perfectly safe and efficient state of repair. The commissioners had sufficient funds in hand to meet this expenditure.

Yukon Central Ry.—The application made last session of the Dominion Parliament by

—THE—

BROWN HOISTING MACHINERY CO.

ENGINEERS AND DESIGNERS OF HOISTING MACHINERY OF ALL DESCRIPTIONS

MAIN OFFICE AND WORKS: CLEVELAND, OHIO. BRANCH OFFICES: NEW YORK & PITTSBURG

Nipissing Central Ry.—J. W. Fitzpatrick, F. R. Latchford, Ottawa; B. F. Pearson, Halifax, N.S.; A. G. Browning, North Bay, Ont.; H. L. Dunn, Toronto; G. Taylor, New Liskeard, Ont.; M. J. O'Brien, Renfrew, Ont.; G. F. Duncan, Portland, Me.; J. J. Whipple, Brockton, Me., are the provisional directors named in the act passed last session of the Dominion Parliament, incorporating a company with this title to construct a railway from Latchford via Blanche River to Wendigo Lake, thence to the G.T. Pacific Ry., at Mattagami Lake, Que.; from Latchford through Colman, Barr, Lundy, Auld, Caine, Barber, Tadhope, James, Smyth and Willison townships and northerly to the G.T. Pacific Ry.; from Latchford southerly to Temagami station on the Temiskaming and Northern Ontario Ry.; from New Liskeard to meet the second mentioned line, and various branch lines. The company was authorized to issue securities to the extent of $30,000 a mile and to enter into agreements with the G.T.R., the C.P.R., the G.T. Pacific Ry., and the Temiskaming and Northern Ontario Ry. (April, pg. 243.)

Orford Mountain Ry. — The extension which is now practically completed, will give a line from Rockland on the St. Francis River to Masonville, Que, on the International boundary. It was expected that the extension would be open for traffic by the end of April. (Jan., pg. 5.)

Port Hood Richmond Ry. Coal Co.—We have been advised that the company has not built any railway except such as is necessary for the operation of its mines. It has a railway charter, however, and may construct a line under it, if satisfactory arrangements cannot be made with the Inverness Ry. and Coal Co.

Port Simpson and Eastern Ry.—D. B. May, of Seattle, Wash., in the course of an interview in New York, stated recently that a New York and London, Eng., syndicate was looking into a proposal to construct a railway from Port Simpsom on the B.C. coast to Fort Churchill on Hudson Bay, to which it was proposed to give the above title.

The line would be about 1,450 miles in length, and it was expected to have the surveyors at work locating the route at an early date. The highest point on the proposed route was 2,400 ft. above sea level, and the line would pass through a fertile country. It was the company's intention to put steamers on the Pacific Ocean to run to Japan, and British shipowners had promised to establish a line to Fort Churchill.

Prince Edward Island Ry.—A contract has been let to E. A. Walberg, Montreal, for the construction of a reinforced concrete wharf at Souris, for the railway service Tenders for the construction of a railway wharf at Charlottetown are under consideration.

The following appropriations were made at the recent session of the Dominion Parliament for works on the P.E.I. Ry.:

Charlottetown—Increased accommodation	$63,600
Souris—Extending wharf	11,000
Albion—Shelter and platform	120
Uigg—Shelter and platform	100
Summerside—Improvements	50
Toronto Road "	10
Murray Harbor Branch—Land purchase	1,312

(April, pg. 245.)

Rainy Hollow Ry.—Application is being made at the current session of the British Columbia Legislature for an act incorporating a company with this title with power to construct a railway from the Alaska-B.C. boundary at the Klihini River (which flows into Lynn canal), thence northerly following Klihini River valley to the Rainy Hollow Copper mines. The company is desirous of obtaining the right to develop water powers and to generate and sell electric power; to operate steamboats and ferries on the navigable waters touched by the railway; and to connect with any line to be constructed from the south or with the G.T. Pacific Ry. C. H. Tupper, W. M. Griffin, and R. I. B. Warton, Vancouver, B.C., are among the incorporators.

Prince Edward Island Tunnel.—The question of the construction of a tunnel under Northumberland Straits to connect Prince Edward Island with the mainland has been raised several times during the recent session of the Dominion Parliament. A report made to the Department of Marine by E. D. Lafleur and A. St. Laurent of the Department of Public Works, estimated the cost of the work at $15,048,000. The report was based on surveys and soundings made in 1892 by Sir D. Fox and A. W. Palmer. Other estimates place the cost of construction of a tunnel at anything between $9,000,000 and $40,000,000. The tunnel as proposed by the surveys of 1892 would be 7½ miles long, and would reach a depth of 150 ft. below water level. There are no insurmountable engineering difficulties in the way of construction, the only question for consideration being that of funds. (April, pg. 245.)

Quebec and Lake St. John Ry.—It is expected that the branch to La Tuque will be completed early in the summer. Work has been progressing uninterruptedly during the winter. (April, pg. 245.)

Quebec, Montreal and Southern Ry.—The Railway Committee of the House of Commons threw out the company's application for authority to construct a line from Contrecoeur, Que., to a point on its present line. The principal opposition came from Sorel, which had given the company a bonus of $90,000 to bring the line into the city, and the proposal if carried out, would have taken the line outside. We are informed that the old portions of the company's lines are being relaid with 80 lb. steel, and the line will be reballasted, work being started on this as soon as the weather permits. All the bridges are to be renewed.

We are advised that no definite action has been taken with regard to the letting of a contract or contracts for the final section of the line under construction to connect with the Quebec Bridge. (April, pg. 245.)

Saskatchewan Central Ry.—See Great Northern Ry. (U.S.)

Temiskaming and Northern Ontario Ry.—The Ontario Government is considering the propriety of its undertaking the construction of a railway from Cobalt to Sudbury, Ont., as a branch of the T. and N.O. Ry. A survey of the route has been authorized, and a preliminary route marked out shows that the Canadian Northern Ontario Ry. would be connected with at Wahnapitae, and the C.P.R. at Sudbury.

The commissioners have decided to effect improvements upon the line from North Bay to New Liskeard by reducing the gradient from 1.25% to 0.60%, and to extend the line so as to have an independent entrance into North Bay. At present the line enters the town over the C.P.R. tracks.

The Ontario Legislature has passed an act eliminating the land grant of 20,000 acres a mile made to the railway under the original act, such grant being unnecessary as the Government had assumed the cost of construction of the line. Under the original act the commissioners were to meet the cost of construction by the sale of the lands. (April, pg. 245.)

Tobique and Campbellton Ry.—The New Brunswick Legislature has passed an act extending the time for the construction of the railway from the present terminus of the Tobique Valley Ry. at Plaster Rock, to Campbellton, N.B. It is provided that the surveys shall be completed within two years and the construction commenced within three years from the passing of the act.

Toronto Junction Terminal Ry.—The Railway Committee of the Ontario Legislature rejected the application for an act incorporating a company to construct a terminal railway in Toronto Junction and York township. The Stock Yards Company at Toronto Junction was the principal promoter of the project.

Trans Alaska-Siberian Ry. — A survey party has reached Dawson, Yukon, after having completed a reconnaisance survey from Dawson to a point in Alaska, about 150 miles beyond the mouth of White River. The survey was made in connection with the project to construct a railway to connect up the C.P.R. and other Canadian lines with the line across Siberia constructed by the Russian Government. J. H. Watson, Chief Engineer of the party, says the route which the party traversed is perfectly feasible for the construction of a railway.

A despatch from St. Petersburg, April 4, states that the Russian Government has rejected a proposal on behalf of a United States syndicate for the construction of a tunnel under Behring straits, in connection with the railway project.

Tusket Wedge Ry.—In June, 1906, the Provincial Engineer of Nova Scotia reports a survey was made by his department of a proposed line of railway from Tusket Wedge to a junction with the Halifax and South-Western Ry., at Salmon River, a distance of about 7½ miles. An easy line was obtained, showing light gradients and easy curvature, with only a few small structures and very light work generally. A large population would be served by the line, and from reports from residents there would be a large amount of traffic. If constructed as a branch of the H. and S.W. Ry., it could be built and operated cheaply, and should give a fair return for the investments. (Mar., pg. 163.)

Vancouver, Westminster and Yukon Ry.—J. Hendry, President, was in Ottawa Mar. 21, discussing with the Dominion Government, the question of the construction of a line from Vancouver to Edmonton, Alta. R. G. McPherson says that the question of a traffic bridge across the Second Narrows, which part of the project is receiving every attention, will require encouragement from the Provincial Government and from the municipality of North Vancouver. (April, pg. 245)

Winnipeg and Northwestern Ry.—The act which the Dominion Parliament was asked to pass at its recent session for the incorporation of a company with this title named as provisional directors: A. T. Drummond, P. Howland, W. K. George, H. M. Mowat, Toronto; H. Fox, of London, Eng. The company proposes to construct a railway from Winnipeg, northerly between Lake Winnipeg and Lakes Manitoba and Winnipegosis, by way of Mossy portage to and along the Carrot River valley, or by an alternative route from near Shoal Lake northwesterly by way of the narrows of Lake Manitoba and the easterly side of Lake Dauphin and Swan Lake to Carrot River valley; thence westerly by way of Fort La Corne to and following the north side of the North Saskatchewan River to the Lobstick valley. It is also proposed to construct branches from Prince Albert to Battleford, Sask.; from Saddle Lake to Lake La Biche, from Victoria to Athabasca Landing, and southwesterly along the North Saskatchewan River to Edmonton, Alta., and from Shoal Lake northwesterly by way of the narrows of Lake Manitoba and the valley of the Swan River to the main line near tp. 47, range 12, west second meridian. A clause was inserted in passing through committee providing that the line must pass Stonewall, Man. (Mar., pg. 163.)

H. Blitz. E. Auerbach, New York, and L. Auerbach, Boston, Mass., for the incorporation of a company with this title to construct a railway from the northern boundary of British Columbia through the Yukon Territory to Dawson, was withdrawn, the promoters not being prepared to proceed. The line proposed to be constructed was from the B.C. boundary to Dawson. At the 1906 session of the British Columbia Legislature, the three persons named were given a charter of incorporation as the British Columbia Northern and Alaska Ry., to construct a railway from Vancouver to the northern provincial boundary. (Mar., pg. 163.)

Alleged Railway Default.

The following order 2843 was issued by the Board of Railway Commissioners April 12: Whereas numerous complaints have been made to the Board that the C.P.R. Co. has failed to furnish, at places of starting and at stopping places established for such purpose on railway, adequate and suitable accommodation for the receiving and loading of all traffic offered for carriage upon the railway; and that the said company has failed to furnish adequate and suitable accommodation for the carrying, unloading, and delivering of all such traffic; and that the said company has failed to receive, carry and deliver, without delay, and with due care and diligence, all such traffic; and that the said company has failed to furnish and use all proper appliances, accommodation and means necessary for receiving, loading, carrying, unloading and delivering such traffic; and whereas the Board deems it desirable to make inquiry into the facts relating to the complaints aforesaid, and as to whether the said company has failed, and does now fail, to perform the duties imposed upon it by sec. 284 of the Railway Act, or any of them, and as to the powers of the said company in these respects; now, therefore, in pursuance of the powers conferred upon it by sec. 60 of the Act, and all other powers possessed by the Board in that respect; the Board orders that A. Frank Dillinger, of Ottawa, Ont., Operating Assistant to the Chief Traffic Officer of the Board, is hereby appointed and directed to make inquiry and report to the Board:

1. Whether the C.P.R. Co. has, at any time within the period of 12 months next preceding the issue of this order, failed, and whether the said company does now, or at any time up to the making of the final report of the said Dillinger under this order, fail to furnish at any place or places of starting on its railway, or at the junction or junctions of its railway with any other railway or railways, or at any stopping place or places established for such purpose, adequate and suitable accommodation for the receiving and loading of all traffic offered for carriage upon its railway; or to furnish adequate and suitable accommodation for the carrying, unloading, and delivering of all such traffic; or without delay, and with due care and diligence, to receive, carry, and deliver all such traffic; or to furnish and use all proper appliances, accommodation and means necessary for receiving, loading, carrying, unloading, and delivering such traffic;

2. In what particulars the said company has so failed or does fail, as aforesaid, and to what causes any such failure has been or is due;

3. Whether the said company is possessed of all proper appliances, accommodation, and means necessary for receiving, loading, carrying, unloading, and delivering the traffic which will probably be offered, immediately or within the two years next succeeding the issue of this order, at all places of starting on its railway, at all junctions of its railway with other railways, and at all stopping places established by it for such purpose, for carriage upon its railway, and, if not, in what particular respects the said company is not possessed of any such appliances, accommodation or means.

4. If the said company is not possessed of all proper appliances, accommodation, and means necessary as aforesaid, what preparation the said company has made, and what steps it has taken to furnish itself with the same, and whether such preparation and steps are adequate and sufficient for the purpose of furnishing to the said company all further proper appliances, accommodation and means necessary as aforesaid in respect of which its supply is now defective, and, if not, whether it is within the power of the said company to obtain the same within a reasonable time, and, if so, within what time;

5. In the event of the said company having failed, or failing as aforesaid, or of its not being furnished with all proper appliances, accommodation, and means necessary as aforesaid, whether any, and if so what, specific works should be constructed or carried out, or property acquired, or what property, cars, motive power, or other equipment should be acquired, or what steps, systems, or methods should be taken or followed by the said company, so as to enable it, without delay, and with due care and diligence, to receive, carry, and deliver all traffic offered for carriage upon its railway;

6. What is or would be the effect, upon the power of the said company to receive, carry, or deliver traffic, without delay, of compliance with the provisions of the Lord's Day Act.

7. In how far the said company has been prevented by any of the causes set out in the second paragraph of its answer of Feb. 27, 1907, to the inquiries made by the letter of the Secretary of the Board of Feb. 14, 1907, from receiving, carrying, and delivering traffic without delay, and in how far are any of such causes likely to continue to prevent the said company from doing so and what steps, if any, can and should be taken by the said company, or otherwise, to remove or lessen such operation of any of said causes.

And the board further orders that the said Dillinger report from time to time to the Board upon any of the matters aforesaid, as he may think desirable, or as may be directed by the Board.

On the same date orders 2844 and 2845 were issued ordering similar enquiries respecting the Canadian Northern Ry and the Qu'Appelle, Long Lake and Saskatchewan Railroad and Steamboat Co. These orders are identical with 2843 respecting the C.P.R., except that clause 7 of that order is omitted from 2844 and 2845.

Canadian Freight Association.

The annual meeting was held at Montreal April 11. Following is the organization for the current year: President, S. P. Howard; Vice-President, J. F. Chapman; Second Vice-President, J. J. Mossman.

Advisory Committee—W. R. MacInnes, chairman; J. Pullan, W. C. Rowley.

Executive Committee—W. B. Bulling, J. E. Dalrymple, J. J. Mossman.

Classification Committee—W. B. Bulling, M. H. Brown, S. P. Howard, W. Phillips, F. J. Watson, J. E. Dalrymple, C. E. Dewey, E. R. Bremner, W. M. Kirkpatrick.

Freight Inspection Committee—S. P. Howard, F. Conway, Guy Tombs, F. F. Backus, L. Macdonald, M. H. Brown, John Paul, J. F. Chapman, C. A. Jaques, W. M. Kirkpatrick.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Canadian Westinghouse Co. has issued its revised circulars, 1028, dealing with rotary converters, and 1069, dealing with air blast transformers.

The Safety Car Heating and Lighting Co. has removed its offices from 160 Broadway to the United States Express Building, Trinity Place and Rector St., New York City.

The American Locomotive Company has issued the seventh of the series of pamphlets which it is publishing to include the various standard types of locomotives. This pamphlet is devoted to the mogul type and illustrates and describes 25 different designs of this type built for various railways. The designs illustrated range in weight from 49,000 to 187,000 lbs., with hauling capacities adapted to a variety of road and service conditions.

The American Locomotive Co. has issued a pamphlet illustrating and describing the rotary snow plow which it builds. The pamphlet contains a brief account of the work done by the rotary in fighting snow on various railways, with illustrations of the rotary in operation; a description of the plow, giving the particular features of the design, and a set of rules for the guidance of those operating the rotary, based on experience gained during the past years in handling it.

At the annual meeting of the Robb Engineering Co., held at Amherst, N.S., recently, the reports showed the output for the year, at Amherst, reached about $500,000, and, including the shipments of the Robb-Mumford Works, an allied concern at South Framlingham, Mass., the total output reached $1,000,000. This was an increase over the business done in 1905. Dividends have been declared on the stock of the Robb Engineering Co., and on the preferred stock of the Robb-Mumford Boiler Co. Following are the officers and directors for the current year: President, D. W. Robb, Amherst; directors, W. B. Ross, K.C.; M. C. Grant, R. E. Harris, K.C.; A. E. Collas, W. M. Aitken, of Halifax; J. S. McLennan, Sydney, N.S.; A. G. Robb, R. W. Robb, of Amherst: Secretary-Treasurer, G. W. Cole, Amherst.

Upon agreeing as to a stipulation of facts as to 15 counts involving illegal rebates, the Great Northern Ry., U.S., was fined $15,000 by the Federal District Court at Minneapolis, Minn., April 6.

The agreement between the Dominion Government and the B.C. Government defining the western boundary of the tract of land known as the Railway Belt, granted by the B.C. Government to aid in the construction of the C.P.R., was approved by the B.C. Legislature in 1906, and was finally ratified and confirmed by the Dominion Parliament at its recent session.

The Quebec Passenger and Elevator Co. has been incorporated under the Quebec Companies' Act with a capital of $80,000 and offices at Quebec, for the purpose of conveying passengers, freight, baggage and merchandise in the city of Quebec, and within the counties of Quebec, Portneuf, Montmorency and Levis, and to collect tolls for such services. The provisional directors are: A. and L. Cumminas, J. M. McCarthy, W. and F. S. Lee, of Quebec city.

Railway Rolling Stock Notes.

The G.T.R. is receiving freight cars at the rate of about 30 a day from U.S. car shops.

The Dominion Parliament at its recent session voted $2,500 for repairs and alterations to the Governor-General's car

The Canadian Northern Ry. has ordered 50 steel cars, 100,000 lbs. capacity, from the Dominion Car and Foundry Co., Montreal.

The Intercolonial Ry. has placed an order with the Canadian Locomotive Co. for 10 consolidation locomotives similar to those recently delivered.

The Quebec Central Ry. is having a number of vestibule cars built in the United States, and is having a baggage car built at its own shops, Newton, Que.

The British Columbia Mills Lumber and Trading Co., Vancouver, B.C., has received material for six flat cars from the Crossen Car Manufacturing Co., of Cobourg, Ont.

The Canadian Northern Ontario Ry. and the Canadian Northern Quebec Ry. are each having built by the Dominion Dump Car Co., Montreal, a Rodger double-plow distributing car.

The Canadian Locomotive Co. has completed the delivery of six consolidation locomotives to the Intercolonial Ry., and is now making deliveries on an order for 30 locomotives to the Canadian Northern Ry.

The locomotive which the Toronto, Hamilton and Buffalo Ry. has received from the Locomotive and Machine Co., of Montreal, the specifications of which were given in our April issue, is fitted with the Walschaert valve gear.

The Intercolonial Ry. between Mar. 15 and April 15 received three consolidation locomotives from the Canadian Locomotive Co., Kingston, Ont., and 82 hopper cars, 15 tons capacity, from Rhodes, Curry & Co., Amherst, N.S.

The Intercolonial Ry. between Mar. 15 and April 15 ordered 10 consolidated locomotives from the Canadian Locomotive Co., Kingston, Ont., and 100 platform cars, 80,000 lbs. capacity, from Rhodes, Curry & Co., Amherst, N.S.

The Acting Minister of Railways, replying to a question in the House of Commons, April 3, said the G.T.R. and the other roads with which it interchanged business, were using the cars purchased for the G.T. Pacific Ry., on the usual per diem rates.

The G.T. Pacific Ry. is receiving freight cars from Rhodes, Curry & Co., Amherst, N.S These cars are being taken to Sydney, N.S., loaded with steel rails and sent to Fort William and other points, from whence they will be distributed to the tracklaying gangs.

The Locomotive and Machine Co., of Montreal, made delivery during Mar. of one consolidation locomotive to the Toronto, Hamilton and Buffalo Ry.; two 10-wheel locomotives to the G.T.R.; eight 10-wheel locomotives and four steam shovels to the C.P.R.

The Canadian Northern Ry., between Mar. 15 and April 15, received the following rolling stock: One locomotive from the Canada Foundry Co., Toronto; 50 flat cars from the Crossen Car Manufacturing Co., Cobourg, Ont., and one palace car from the United States.

The Temiskaming and Northern Ontario Ry. has ordered two auxiliary cars from Rhodes, Curry & Co., Amherst, N.S. It has also ordered three workmen's cars and two second-class coaches from the Crossen Car Manufacturing Co., Cobourg, Ont., and a 45-ton steam shovel from Mussens Limited, Montreal.

The G.T. Pacific Ry. has placed orders with the Canada Car Co., Montreal, for 1,000 flat cars, 60,000 lbs. capacity; three flat cars, 80,000 lbs. capacity; six flat cars for unloaders, 20 caboose cars, and 12 Rodger double plow distributing cars. These latter are being built under license from the Dominion Dump Car Co., Montreal.

The 500 steel Otis type rolling shaft bottom drop door coal cars, 100,000 lbs. capacity, for which the C.P.R. has placed an order with the Dominion Car and Foundry Co., will be built under license from the Dominion Dump Car Co. The dimensions are: length, over end sills, 38 ft. 10 in.; extreme width, 10 ft. 0⅜ in.; interior dimensions, 36 ft. 9½ in. by 9 ft. 7 in.

The C.P.R. between Mar. 15 and Apr. 15 placed the following orders for rolling stock: 10 sleeping cars, 50 box baggage cars, 93 box cars, 26 flat cars, 17 coal cars, 16 boarding cars at its Angus, Montreal, shops; 13 vans at its Farnham, Que., shops; 500 steel coal cars, 100 steel ore cars and 36 steel flat cars from the Dominion Car and Foundry Co., Montreal.

The 500 flat cars for which the Central Vermont Ry. has placed an order in the U.S., are to be all delivered by May 31. The principal dimensions are: Length over end sills, 36 ft., 9¾ in.; width over side sills, 9 ft., 0¾ in.; centre to centre of cross ties, 7 ft. 4 in.; outside end sill to centre of bolster, 5 ft.; wheel base of truck, 5 ft. 2 in.; centre of draw bar to top of rail, 2 ft. 10½ in.; capacity, 60,000 lbs.

The general specifications of the 1,000 flat cars for the G.T. Pacific Ry., which are being built by the Canada Car Co., are: length over end sills, 36 ft. 9¾ in.; width over decking, 9 ft. 3¾ in.; height from rail to top of decking, 4 ft. 1¼ in.; wheel base, 5 ft. 2 in. The special fittings include Westinghouse air brakes, Simplex body and truck bolsters, Simplex brake beams and Canada Car Co.'s wheels.

The Dominion Parliament, at its recent session, passed the following votes for rolling stock, etc.: Air brakes to freight cars, $4,200; to exchange drawbars of freight cars, $7,500; air compressors and reservoirs, $1,080; air brake equipment, $3,900; ballast plough and unloader, $1,300; new machinery for locomotive and car shops, $20,000, for the Intercolonial Ry., and $4,000 for the rolling stock for the Prince Edward Island Ry.

The C.P.R. between Mar. 15 and April 15 received the following rolling stock: Two locomotives from the Locomotive and Machine Co., of Montreal; one locomotive from the American Locomotive Co.; five locomotives, one sleeping car, seven first-class cars, 317 box cars, 115 flat cars, 54 ballast cars from its Angus, Montreal, shops; four vans from its Farnham, Que., shops; and 106 steel coal cars from the Dominion Car and Foundry Co., Montreal.

The 10 passenger locomotives which the C.P.R. has ordered at its Angus, Montreal, shops, will be duplicates of those illustrated in our issue of July, 1906, the general specifications of which follow:

Working pressure, boiler, 200 lbs.; firebox, width, 5 ft. 9⅛ in.; firebox, length, 7 ft. 10⅛ in.; number of tubes, 193-22; length of tubes, 19 ft. 6 in.; diameter of tubes, 2¼ in. and 5 in.; heating surface, tubes, 2,777 sq. ft.; heating surface, firebox, 480 sq. ft.; heating surface, total, 2,957 sq.ft.; grate area, 45.6 sq. ft.; cylinders, 21 in. by 28in.; driving wheels, 75 in.; weight on drivers, 139,000 lbs.; weight, total engine, 212,000 lbs.; weight of tender, 122700 lbs.; weight of tender light, 52,700 lbs.; capacity of tender, 10 tons coal and 5000, imperial gallons of water.

Following are specifications of cars for which the Intercolonial Ry. has placed orders with Rhodes, Curry & Co., Amherst, N.S.

100 BOX CARS, 60,600 LBS. CAPACITY—Length,36 ft. 9⅝ in. over end sills; width, 9 ft. 0 ⅝in.; length inside, 36 ft.; width inside, 8 ft. 6 in.; wheel base, 5 ft. 2 in. Tower couplers, Simplex bolsters and brake beams; and Westinghouse air brakes.

5 REFRIGERATOR CARS—Length, 36ft. over end sills; width, 8 ft. 10 in. over side sills. Tower couplers, Simplex bolsters and brake beams, and Westinghouse air brakes.

70 HART CONVERTIBLE CARS—Length over end sills, 34 ft.; width, 9 ft. Tower couplers, Simplex bolsters and brake beams, and Westinghouse air brakes. To be built under license from Dominion Dump Car Co.

130 HOPPER CARS, 30,000 LBS. CAPACITY—Length over end sills, 16 ft. 10 in.; width, over side sills, 6 ft. 11 in.; wheel base, 10 ft. Tower couplers, Westinghouse air brakes.

The six dining cars which the C.P.R. is having constructed at its Angus, Montreal, shops, will have a seating capacity of 36. They will be 72 ft. long, and 9 ft. 10½ in. wide, and will have steps only at the dining end of the car, the kitchen being carried out on the platform at the other end. The other specifications provide: body and underframe, wood; brake beams, Simplex, with adjustable head; brake shoes, steel; brakes, Westinghouse air, high speed; couplers, Tower passenger; heating system, Gold, with Frumveller heater; platforms, steel, Standard Coupler Co.'s.; roofs, standard passenger, covered with canvas; seats, movable chairs; springs, 38 in. double elliptic; trucks, six-wheel, 5 by 9 in. journals; wheels, 36¼ in. steel-tyred.

Referring to recent press reports that the G.T.R. had ordered 500 flat cars, we are advised that the cars mentioned are undoubtedly those ordered in Feb. by the Central Vermont Ry. It was also reported that the G.T.R. was asking prices on ten passenger cars, but we are informed the company is not in the market for passenger cars at present, the last order placed being in Jan., for 10 passenger cars for delivery during Aug. The company has under construction at its own shops and at private works, 70 passenger cars of its standard type, and four conductors' vans of a new type. The latter are being built at the company's shops, London, Ont., and are to be used only by the crews engaged in the transfer of freight trains between the Mimico and the York yards east and west of Toronto. The new passenger cars will replace old cars sold to the G.T. Pacific Ry. for construction purposes.

Railway Commissioners' Rate Orders.

2570. Feb. 15. In the matter of the application of the Montreal Produce Merchants Association for a direction to the G.T. and C.P.R. companies to make the refund provided for by the Board's order dated Nov. 19, 1906, applicable to business originating south and east of Montreal, in the Province of Quebec, and to order a refund of amounts charged at Montreal for the cartage on cheese for export for the year 1906, as in the case of the said order with respect to export business of the year 1905; this application having come on for hearing at the sittings of the Board held in Montreal on Jan. 22, 1907. Upon hearing what was alleged by the members of the Transportation Commmittee of the Montreal Produce Merchants' Association, and counsel for the G.T. and C.P.R. companies and the evidence adduced, the Board orders that the said railway companies are hereby authorized to refund to the exporters of cheese the tolls collected from them during the season of St. Lawrence navigation for the year 1906, for the carriage from the companies' cars or warehouses, in Montreal, to the exporters' warehouses, of cheese shipped from points west of Montreal received at Montreal in consignments of not less than 500 lbs., and subsequently exported via the port of Montreal during the same season, provided that the said refund be made in proportion to the volume of traffic to all those who have paid such cartage tolls.

The poll tax which the U.S. Government collects on all aliens—Canadian citizens and Mexicans being specifically exempted—will be increased to $4 on July 1. The transportation companies carrying the passengers into the country are made liable for the tax.

THE BAKER HOT WATER CAR HEATERS

RIVETED STEEL SHELL HEATER

Attention is especially called to our FIRE PROOF HEATERS, with jointless steel casings, made of ¼ in. steel; Fire Proof and Break Proof. Single and Double Coils.

RIVETED STEEL HEATER, with Double Coils. Meets the demand for a smaller and cheaper Heater than our Fire Proofs.

PERFECTED HEATERS, Single and Double Coils.

The "MIGHTY MIDGET" HEATER, 19 inches in diameter. This Heater is especially adapted to ELECTRIC CARS.

STEAM ATTACHMENTS, to circulate the water of the Baker Heater by steam from the locomotive; or will circulate hot water independently of any Heater.

PIPE AND PIPE FITTINGS for Baker Heater work.

Avoid Infringements by ordering direct from the makers.

Railway Finance, Meetings, etc.

Alberta Ry. and Irrigation Co.—Net earnings from all sources, exclusive of land sales, for Feb., $4,390; making for eight months ended Feb. 28, $57,324.

Algoma Central and Hudson Bay Ry.—See Ontario railway subsidies for 1907.

Atlantic and Lake Superior Ry.—A scheme of arrangement between the A. and L. S. Ry., and the Baie des Chaleurs Ry., and their creditors, containing provisions for raising additional share capital and settling the rights between preference and ordinary shareholders, has been filed in the Exchequer Court. Copies of the scheme of arrangement can be obtained at the offices of the companies' solicitors, 189 St. James St., Montreal. The A. and L. S. Ry. is the title of a company which was incorporated to amalgamate the B. des C. Ry., and several other short lines, and to construct the necessary connecting links so as to form a complete line from Gaspe, Que., to Lake Superior. The project never fully materialized, and the B. des C. Ry., which was being operated by the A. and L. S. Ry., was subsequently taken over by the bondholders in Great Britain and operated by them. The Dominion Parliament has before it at the current session a bill providing for the taking over of the line by the Atlantic, Quebec and Western Ry.

The newspapers report the sale of the A. and L. Ry. to the Atlantic, Quebec and Western Ry., by the bondholders, but we have been unable to obtain a verification of the statement.

Baie des Chaleurs Ry.—See Atlantic and Lake Superior Ry.

Canadian Northern Ry.—The London, Eng., Stock Exchange has been asked to quote £211,300 additional 4% first mortgage consolidated debenture bonds, guaranteed by the Manitoba Government.

Canadian Pacific Ry.—Figures recently published show that the C.P.R. has, in round numbers, 35,000 stockholders, which shows an average individual holding of about 34 shares. An unconfirmed report states that the directors have under consideration a proposal to split its stock into smaller amounts so as to induce a wider diffusion

The Central Ontario Ry. directors propose to ask the shareholders at the annual meeting to be held at Trenton, Ont., May 15, for authority to issue bonds to the amount of $1,200,000 to retire the outstanding bond issue and for other purposes of the railway A special meeting of the shareholders will be held immediately after the annual meeting to sanction an increase of the capital stock to $3,340,000, or such other sum as the Governor-General-in-Council may approve, and to authorize the issue of paid-up capital stock to the holders of overdue interest coupons, such stock to be issued at par for the face value of such coupons.

Cape Breton Ry.—The Nova Scotia Legislature voted a subsidy of $3,200 a mile for 30 miles, and has paid $91,990, of which $20,000 was paid in 1906, leaving a balance of $4,010 unpaid. No subsidy has been voted for any work done beyond the thirtieth mile.

Crow's Nest Southern Ry.—Following are the officers and directors for the current year: President, Hon. G. A. Cox; Vice-President, Hon. R. Jaffray; Treasurer, E. Sawyer, St. Paul, Minn.; Managing Director and Secretary, G. G. S. Lindsey, K.C.; Directors, Sir H. M. Pellatt, E. R. Wood. The company does not issue any annual report.

Dominion Atlantic Ry.—Gross earnings for Feb. $59,200, against $54,067 for Feb., 1906, making for two months ended Feb. 28, $128,000, against $112,400 for same period 1906.

Great Northern Ry. (U.S.)—It is reported from Minneapolis that the company will at an early date acquire a number of lines which now operate as independent concerns. The lines to be acquired include the Vancouver, Victoria and Eastern Ry. and Navigation Co., in British Columbia; the Brandon, Saskatchewan and Hudson Bay Ry., and the Midland Ry. of Manitoba in Manitoba. This report was put in circulation following upon the judgment of the Supreme Court of Minnesota authorizing the issue of the proposed $60,000,000 of new stock.

Halifax and Southwestern Ry.—The amount paid by the Nova Scotia Government in connection with the construction of the main line to Sept. 30, 1906, was $2,456,399.31, of which $160,579.99 were special payments provided for by Chap. 26 of 1903. Of the subsidy of $400,000 voted for the construction of the Middleton and Victoria Beach Ry., $96,000 was paid to Sept., 1905, and the balance of $304,000 was paid by bonds issued to the company during the year.

Halifax and Yarmouth Ry.—The subsidy account was closed during the year ended Sept 30, 1906, by the payment of the $3,550,-67 in hand at the beginning of the year. The total payment has been $160,000, being at the rate of $3,200 a mile for 50 miles The line is now part of the Halifax and Southwestern Ry.

Lake Superior Corporation.—The Treasurer of Ontario stated in the Legislature Mar. 27, that arrangements had been made for another extension of the Government guarantee of the loan for the benefit of the industries at Sault Ste. Marie, still outstanding. The original guarantee was in respect of a loan of $2,000,000. One-half of this was arranged for in 1905, and the guarantee renewed in respect of the other $1,000,000. The obligation became due again in the fall of 1906, and was renewed for a further period. An endeavor was being made to obtain British capital to take up the bonds, and it had been agreed to extend the guarantee for a further period of six months from April 1. The company owns the Algoma Central and Hudson Bay Ry., the Manitoulin and North Shore Ry., and the Algoma Central Steamship Line.

Michigan Central Rd.—A committee of the directors has been appointed to decide about providing for $14,000,000 of Canada Southern Ry. bonds which mature Jan. 1, 1908. It is expected that an announcement will be made at an early date of the terms for refunding these bonds. The Canada Southern Ry. is that portion of the main line of the M.C.R., passing through Canada.

Morrissey, Michel and Fernie Ry.—The annual meeting which was to have been held in Toronto, April 1, was adjourned to a date to be fixed later. The railway is owned by the Crow's Nest Coal Co.

New Brunswick Coal and Ry. Co.—This railway, 69 miles long, is operated by a commission appointed by the New Brunswick Government. The line is set down in the Auditor-General's report as an asset to the value of $1,150,000. The line represented, the Premier recently stated, an outlay of $1,119,012.54, of which the N.B. Government had guaranteed bonds to the amount of $700,000, An offer of 3% on the Government's interest in the line had been refused, and he did not think the line should be leased for less than 4%, which would mean $146,000 a year. The property, he considered, would soon be a paying one, and he expected that it would in time be taken over by the G.T. Pacific Ry.

Pere Marquette Rd.—The shareholders at the adjourned annual meeting recently ratified the settlement with the Chicago, Cincinnati and Louisville Rd., turning the line back to the latter, and cancelling the bonds issued for its purchase. The lease of the Pere Marquette Rd. to the Cincinnati, Hamilton and Dayton Rd. was repudiated. The question of the election of directors was left undecided, no party being strong enough to carry their men.

Quebec Central Ry.—Gross earnings for Feb., $49,750.35; net earnings, $6,715.05, against $61,781.58 gross and $19,011.45 net for Feb., 1906. Net earnings for two months ended Feb. 28, $16,561.67, against $39,007.58 for same period, 1906.

Quebec and Lake St. John Ry.—Earnings for Feb , $33,978, against $24,959 for Feb., 1906, making for two months ended Feb. 28, $69,823, against $54,290 for same period 1906.

Temiscouata Ry.—Traffic receipts for Feb., $11,198.78 against $12,078.32 for Feb., 1906.

Temiskaming and Northern Ontario Ry.—The report of the commissioners as to the operation of the line for 1906 showed gross earnings of $544,018, and the expenses $362,492, leaving net earnings of $181,526. Of this amount $158,000 had been transferred to the Provincial Treasurer, and had been utilized to meet interest on the original loan of $6,000,000 for construction.

The total amount realized from sales of townsites was $117,286, of which $14,467 was unpaid Dec. 31; bonuses on mining rights the aggregate was $151,100, of which $16,000 was unpaid on the date named. The plotting and prospecting of townsites and the expenses re-mining rights totalled $31,525, leaving a balance of $207,535 on this section of the Commission's work. Of this surplus $123,674 was applied to the cost of the railway, $83,725 to operation, leaving a balance of $136 in hand.

The expenditure upon construction for the year ended Dec. 31, 1906, as shown by a special return made to the Legislature, was $2,300,469.18, of which $232,666.66 represented discount, stamps and underwriting in connection with the London, Eng., loan.

Toronto, Hamilton and Buffalo Ry.—Earnings for Mar., $64,685.90, against $69,063.05 for Mar., 1906.

Recent Provincial Legislation

The following acts affecting transportation and allied interests have been passed at the current session of the Nova Scotia Legislature:

Acadia Coal Co.—Amending act of incorporation and acts amending the same.

Dominion Iron and Steel Co.—Amending acts respecting the company.

Inverness Mining and Transportation Co.—Amending act of incorporation and acts amending the same.

Margaretville Steamship Co.—Act of incorporation.

Nova Scotia Railway Act.—Amending the N.S. Railway Act as it appears in the Revised Statutes of 1900.

Nova Scotia Society of Engineers.—Act of incorporation.

Pacific Whaling Co.—Amending acts of 1903, 1905 and 1906, relating to the company.

Port Hood, Richmond Ry. Coal Co.,—Respecting the act of incorporation, etc.

Queen's County.—To enable the municipality to borrow money to pay railway damages and to legalize certain payments of railway damages.

The Dominion Parliament at its recent session voted $2,500 to the Faculty of McGill University, towards the foundation of a School of Railway Engineering and Transportation in general in connection with the Faculty of Applied Science.

Dominion Railway Subsidies.

The House of Commons was asked April 15 to vote a number of subsidies in aid of the construction of railways. The resolutions submitted provided aid for 24 lines, covering a total of 1,057 miles, all of which were revotes of former subsidies which had not been taken advantage of. The aid to be given is at the usual rate, and the customary conditions as to the determination of the amount, whether the minimum of $3,200 per mile, or how much more up to $6,400 per mile is to be paid—running powers of other railways, transportation of Government supplies, production of accounts, purchase of all possible supplies in Canada, Government inspection, etc. Following are the lines to be aided:

CANADIAN NORTHERN ONTARIO RY.—For a line from Toronto via east side of Lake Simcoe to or near Sudbury, Ont., in lieu of subsidy granted to James Bay Ry., not exceeding 265 miles.

CANADIAN NORTHERN QUEBEC RY.—For a line from near L'Epiphanie, passing by way of St. Jacques de L'Achigan to Rawdon, Que., in lieu of subsidy granted to Chateauguay and Northern Ry., not exceeding 16 miles.

CENTRAL ONTARIO RY.—For an extension from Bancroft to Whitney, Ont., on the Ottawa Division G.T.R., 40 miles.

DOMINION ATLANTIC RY.—For an extension to the Dominion wharf at Canning, N.S., one mile.

EDMONTON, YUKON AND PACIFIC RY.—From Strathcona and Edmonton, Alta., and thence towards Yellowhead Pass, 50 miles.

HAWKESBURY TO SOUTH INDIAN.—For a line between these points in Ontario, 35 miles. The Great Northern Ry. of Canada, now part of the Canadian Northern Quebec Ry., made surveys some years ago for the construction of this line.

INDIAN RIVER RY.—For a line from the north end of Lake Megantic to the International boundary near Riviere Morte, Que., not exceeding 10 miles.

INVERNESS RY. AND COAL CO.—For a line from Cheticamp to between Broad Cove and Point Tupper, N.S., 37 miles.

KLONDIKE MINES RY.—For a line from Dawson to Sulphur Springs, not exceeding 31 miles; for a line from Sulphur Springs to the Divide between Dominion and Flat Creeks, not exceeding 45 miles; for a line from the Divide as above towards the Stewart River, not exceeding eight miles.

LIVERPOOL TO MILTON.—For a line from Liverpool to Milton, N.S., seven miles.

MIDWAY AND VERNON RY.—For a line from Midway to Vernon, B.C., not exceeding 150 miles.

MILTON TO CALEDONIA.—For a line from Milton to Caledonia, N.S., 22 miles.

NICOLA, KAMLOOPS AND SIMILKAMEEN COAL AND RY. CO.—For a line from Spence's Bridge to Nicola Lake, B.C., 47 miles.

NICOLET RIVER BRIDGE.—Towards the construction of a railway bridge over Nicolet River at Nicolet, Que., $15,000.

ORFORD MOUNTAIN RY.—From Bolton line to Massonville, Que., 7.54 miles; from Massonville to the International boundary, 3.12 miles; from Windsor Mills to Brampton Falls, eight miles; from Melbourne road crossing to Melbourne village, 3.5 miles; from some convenient point on the main line to Bonella Lake, five miles; total in all not to exceed 27 miles.

ST. JOHN VALLEY RY.—From Welsford or Westfield to Gagetown, N.B., 30 miles.

ST. JOHN VALLEY AND RIVIERE DU LOUP RY.—From Fredericton to Woodstock, N.B., 58 miles.

ST. PHILIPPE D'ARGENTEUIL TO BROWNSVILLE.—For a line near the intersection of the C.P.R., and the Canadian Northern Quebec Ry. near St. Philippe D'Argenteuil, northerly through Brownsville, Que., 4.2 miles.

STE. ROSE TO ORANGEDALE.—For a line from Ste. Rose to the Intercolonial Ry. near Orangedale, not exceeding 34 miles; from the I.C.R. between Orangedale and Point Tupper to Caribou Cove or Inhabitants Bay or River, N.S., not exceeding four miles.

TILLSONBURG, LAKE ERIE AND PACIFIC RY.—From Woodstock to Berlin, or from Ingersoll to Stratford, Ont., or to any point on the G.T.R. between Berlin and Stratford, 35 miles.

WELLINGTON TO UNION BAY.—For a line from Wellington to Union Bay, B.C., not exceeding 55 miles.

WOODSTOCK TO INTERNATIONAL BOUNDARY.—From Woodstock, N.B., to the International boundary, 26 miles.

WINNIPEG BEACH TO GIMLI.—For a line from Winnipeg Beach to Gimli, Man., not exceeding 11 miles.

YORK AND CARLETON RY.—For a line from its present terminus westerly, not exceeding five miles.

Canadian Northern Ry. Earnings, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1905-06, from July 1, 1906:

	Earnings.	Expenses.	Net Earnings.	Increase or Decrease.
July..	$ 603,800	$ 397,900	$ 205,900	$ 63,400+
Aug..	594,900	402,800	192,100	80,400+
Sept..	624 400	417,800	206,600	96,400+

Canada Atlantic	81,166	80,901	265	....
G. T. Western	290,586	267,123	23,463	....
D. G. H. & M.	88,760	81,926	6,834	....
Total	£1,963,142	£1,801,384	£161,758	....

Ontario Taxation of Transportation Companies, Etc.

The public accounts for Ontario for the year 1906 give the amount of taxation imposed upon transportation companies by the Legislature and collected during the year. Steam railways paid $376,364.84; electric railways, $8,944.50; express companies $5,325; telegraph companies, $1,317.24; telephone companies, $6,361.13. Following are details:

STEAM RAILWAYS:	
Bay of Quinte Ry.	$ 1,405.12
Brockville, Westport and N. Western Ry. (for 1905)	675.00
(for 1906)	675.00
Canada Atlantic Ry.	20,840.08
Canadian Pacific Ry.	124,686.84
Canadian Northern Ry.	14,140.00
Canada Southern Ry.	25,940.80
Central Ontario Ry.	2,019.00
Grand Trunk Ry.	168,535.60
Kingston and Pembroke Ry.	1 546.50
Lake Erie and Detroit River Ry.	13,348.20
Niagara, St. Catharines and Toronto Ry.	285.00
Nosbonsing and Nipissing Ry.	82.50
Ottawa and New York Ry.	825.00
Thousand Islands Ry.	94.95
Toronto, Hamilton and Buffalo Ry.	1,265.25
ELECTRIC RAILWAYS:	
Brantford St. Ry. (for 1905)	$ 154.40
Guelph Radial Ry.	120.00
Galt, Preston and Hespeler St. Ry.	92.00
Hamilton, Grimsby and Beamsville E. Ry.	97.50
Hamilton St. Ry.	405.54
Hamilton and Dundas St. Ry.	42.42
Hamilton Radial E. Ry.	136.44
International Ry.	341.90
Kingston, Portsmouth & Cataraqui E. Ry.	120.21
London St. Ry.	394.30
Oshawa Ry.	67.50
Ottawa Electric St. Ry.	887.40
Preston and Berlin St. Ry.	103.75
Port Dalhousie, St. Catharines and Thorold E. Ry.	92.00
Sandwich, Windsor and Amherstburg Ry.	300.00
Toronto Ry.	5,114.44
Toronto and York Radial Ry.	396.60
Niagara Falls, Wesley Park and Clifton Tramway Co.	78.10
EXPRESS COMPANIES:	
American Express Co.	$ 925.00
Canadian Express Co.	1,800.00
Dominion Express Co.	1,800.00
United States Express Co.	800.00
TELEGRAPH COMPANIES:	
North American Telegraph Co.	$ 125.00
Dominion Telegraph Co.	475.00
Montreal and G.N.W. Telegraph Co.	717.24
TELEPHONE COMPANIES:	
Bell Telephone Co. of Canada	$6,250.00
Haileybury, Cobalt Telephone Co.	3.62
North American Telegraph Co.	100.00
Temiskaming Telephone Co.	7.51
MISCELLANEOUS:	
Pullman Co.	$1,748.33

The G.T.R., the C.P.R. and the Canadian Northern Ry. have joined forces for the purpose of building a permanent structure at the Exhibition Grounds, Toronto, at a cost of $50,000. The building, which will contain three octagonal structures, connected one with the other, will be constructed of brick, stone and steel. G. W. Gouinlock, Toronto, is the architect.

MAINLY ABOUT PEOPLE.

L. Malcolm, M.A., has been appointed City Engineer of Stratford, Ont.

H. Folger, who has acted as U.S. Vice-Consul at Kingston, Ont., since 1873, has retired.

Mrs. Wm. C. Hall, wife of the ex-Superintendent Eastern Division C.P.R., died in Quebec recently.

Lady Shaughnessy and Miss Shaughnessy are in Great Britain, where they will remain for some months.

H. S. Heydon, formerly New York agent Canada Atlantic Ry., is now engaged in the Arizona copper industry.

J. R. Booth, who constructed the Canada Atlantic Ry., celebrated the 81st anniversary of his birth, April 5, at Ottawa.

Mrs. I. Gibson, who died at Beamsville, Ont., recently, was mother of Hon. W. Gibson, railway contractor, Beamsville.

Miss Winnifred Jaques, daughter of Mrs. G. E. Jaques, Westmount, Montreal, was married there April 25 to R. H. Dawson.

G. Swain, for a number of years C.P.R. station master at Winnipeg, and recently retired, celebrated his 81st birthday, Mar. 28.

A. Belbeck, who has resigned his position as Superintendent C.P.R. Terminals at Winnipeg, will not, it is said, re-enter railway service.

R. J. Smith, who has been general agent in Winnipeg for the Great Northern Ry., U.S., since 1897, has resigned to go into private business.

The estate of the late Lieut.-Col. R. R. McLennan, of Cornwall, Ont., formerly a railway contractor, was valued for probate at $398,000.

S. S. McCrea, customs broker, who died at Buffalo, N.Y., April 17, aged 62, from pneumonia, was for 15 years G.T.R. freight agent there.

H. D. Bayne, Montreal representative of the Canadian Westinghouse Co., sailed from St. John, April 5, for a two months' trip to Great Britain.

W. R. Tiffin, Superintendent Northern Division G.T.R., has returned to Allandale, Ont., after spending some time in British Columbia and California.

J. Charlton, President Tillsonburg, Lake Erie and Pacific Ry., which has been leased to the C.P.R., was married at Lynedoch, Ont., April 6, to Miss C. Owen.

Hon. J. H. Howden, Minister of Railways and Telephones, of Manitoba, was re-elected by acclamation as member of the provincial Legislature for Neepawa.

Mrs. D. McNicoll, wife of the Vice-President of the C.P.R., together with a son and daughter, sailed on the Empress of Britain, April 6, for Great Britain.

F. H. Small, who at one time was travelling passenger agent C.P.R., Montreal, died at Bangor, Me., April 5. He had been ill for over a year with paralysis.

C. A. Nimmo, who recently resigned the General Passenger Agency of the Rutland Rd., will be associated with his brother in a fruit business in California.

C. C. Morris, Superintendent of railways and docks for the Dominion Iron and Steel Co., has returned to Sydney, N.S., from a two months' tour in Europe.

Mrs. M. A. Morine, who died recently at Macleod, Alta., was mother of H. A. Morine, General Agent of the Port Hood Richmond Ry. Coal Co., at Halifax, N.S.

Wm. Thomson, who died in Toronto, April 6, aged 76, was interested in the construction of the old Northern Ry., and was subsequently President of the company.

P. J. Myler, Vice-President and Managing Director Canadian Westinghouse Co., has been re-elected people's warden of Christ Church Cathedral, Hamilton, Ont.

J. J Forbes was presented with a purse of gold by the business men of Guelph, Ont., recently, on being promoted to the position of G.T.R. agent at Brantford, Ont.

By the will of the late Mrs. Lumsden, widow of A. Lumsden, lumberman and shipowner, Ottawa, $50,000 is left to the Protestant General Hospital, Ottawa.

F. H. Mackey, K.C., Montreal, well known in connection with railways and other corporate legislation, etc., is announced as being engaged to Miss Laura Toller, of Ottawa.

G. A. Davidson, who was I.C.R. ticket agent at Windsor, N.S., in 1886, has resigned his position as Auditor of the Atcheson, Topeka, and Santa Fe Ry. Coast Lines, Los Angeles, Cal.

F. Nicholls, Vice-President Canadian General Electric Co., Toronto, is in London, Eng., in connection with the various electrical development companies in which he is interested.

G. H. Ham, of the C.P.R. headquarters staff, left Montreal Mar. 28, for a trip to Mexico for the benefit of his health. He expects to return to Montreal about the middle of May.

G. B. Hughes, of the Canadian Northern Ry. engineering staff, has been appointed to a position in Monterey, Mexico, in connection with one of the companies in which Wm. Mackenzie is interested.

Sir Wm. C. Van Horne left Montreal for Guatemala, early in April, in connection with the approaching completion of the 200 miles of railway from Port Barrios to Guatemala, in which he is interested.

Col. J. M Gibson, President of the Dominion Power and Transmission Co., Hamilton, Ont., has been appointed to take command of the Canadian rifle team which will visit Bisley, England, in July.

J. N. McIlhargey, in the service of the Canadian Northern Ry. at Port Arthur, Ont., who died there recently, was for some time Trainmaster on the Toronto, Hamilton and Buffalo Ry., Hamilton, Ont.

A. O. R. Huddell, cashier G.T.R., Montreal, was presented with a portrait of himself by the officials of the Treasurer's department, on the recent completion of his fiftieth year of service with the company.

One of the last letters written by the late Dr. Drummond, the poet, who died at Cobalt, Ont., April 10, was to S. W. Foster, Knowlton, Que., President Orford Mountain Ry., in acknowledgment of a pass over that line.

J. McLellan was presented with a couple of arm chairs and an oak cabinet by the C.P.R. freight department officials at Winnipeg, April 2, on the occasion of his promotion to the position of Superintendent of Terminals there.

Miss E. Dunsmuir, daughter of Jas. Dunsmuir, Lieut.-Governor of British Columbia, and principal owner of the Wellington Colliery Ry. on Vancouver Island, was married in London, Eng., April 15, to J. Hope.

W. Mackenzie, President Canadian Northern Ry., Toronto, and W. Harty, M.P., President Canadian Locomotive Co., Kingston, Ont., have been elected by the graduates as trustees for Queen's University, Kingston.

C. M. Hays, Second Vice-President and General Manager G.T.R., returned to Montreal April 15, from London, Eng., where he had been to meet the directors prior to the half-yearly meeting of shareholders, held April 11.

Hon W. S. Fielding is acting as Minister of Railways and Canals, owing to the resignation of Hon. H. R. Emmerson: and Hon. J. Templeman is acting Minister of Marine, during the absence in England of Hon. L. P. Brodeur.

Jas C. Robertson, who died at Sharon, Mass., Mar. 27, aged 63, was manager of the Harris Car Works, at St. John, N.B., and since the amalgamation with Rhodes, Curry & Co., at Amherst, N.S., has been a director of that company.

J. N. Sutherland was presented with a purse of gold by the C.P.R. freight staff and other transportation officials at St. John, N.B., April 5, on the occasion of his retirement from railway service. He will reside at Thornhill, Ont.

David McWood, who had been for about 50 years employed in the cabinet making shops of the G.T.R., Montreal, died at Point St. Charles, Mar. 30, aged 73. He was a brother of W. McWood, Superintendent G.T.R. Car Department, Montreal.

G. A. Grant, who has been appointed Secretary-Treasurer of the Quebec Cartage and Transfer Co., was presented with a gold locket and chain by the office staff of the Dominion Transport Co., Montreal, on leaving that city to take up his new duties.

Miss Marjorie Baker, daughter of the Assistant to the President C.P.R., was married in Montreal April 18, to H. Turnbull. The bride and bridegroom sailed by the Empress of Ireland to spend their honeymoon in Europe. They will reside in Collingwood, Ont.

J. Vaughan, Superintendent district 2 and Montreal Terminals, Eastern Division, C.P.R., was entertained at dinner, April 6, by members of the C.P.R. operating staff at Montreal, on his leaving that company's service to become Superintendent of Terminals for the Montreal Harbor Commission.

The estate of the late N. Dyment, Barrie, Ont., was valued for probate recently, at $1,594,000. It included 111 shares in the Goderich Elevator Co.; 350 shares in the Nova Scotia Steel and Coal Co.; 1,000 shares in the Canadian General Electric Co., and 23 bonds of the Port Hood Coal Co.

J. D. Sullivan, Superintendent Halifax and South-Western Ry., Bridgewater, N.S., died there April 11, aged 38, after three days' illness of pneumonia. Prior to his appointment to the H. and S. W. Ry., in 1905, he was in the C.P.R. service at Montreal, his last work for that company being in connection with the revision of train rules.

R. Bickerdike, M.P., Montreal; D. B. Hanna, Third Vice-President Canadian Northern Ry., Toronto; Z. A. Lash, K.C., Toronto; F. Nicholls, Vice-President and Managing Director Canadian General Electric Co.; and Sir Henry M. Pellatt, Toronto, have been elected directors of the British American and Western Assurance Companies.

The Eastern Canadian Passenger Association at its recent meeting in Montreal, passed a resolution of regret that C. A. Nimmo, General Passenger Agent Rutland Rd., had retired from transportation service, and congratulating F. E. Barbour, General Agent of the New York Central Lines in Montreal, on his promotion to succeed Mr. Nimmo.

W. H. Walker, General Auditor, G.T.R., is spending a holiday on the Mediterranean shores, and will visit London, Eng., to consult an oculist, prior to returning to Montreal. Reports were recently current in Montreal that on account of his eyesight Mr. Waker would shortly resign his position, but officials of the company there state that there is no foundation for the reports.

Thos. Tait, Chairman of the Victorian State Railway Commission and his fellow commissioners, have been re-appointed for

a further term of four years. Mr. Tait is on his way to Canada from Melbourne, travelling via England, on an extended holiday and is expected to reach Montreal early in July. Mrs. Tait, who was in Canada a short time ago visiting her parents, is now in Paris, France.

The Y.M.C.A. at Ottawa has raised $200,000 for the purpose of erecting a building for carrying on its work there. Among the subscribers are W. C. Edwards & Co., steamboat owners, etc., $20,000; J. R. Booth, formerly President Canada Atlantic Ry., and now a director of the Grand Trunk Pacific Ry., $10,000; Lord Strathcona, Mackenzie, Mann & Co. (Ltd.), $5,000 each; W. Y. Soper, Ottawa Electric Ry., $2,000.

Mrs. Scott Griffin, wife of the Superintendent Canadian Northern Express Co., and the Canadian Northern Telegraph Co., Winnipeg; Mrs. A. M. Grantham, wife of the Superintendent of Construction and Purchasing Agent Toronto Ry., and Misses Mackenzie, are to be presented at the May Drawing Room at Buckingham Palace, London, Eng. They are all daughters of W. Mackenzie, President Canadian Northern Ry.

F. H. McGuigan, who resigned his position as Fourth Vice-President G.T.R., was entertained at dinner at the Canada Club, Montreal, by the officials of the company, Mar. 30, on the occasion of his leaving to become First Vice-President Great Northern Ry., St. Paul, Minn. W. Wainwright, Comptroller, presided, and the health of Mr. McGuigan was proposed by E. H. Fitzhugh, Third Vice-President.

J. M. McKay, who has been appointed Trainmaster C.P.R., at Souris, Man , was born at Tiverton, Ont., Mar. 13, 1868, and entered railway service in 1895, his record being: Sept., 1895, to May, 1897, brakeman, Northern Pacific Rd., Winnipeg; May, 1897, to Sept., 1899, brakeman, C.P.R., Winnipeg; Sept., 1899, to Mar., 1906, conductor, C.P.R., Winnipeg; Mar., 1906, to Mar., 1907, Trainmaster, district 2, Central Division, C.P.R., Winnipeg.

A. A. Schantz, who has been appointed General Manager of the Detroit & Cleveland Navigation Co., and of the Detroit & Buffalo Steamboat Co., had been General Superintendent and Passenger Traffic Manager of these companies since Nov., 1903. He has been for a long time in the service of the former company, having been appointed Assistant General Passenger Agent, Feb. 5, 1891; General Passenger and Ticket Agent in March, 1892, and General Passenger Traffic Manager in Feb., 1903.

At the Anglican vestry meetings held in Toronto recently, J. H. G. Hagarty, Manager St. Lawrence and Chicago Steam Navigation Co., was re-appointed rector's warden St. James' Cathedral; B. W. Folger, Manager Niagara Navigation Co., was elected a sidesman of St. Paul's church: D. D'E. Cooper, Canadian Freight Agent Lehigh Valley Rd., was re-appointed rector's warden of St. Paul's church, and R. M. Melville, steamship agent, was re-elected people's warden of St. Stephen's church.

O. O. Winter, who has been appointed General Superintendent G.T. Pacific Ry. at Winnipeg, Man., was born in Ohio in 1856, and entered railway service as a brakeman on the Chicago, Rock Island and Pacific Rd., 1872, and was subsequently yardmaster. After some years' service with small lines in the Southern states he became Superintendent Great Northern Ry., U.S., in 1892, and later was appointed Assistant General Superintendent, subsequently becoming General Manager, Brainerd and Northern Minnesota Rd., which position he resigned in 1903. He then entered the C.P.R. service, serving successively as Assistant Superintendent of Terminals, Winnipeg; Assistant Superintendent district 2, Central Division, and latterly Assistant Superintendent district 3, Central Division.

F. W. Peters, whose portrait appears on the first page of this issue, was born at St. John, N.B., Mar. 25, 1860, and entered railway service in 1873, as telegraph operator with engineers on construction I.C.R., and from 1873 to 1876 acted as agent at Jacquet River and other points, same road; 1876 to 1878, assistant agent at Newcastle, N.B., same road; 1878 to 1880, agent Chatham Jct., N.B., same road; 1880 to Nov., 1881, relieving agent Chicago and Grand Trunk Ry., Fort Gratiot, Mich.; Nov., 1881, to May, 1882, billing clerk local freight office C.P.R., Winnipeg; May, 1882, to April, 1889, agent C.P.R., Brandon, Man.; April, 1889, to June, 1889, agent C.P.R. Fort William, Ont.; June, 1889, to Nov., 1896, local freight agent C.P.R. Winnipeg; Nov., 1896, to 1899, District Freight Agent, C.P.R., West Kootenay district, Nelson, B.C.; 1899 to Dec., 1900, Assistant General Freight Agent, same territory; Dec., 1900, to July, 1901, Assistant General Freight Agent, Pacific Division, C.P.R., Vancouver; July, 1901, to Dec. 31, 1902, General Freight Agent, same division; Jan. 1, 1903, to date, Assistant Freight Traffic Manager Western Lines, same road

J. G. Sullivan, who has been appointed Manager of Construction, C.P.R., Eastern Lines, with office at Toronto, was born at Bushnell's Basin, N.Y., Jan. 11, 1863, and graduated C.E. at Cornell University, June, 1888. He entered railway service in 1888, his record being: July, 1888, to Mar., 1889, rodman, Great Northern Ry., U.S.; April, 1889, to Aug., 1890, rodman, instrumentman and assistant engineer Spokane Falls and Northern Ry.; Aug., 1890, to May, 1893, assistant engineer, Great Northern Ry. (U.S.) coast lines; July, 1893, to Feb., 1894, assistant engineer, Alberta Ry. & Coal Co.; July, 1894, to Oct., 1894, section foreman, Northern Pacific Ry.; Oct., 1894, to April, 1895, locating engineer, Butte, Anaconda & Pacific Ry.; April, 1895, to Dec., 1895, division engineer, Kaslo & Slocan Ry.; April, 1895, to Feb., 1901, locating and reconnaissance engineer and engineer in charge construction, Columbia & Western Ry.; Feb., 1901, to Sept., 1905, division engineer, construction department, Western Lines, C.P.R.; Sept., 1905, to Feb., 1907, assistant chief engineer, Panama Canal. He was elected a member of the American Society of Civil Engineers in 1899, and is also a member of the Canadian Society of Civil Engineers.

Transportation Companies and Chinese.—The Canadian Customs regulations respecting the transportation of Chinese in bond through Canada have been revised. The new regulations provide that the steamship company or railway must deposit with the Government bonds or currency equal to the full capitation tax in respect of the Chinese in transit. The ports of exit are Victoria, Vancouver, B.C.; North Portal, Sask.; Athelstan, Abercorn, Que.; St. John, N.B.; North Sydney, N.S.; and during the summer months Montreal and Quebec. The manifest must show the name and full descriptions of the persons named, and the U.S. certificates must be attached when the men are bound therefor. They are not to be considered delivered by the transporting company until officially accepted by the U.S. officials. The men must be kept in the same car from ocean port to port of exit, and cars and buildings for their accommodation must be provided with all sanitary conveniences.

The act providing for the establishment of a pension fund for its employes, by the G.T.R., was passed at the recent session of the Dominion Parliament.

TRANSPORTATION APPOINTMENTS.

Board of Railway Commissioners.—A. Frank Dillinger, formerly a superintendent on the C.P.R. Western Lines, has been appointed Operating Assistant to the Chief Traffic Officer of the Board of Railway Commissioners.

Buffalo, Rochester and Pittsburg Ry.—E. J. Devans has been appointed Superintendent of the Buffalo and Rochester Divisions, in place of J. McGarvey, who has been granted leave of absence on account of ill-health. Office, Rochester, N.Y.

Canadian Lake Line.—The following appointments have been made: General Manager, F. Plummer, Toronto; Traffic Manager, H. A. Young, Toronto; General Agents, J. M. Brown, Montreal; C. C. Philpott, Cleveland, Ohio; J. J. O'Connor, Port Arthur, Ont., Agent; G. A. Boyd, Sault Ste. Marie, Ont.; Northwest Agent, J. McLerie, Winnipeg; Soliciting Freight Agents, J. J. Nelligan, Montreal; E. C. Boland, Toronto; E. J. Jordan, Hamilton, Ont.

Canadian Northern Ry.—A. Brunton, heretofore passenger conductor, has been appointed Trainmaster, with headquarters at Dauphin, Man.

Canadian Pacific Ry.—The position of Superintendent district 2, Eastern Division, becoming vacant April 1, through the resignation of J. Vaughan, who has been appointed Superintendent of Terminals for the Montreal Harbor Commission, will not be filled, but Assistant Superintendent R. W. McCormick has been removed from Smith's Falls to Windsor St., Montreal, and will report direct to the General Superintendent.

W H. Dummert has been appointed locomotive foreman at Chapleau, Ont., succeeding H. G. Reid, transferred.

C. Kyle has resumed duty as Master Mechanic of the Eastern Division.

C. A. Stark, heretofore assistant master mechanic Lake Superior Division, has been appointed master mechanic. Office, North Bay, Ont.

H. G. Reid, heretofore locomotive foreman, Chapleau, Ont., has been appointed district master mechanic district 1, Lake Superior Division, at North Bay, Ont.

Alex. Gray, formerly with the staff of the 5th Division, has been appointed Resident Engineer Ottawa Division.

F. L. Lamplough, heretofore Chief Dispatcher at Ottawa, has been appointed Trainmaster, district 30, with office at Ottawa. He will have jurisdiction over all employes in station, train and yard service.

R. Ferguson has been appointed road-master of Fort William, Ont., terminals. This is a new position.

F. T. Anderson has been appointed Car Distributor Central Division, with headquarters at Winnipeg. His duties are to regulate the distribution of cars between districts and to handle the detail work in connection with enquiries as to the local car supply on such districts.

Jno. McLellan, heretofore local freight agent Winnipeg, has been appointed Superintendent of Winnipeg Terminals, succeeding A. Belbeck, resigned.

H. G. Coram, heretofore city freight agent, Winnipeg, has been appointed local freight agent there, succeeding J. McLellan, promoted.

D. C. MacDonald has been appointed city freight agent at Winnipeg, vice H. G. Coram, transferred

J. Hulme, who was until recently Train-

PROFESSIONAL CARDS.

THE RAILWAY AND MARINE WORLD is especially adapted for the publication of professional cards of engineers, inspectors, analysts, electrical experts, naval, grain elevator and other architects, solicitors, etc., who desire to bring themselves under the notice of the managements and officials of the various steam and electric railway, steamship, grain elevator, telegraph, telephone and power companies throughout Canada, as well as the locomotive, car and shipbuilders, contractors and promoters of railway enterprises. THE RAILWAY AND MARINE WORLD is the only one medium through which all these important classes can be reached.

Rates will be quoted on application.

TELEGRAPH AND TELEPHONE POLES

1,750,000 IN USE IN CANADA

Extract from report of Henry Grinnell, Forest Service, U.S.A.:

"The investigations were confined to the consideration of various methods for protecting that part of the pole most subject to decay i.e., the part immediately above and immediatly below the ground line. . . . . The cost of a green pole at the setting hole may be put at $5.00 and of a treated pole (calculated on the basis of fair prices for labour and a good preservative) at $5.40 and $5.65 respectively, for brush treated and tank treated poles. The average length of life of a green pole is about twelve years, and an increase in the length of service due to treatment of four years in the case of poles treated by the first or brush method, and eight years in the case of poles treated by the third or tank method, is probably a very conservative assumption. . . . . A comparison of these annual charges shows that by using a pole treated by the first method instead of a green pole an annual saving of about seven cents is effected, while if a pole treated by the third method is used the annual saving will be about twelve cents."

A saving to Canadian companies can be effected of from $122,500.00 to $210,000.00 per annum

Carbolineum is the most efficient preservative for poles
